1902.

Proceedings of the Hon'ble the Lieutenant-Governor in the Department of Revenue and Agriculture (Agricultnre), No. 57, dated 7th April 1902.

READ—

Report on the working of the Punjab Alienation of Land Act, XIII of 1900, for the year ending 30th September 1901, forwarded with the letter of the Senior Secretary to the Financial Commissioner, Punjab, No. 238, dated the 21st March 1902.

REMARKS.—The Act was in force for less than four months in the year to which the report relates, and that during a season in which more attention is paid to the incorporation in the jamabandis of already attested mutations than to the discovery and attestation of new ones. The Lieutenant-Governor agrees with the Financial Commissioner that it would be premature to base any definite conclusions on the experience gained during so brief a period.

2. The declaration in Section 2 of the Act that a "permanent alienation" includes certain kinds of alienations does not mean that it does not include any other kind, and an *adhlapi* would certainly appear to be a permanent alienation.

3. It is advisable to wait, as the Financial Commissioner proposes, until some experience has been gained of the working of the present grouping of tribes, before making any alteration in it.

4. The Lieutenant-Governor agrees with the Financial Commissioner that it is not yet time to alter the present practice in respect of temporary alienations which leaves it to the parties concerned to take action under the Act. The matter, which is one of considerable importance, should however be kept in view and noticed in the next Annual Report.

5. The increase of work is said to have been less than was expected, and was caused mainly by references to the Deputy Commissioner in connection with foreclosure proceedings which will diminish in time, but the effect of the Act in this direction cannot be gauged until the Deputy Commissioners have dealt with the mutations subsequent to June 8th, 1901, which could not have been brought on the Patwaris' registers to any considerable extent by the time when the district reports were written.

6. From a perusal of the district reports the Lieutenant-Governor is satisfied that the Financial Commissioner's conclusion is correct that the Act has been favourably received by those in whose interest it was framed, and has so far produced no prejudicial effects. In causing an increased demand for Government *takavi* in some places and a curtailment in expenditure on ceremonial occasions in others, its influence has been entirely wholesome. The readiness of the money-lenders in Hissar to part with the land mortgaged to them, which the Financial Commissioner considers remarkable, probably indicates nothing more than that after a season of unusual plenty the zamindars showed great keenness in redeeming their lands from mortgage. But Hissar is a district in which the area under mortgage forms an abnormally small percentage of the total area, and it is conceivable that land may not be considered a good investment in a tract so subject to drought. No conclusion as to the effect of the Act on the price of land can be formulated on the figures supplied in the report as the Financial Commissioner remarks, and it is not clear to what class of land they relate.

7. On the whole the Lieutenant-Governor thinks there is reason for congratulation on the smooth and promising start made with the practical working of this important measure. There is one point which has not been specially noticed in the present report, but which needs the most attentive observation, namely, the effect on the smaller notified tribes of the present wide market of

free transfer between members of different agricultural tribes in the same district. The extent to which, under the present system of grouping, the smaller tribes are ousted from their lands by the larger tribes should be very carefully watched, and the subject should be prominently noticed in the next report.

ORDER.—Ordered that the above remarks be printed and circulated with the report; also that they be published in the *Punjab Government Gazette*, be communicated to the Financial Commissioner and forwarded to the Government of India, Revenue and Agricultural Department, with the report.

By order of the Hon'ble the Lieutenant-Governor,

A. H. DIACK,

Revenue and Finl. Secy. to Govt., Punjab.

Punjab Government Press, Lahore—8·4·02—467.

No. 238.

FROM

R. HUMPHREYS, ESQUIRE,

Senior Secretary to the Financial Commissioner, Punjab,

To

A. H. DIACK, ESQUIRE,

Revenue and Financial Secretary to Government, Punjab.

Dated LAHORE, 21*st March* 1902.

SIR,

I am directed to submit the Annual Report on the Working of the Punjab Alienation of Land Act, XIII of 1900, for the year ending 30th September 1901.

I have the honour to be,

Sir,

Your most obedient servant,

R. HUMPHREYS,

Senior Secretary to Financial Commissioner, Punjab.

ANNUAL REPORT

ON THE

WORKING OF THE PUNJAB ALIENATION

OF

LAND ACT XIII OF 1900.

—:o:—

Introductory.

Act XIII of 1900 came into force on the 8th June 1901, and the present report deals with the period ending 30th September 1901. All generalisation upon the permanent effects of the Act would obviously be premature. This report will therefore be limited to a narrative of what happened upon the commencement of the Act, to some remarks upon questions which have either actually arisen in its working or, for sufficient reasons, have been propounded by local officers, and to a brief account of the instructions issued from time to time to facilitate its working.

PART I.—Preliminary.

Commencement of the Act.

1. In this and subsequent paragraphs the Financial Commissioner will follow the order of subjects indicated in his Circular No. 5529, dated 16th September 1901, a copy of which is appended for facility of reference. The original intention was that the Act should come into force on the 1st June 1901, but through an oversight it was not published in the *Gazette of India* in time, and consequently it really did not come into operation until the 8th of the month. This mistake is generally reported not to have caused any inconvenience. In the Ferozepore and Montgomery districts proceedings had been taken under the Act before the 8th, but steps were taken to legalise them subsequently.

Working of the definitions.

2. The general opinion seems to be that the ordinary zamíndár has not yet come to appreciate the signification of the expressions "agriculturist" and "member of an agricultural tribe," and consequently no common vernacular rendering of the two expressions appears to have gained a footing among the people.

It has not been suggested that any alteration in the definition of "agriculturist" is needed; but the Commissioner of Jullundur notes that some native officials do not grasp the difference between "agriculturist" and "member of an agricultural tribe" and ascribes their failure to unsatisfactory translation in the Urdu version as it seems to them a contradiction in terms to refer to a Brahman or Mahájan as a *zera'at pesha shakhs*.

The same.

3. As in the case of the definition of agriculturist alluded to above so in the case of the other definitions in Section 2 of the Act, district officers have not felt themselves to be in a position to give any decided opinion, but practically no difficulties have been noticed as arising out of them. The Deputy Commissioner of Mooltan points out that in his opinion the definition of "permanent alienation" does not cover the *adhlápi* tenure which is so common in the south-west of the Punjab. This tenure arises out of the custom that when a man agrees to dig a well in another man's land and cultivate it he becomes proprietor of half the land which becomes irrigable and of half the well. In the Financial Commissioner's opinion such an agreement is virtually a sale, the consideration for the transfer of half the land being the provision of irrigation for the other half. The view that the transaction really is a sale is supported by the fact (*vide Punjab Customary Law*, Vol. II, page 284) that the man who sinks the well sometimes makes to the

original proprietor a small payment in cash. In any case the transaction appears to be a permanent alienation within the meaning of the Act; but the point is not of great importance; for even if the restrictions of the Act do not apply, this matters little, because the alienation is one which should ordinarily be permitted as economically sound, being subservient to land improvement, and in all probability politically unobjectionable as occurring between *bonâ fide* agriculturists in the popular sense of the term. The Deputy Commissioner of Muzaffargarh, Sheikh Asghar Ali, questions the propriety of translating "usufructuary mortgage" by the term *rahn-ba-qabza* and suggests that *rahn-intifai* would be much better. This and other points connected with the translation of the Act will be separately considered.

The only instance discovered of the exemption of gifts for religious and charitable purposes from the definition of "permanent alienation" being made a cloak for evading the law is reported from Umballa. The transfer was disallowed by the Deputy Commissioner.

PART II.—Permanent Alienation of Land.

Procedure in dealing with applications.

4. Very few applications for permission to make permanent alienations had been made, by the dates of the district reports, but where they have occurred the existing instructions have enabled Revenue officers to deal with them. The steps taken to ascertain whether any member of an agricultural tribe in the same group as the alienor is ready to offer a fair price for the land appear to vary. In Kángra a notice is posted up in the village, while in Mooltan the application is sent to the Tahsildar to enquire from all the village proprietors if they would buy the land. No applications appear to have been made to permanently alienate land to subjects of Native States, or to residents of adjoining districts or provinces. The Deputy Commissioner of Hissár, however, mentions a case in this connection which came to his notice, in which he considers the parties should have been referred to the Deputy Commissioner for sanction; but no further particulars are given as to the nature of the case, or as to what action, if any, was taken.

Working of the rules.

5. The rules published under Punjab Government Notification No. 23 S., dated 22nd May 1901, as affecting permanent alienations appear to have worked well so far as they have been put in practice. Copies of the Financial Commissioner's Circular of instructions in the appropriate language have been placed in the hands of all revenue officers down to those of the lowest grade; and they are usually said to have grasped their duties satisfactorily, but it is clear that until more experience has been gained, strict supervision over mutation proceedings by the Collector and his assistants will be necessary. The Deputy Commissioner of Siálkot points out that often in dealing on the spot with mutation proceedings a difficulty arises in deciding whether a person, who is not a member of an agricultural tribe, is or is not an "agriculturist," because the settlement records of the first regular settlement are not kept by the patwári. He suggests that the patwári should notify to the Tahsildar at once all mutations in favour of persons claiming to be agriculturists under Section 2 (1), in order that the claim may be verified before the attesting officer proceeds to the circle to attest the mutation. The suggestion commends itself to the Financial Commissioner and steps will be taken to give it effect.

Enumeration and grouping of tribes.

6. A good many suggestions have been offered in the district reports for altering the enumeration of the tribes which have been notified under the Act, invariably with a view to having some tribes notified which have been omitted. The Financial Commissioner however agrees with the Commissioner of Jullundur who gives it as his opinion that it is yet too soon to think of changes. A record is being kept of suggestions for the inclusion or exclusion of certain tribes in the various districts, and the Financial Commissioner proposes to deal with them when the Act has been in force for a year. He would only note here, as an instructive fact, that whereas no petitions have reached him from tribes complaining that

they have been improperly notified a good many have been received or reported complaining of exclusion from the notified lists. The reasons why certain tribesmen should themselves desire to have their powers of alienation restricted will be interesting when fully known. On the other hand, it is very intelligible that tribes might desire (1) greater freedom of purchase from zamindars, (2) retrospective cancellation of conditions of sale in their mortgages, and (3) exemption of their lands from sale in execution of decree. Perhaps in some cases the petitioners are under some misapprehension; for instance the Deputy Commissioner of Siálkot mentions that the representatives (zaildárs, lambardárs and *sufedposhes*) of some of the smaller tribes who have been excluded, *e.g.*, Kaláls and Kakazaís, are under the impression that the exclusion of their tribes will act to the detriment of their descendants as debarring them from holding the same offices.

PART III.—Temporary Alienation of Land.

Mortgages.

7. The only experience that has yet been gained in the matter of mortgages under Section 6 of the Act, is that, in general, money-lenders are unwilling to lend money on the security of any of the forms of mortgage permitted by the Act.

Working of Section 6 (1) (c).

8. In the case of the Gurgaon and Kangra districts it has been noticed that where rents are payable in kind, difficulty has been experienced or is anticipated in working Section 6 (1) (*c*); for by the provisions of the section, rent is limited to double the revenue, plus cesses, whereas ordinary produce rents are usually in excess of this amount. The Deputy Commissioner of Gurgáon and Commissioner of Delhi are mistaken in supposing that kind rents are not permissible under this clause. The term rent has the same meaning as in the Tenancy Act, and therefore includes rents in kind. Doubtless the clause is not likely to be much used where rents in kind are the rule.

Need for other forms of mortgage.

9. No suggestions have been made as to any need for any other kind of mortgage than those specified in the Act, except so far as is implied in the remarks made in the preceding paragraph.

Applications under the Act.

10. Little information is forthcoming on the subject of applications under the Act, and the only points which call for any remark in this connection are the following:—

(1). In the case of mortgages, where the mortgagor is a member of an agricultural tribe and the mortgagee is not, and the mortgage existed before the commencement of the Act, and where after that date a further sum was advanced on the old security, the question was raised whether the further advance did not constitute a new mortgage which under the Act should be in one of the approved forms. The point was referred to the Legal Remembrancer, who has given it as his opinion that where the additional sum is advanced on the old security and no changes are made in the terms of the mortgage, the old mortgage may be considered as still subsisting, as such further advance would amount only to a charge as distinct from a mortgage on the land; but that where the original deed is cancelled and a new mortgage is executed between the parties after the commencement of the Act, the mortgagor must be held to "mortgage his land" within the meaning of Section 6, although the property mortgaged on the two occasions may be one and the same.

(2). In dealing with applications under Section 9 (2) to put a mortgagee to his election whether he will have the clause relating to conditional sale struck out or accept a mortgage in form (*a*) or (*b*) of Section 6, it was found that a difficulty existed as to the necessity or otherwise for drawing up a new deed

of mortgage, and in case it was necessary it was felt that it would be an injustice to insist on a second payment of stamp duty. After reference to the legal authorities it was ruled that where the only correction in the existing deed was the excision of the clause relating to conditional sale, this could be done by the Deputy Commissioner, and no fresh deed was necessary; but that where the mortgagee elected to accept in lieu of the said mortgage a mortgage which might at his option be either in form (*a*) or (*b*) as permitted by Section 6 of the Act, a new deed of mortgage would have to be executed; because in such a case there was no mere alteration of a subsisting mortgage but the substitution of a mortgage of one kind for another mortgage of a different kind. The Government of India have also conceded that in this case no fresh stamp duty is leviable on the new deed except in the case where the new deed would under the Stamp Act have to be stamped to a higher value than the old one, which it superseded, in which case the difference only in value would be leviable on the new deed. In the Umballa and Rohtak districts difficulty has been experienced in inducing the mortgagor to execute the new deed. The question as to what course the Deputy Commissioner should pursue in such a case, and what the legal effect of the omission of the mortgagor to execute the new deed is as regards his own rights and those of the mortgagee, is engaging the attention of the Financial Commissioner.

(3). Section 9 (3) of the Act has caused considerable difficulty to many district officers, especially as to the meaning of the word "Proceedings" and as to the stage in a civil suit at which the Judge should refer the case to the Deputy Commissioner. Instructions on these important points were clearly necessary and arrangements have been made to issue them. They may be summarized as follows:—

(*a*). "Proceedings" only mean proceedings under Section 8 of Regulation XVII of 1806.

(*b*). In the case of a mortgage in which there is a condition designed to operate by way of conditional sale, "proceedings" are no longer pending where the year of grace has expired.

(*c*). Civil Courts shall not make references to the Deputy Commissioner under Section 9 (3) of the Act until they have disposed of any objections brought by the mortgagor against the validity of the mortgage, or of any plea raised by him on the point of limitation.

It is pretty generally agreed that when possession of land is given under Sections 6, 11 or 12 of the Act for a term of years the date not only of the commencement but also of the expiry of the term should be shown in every *jamabandi* drawn up during its currency. The simplest way of doing this appears to have the dates noted in the mutation proceedings and then entered in the column of remarks in the *jamabandi* in red ink when the mutation is incorporated.

Working of rules.

11. The rules published under Punjab Government Notification No. 23 S., dated 22nd May 1901, so far as they affect temporary alienations, are believed to have worked well; but here as elsewhere as regards the working of the Act little experience has been gained. The question as to whether temporary alienations which contravene the provisions of Sections 6, 7 or 8 of the Act should be brought to the notice of the Deputy Commissioner as part of the mutation proceedings, or whether it is preferable to leave the parties to take action of themselves, has been variously answered. In the opinion of the Financial Commissioner the present rule, which leaves the parties to take action, should be maintained until further experience has accumulated.

Leases and farms.

12. No special remarks as to leases and farms under Section 11 of the Act have been made in the district reports, nor has any tendency to use these provisions to evade the Act been noticed.

PART IV.—General Provisions.

Applications under Section 15.

13. No applications under Section 15 of the Act to sanction alienations of, or charges upon the produce of land for more than one year have been recorded.

Applications in execution proceedings by Civil courts.

14. In Financial Commissioner's Circular No. 4, dated 20th June 1901, it was pointed out that land applied to agriculture or pastoral purposes is no longer saleable in execution of any decree or order of a Civil or Revenue Court when it belongs to a member of an agricultural tribe, but that Section 16 (1) of the Alienation of Land Act does not prohibit the attachment of such land in execution of decree. In some districts (*viz.*, Ludhiana, Sialkot, Jhang, Montgomery and Multan, it is noted that since the coming into force of the Act no applications for the attachment of land belonging to members of agricultural tribes have been made, but in districts where they have been made, they have been treated in the same way as before the Act existed except, of course, that no proceedings for the sale of the land have been taken.

Honorary Sub-Registrars and the working of the Act.

15. As a rule it has been reported that the Honorary Sub-Registrars are coping satisfactorily with their new duties. Many of the district reports had been submitted before the issue of his Circular of instructions by the Inspector-General of Registration, and in the case of other districts they had not been a sufficient time in force to allow of any remarks being made as regards their working. Several Deputy Commissioners, however, who were in a position to give an opinion consider them to be of an eminently clear and practical nature.

The Deputy Commissioner of Jhelum notes that the Honorary Sub-Registrars in that district show a general tendency towards resignation, as the remuneration offered by the diminished fees since the Act came into force no longer proves an adequate inducement to them to serve. There can be no doubt but that one of the first effects of the Act was to diminish the number of documents presented for registration, but whether that effect will be permanent or not can only be shown by experience; probably it will be found that it was in a measure temporary, due to an exaggerated idea as to the operation of the Act, but if the objects of the Act are fully attained there should eventually be a permanent decrease in the permanent alienations of agricultural land.

Legal practitioners and the Act.

16. In some of the larger districts it is noticed that there is a good deal of discontent among legal practitioners on account of their exclusion from appearing in cases and applications under the Act. They also appear to consider that it will permanently affect their incomes owing to the restriction which it places on sales and mortgages; this effect will no doubt be produced but at the same time it must be remembered that the excellent harvest which had been reaped when the Act came into force must also have operated to reduce the number of transactions affecting land. There seems little doubt but that the restriction of credit which the Act entails must have its effect in restricting extravagance in litigation; and the inability of the zamíndár to raise money for his law-suit is likely enough to diminish the gains of the *vakíl*. The Deputy Commissioner of Mooltan observes that some well-to-do and litigious people feel some inconvenience owing to the exclusion of legal practitioners as they say they are now obliged to appear themselves, and if they do appear they cannot cope with the intricacies of the law. The Deputy Commissioner of Dera Gházi Khan instances one case in which a legal practitioner claimed to appear in a case concerning a mutation which had been rejected under the Act. His claim was, however, disallowed.

17. By Punjab Government Notification No. 22 S., dated 22nd May 1901, the district of Simla, and the districts and parts of districts, which have since been constituted as the North-West Frontier Province, were exempted from all the provisions of the Act, and areas within the limits of cantonments and municipalities were exempted from certain provisions of the Act. This was subsequently modified by Notification No. 111, dated 17th October 1901, which extended the provisions of Section 10, *i.e.*, those making void any condition to operate by way of conditional sale in a mortgage, to Simla and the frontier districts. No suggestions as to the need for any further modifications under this head have been made in the district reports.

Exemptions under the Act.

Part V.—General Remarks.

18. It is generally conceded that any increase of work which has occurred owing to the passing of the Act is mainly of a temporary nature, but that it is too soon yet to form any opinion as to the ultimate effect on the amount of work to be done. It is pointed out that up to the present time people have not become familiar with the Act, and that an impression pretty generally exists that it restricts all alienations of land. When this impression has been corrected, it is possible that there may be a certain permanent increase in work especially in that of the superior grades of officers owing to the necessity for constant and careful supervision of the work of subordinates.

Extra revenue work caused by the Act.

19. The Act has generally been well received by the well-to-do agricultural community. It is difficult, however, to give any useful appreciation of the feelings of the people because in the first place the erroneous and exaggerated impressions which people of all classes formed regarding the Act, while it was under discussion in the legislature, have not yet had time to be obliterated, and secondly the Act came into force immediately after the reaping of a bumper harvest when agriculturists had means to meet their current expenditure without the necessity for raising loans. On the other hand, the money-lending community thoroughly disapprove of the Act. This, however, was in a great measure to be expected. The effect of the Act was apparent long before it came into force and may have operated differently in different places. The general opinion is that money-lenders exerted themselves to the utmost to acquire all the land they could before the Act came into force; and this is borne out by the statistics of transfer which are contained in the Land Revenue Report. The Deputy Commissioner of Hissár, however, reports that in his district the money-lending class appears to be anxious to drop all attempts to acquire new lands, and that it has even been ascertained that in many places the banias insisted on the zamíndárs taking back their land before the passing of the Act and restoring the purchase money. The Deputy Commissioner does not give further particulars, but the Financial Commissioner is asking for them. The banias may have encouraged redemptions of mortgage under the idea that the new Act would diminish their security, and such redemptions may have been facilitated by the good harvest. But that the banias should have resold to zamíndárs lands already purchased from them is a very extraordinary thing and needs further explanation. In the Dera Ghazi Khan and Multan reports it is noticed that the small agriculturist, who lives from hand to mouth, has been rather hardly hit owing to the contraction of credit which has taken place in his case, owing to his lack of personal security, and consequently an increased readiness has been evinced to apply for and take *takávi* loans.

Reception of the Act by the people.

As to whether there has generally been a contraction of credit owing to the Act, it is not easy to say; undoubtedly there has been in many districts, especially in the west of the Province. On the other hand in the east of the Province in the rich submontane districts of the Jullundur Division and in Amritsar it is noted that little or no contraction of credit is traceable, as the zamíndárs are either well-to-do, or money-lending zamíndárs are to be found who are not affected by the Act.

A tendency to curtail expenditure on the part of zamindárs is noticed in some of the reports as an effect of the Act, and the Deputy Commissioner of

Ráwalpindi instances a case which came under his notice where a man was excused incurring a large expenditure on funeral ceremonies at his brother's death owing to his having no money in hand and being unable to raise it by a mortgage on his land. The Deputy Commissioner of Dera Gházi Khan notes that the revenue for last rabi was realized with difficulty, which he considers was largely due to the effect of the Act; but he says that he believes the state of things to be temporary, and that as soon as people have settled down to the new order of things the difficulty will disappear. He says: "the small bania must lend his money on the land, and its produce, whatever the big banker may do, and though the zamíndár will no longer be able to borrow in the same careless extravagant way as of yore, he ought, so long as he has a crop on his land or a 20 years' interest to dispose of, to be able to obtain sufficient cash for his needs."

In only a few district reports are any statistics given relating to the price of land; the following table will show how average prices have fluctuated :—

District.	Average consideration money in rupees.								
	Mortgages.				*Sales.*				
	1898.	1899.	1900.	1901.	1898.	1899.	1900.	1901.	
Rohtak	9	11	7	4	22	18	18	14	Per bigha.
Umballa	86	90	85	69	100	82	65	78	Per acre.
Hoshiárpur { In favor of agriculturists.	...	...	131	143	...	...	81	147	„
Hoshiárpur { In favour of non-agriculturists.	...	...	91	78	...	...	92	159	„
Gujránwála	...	21	24	25	...	35	47	34	Per ghumao.

It will be seen that the data are insufficient, and that practically no conclusions can be drawn as yet. The figures for Hoshiárpur are incomprehensible, and the Deputy Commissioner says no satisfactory explanation can be given of the rise except that it may be due to difference in the quality of the land affected. The subject of the influence of the Act on rents has not been noticed in any of the district reports.

Striking points in connection with the Act.

20. The chief points which have struck the Financial Commissioner in connection with the commencement of the Act are these :—

(1) the great and apparently general diminution of transactions affecting agricultural land;

(2) the absence of all excitement, amounting to apathy in some cases, on the part of the people;

(3) the absence of any great increase of work;

(4) the doubts and mistakes of officials no less than of private persons as to the degree in which the Act is retrospective in its effects.

Each of these points calls for some remark :—

(1). The decrease in transactions affecting agricultural land will stand in a clearer light when the usual statistics of the period under report are available. Those contained in statements X A and X B of the Land Revenue Report show an increase in transactions, but they relate to transfers attested before the 15th June 1901. Capital had been frightened before the Act came into force and one result apparently was haste to make sure of acquisitions; later on, the situation was influenced by the bumper harvest. If banias feared to lend upon the terms of the Act, the zamíndárs, as it happened, did not want to borrow. It would have been impossible to have chosen a better time for the introduction of a measure restricting credit.

(2). The good season may have had something to do with the remarkable calmness with which the Act was received, but other causes, such as the prolonged discussion of the measure, contributed to this result. Apparently the general idea that got abroad was that Government had passed an order that zamíndárs must not alienate their lands to banias;—in the current vernacular *hukm nahin*. This idea is not an unwholesome one in itself, nor is it widely at variance with the real intentions of Government. That this supposed fiat has at first met with acquiescence and apparent obedience is some testimony to the soundness of the assumption on which the whole experiment rests, *viz.*, that the measure is well suited to the state of society which exists among the peasants of the Punjab.

(3). The new work under the Act consisted chiefly of proceedings to give effect to its retrospective provisions as regards conditional sales. This work came to the Deputy Commissioner by reason of the necessary action of the Civil Courts, but no one appears to have had difficulty in coping with it. Indeed where the creditor accepts, under Section 9 (2), the excision of the condition intended to operate by way of conditional sale, the case would ordinarily be a short and simple one. If some extra work arose under Section 9, some ordinary work must have diminished in consequence of the decrease in transactions affecting agricultural land.

(4). The Civil Courts, notably in the Rohtak and Umballa Districts, were often under a misapprehension as to the class of cases which they were bound to refer to Deputy Commissioners; and Deputy Commissioners were uncertain as to the stage in the case at which such a reference might properly be made. Indiscriminate transfers no doubt occurred, but the uncertainties on both sides will, it is hoped, have been set at rest by the instructions summarised in paragraph 10 (3) above. All this difficulty was connected with the application of the retrospective provisions of the Act relating to conditional sales. These provisions are transitory in the sense that the need for their application will cease after a short time. So far it is a satisfactory thing that the only difficulties of importance which have been felt in the application of the Act are connected with these, so to speak, transitory provisions. What difficulties may arise when the provisions of permanent effect are better understood it is only the future that can disclose.

Instructions issued.

21. The general instructions for the working of the Act were issued, by the Financial Commissioner, with the approval of Government, in his Circular No. 3441, dated the 5th June 1901. This dealt with the circumstances under which a Deputy Commissioner should accord or refuse sanction to an alienation under Section 3 of the Act, and explained in detail the manner in which the rules issued by Government under the Act were to be applied by the Revenue Staff.

In his Circular No. 4, dated the 20th June 1901, the Financial Commissioner explained the effect of the Act on proceedings for sale of land in execution of decrees by a Civil Court. The subject has been alluded to in paragraph 14 above. Similar instructions were simultaneously issued by the Chief Court.

Financial Commissioner's Circular No. 6, dated 19th July 1901, called attention to the mistake in the date on which the Act came into force, *vide* paragraph 1 above.

Financial Commissioner's Circular No. 8, dated the 14th August 1901, explained how far the Act was retrospective in effect, and that it had no effect on transfers which had been completed before the date on which the Act came into force.

In his Circular letter No. 6014, dated 9th October 1901, the Financial Commissioner explained the difficulties as regards mortgages which are alluded to in paragraph 10 (1) above.

The instructions for Registrars in dealing with deeds relating to alienations of land were issued by the Inspector General of Registration in his Circular letter No. 9, dated the 15th November 1901, and have been referred to

in paragraph 15 above. They were prepared in consultation with the Financial Commissioner, and were approved by Government after considerable correspondence and some modification of the original draft.

The district reports.

22. The Financial Commissioner has not considered it necessary to have the district reports printed, but they are submitted in manuscript, except a few which contain nothing of any interest.

The Financial Commissioner regrets the delay which has occurred in the submission of this report. It was due in a great measure to the late receipt of some of the district reports, the last of which, that from Amritsar, was not received in the Financial Commissioner's Office until the 28th February, *i.e.*, the day before the report was due to Government. The Financial Commissioner hopes that next year district officers will be more punctual.

23. The next annual report, when the Act will have been in operation for a year and a half, will probably be more significant and suggestive than such a report as it is now possible to submit. Last autumn harvest was a poor one, and the present spring harvest is likely to be very bad. Restriction of credit will be felt much more than after the bumper crop of last year; and the novel law will be tested by a severer strain. Meanwhile, considering as a whole the above narrative of what has happened upon the commencement of the Act, Mr. Tupper thinks—and he hopes that the Lieutenant-Governor will share his opinion—that the great experiment to endeavour by legislation to restrict the permanent alienation of the lands of the peasantry, to prevent their lands passing away from them to the money-lending classes and to do this without unduly limiting the credit upon which the peasantry depend—promises at least as well as we could venture to expect.

FINANCIAL COMMISSIONER'S OFFICE.

CIRCULAR LETTER No. 5529.

FINANCIAL COMMISSIONER'S OFFICE:

Dated Lahore, 16th September 1901.

FROM

M. S. D. BUTLER, ESQUIRE,

Junior Secretary to the Financial Commissioner, Punjab,

TO

ALL COMMISSIONERS AND DEPUTY COMMISSIONERS IN THE PUNJAB, EXCEPT COMMISSIONER, PESHAWAR, AND THE DEPUTY COMMISSIONERS OF SIMLA, HAZARA, PESHAWAR AND KOHAT.

SIR,

THE Government of India have called for an annual report on the working of the Punjab Alienation of Land Act, 1900, and it has been decided that it shall be submitted as an Appendix to the Land Revenue Report. Deputy Commissioners should, therefore, submit their first report together with their District Land Revenue Report in October next for the revenue year 1900-01. That is to say, the report now called for will deal with the period from June 8th, 1901 (the date of the commencement of the Act), to September 30th, 1901. The Financial Commissioner is fully aware that the experience which will have been gained in these few months will not be of any great value, and he will not expect a detailed report, but there will, he thinks, be enough material available to indicate where watchfulness will be particularly necessary. The reports should be submitted on half margin to Commissioners, who should make marginal comments where necessary, and also, if they so desire, add further notes of their own. The Financial Commissioner would be specially glad of a note from Commissioners on the procedure under the Act. They should remark on the extra work which the Act throws on the Revenue Staff, and indicate whether in their opinion our ordinary administrative machinery will prove able to cope with it.

2. The appendix to this letter gives a schedule of topics which should be followed in preparing the report now called for and future annual reports. It covers much ground, but it is by no means necessary that each topic should be the subject of remark. The order given should be followed and the sheets dealing with the four main heads—

I—Preliminary,

II—Permanent Alienation of Land,

III—Temporary Alienation of Land,

IV—General Provisions,

should be kept separate from each other. The order of the topics follows, it will be observed, the order of the sections of the Act. It is not intended to call for any statistics for the broken period which the present report will cover, and separate instructions will be issued as to their preparation for the coming revenue year.

3. The main object of the appendix is to draw attention to certain points on which information as to the working of the Act is desired either now or hereafter when more experience has been gained. Where Deputy Commissioners have nothing of consequence to say upon any topic noted in the appendix, they need not notice that topic at all. Their reports should be limited to the subjects on which there is experience. In dealing with these subjects they should note the relevant part and paragraph of the appendix.

4. A few passages in the appendix have been printed in italics. This has been done because the subjects to which they relate, although needing close observation in connection with the working of the Act, are such as have either lately been considered and disposed of by order of Government or such as cannot be dealt with at all till the Act has been in operation for a considerable time or such as relate only to special localities. Paragraph II (4) (*b*) should doubtless be noticed in regard to places where the question there put is applicable, but otherwise the first report should not, as a rule, deal with the passages in italics, which may, however, be taken up, so far as necessary, in future annual reports. The Financial Commissioner does not wish any recently decided question to be re-opened on the occasion of the first report. At the same time he does not intend to prohibit absolutely all present discussion of the passages in italics. He will only say that such passages should not be discussed except for strong reasons. It would be obviously useless to discuss over again on the strength of a very short experience matters which have already been discussed in great detail within the last four years.

5. I am to add that, in view of the novel character of the Act now under consideration and the important effect which it is bound to have on land tenures and transfers in the Province, Mr. Tupper is confident that all Deputy Commissioners will give the preparation of the report now called for their close personal attention.

I have, &c.,

M. S. D. BUTLER,

Junior Secretary to Financial Commissioner, Punjab.

APPENDIX.

I.—Preliminary.

(1) Has the mistake in the original notification as to the date of the commencement of the Act occasioned any inconvenience? (Section 1).

(2) How has the definition of agriculturist worked? (Section 2 (1)). In particular—

(*a*) what has come to be the common vernacular rendering of—

(*i*) agriculturist?

(*ii*) "member of an agricultural tribe"?

(*b*) *is there any need for the extension or restriction of the definition of "agriculturist"?*

(3) How have the other definitions in Section 2 of the Act worked? In particular—

(*a*) has the exemption of gifts for religious and charitable purposes from the definition of "permanent alienation" been made a cloak for evading the law? (Section 2 (4)).

II.—Permanent Alienation of Land.

(4) In taking action under Section 3 of the Act how far have the instructions conveyed in paragraph 11 of Financial Commissioner's Circular letter No. 3441 of 5th June 1901 been found sufficient? In particular—

(*a*) what steps have been taken to ascertain that no member of an agricultural tribe included in the same group as the vendor has offered or is ready to offer a fair price for the land, sanction to the alienation of which is requested? (Paragraph 11 (*b*) of circular);

(*b*) *have applications for leave to permanently alienate land to subjects of Native States and residents of the North-Western Provinces adjoining Punjab Districts been made, and if so, how have they been treated?*

(5) How have the rules published under Punjab Government Notification No. 23 S., dated 22nd May 1901, worked so far as they affect permanent alienations? Have subordinate Revenue Officers come to understand the procedure, and what steps have been taken to instruct them? Do any improvements in procedure suggest themselves?

(6) How have the enumeration and grouping of tribes answered? Have they caused much heart-burning? State briefly without arguing the question whether any tribe has been included which might have been excluded, and *vice versâ*, always remembering that specific proposals for inclusion or exclusion should be made by separate reference. In particular, *is any tendency observable for the stronger agricultural tribes in the group to swallow up the weaker?*

III.—Temporary Alienation of Land.

(7) Have mortgagors who are members of agricultural tribes found any difficulty in getting their mortgages drawn in the forms prescribed by Section 6 of the Act when they wish to mortgage to persons who are not members of the same tribe or of an agricultural tribe in the same group?

(8) Has any difficulty been found in working Section (6) (1) (*c*) of the Act owing to the prevalence of rents in kind? How have kind rents been expressed in terms of the land revenue?

(9) *Is there any need to permit any other forms of mortgage besides those specified in the Act by virtue of the powers conferred by Section* 6 (1) *(d) of the Act or to permit any special conditions to be made in accordance with the powers conferred by Section* 8 (1) *(c)?*

(10) Have applications been made—

(1) *under Section* 6 (1) *(b) to place the mortgagee in possession*;

(2) under Section 6 (2) to fix the term and mortgage money of the usufructuary mortgage;

(3) under Section 7 (3) to fix the proportion of the mortgage debt to be deemed equitable;

(4) under Section 9 (1) to revise and alter the terms of the mortgage;

(5) under Section 9 (2) to put the mortgagee to his election as therein prescribed;

(6) *under Section* 13 *to eject a mortgagee, lessee or farmer and place the person entitled in possession;*

and if so, do any remarks suggest themselves? In particular—

(*a*) *what steps have or should be taken to ensure that the reports referred to in paragraph* 25 *of this Office Circular letter No.* 3441, *dated 5th June* 1901 (*application* (2)), *shall be made to the Deputy Commissioner?*

(*b*) in cases under Section 7 (3) of the Act on what principles has the proportion of the mortgage debt equitably due been fixed? Have the Civil Courts made any references to the Deputy Commissioners under this sub-section, and has there been any difficulty in determining the respective duties of the Civil Courts and Deputy Commissioners in dealing with the redemption cases in question?

(*c*) how have the Civil Courts interpreted their powers under Section 9 (3) of the Act? At what stage of the proceedings do they usually refer the case to the Deputy Commissioner? Are any instructions necessary to regulate the relations of the Civil Courts with Revenue Courts or Officers in working this sub-section of the Act?

(*d*) what steps have or should be taken to see that the commencement of possession under Sections 6, 11 or 12 of the Act is duly entered in the jamabandi, so that effect may in due course be given to the provisions of Section 13?

(11) How have the rules published under Punjab Government Notification No. 23 S., dated 22nd May 1901, worked so far as they affect temporary alienations? In particular—

(*a*) *is it desirable that in accordance with a suggestion mentioned in paragraph* 20 *of this Office Circular letter No.* 3441, *dated 5th June* 1901, *temporary alienations which contravene the provisions of Sections* 6, 7 *or* 8 *of the Act should be brought to the notice of the Deputy Commissioner as a part of the mutation procedure, or is it preferable to leave the parties to take action of themselves?*

(12) Do any remarks as to leases and farms under Section 11 of the Act suggest themselves? Is there any tendency to employ these provisions to evade the Act, and if so, how?

IV.—General Provisions.

(13) Have any applications under Section 15 of the Act to sanction alienations of or charges upon the produce of land for more than one year been made? In particular—

(*a*) is there any tendency to employ the provisions of this section to evade the Act?

(*b*) have the provisions of this section been found to hamper trade?

(14) Are applications for the attachment of land belonging to members of agricultural tribes still being made? If so, what action is usually taken by the Collector under Section 326 of the Code of Civil Procedure? (Section 16).

(15) Do any remarks as to Section 17 of the Act suggest themselves? In particular—

(*a*) are the honorary Sub-Registrars as a body capable of coping with their new duties, and do the instructions in this behalf now about to be issued by the Inspector-General of Registration seem sufficient?

(*b*) has the delay necessitated by the need of getting the Deputy Commissioner's sanction to alienations under Section 3 of the Act been found to be such that documents cannot be registered within the period required by law? If so, does the remedy indicated in the Inspector-General of Registration's Circular on the subject (to be used shortly) suffice?

(16) Have legal practitioners asserted any claim to appear in any proceedings under the Act *or evinced any discontent at their exclusion?* (Section 20).

(17) *Are any further exemptions necessary under Section 24 of the Act?*

(18) What amount of extra work has been thrown on Revenue officials by the Act? To what extent is additional assistance required, and what form should it take? In answering these questions care should be taken to distinguish between extra work which is of a temporary character, such as that arising out of references relating to pending cases under Section 9 (3) or out of transactions which took place before the commencement of the Act, or out of mistakes unlikely to occur when it is better understood: and extra work which will probably be normal when the Act has been in operation for some time.

(19) How has the Act been received by the people generally? In particular—

(*a*) what devices have been resorted to for evading its provisions? Is there any tendency for the subterfuges referred to in paragraphs 11 (*ii*), (*iv*) and (*vi*) of this Office Circular letter No. 3441, dated 5th June 1901, to be adopted?

(*b*) has their been any appreciable contraction of credit amongst *zamíndárs* or any increased demand for takávi on that account?

(*c*) what has been the effect of the Act on the prices realised for land, and also on rents? Are they less than before the Act came into force or less than they were before its first publication?

(20) Any other remarks.

ANNUAL REPORT

ON THE

WORKING OF THE PUNJAB ALIENATION

OF

LAND ACT, XIII OF 1900.

For the year ending 30th September **1902.**

Published by Authority.

IX - 112

Lahore:
THE "CIVIL AND MILITARY GAZETTE" PRESS,
Sole Contractors for Printing to the Punjab Government.

1903.

Proceedings of the Hon'ble the Lieutenant Governor of the Punjab and its Dependencies in the Department of Revenue and Agriculture (Agriculture), No. 30, dated 4th April 1903.

READ—

Report on the working of the Punjab Alienation of Land Act, XIII of 1900, for the year ending 30th September 1902, forwarded with the letter of the Senior Secretary to the Financial Commissioner, Punjab, No. 137, dated the 3rd of March 1903.

REMARKS.—This report was due with Government on January 15th, but was not received until March 5th, and the report is much in excess of the prescribed limit. In a separate communication the Financial Commissioner has asked that the date for its submission may be postponed until January 31st, and that decision as to the permissible length of the report may be reconsidered, and both these points will shortly be referred for the orders of the Government of India As desired by the Secretary of State, the various rules made under the Act and the instructions concerning the working of it which have been issued for the guidance of officers are printed as an appendix to the report.

2. The Lieutenant-Governor is glad to observe that on the whole the technical terms employed in the Act have given little trouble, and, as the Commissioner of Delhi remarks, the terms themselves are of minor importance, provided the definitions of the terms are thoroughly understood. It is, however, obvious from certain matters that are brought to notice that the provisions of the Act must be read with care and strictly interpreted. The difficulty referred to by the Deputy Commissioner of Kangra which has arisen in working the definition of agriculturist must be met as suggested. The Lieutenant-Governor would like to see the file of the case referred to at the end of paragraph 2 of the report, as, *primâ facie*, the Deputy Commissioner's decision seems open to question. The case referred to in paragraph 4 of the report regarding the question whether the right of an usufructuary mortgagee which included a right to receive rent is "land" within the meaning of the Act is an important one, and it is satisfactory, is only on economic grounds, that the decision was in the affirmative. The decision referred to in the same paragraph that the definition of land did not include a right of occupancy was concurred in by Government.

3. The normal effect of the Act in so far as transfers of land are in question cannot be gauged with accuracy for some years owing to the abnormal causes at work both before and after it came into force, but the remarkable decrease in the area transferred by mortgage and sale is undoubtedly due to its operation. The decrease in the Provincial totals of the areas redeemed from mortgage is disappointing considering the excellence of the rabi crop of 1901, and the absence of any explanation in the cases of Jhang and Mianwali is regrettable. It may, of course, be due to some extent to the fact that the mortgagors did not think it worth while to redeem mortgages, as they had nothing to fear in the way of being sold out, and it must also be taken into consideration that land was frequently redeemed in the past merely for the purpose of making a fresh mortgage, and that it is improbable that the figures of the year under report include many transactions of this nature. The figures of sales show some decrease in the price of land, but how far it is a real decrease and how far it is due to the Alienation Act is, at present, uncertain.

4. The Lieutenant-Governor recognises the necessity for amending Statements I and III of the statements attached to the report so as to better exhibit the working of the Act, and probably it may be best to divide Statement III into two statements as suggested in paragraph 11 of the report. It seems desirable, however, in recording alienations made by members of agricultural tribes, to have a separate heading showing those made to agriculturists as defined in the Act who are not members of an agricultural tribe. Statement II also calls for revision as noted in paragraph 34 of the report. If the Financial Commissioner's conclusion is correct that 5,000 acres of land were mortgaged to banias irrespective of the provisions of the Act, it would

seem that there must have been considerable slackness on the part of Honorary Sub-Registrars as well as on that of officers attesting mutations, and the matter might be enquired into in some of the districts concerned and the causes ascertained.

5. The Lieutenant-Governor regrets to notice from what is said in paragraph 13 of the report and elsewhere that misconceptions as to the objects of the Act are not uncommon, and His Honour hopes that the prominence given to them in the present report will help to put matters in a clearer light. Considering the great importance of the issues at stake, it is the duty of every Deputy Commissioner to master the principles on which the Act was based and the objects that it was desired to attain, and to carefully study and interpret the provisions of the Act itself and rules and instructions issued in regard to it. The mistake of the Deputy Commissioner of Gujranwala in holding that land within the limits of Notified Areas is exempt from the provisions of the Act should be put right without delay. The point noticed in paragraph 17 of the report is of importance, and should, as proposed, be separately dealt with.

6. The Lieutenant-Governor would like to see the report which the Financial Commissioner proposes to call for from the Deputy Commissioner of Mooltan regarding the class of cases referred to in paragraph 18 of the report which are said to have arisen in that district with a view to defeating the provisions of the Act on the subject of temporary alienations. There is, of course, nothing in the Act to prevent a lessor, if he wishes to do so, from re-leasing his land on the expiry of a lease to the late lessee. His Honour will be glad to consider, if it is separately referred, the question raised in paragraph 21 as to the action to be taken when alienations are discovered in the course of mutation proceedings which contravene the provisions of Sections 6, 7 and 8 of the Act.

7. Sir Charles Rivaz agrees that it is premature to discuss any alteration of Section 15 of the Act until its operation is better understood, and its operation should be tested as opportunity offers in the manner indicated in paragraph 23 of the report.

8. The anticipations as to the amount of additional work that would be thrown on Revenue Officers as a consequence of the Act have proved, happily, exaggerated. It may be that the work will increase in future years, but His Honour is confident that should this prove to be the case, the extra burden entailed in working such an important measure will be cheerfully borne.

9 The conclusions to be drawn from the working of the Act during the year are succinctly stated in paragraph 35 of the report. The Lieutenant-Governor notices with much pleasure the many evidences of the appreciation with which the Act has been received by those for whose protection it was designed, and it is gratifying that so far few devices appear to have been contrived for defeating its provisions. The only device of importance appears to be that noticed in the Shahpur District, but this will shortly be nullified when the pre-emption law is amended. That there has been to a certain extent a contraction of credit is not to be disputed, but if, as there is good ground for assuming, this has not occasioned any actual hardship, and if on the other hand, as stated, it has led to a sensible reduction in the expenses connected with social and family ceremonies, one of the main objects of the Act will have been attained. That there has been some depreciation in the value of land was also to be expected, but, so far as can at present be judged, such depreciation is not at all of an alarming nature. The main point connected with the operation of the Act which requires to be especially watched is as regards its effect on facilitating and stimulating permanent alienations by the smaller tribes to the larger ones, and by members of agricultural tribes to "agriculturists" who do not belong to such tribes.

The attitude of the money-lender has been, on the whole, satisfactory, though, so far, he has shown a reluctance to avail himself of any of the forms of temporary alienation allowed by the Act. The Bill to extend the period of limitation in the case of suits for simple debts will shortly be introduced into the Local Legislative Council.

10. The Lieutenant-Governor desires to thank the Financial Commissioner for the close attention which he gave to the working of the Act during the year and for the excellent report which he has submitted.

ORDER.—Ordered that the above Remarks be printed and circulated with the Report ; also that they be published in the *Punjab Government Gazette*, be communicated to the Financial Commissioner, Punjab, and forwarded to the Government of India, Revenue and Agricultural Department, with the Report.

By order of the Hon'ble the Lieutenant-Governor,

J. F. CONNOLLY,

Offg. Revenue and Finl. Secy. to Govt., Punjab.

Orders and instructions issued under Act XIII of 1900.

ANNUAL REPORT

ON THE

WORKING OF THE PUNJAB ALIENATION

OF

LAND ACT, XIII OF 1900.

PART I—Preliminary.

Preliminary.

1. In this report, unless the contrary appears from the context, the word "zamíndár" will be used as the equivalent of "member of an agricultural tribe" and the word "agriculturist" will be used only in the technical sense given to it by the Act.

Working of the definitions.

2. The mere definition of "agriculturist" does not appear as yet to have given rise to any special difficulties. The probability is that the special privileges of an agriculturist, as defined in the Act, have not yet been understood, either by the "agriculturists" themselves or others. The definition will not be really tested, until it is generally known that descent from an outside purchaser of old standing will, within the village and for the purposes of the Act, put an outsider on nearly the same footing as a member of an agricultural tribe.

As noticed in last year's report the vernacular terms used in the Urdu translation of the Act for "agriculturist" and "member of an agricultural tribe" appear to have been stumbling blocks to those officials who are not acquainted with English. But, as the Commissioner of Delhi rightly remarks, the terms themselves are matters of minor importance, provided that the definitions of the terms are comprehended and grasped. The Financial Commissioner favours the idea that we should use the expression "*bandobasti zamindár*" for "agriculturist" and "*kaumi zamindár*" for "member of an agricultural tribe," but it is impossible to give such expressions currency by mere official order.

The Deputy Commissioner of Kángra notices that some difficulty arises in working the definition of "agriculturist" owing to the names and pedigree tables of all the holders of land at the time of the first Regular Settlement not having been recorded in the Settlement records. This is a difficulty, however, which is inevitable when the records are defective, and must be met, as far as possible, by taking evidence as to the antecedents of the claimants.

The Deputy Commissioner of Hoshiárpur, Mr. Fagan, discusses the question whether the "village" referred to in Section 3 (1) (*b*) of the Act must necessarily be identical with the "estate" mentioned in Section 2 (1). The conclusion which he arrives at, that this need not be the case, is accepted by the Commissioner, but appears to the Financial Commissioner to be quite wrong and altogether opposed to the intention of the Act. Mr. Fagan writes :—

> "It is generally understood that the village referred to in Section 3 (1) (*b*) of the Act must be identical with the estate mentioned in Section 2 (1). It seems, however, open to doubt whether this is the necessary construction of the two passages. A non-zamíndár, who is an agriculturist in virtue of his status in village (estate) A, may hold land by purchases or mortgages made subsequent to the first Regular Settlement in villages B, C and D, &c. A strict interpretation of Section 3 (1) (*b*), would apparently allow him to purchase fresh lands in B, C and D."

In villages B, C and D the non-zamíndár does not hold land *as an agriculturist* within the meaning of the Act and has no special privilege. The use of the two different words for the same thing "village" and "estate" is probably accidental.

The suggestion of the Deputy Commissioner of Ludhiána that the Harnis, a criminal tribe, should be given the status of agriculturists, in order that their reform may be facilitated, is on the face of it quite absurd, and shows a curious misconception of the Act and its objects. No one can be given

the status of an agriculturist. He either has it or not according to the facts of his case. But, assuming that the Deputy Commissioner really means that Harnis should be treated as members of an agricultural tribe, then the question whether they are or are not Rájpúts, as they claim to be, is one to be decided on the merits, if it arises in practice. If they are Rájpúts, then they are such members. If their claim is a mere unfounded pretension, then they certainly should not be notified under the Act as a means of redeeming them from their criminality. The Act was meant for the preservation not of criminal tribes, but of the old agricultural tribes of political importance, who were being displaced by the bania.

The other definitions in the Act appear to be generally working satisfactorily and to call for little comment. An interesting point is raised by the Deputy Commissioner of Lahore as to whether a member of an agricultural tribe who turns faqir is still entitled to the benefits of the Act. In the particular case the Deputy Commissioner decided against the man, but regarded it as a hard case. The Commissioner doubts if this decision was right, and the doubt is shared by the Financial Commissioner, who prefers, however, to reserve further comment until the case comes before him for decision. The file will be sent for and the Financial Commissioner will consider whether revision is required.

Gifts for religious purposes.

3. Several cases have been referred to in the district reports where gifts for religious and charitable purposes appear to have been used as a cloak for evading the law, but no systematic use of this subterfuge appears to have taken place, and apparently the instances discovered were satisfactorily dealt with.

Land.

4. Discussion arose during the year as to whether the definition of "land" in Section 2 (3) included a right of occupancy. The conclusion arrived at was that though for the purposes of the Act "land" includes "a right to receive rent," the correlative in certain cases of that right, *viz.*, an occupancy right, is not included so far as transfers of such rights are concerned, because they are sufficiently regulated by the Punjab Tenancy Act, XVI of 1887. The creation of an occupancy tenancy has, however, been held to be a lease of land for more than twenty years; and accordingly it was ordered that, under the circumstances detailed in Section 11 of the Act, rights of occupancy so conferred should be held to be a lease for twenty years.

A curious case is reported from the Lahore district, in which the question arose whether the right of an usufructuary mortgagee, which included a right to receive rent, is "land" within the meaning of the Act. The point was settled, and the Financial Commissioner thinks rightly settled, in the affirmative. It is not, indeed, a consequence of the political principles of the Act that we must retain in the hands of zamíndárs' lands, which they merely hold on mortgage. The object is to retain in their hands their old ancestral possessions. But in this particular case the land originally belonged to a zamíndár, and it was right if possible to prevent its passing, even in mortgage in a form not permitted by the Act, to an outsider. The Act appears to authorise this action, and this by reason of the definition of land. Though the consequence may have been unintended, the case shows that it is safer that the definition should be wide enough to include mortgage rights than that it should be narrowed so as to exclude them, and thus facilitate the relinquishment by zamíndárs of lands they actually possess. The holding of land by a zamíndár is economically sounder than its holding by a bania; and from this point of view the interpretation put upon the Act may be justified by its economical, if not by its political, principles.

PART II.—Transfers of Land.

Explanation of Statements Nos. I and III.

5. Statements Nos. I and III appended to the report give the salient figures as to transfers of land for the year under report. Statement No. I is based on Statements Nos. X(a) and X(b), which under the old system used to appear with the Land Revenue report, but the whole subject under existing orders is to be dealt with in the present

report. The difference in the arrangement of the statistics in the statement, and also the fact that the present statement deals with the province as now constituted, whereas statements X(a) and X(b) submitted with the Land Revenue report for 1900-1901 dealt with the province including the frontier, make comparison between the figures now given and those given in last year's revenue report very difficult. As regards provincial totals, strict accuracy is impossible, but a rough approximation has been made by deducting the figures for the frontier districts and half the figures for Bannu and Dera Ismaíl Khan, and assuming broadly that the remaining half of the transactions originally recorded in those districts took place in what now forms the Miánwáli district. It must be remembered also that Statement No. I is based on the revenue mutation proceedings sanctioned during the year, and so a certain percentage of the transactions recorded, which varies from district to district according to the state of the mutation work, necessarily took place in previous years, and before the coming into force of the Alienation of Land Act. As noted in last year's report on the working of Act XIII of 1900, one effect of the Act undoubtedly was to give a stimulus to transactions in land during the months which preceded its coming into force, and consequently, as many of these were incorporated in our revenue records during the year, they have the effect of swelling the district figures. There was, however, a strong counterbalancing factor in the effect of the Act on its commencement; which was to greatly reduce the number of transactions in land, as it appears to have been the general idea in most places that the Act forbad all sales by zamíndárs to banias and the like.

Gifts and exchanges.

6. Turning now to the various heads of Statement No. 1 we find that the total area transferred by gifts and exchanges (95,283 acres), is considerably lower than it was in 1900-1901, when it amounted to 154,222. The former figure, however, excludes 71,584 acres transferred by exchanges among the tenants in the Chenáb Colony, while the latter total includes such transfers. The figures are accordingly not widely divergent and call for no particular comment.

Mortgages.

7. The total area transferred by mortgages with possession, or by order of a court for debt, amounted to 305,869 acres, of which 207,501 acres were cultivated. The corresponding totals for 1900-1901 were 438,113 and 325,084 acres respectively, while the mortgage-money has fallen from Rs. 2,07,78,248 to Rs. 1,29,64,793. This remarkable decrease, which is not apparently in any way due to the figures for 1900-1901 being above normal, in fact they were if anything below average as is shown in para. 7 of the Land Revenue report for that year, is practically entirely due to the Alienation of Land Act. Rohtak, Simla, Jhelum and Miánwáli contribute increases strange to say. In Amritsar the figures for the total area are about the same as they were in the previous year, while in all other districts decreases are recorded—those in Kángra (11,927 to 4,785 acres), Ferozepur (27,376 to 19,769 acres) and Muzaffargarh (24,818 to 2,687 acres) being most marked. The increase in Rohtak is said to be due to the fact that mutation work had been in arrears, and a special Naib Tahsildar was put on duty to bring it up to date, thus swelling the number of transactions recorded. No reasons have been given by the Deputy Commissioners for the increases in Jhelum and Miánwáli, but in the latter case it may be due to the figures for 1900-1901 being only estimates. The increase in Simla is insignificant, and moreover that district is unaffected by the Alienation of Land Act, except as to Section 10. It is to be noticed also that the decrease in the provincial totals appears to be pretty evenly distributed over the three heads, superior ownership, ownership, and rights of occupancy, although the last are not affected by the Act, but this is probably due to the fact that the Act was generally supposed by the people to affect all transfers affecting land whether of proprietary or of occupancy rights.

Redemptions.

8. The total area redeemed from mortgage during the year was 251,597 acres, representing Rs. 79,80,949 mortgage-money discharged. The corresponding figures for 1900-1901 were 298,150 acres and Rs. 10,196,567. Considering the excellent Rabi crop of 1901 the above figures cannot be viewed as otherwise than disappointing. The chief

variations in the district figures for the total area redeemed are roughly as follows :—

Increases.		Decreases.	
Districts.	Thousands of acres.	Districts.	Thousands of acres.
Hissár	3½	Delhi	⅓
Rohtak	2½	Kángra	4
Gurgáon	1½	Hoshiárpur	4
Karnál	1½	Ludhiána	3
Jullundur	6	Montgomery	½
Ferozepur	2	Lahore	½
Amritsar	1½	Gurdáspur	5
Gujranwála	3½	Gujrát	2
Jhelum	1½	Shahpur	7
Ráwalpindi	7½	Miánwáli	16
		Multan	1⅔
		Jhang	18
		Muzáffargarh	9½
		Dera Gházi Khan	6½
Total	31	Total	79

The increases are undoubtedly due to the excellent Rabi crop of 1901, which enabled many loans and mortgages to be paid off. An additional reason is given by the Deputy Commissioner of Jullundur, and probably applies to other districts as well, namely, that a large number of peasants, who have gone to the Chenáb Colony and to Australia, have been enabled to make remittances to their home districts and free their ancestral lands from debt. The Deputy Commissioner of Ráwalpindi says the increase in redemptions in that district is due to the fact that money-lenders consider that lending money on the security of land is no longer profitable, and are eager to come to terms with the mortgagees in order to release their capital for more profitable employment. No hint, however, is given of what this may be. As regards some few of the big money-lenders in Ráwalpindi itself it is perhaps not impossible that this may be the case, but as regards the ordinary village money-lender it seems *primâ facie* improbable. The remarks, however, of the Deputy Commissioner of Gujrat bear on the matter. He says "the non-agricultural classes, especially the sahukars, are parting with their interests in land. The general impression is that sooner or later these classes shall have to forego what interests the present Act has not taken away from them. The money-lenders, who had acquired small shares in holdings and estates, with the ultimate object of acquiring the whole in course of time, now see their aims frustrated, and do not think it worth while to stick to business connected with land. As a rule they are not self-cultivating people, and the failure of crops owing to deficient rains did not admit of the rents being paid in full. This fact has also tended to confirm their idea of parting with the land." The Deputy Commissioner of Hissár also, on the same subject, in explanation of a remark made in para. 19 of last year's report as to the tendency in Hissár for money-lenders to be anxious to drop any attempts to acquire new lands, says: "I think there is an inclination on the part of the bania, who has only a few isolated *barani* fields as the security for his loan, to take money down even at a loss rather than acquire rights in soil bearing a crop only once in three years and cultivated by fugitive and troublesome tenants."

No explanation has been given of the decreases in redemptions, especially of the phenomenal decreases in Miánwáli and Jhang. In Miánwáli we know that the decrease is only an estimate and may be exaggerated, but yet it must have been considerable, and both here and as regards Jhang it might have been expected that these very abnormal figures would have been commented on by the Deputy Commissioners.

Sales.

9. The figures for sales also show a material decrease over those for the previous year having decreased from a total area of 3,66,246 acres sold for Rs. 16,182,014 to 2,83,015 acres sold for Rs. 10,706,954. This shows, however, at the same time a decrease in the average price per acre sold of Rs. 6·3, from Rs. 44·1 to Rs. 37·8. The fall was, however, probably not so great as that brought out by these figures for, as already explained, those for 1900-1901 are after all only estimates, and the provincial average including the frontier, as shown in para. 7 of last year's Land Revenue report, was Rs. 41·7 per acre. Even taking this latter figure, however, as the more correct, there has yet been a sensible decrease, which must have been mainly due to the effects of the Alienation of Land Act, though the poorness of the harvests may also have contributed something to produce the result. The decrease in the total number of transactions (61,562 to 45,783) is also undoubtedly due to the effect of the Alienation of Land Act.

Land under mortgage.

10. The total area of proprietary cultivated land under mortgage shows a slight decrease from 33,91,499 to 33,52,637 acres, which gives a percentage of 12·5 on the total cultivated area of the province compared with 13 per cent. in 1900-1901 on the total cultivated area of the old province including the frontier.

Another reason why little use of Statement I can be made in the present report is that, while columns 1 to 21 are too general in their design to show specifically the effect of the Alienation of Land Act, inasmuch as they relate to alienations at large without distinction of the classes by and to which the alienations take place, column 22, which has some bearing on the Act, is not sufficiently detailed to test its working properly, and moreover contains a cross division, inasmuch as transfers by order of court may occur in favour of zamíndárs. The fact is that column 22 requires to be recast, and combined with Statement III in one new statement devised for the purpose of exhibiting the working of the Alienation of Land Act and for no other purpose. The Financial Commissioner proposes to take up this question in communication with the Director of Land Records, and suggest a solution of it for the approval of Government. His reason for leaving Statement I so far very much as it was is that he was anxious, on the introduction of the Act, to make as few changes and to impose as little extra work as possible; and he preferred to work with the old forms—little altered for a time—until sufficient experience of the operation of the Act should indicate the particulars which were most required for the intelligent observation of its working.

Statement III.

11. Statement III was devised specially to show what agricultural tribes were losing or gaining ground. It would have been interesting to know whether any tendency was declaring itself anywhere for particular tribes to lose land to, or gain land from, any other particular tribes, but it has not yet been found possible to prepare a workable statement which would show this. It was not intended that any cross check should be possible between the figures of Statements I and III, because Statement I relates to transfers generally and Statement III is limited to transfers by and to agricultural tribes.

It is, however, to be regretted that, owing to the novelty of Statemen III, some misunderstanding appears to have arisen as to how it should be filled up in two or three districts. Thus in Hoshiárpur, Mooltan and apparently in Amritsar, the direction that only transactions, which occurred after the commencement of the Act, should be entered was disregarded, and in Ludhiana, in the second half of the statement showing sales and mortgages to members of agricultural tribes, apparently only those transactions were entered where a member of an agricultural tribe was also the alienor, *i. e.*, those cases in which agricultural tribes acquired land from other persons were excluded. Even as it stands, however, the statement is an interesting one. In these early stages of the operation of the Act, it is difficult to perceive with certainty any tendencies for particular tribes to acquire land, and for other tribes to lose it, but generally it will be noticed that in the case of sales the agricultural tribes as a whole are more than holding their own. They acquired 69,305 acres as against 60,792 sold. The inference is that so far the Act is successful in preventing permanent transfers to persons other than zamíndárs.

The figures for mortgages are not so satisfactory. The zamíndárs mortgaged 66,540 acres and acquired on mortgage 61,587. How is the difference, 4,953 acres, say 5,000 acres round, to be accounted for? Theoretically these 5,000 acres should have been mortgaged in one of the forms prescribed by the Act. The Financial Commissioner does not believe that such forms were followed at all. It is notorious that banias will have nothing to say to them. The conclusion, therefore, is that some 5,000 acres were mortgaged in the old style just as if the Act had never been passed. This seems very likely; but the mortgagee has his remedy, because he can apply—and it is his interest so to apply—to the Deputy Commissioner to revise the mortgage under Section 9 (1) of the Act. This will get known in time and banias will then see that the old style of mortgage is useless.

Jats appear to have acquired by sale considerable areas in Hissár, Jullundur, Ferozepore, Lahore, Gujránwala, Gujrát and Miánwáli. In Karnál, Umballa, Ferozepur and Rawalpindi Gujars have lost, while they have gained in Hoshiarpur. Rajputs have gained in Hissár, but have lost considerable areas in Kángra, Jullundur, Ferozepur, Gurdáspur, Rawalpindi, Jhang and Multan. Arains have gained in Delhi, Karnál, Umballa, Ferozepur, Montgomery and Lahore, but have lost in Hissár. Similarly, as regards mortgages, the Jat, of course, naturally tops the list as regards number of transactions. He has gained in Jullundur, Ferozepur, Lahore, Amritsar and Gujrat, largely in the first named district and moderately in the rest, but he has lost ground in Hissár, Rohtak, Gurgáon, Delhi, Sialkot, Gujránwala, Muzaffargarh, Dera Gházi Khan and heavily in Multan. Rajputs have gained only in Kangra, Gujránwala, Gujrát, Jhelum and Dera Gházi Khan, and then only by very small areas, while they have lost in every other district in which they are notified and in which any mortgages are recorded. Both under the heads "sales" and "mortgages" the transactions affecting the smaller tribes are so few in number that no useful object would be attained by examining them in detail. It seems enough to say that from the figures given no inference can be drawn that the big tribes have begun to absorb the lands of the smaller ones. From the approximation in many cases of gains to losses, and the excess in some cases of gains over losses, it seems pretty certain that many of the transactions must have occurred within the tribe; and the statement does not show that any small tribe has lost heavily.

The Deputy Commissioner of Amritsar notices that village menials often alienate their land to zamíndárs. The Deputy Commissioner of Jhelum, on the other hand, says that, in his district, he has noticed a tendency for village menials and Kashmiris to acquire land by purchase, as many of them have made money in Africa and elsewhere, and frequently assert themselves to belong to one of the more gentle agricultural tribes such as Janjuas, Ghakkars, and so on.

Reverting to the suggestion made above that we might amalgamate column 22 of Statement I and Statement III, the idea, which, so far, has occurred to the Financial Commissioner, is that perhaps we might have two statements as below :—

I.—Alienations by members of agricultural tribes.

(1) to members of the same tribe;
(2) to members of tribes of the same group;
(3) to other persons.

II.—Acquisitions by members of agricultural tribes.

(1) from members of large tribes;
(2) from members of small tribes;
(3) from other persons.

The second column (as at present in Statement III) would give the list of tribes notified under the Act, and heads (1), (2) and (3) in each statement would be subdivided thus :—

Sales ... ... { No. of transactions. / Area.

Mortgages ... ... { No. of transactions. / Area.

For the sake of simplicity values would be omitted. As already said the Financial Commissioner purposes to discuss this suggestion with the Director of Land Records.

Enumeration and grouping of tribes.

12. In para. 6 of last year's report the Financial Commissioner said that, when the Act had been in force for a year, the question of the enumeration and grouping of agricultural tribes would be taken up. This was done and Commissioners of divisions were addressed and asked to report what action, if any, should be taken as regards the districts under their charge in view of certain general principles, which were laid down, and which may be summarised as follows:—

(*a*) When there is a doubt as to what race or great group of tribes a tribe belongs to, it was considered advisable that the tribe should be notified while retaining the general term for the race, *e.g.*, if it is uncertain whether a particular tribe should rightly be classed as belonging to the Jats or Rajputs, the tribe may be notified by name as well as the Jats and Rajputs under their general designations.

(*b*) Where it is proposed to add any tribe to the list, otherwise than in the circumstance described in (*a*) above, the most essential questions are (i) is the tribe of such a character that we need not object to its being free to acquire the lands of notified tribes; (ii) is it likely to acquire such lands to any large extent; (iii) what are the reasons, especially the commercial or pecuniary reasons, for which the tribe desires to be notified; (iv) if what the tribesmen want is to have conditions of sale struck out of their mortgages or their lands exempted from liability to sale in execution of decree, these are legitimate motives for desiring the application of the Act; but (v) if a tribe desires to be notified in order that it may freely take on mortgage the lands of zamindárs, this would not be a good reason for granting its request. It is to be regretted that replies to this communication are still due from more than one Commissioner, and, as there are obvious reasons for dealing with the question on broad lines, the Financial Commissioner has not been able to take it up pending the receipt of the remaining reports.

No suggestion has been made in any of the district annual reports that the groups of agricultural tribes, *i.e.*, one group for each district, should be subdivided. As yet there appears to be no necessity for considering this question, and practically all that will have to be considered, in connection with the reference to Commissioners referred to above, is what new tribes should be added to the list already notified.

PART III.

PERMANENT TRANSFERS.

Working of instructions.

13. In taking action under Section 3 of the Act the instructions conveyed in para. 11 of Financial Commissioner's circular letter No. 3441, dated the 5th June 1901, have been generally found sufficient. The only point which has been noticed in connection with them has regard to rule (viii) in paragraph 11, which lays down that ordinarily no Deputy Commissioner may, on his own authority, sanction an alienation to a money-lender, whether the money-lender is a member of an agricultural tribe or not; whereas, in fact, if the money-lender is a member of an agricultural tribe, or an agriculturist, no sanction is necessary. What the Financial Commissioner meant was that, in such a case, if the Deputy Commissioner became aware that the applicant for permission to become the alienee was a money-lender, the application should be rejected *in limine* without any further inquiry. If it so happened that the applicant, being a zamíndár or an agriculturist, had come up by mistake, no harm would be done, as such a person might still proceed with his transaction on his own responsibility. But it might happen that the application of the zamíndár or agriculturist was not a mistake at all. The agriculturist might be an agriculturist not in the village where the land was proposed to be sold, but in some other village. The alienee, though a zamíndár, might not belong to the same tribe or to a

tribe in the same group as the alienor. In either of these cases the sanction of the Deputy Commissioner would be necessary and should be refused, unless he is prepared to refer the case for the orders of the Commissioner.

When an application is made to permanently alienate land to a person other than a zamindár or an agriculturist, the usual practice appears to be to refer the application for enquiry by the Tahsildar as to whether any zamíndár is prepared to buy at a fair price. In many cases these enquiries appear to be fruitless, as it generally happens that, unless there are special reasons for selling the land to the person to whom the applicant proposes to sell, as, for instance, where he is already in debt to the man or the man has a mortgage on the property, he himself has made enquiries among his caste friends as to their readiness to purchase. The number of successful cases reported, however, go to show that such enquiries are expedient and the Tahsil agency appears to offer the best facilities for conducting them. The matter is one in which good use can be made of zaildárs and inamdars. It seems doubtful whether it can be really true that the Deputy Commissioner of Kangra, on ascertaining that the relatives of the alienor refused to purchase, had the land, apparently of a zamíndár, put up to auction. If this is true, it reveals perhaps the most extraordinary misconception of the objects of the Act that has yet come to the notice of the Financial Commissioner. The context seems to show that the Deputy Commissioner thinks the object is to get the zamíndár a good price for his land; whereas the object is to prevent him parting with it save under certain exceptional circumstances. An explanation of the very curious statements in this part of the Deputy Commissioner's report is required and will be called for.

No applications were made to permanently alienate land to subjects of Native States or residents in other provinces. Deputy Commissioners, whose districts do not adjoin Native State territory or the United Provinces, should, as a rule, write "no remarks" against this heading.

Working of the rules.

14. The rules published under Punjab Government Notification No. 23 S, dated 22nd May 1901, are reported to work smoothly, and no suggestions for their amendment have been made. The Deputy Commissioner of Amritsar rightly remarks that the definition of an agriculturist gives the *Shajra Nasb* a good deal of importance, and suggests that it might be perhaps well to modify the practice adopted in recent settlements of showing the last three generations only in that paper where it would become clumsy if more were shown. The suggestion is an important one, and will be examined separately in consultation with the Settlement Commissioner.

Number of proceedings.

15. The total number of proceedings granting or refusing sanction to permanent alienations during the year was 478. The Deputy Commissioner of Karnál gives it as his opinion that one effect of the Act has been to raise the price which banias and the like are prepared to pay for the land; and he asks the question whether, where there is no doubt that the offer is a *bonâ fide* one, the Deputy Commissioner is justified in depriving the vendor of the difference between the price offered by such persons and that offered by a fellow caste man. The question of price will be dealt with below, but this query indicates a misapprehension of the same sort as that which may have existed in the Kángra district. As already said, we do not want to get the zamíndár a good price for his land, but to prevent his parting with it. Moreover, in such cases the doubt would immediately arise whether the price offered by the outsider was the fair market value or a price unduly inflated by excessive interest. In the latter case refusal to sanction the permanent alienation to the outsider would certainly be right in the great majority of instances. Sanction would be justifiable only if the alienation would improve the position of the zamíndár by clearing him from debt, while at the same time leaving him a sufficient holding. In this connection it is interesting to note that Mr. Alex. Anderson, Commissioner of Lahore, says on the same question that, if it is a cash transaction between the vendor and the vendee and not between a debtor and creditor, a peasant-cultivator can give a bigger price; and Jats often do give a bigger price in Ludhiána and other congested districts where land is required for cultivation, and not as a mere speculative investment.

16. Another point of interest affecting permanent transfers is referred to by the Deputy Commissioner of Gujránwála; namely, whether the Act applies to land situated within the limits of notified areas or not. The Deputy Commissioner has held that the provisions of Notification No. 22 S, dated the 22nd May 1901, exempting municipalities and cantonments from the provisions of the Act apply to notified areas also. The Commissioner remarks that the latter are more agricultural than the former. The Notification has been superseded by Notification No. 111, dated 17th October 1901, but that has not altered the position. In terms neither notification exempts notified areas from the operation of the Act. This is, in the Financial Commissioner's opinion, quite right, and the Deputy Commissioner's decision was quite wrong. It will be called for and revised.

Notified areas and the Act.

17. One point has been noticed which, if care be not taken to record the facts in time, may give trouble in future years. An agriculturist, who as such acquires land under Section 3, may not permanently alienate it except to a zamíndár or fellow agriculturist in the same village. How is it to be known whether any particular plot owned by an agriculturist was so acquired or not? The Commissioner of Multan suggests that a note should be made in the remarks' column of the *jamabandi* regarding those holdings which have been so acquired; the suggestion seems to the Financial Commissioner to merit consideration and will be dealt with separately; but, the point is one of several which indicate that the existence of the statutory agriculturist, wholly a creature of the law, is one of the blots, probably the chief blot, on the Act, and one of the chief difficulties in working it.

Proviso to Section 3.

PART IV.—Temporary Alienations.

18. Practically no experience of the working of Section 6 (1) (*c*) has been gained during the year, and consequently the doubt, which was expressed by some district officers last year, as to whether the maximum limit allowed by the section is sufficiently high, has not been satisfactorily solved. The Commissioner of Delhi, in referring to the question, says that, in practice, it would be sufficient to take the full rent in kind usually paid by tenants-at-will as the equivalent of the maximum described in the section; but this view is plainly opposed to the express terms of the Act, which limit the rent to the equivalent of the land revenue. If the sub-section acquires any importance in future, it will probably be best to consider its amendment somewhat on the lines suggested by the Deputy Commissioner of Gurgáon; that is to say, we should distinguish in terms between cash rents and kind rents and provide separately for each. At present there is practically no resort to this provision, and it will probably be time enough to consider its amendment some years hence, when, no doubt, experience will have suggested other points on which further legislation will be required.

Usufructuary mortgages and rents in kind.

In Multan an arrangement is described, which the money-lenders of that district have invented, whereby, instead of taking land on mortgage, they take a lease for a term not exceeding that allowed by the Act in lieu of the sums advanced, the lessor remaining in cultivating possession subject to the condition that any money advanced to him for the expenses of cultivation by the lessee shall be repaid with interest. The lessee pays the revenue. At the close of the term the proprietor finds a considerable balance against him, and executes a fresh lease, and so on. This arrangement, however, is said to be made only with reference to old debts as yet. There seems to be considerable confusion in this passage, as it is not apparent how leases for considerable terms made since the commencement of the Act are now expiring. The Financial Commissioner conjectures from a further passage in the same report that what is meant is that, when a zamíndár is heavily indebted to a bania, the bania takes a lease of the zamíndár's land from the zamíndár for a term less than twenty years, puts in the zamíndár as his sub-tenant, pays the revenue himself, but maintains against the zamíndár a running account for expenses on well or watercourse; and that it is apprehended that, when the lease expires, the zamíndár

will still be in debt and the lease will be renewed on the same terms as before. The debt forms the consideration for the lease and operates both as a fine on entry and a discharge from rent. This, however, is only a conjecture, and the Deputy Commissioner will be asked to report what the facts really are. There is, the Financial Commissioner fears, little doubt that the mortgage provisions of the Act can be evaded in this way; and leases made by zamíndárs in favour of banias should be very carefully watched. Till the facts are more clearly reported, the Financial Commissioner will make no further comment, and necessarily abstains from suggesting any remedy till he knows more exactly what evil demands a cure.

Necessity for other forms of mortgage.

19. No suggestions have been made as to any other form of mortgage, besides those specified in the Act, which should be permitted. The opinion, however, has been expressed that in those parts of the province, where the seasons are likely to be capricious, *e.g.*, Hissár and Multan, the people think the period of twenty years is not sufficient to enable such profits to be reaped as would equitably extingnish the debt and its interest. The Deputy Commissioner of Multan accordingly says that between agriculturists and money-lenders in his district there is somewhat of a dead-lock.

This merely bears out what is already known, *viz.*, that money-lenders strongly disapprove of the prescribed forms of mortgage and are unwilling to advance money in accordance with them. This may operate, as already implied, to withdraw the capital of important firms from investment in loans to zamíndárs—a thing not to be regretted—unless the money could be put into agricultural banks of which the general establishment is probably chimerical, and of which more will be said below. The ordinary village money-lender, though at present frightened at the forms of the Act, is likely to continue to lend to approved clients on personal security, fortified by bonds, and on the security of houses and moveables including the crop. Zamíndárs without credit, except such as could be founded on the mortgage of their lands, will be forced to curtail expenditure on social occasions and litigation.

Applications under the Act.

20. Little of interest has been reported as arising out of the various applications made during the year under the Act, except that in most districts a good many unnecessary applications have been filed owing to ignorance of the provisions of the Act, and to the general vague idea, which zamíndárs seem to have, that it is a panacea for all their troubles with their money-lenders. In this respect, however, the reports are not altogether satisfactory, and some further remarks will be made on the present subject below.

With reference to mortgages some interesting points came up for discussion during the year. The question was referred as to the procedure to be adopted in the case of mortgages containing a clause intended to operate by way of conditional sale executed before the coming into force of the Act, which come to light in the course of revenue cases. It was held that no one but a Deputy Commissioner has power to put a mortgagee to his election under Section 9 (2), and that no reference by the Revenue Court as such to the Deputy Commissioner is necessary; but if the officer presiding in the Court is an Assistant Collector, 1st or 2nd grade, any of the parties may make through him an application to the Deputy Commissioner to exercise the power conferred on him by Section 9 (2). A suit in a Revenue Court cannot be brought to enforce a condition of sale, and if the mortgagor ceases to be a tenant of the mortgagee, this in no way deprives him of his right of redemption. The reference, therefore, to the Deputy Commissioner, which is necessary in Civil Court cases, need not be ordered in Revenue Court cases, the parties themselves being left to invoke the power of the Deputy Commissioner, if they so desire.

In last year's report the conclusions arrived at, as to the circumstances under which it is necessary that a new mortgage deed should be drawn up to take the place of the old mortgage rendered invalid by the Act, were discussed in para. 10 (1) and (2). Even though the concession has been granted that on any such fresh mortgage deed the stamp duty already paid on the original deed would be allowed for, and duty charged only to the extent of the excess, if

any, in the ordinary duty on the new deed over that on the old, it has been found that occasionally the mortgagor refuses to execute the new deed, although it is in his interest to do so. It became necessary, therefore, to determine the effect of such a refusal on the legal rights of the mortgagor and mortgagee; and the conclusion which has been arrived at is that, where the mortgagee elects (as he is at liberty to do) to accept an approved form of mortgage in lieu of the original mortgage, his consent is conditional on his receiving such other mortgage. Accordingly if the mortgagor declines to execute a new mortgage, the mortgagee can justly claim that, inasmuch as he has done everything required of him by the Act, his original mortgage should be left unaltered. The parties will thus be relegated to their former position, and the mortgagee will doubtless, in due course, follow the procedure laid down in Regulation XVII of 1806, and, if the mortgagor fails to pay, eventually become owner of the property, notwithstanding the provisions of Section 16 (1) of the Act, as on the expiry of the year of grace the ownership of the property becomes *ipso facto* vested in the mortgagee, or in other words the sale to him becomes complete at once and quite irrespective of the existence or non-existence of a decree in his favour.

Working of the rules.

21. The rules published under Punjab Government Notification No. 23 S., dated 22nd May 1901, are generally reported to have worked well so far as they affect temporary alienations. In last year's report the Financial Commissioner said that, until further experience has accumulated, he was of opinion that in the case of temporary alienations, which contravene the provisions of Sections 6, 7 or 8 of the Act, the parties should, on mutation being refused, be left to take action themselves. The comments on the point in the district reports display the same diversity of opinion as was noticed last year, but there seems to be a growing tendency in favour of having all cases of mortgages reported to the Deputy Commissioner as part of the mutation proceedings. The principal reasons in favour of this course are (*i*) that the decisions of subordinate Revenue officers are not to be trusted to be in accordance with the provisions of the Act; (*ii*) it would be more satisfactory to the people to know where they are exactly, and the procedure would have an educative effect as far as they are concerned; and (*iii*) the amount of extra work entailed would not be great, much less prohibitive.

The question thus raised demands very close consideration, and the Financial Commissioner thinks it will be best for it to be decided not on the present annual report, but on a separate reference to Government. He is inclined to think that for a considerable time to come the rules should in this respect be left as they are, but that a regular system should be laid down for the scrutiny of mutation cases with the object of detecting violations of the Act. This is probably desirable for other reasons and would mean a great deal of work. If, on inspection of a mutation proceeding, a Deputy Commissioner came across a mortgage made by a zamíndár in any manner or form not permitted by the Act, the Financial Commissioner is disposed to hold that the Deputy Commissioner could, under Section 9 (1), proceed to revise and alter the mortgage without any application from the parties (though he should doubtless call them up) and without any reference from a Civil Court. This is, however, a point on which the advice of the Legal Remembrancer would be desirable. Assuming that the mutation procedure is controlled with sufficient strictness to ensure that the great majority of revenue officials comply with the rules, then, under rule II (2) of Notification No. 23 S., dated 22nd May 1901, in the case of a mortgage not permitted by the Act, mutation of names would be refused and the parties would be informed of the illegality. This of itself should prove a strong deterrent. But, assuming that they nevertheless hold for the time to their transaction, the position of the mortgagee would be altogether insecure; for his mortgagor might at any time apply to the Deputy Commissioner, under Section 9 (1) to revise and alter the mortgage; and if the mortgagee sued on his mortgage, then the Court, under Section 9 (3), would have no option but to refer the case to the Deputy Commissioner for the same purpose. Is it worth while to oblige Deputy Commissioners to undertake the extra work of seeing every case in which a zamíndár makes a mortgage, when, if the revenue staff act in accordance with the law, the parties will hear at once of an illegality if committed, and when, even if the revenue staff make a mistake and pass the transaction, it cannot

be enforced at law in its original form? Is it not probably better to be satisfied with measures to see that the revenue staff understand the law and apply it properly?

Farms.

22. Except what has been said in paragraph 18 above on the subject of leases in Multan no remarks have been made in the district reports as to leases and farms under Section 11 of the Act.

PART V—General Provisions.

Charges on produce for more than a year.

23. No applications were received during the year under Section 15 for permission to alienate or make charges on the produce of land for more than one year. As far as can be gathered there is no evidence that the provisions of this section tend to hamper trade, but the Deputy Commissioner of Lahore gives it as his opinion that the period of one year is too short, and that it might be extended to five years. He thinks that the restriction to one year practically prohibits such transactions altogether. The Deputy Commissioner of Muzáffargarh also points out that for transactions relating to fruit gardens the period is too short, as such contracts are usually made for two years at least, on the principle that it is usually found that fruit trees bear well only every second year. Under the provisions of the section the Deputy Commissioner can of course sanction a contract for the two years, but this is hardly the point, which, more correctly put, would be whether, in such case, it is expedient to put the parties to the trouble of applying for and obtaining permission from the Deputy Commissioner. It would be premature, however, to discuss any alteration of this section until its operation is better understood.

In next year's report Deputy Commissioners should state, so far as they can from executive inquiries, to what extent loans are made to zamíndárs on the security of the crop. Such loans probably occur, and the effect of the section is to validate them subject to certain conditions. The operation of the section would be tested when there was a dispute and the parties went to Court, as they could then find out what their transaction amounted to. No mutation proceeding is required; and probably the parties are quite ignorant of what the Deputy Commissioner could do for them and do not apply. Hence, so far, revenue officers have little or no opportunity of judging what this section really effects. Its main object is to prevent the provisions of the Act on the subject of mortgages being evaded by mortgages of the crop only, as distinguished from the land, for a term of years which might be renewed. It is from this point of view that Deputy Commissioners should regard it in future reports. If there is no tendency to evade the Act in this way, and at the same time loans are made from year to year on the security of the crop, thus affording the zamíndár reasonable credit on his actual assets other than land, then the aim of the section will be fulfilled and its effect may be deemed satisfactory.

The Act and Registration.

24. Little of interest has been recorded in connection with the working of Section 17 as regards registration. Circular No. 9, dated the 1st November 1901, issued by the Inspector-General of Registration, Punjab, seems to be quite sufficient in every respect. It is reported that generally in case of a transaction affecting land, which requires the Deputy Commissioner's sanction, this is obtained before any deed is drawn up and executed, and consequently no delay occurs in getting the deed registered. In Miánwáli only, two cases are noticed where the four months allowed by the Registration Act were exceeded owing to the necessity for obtaining the Deputy Commissioner's sanction, and, as directed by the Inspector-General of Registration, in his circular above referred to, merely nominal fines were imposed by the Registrar.

Changes in local extent of the Act.

25. Punjab Government Notification No. 111, dated 17th October 1901, which extended the provisions of Section 10 of the Act to Simla and the Frontier Districts, was discussed in paragraph 17 of last year's Annual Report. The only other change which took place in the local application of the Act during the year was its extension to the Attock tahsíl of the Ráwalpindi district. This tahsíl belonged to

Hazára up to the 1st November 1901, when it was transferred to the Ráwalpindi district, and consequently it became necessary to place it on the same footing as the rest of the district. This was done by Punjab Government Notification No. 114, dated the 16th July 1902.

In connection with the second part of Punjab Government Notification No. 111, dated 17th October 1901, exempting cantonments and municipalities in the Punjab from certain provisions of the Act, an interesting point is noticed by the Deputy Commissioner of Lahore. He says that, some years ago, some lands in Sharakpur were included in municipal limits, at the request of some peasants who evidently wanted to escape octroi. They have now asked to have that area excluded, in order to take advantage of the Alienation of Land Act. Probably the question is one which will arise in the case of other municipalities also, and it certainly speaks well for the Act that the people concerned are anxious for its protection, even when it involves the payment of octroi.

Extra work caused by the Act.

26. It is apparent that the amount of extra work thrown on the great majority of the Revenue staff by the Act is little or nothing. In fact in many districts the opinion is that, on the whole, the Act has decreased work by lessening the number of mutation proceedings and diminishing the number of suits and the volume of litigation generally. The Deputy Commissioner of Rohtak says that, during the executive proceedings under the Act, the parties seem to feel that they are in a different atmosphere from that of the Courts, and they admit freely what they would deny stoutly a week later on in a regular suit. This attitude simplifies matters a great deal. It is to be hoped that it occurs in other districts also, but no other Deputy Commissioner has mentioned it.

The Deputy Commissioner of Hoshiárpur thinks that, assuming the present price of land to be maintained, in future an increase in work will occur in connection with more numerous applications to sell a portion of a holding, when by so doing the remainder can be freed from debt. Apparently the price shows little tendency to fall in that district at any rate. "Many existing mortgages," he says, "were made many years ago, when the price of land had not reached its present level. The margin of excess value, which the security has acquired in consequence, can be used to redeem a portion of it." In all such cases, of course sanction to the alienation should be readily accorded. In reviewing the report on the administration of Civil Justice in the Punjab during the year 1901, and the note by the Inspector-General of Registration on the administration of the Registration Department for the triennium 1899-1900—1901-02, His Honor the Lieutenant-Governor noticed prominently the effect of the Alienation of Land Act to decrease work in the Departments concerned, especially in the latter.

In two respects, however, there has been a real increase. Extra work arose out of Section 9, because Deputy Commissioners had to deal with mortgages containing a condition intended to operate by way of conditional sale. These cases will be worked off before very long, so this temporary increase of work, which after all has only much affected a few districts where conditional sales were frequent, will cease comparatively soon. The other cause of increase is likely to last longer. Legal practitioners not being allowed to appear, Deputy Commissioners have to take both sides in every case and expound the law to the parties, who are usually ignorant of its exact meaning and not quick at understanding the explanations. This, no doubt, takes up a great deal of the Deputy Commissioner's time and requires much patience. But in working so important a measure as this Act, the Financial Commissioner thinks that the time and patience necessary will not be grudged.

PART VI.—General Remarks.

Reception of the Act.

27. The agricultural community generally fully appreciate the benefits conferred on them by the Act. In several districts it is noted that membership in an agricultural tribe is held to confer a sort of social distinction.

28. It is a matter for congratulation that so far few devices appear to have been invented for evading the provisions of the Act. The most successful device is that reported from Hissár and a similar case also appears to have occurred in Shahpur. The *modus operandi* is for the money-lender to arrange the sale of the piece of land he covets to a complacent member of an agricultural tribe probably of another village. The money-lender already owning a small plot in the village in which the land is situated, but not necessarily being an agriculturist, promptly sues the vendee for pre-emption. The latter confesses judgment and a decree is given in favour of the money-lender. This device completely evades the Alienation of Land Act and shows how necessary it is that the law of pre-emption should be modified as soon as possible.

Devices for evading the Act.

Benámi transactions of a simpler sort are reported from several districts, *i.e.*, the land is sold nominally to a member of an agricultural tribe, the real purchaser being a money-lender. The Commissioner of Delhi, however, gives it as his opinion that this device will not be largely resorted to as the real alienee could never perfect his title. The Commissioner further considers that the position of the alienee would be so insecure that men of the money-lending class would not take the risk.

29. There is no doubt but that one effect of the Act has been to contract the credit of zamíndárs, except perhaps in some of the rich districts of the Jullundur Division, but, as far as can be gathered from the district reports, this contraction of credit is viewed by the generality of zamíndárs themselves as a relief. It has led to a sensible reduction in the expenses connected with social and family ceremonies, which had hitherto been regarded as necessary evils. Even the effect of poor crops does not appear to have caused any hardship owing to difficulties in obtaining loans, except in some few cases among the poorer zamíndárs, who found they had little or no credit left. In some such cases it appears that the creditless zamíndár is able to raise a loan from the *sahukar* on the intervention of some strong and reputable zamíndár, who probably shares in the interest with the money-lender. No very marked increased demand for *takavi* advances is apparent in any of the districts, consequent on the difficulty of raising loans from the ordinary money-lenders. In the Delhi Division especially it has been found extremely difficult to unravel the causes of *takávi* demand; variation in prices, owing to the pressure of bad seasons following on a long period of famine, itself forms a strong disturbing element. In some of the districts in the west of the Province, *e.g.*, Multan, Muzaffargarh, Miánwáli and Dera Gházi Khan, there has to a certain extent been an increased demand for *takávi* loans from Government. In those parts of the province, where the seasons are capricious and where the income of revenue payers fluctuates enormously in consequence, the means of credit being curtailed, it behoves us to ease the situation by reasonable liberality in suspensions.

Effect on credit.

30. No effect on rents due to the Act has yet become apparent. As to what its effect has been on the price of agricultural land it is not easy to say. As mentioned in the preceding paragraph, as far as the Delhi Division is concerned, there have been too many disturbing causes at work to allow the effect of each cause being estimated separately, but apparently in that Division there has been a certain falling off in the prices obtained for such land. In the Jullundur Division there has apparently been no fall in prices at all. In the Lahore Division, except in Gurdáspur, Siálkot and Gujránwála, where a slight downward tendency is reported, the effect on prices appears to have been negligible. The same is reported from the Ráwalpindi Division. The Deputy Commissioner of Shahpur says that in his district prices were depressed in anticipation of the Act, and have not recovered since. Multan, Jhang and Dera Gházi Khan all report that prices have fallen. At the present stage of our experience it is, of course, very difficult to generalise on the effects of the Act in this respect. There must always be local causes affecting the considerations in different districts, the great diminution in the number of transactions transferring land affects the value of averages; and the personal equation appears to enter largely into the opinions given in the various district reports. The same remarks

Effect on rents.

apply to mortgages. Generally speaking the position may be summed up by saying that in the south-east of the province, while there may have been a fall in value due to the Act, its amount cannot be estimated owing to the disturbing cause of loss of credit due to famine and long years of scarcity. In the Central Punjab practically no effect has been produced, and little in the north; in the south-west undoubtedly there has been a falling off, but not to any great extent.

Theoretically the Act should cause a fall in the price of land, because it puts out of the field the bania class—a very large number of eager competitors. It should also diminish the amount obtainable by zamíndárs when mortgaging their lands to banias, because it diminishes the value of the security. The statistics discussed in paragraph 9 above show on the whole a slight decrease in price; but this is to be expected, not so much for the theoretical reason just given as because the bania is no longer the purchaser. When he was the purchaser, the price was inflated by large interest charges. Interest apart, as already pointed out in paragraph 15, the well-to-do zamíndár should be able to give a better price for agricultural land than the bania, because a self-cultivating peasant can make more out of such land than a mere rent-receiver. As for mortgages, the fact that banias will not take land on mortgages of the prescribed forms obviously prevents the effect of the Act on mortgage values appearing in the statistics. We do not yet know what the new mortgage values will be, because the new mortgages are not yet made. It may be that while banias will not be able to buy agricultural land at all, zamíndárs will be able to buy it cheaper than if the Act had not been passed. This is not to be regretted. As to an absolute fall in the true value of agricultural land for zamíndárs against the effect of the Act we must set the normal tendency of the value of land to rise with commercial and agricultural progress. Deputy Commissioners should bear these remarks in mind in reporting on the subject in future years, and should distinguish between prices in sales and mortgage values, and between sales and mortgages (1) to zamíndárs and (2) to other persons.

Effect on money-lenders.

31. The money-lenders naturally find their business much affected by the Act. The Deputy Commissioner of Siálkot says:—

"In the year under report money-lenders have, as a rule, stopped all credit, in the hope that agitation on the part of agriculturists will occur, and the Act will be cancelled as the result. As their hopes have not been realized, it is believed that they will again take up their business as before, because they have no other means of livelihood. As far as money-lenders in a small way of business are concerned, the Act is considered comparatively harmless, because at sowing time they make small advances of grain and, on the ripening of the harvest, receive back fifty per cent. or more in excess of the quantity advanced. It is a pity that the rate of interest so charged is so high, but as implied, in remarks already made, it was not the intention of the Act to stop borrowing in this way on the security of the crop. In the case of wealthy *sahukars*, whose dealings are in money alone, the Act makes it difficult for zamíndárs to obtain loans without tangible security being given in some shape or form, most frequently articles of jewelry, and at the same time a high rate of interest is paid for the loan."

Some remarks recorded by the Commissioner of Delhi in this connection are also pertinent. He says: "Considering the enormous amount of capital engaged in the money-lending business, I think it is out of the question that any appreciable quantity of it should be diverted, or find any other outlet. If there were such a diversion (though under the existing economic condition of the country I do not see the possibility) it would certainly be for the good of the community. The agriculturist borrower is as necessary to the professional money-lender as the latter is to the former; and I believe that the result of the Act will be to place the relations of the two parties on a more equitable footing. If that is the indirect result of the Act (and I have always thought it would be), no better justification could be found." In this opinion the Financial Commissioner generally concurs, and he is also glad to note that, in several of the district reports, it is mentioned that money-lenders are devoting their capital to a more healthy and legitimate class of business in the direction of dealing wholesale and retail in food stuffs and other common commodities. In many places money-lenders have been making the most of the Alienation of Land Act to secure an abatement of income-tax. The claim is one which will

require close scrutiny and may often be really due to errors in assessment. The income derived from usufructuary mortgages of agricultural land assessed to land revenue or local rate is exempt from income-tax; not so the income derived from collateral mortgages, *vide* Income-Tax Manual, Appendix VI, paragraph 19, page 131. The claimant, by reason of the Alienation of Land Act, will therefore have to show that it has affected his income from collateral mortgages.

The Deputy Commissioner of Ferozepore notices a tendency for money-lenders to buy up occupancy rights, which, as explained in paragraph 4 above, have been held not to be "land" within the definition of that term in the Act. The value of occupancy rights as investments for capital on loan is said to have gone up considerably in the Fázilka Tahsil.

Agricultural banks, &c.

32. In connection with the effect of the Act on money-lenders, three subjects, which are more or less corollaries to it, require to be touched on; namely, agricultural banks, the extension of the period of limitation for the recovery of money debts to six years, and the question of affording facilities to money-lenders to recover their debts from agriculturists.

As regards the first of these, the recommendations of the Commission, which met at Simla in 1901 to formulate schemes for agricultural banks, were discussed by the Financial Commissioner in this office letter No. 177, dated the 1st March 1902, and suggestions were made for working a system of rural banks. No orders have yet been received on the subject. Sir Lewis Tupper has been throughout in favour of continuing and expanding the experiments already made in this connection on a small scale in two or three places; but he does not believe that, within any time to which we can look forward, it will be possible to establish agricultural banks in sufficient numbers in the Punjab to have any material effect on the prosperity of the mass of Punjab peasants. He thinks it is a more promising line of advance to determine to improve the indigenous village agency; to facilitate the recovery of the just demands of the bania and thus induce him to lower his rates of interest; and to offer him inducements by legislative means to observe greater honesty in his transactions. An ordinary village bania, who submits to well devised regulations, might himself be a useful agricultural bank.

The question of extension of the period of limitation in the Punjab, in the case of suits by money-lenders against agriculturists to recover simple debts, has advanced considerably during the year, and it is hoped that the bill to give effect to the proposal will shortly be introduced in the Local Legislative Council.

The third question relating to the execution of decrees against agriculturists was discussed in paragraphs 11 *et seq.* of this office letter No. 234 S, dated the 29th July 1902, on the subject of the Draft Code of Civil Procedure. The procedure, which the Financial Commissioner suggested then, was that the execution of money decrees against agriculturists should be transferred to the Collector in selected districts or tracts, the amounts of such decrees becoming then recoverable as arrears of land revenue in such proportion to the current demand at each harvest as the Collector might fix. This plan did not receive the support of the Local Government, who preferred that the question should be solved by experiment, and suggested that an enabling Act should be passed making it possible for the Local Government to introduce cautiously the reforms proposed by the Simla Committee of 1901, *i.e.*, the granting of special facilities to selected money-lenders, who will keep their accounts in proper form for realising loans made for productive purposes.

Settlement Officers and the Act.

33. The connection of Settlement Officers with the working of the Alienation of Land Act was also discussed during the year. The Settlement Commissioner urged that, in districts under settlement, the Settlement Officers were in a better position than the district officers to deal with questions arising under the Act. It was held, however, by Government that, for the present at any rate, the proper person to work the Act is the Deputy Commissioner; and accordingly it was ruled that Settlement Officers should have no concern with it.

Concluding remarks.

34. As directed by the Secretary of State, in his despatch No. 113, dated the 11th July 1902, the rules made by the Local Government under the Act, and the instructions issued from time to time by Heads of Departments for the guidance of officers have been collected, and printed as an appendix to the present report. The Financial Commissioner, as on the last occasion, submits the district reports in original for the perusal of Government. He thinks that those received from Umballa, Hoshiárpur, Ferozepore and Siálkot are above the average.

It will have been noticed that, in the opinion of the Financial Commissioner, Statements I and III will require some revision, before they become thoroughly suitable for the purposes of the Act. The same remark applies to Statement II. A distinction should be made throughout between cases instituted and cases disposed of; and perhaps also in some columns between applications granted and those refused. As, in the case of the other statements, the Financial Commissioner will take up the matter in communication with the Director of Land Records. The reviews by Deputy Commissioners of this statement ought in future to be fuller than they are in most of the present reports. For instance, when applications by zamíndárs for permission to make permanent transfers are granted, it would be useful to know, at least as regards classes of cases, why permission was given. Other cases presenting any special features, such as those which may have led to decisions by superior authority on a question of principle or which disclose any actual or possible methods of evading the Act, should be specially referred to. In the remarks of Deputy Commissioners particulars should also be given of cases shown in the miscellaneous column 9, so that the Financial Commissioner may be able to consider whether further specification is desirable, in order to show by one or two additional columns something more of the working of the Act. The Financial Commissioner has no desire to add unduly to the work of Deputy Commissioners and their subordinates; but it was partly for this very reason that he was content to begin with somewhat imperfect statements, which may well be improved now that the Act has entailed so much less extra work than was expected.

Summary.

35. This report on the first completed year of the operation of the Act has unavoidably extended to considerable length, and it may be useful to conclude it with a summary.

The definitions in the Act have worked well, but the statutory agriculturist is a standing danger; because in every village, where any such person is to be found, the door is not closed to permanent transfers by zamíndárs to banias. There has been a marked decline in the number of usufructuary mortgages and sales of agricultural land; and the decrease in fact is probably much greater than the decrease shown by the statistics, because the figures are the results of the mutation procedure, which lags behind the transactions themselves; and in the preceding year permanent transfers were stimulated by the fears of creditors as to the effect of the Act. The selling price of agricultural land has most likely fallen a little; but the figures probably show the effect of banias' prices inflated by interest, which exaggerated the price of land before the passing of the Act. There is no trace of any sudden and violent depreciation of the value of land. It does not as yet appear that the big tribes are encroaching on the smaller ones; and, in transfers, the zamíndárs as a body have gained more land than they have lost. Credit has, no doubt, been restricted, but with salutary consequences in curbing extravagance on social occasions. The zamíndárs generally approve of the Act, and, for social and other reasons, a good many unprotected tribes are anxious for its protection. The rules and circular orders under the Act have worked very smoothly and well; and there has, contrary to expectation, been no material increase of work. The statistical forms which accompany this report are not as yet quite suitable. Their improvement is intended. It is not likely that the subordinate revenue officials have as yet become thoroughly familiar with the Act; and their proceedings must be closely watched by Deputy Commissioners. Few devices for the evasion of the Act have so far been detected. Banias no doubt dislike the Act; and some of the richer men amongst them may be abjuring investments in land and seeking other

employment for their capital. It is, however, probable that the small village money-lenders as a class will continue their customary dealings with zamíndárs on a healthier system of credit.

On the whole Sir Lewis Tupper is able to say that the Act is working even better than he hoped it would. Last year he thought the great experiment promised well; and this year he is fully confirmed in that opinion.

GAZETTE OF INDIA NOTIFICATION.

No. 1243, *dated* SIMLA, *the 8th June* 1901.

In exercise of the power conferred by Section 1, sub-section (3), of the Punjab Alienation of Land Act, 1900 (XIII of 1900), the Governor-General in Council is pleased to direct that the said Act shall come into force from the 8th June 1901.

[No. 2]

GAZETTE NOTIFICATION.

The 22nd May 1901.

No. 21 *S.*—*Notification.*—In exercise of the powers conferred by Section 4 of the Punjab Alienation of Land Act, 1900 (XIII of 1900), and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor of the Punjab is pleased to issue the following orders determining what bodies of persons are to be deemed to be agricultural tribes or groups of agricultural tribes for the purposes of the said Act:—

(1) In each district of the Punjab mentioned in column 1 of the Schedule annexed to this notification, all persons either holding land or ordinarily residing in such district and belonging to any one of the tribes mentioned opposite the name of such district in column 2 shall be deemed to be an "agricultural tribe" within that district.

(2) All the "agricultural tribes" within any one district shall be deemed to be a group of agricultural tribes.

SCHEDULE.

District.	Tribe.
Hissár ...	Jats. Rájpúts. Patháns. Syads. Gujars. Ahírs. Mughals. Dogars. Málís. Aráíns.

GAZETTE NOTIFICATION.

The 22nd May 1901.

No. 22 *S.*—*Notification.*—In exercise of the powers conferred by Section 24 of the Punjab Alienation of Land Act, 1900 (XIII of 1900), and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor of the Punjab is pleased to exempt—

(1) from the operation of the said Act the following parts of the Punjab, namely—

(*a*) the district of Simla,

(*b*) the district of Hazára,

(*c*) the district of Pesháwar,

(*d*) the district of Kohát,

(*e*) the Bannu and Marwat Tahsils of the district of Bannu, and

(*f*) the Dera Ismail Khan, Kuláchi and Táuk Tahsils of the district of Dera Ismail Khan; and

(2) from the operation of the provisions of the said Act, other than those of Section 1, Section 2, clauses (1), (2), (3) and (6), Sections 4, 10 and 16, Section 17, sub-section (1), Section 18, sub-section (2), Section 21, sub-section (2), and Section 24, every area included within the limits of any cantonment or municipality in any part of the Punjab not exempted from the operation of all the provisions of the said Act by clause (1) of this notification.

[No. 4.]

GAZETTE NOTIFICATION.

The 22nd May 1901.

No. 23 *S.*—*Notification.*—In exercise of the powers conferred on him by Sections 19 and 25 of the Punjab Alienation of Land Act, 1900, and Section 17 of the Punjab Land Revenue Act, 1887, the Lieutenant-Governor of the Punjab is pleased to make the following rules and to direct that they shall be read as an addendum to Chapter V of the Rules made under the last-named enactment relating to Mutation Lists, Parchás, Báchh Papers and Orders of Court:—

Addendum to Chapter V of the Rules under the Punjab Land Revenue Act.

I.—If any alienation of land is made otherwise than in accordance with the provisions of the Punjab Alienation of Land Act, 1900, or involves any condition contrary to those provisions, the patwári shall nevertheless enter the same, when it comes to his knowledge, in his register of mutations for the village where it occurred.

II.—An entry made under the preceding rule shall be dealt with like other entries in the register of mutations which are made under this chapter, except that the Revenue

Officer to whom the register is submitted for orders under Rule 48 of this chapter shall, after hearing the parties and recording a note of their representations,—

(1) in the case of any permanent alienation, transmit the mutation proceeding with his recommendation, as to whether sanction should be granted or refused, to the Deputy Commissioner for his orders under Section 3 (2) and (3) of the Punjab Alienation of Land Act; or

(2) in the case of any temporary alienation, refuse to sanction mutation of names and refer the parties to the provisions of the Punjab Alienation of Land Act which they have contravened.

III.—The Deputy Commissioner on receipt of any mutation proceeding transmitted to him under Rule II (1) shall, after such further inquiry, if any, as he may consider necessary, grant or refuse the sanction required by sub-section (2) of Section 3 of the Punjab Alienation of Land Act. For the purposes of any further inquiry under this rule the Deputy Commissioner may refer the case to any Revenue Officer subordinate to him for investigation and report and may decide the case upon the report.

IV.—When the Deputy Commissioner has decided any case dealt with under Rule III, he shall record his order upon the mutation proceeding and direct the same to be returned to the Revenue Officer whose duty it is to dispose of mutation cases arising in the village where the land alienated is situated.

V.—If the Deputy Commissioner sanctions the alienation, the record of his sanction made upon the mutation proceeding shall be deemed to be sufficient evidence of the order of sanction for the purposes of Section 18 of the Punjab Alienation of Land Act, and the Revenue Officer whose duty it is to dispose of the mutation case shall dispose of the same and shall not refuse mutation on the ground of any objection arising out of the said Act.

VI.—If the Deputy Commissioner refuses to sanction the alienation, the Revenue Officer disposing of the mutation case shall pass such order in the case as may be in accordance with the order of the Deputy Commissioner refusing sanction.

VII.—When a mutation proceeding has been transmitted to the Deputy Commissioner under Rule II (1) the transmission thereof shall be deemed to be an application to the Deputy Commissioner to exercise the powers conferred upon him by Section 3 of the Punjab Alienation of Land Act. Such application need not be stamped nor is any separate application necessary for the exercise of those powers in the same case.

VIII.—Nothing in these rules shall be so construed as to disallow applications to the Deputy Commissioner for the exercise of any power conferred upon him by the Punjab Alienation of Land Act, 1900, which are made in any other manner authorized by law or by rules having the force of law.

[No. 5.]

GAZETTE NOTIFICATION.

The 22nd May 1901.

No. 24 *S.—Notification.*—In exercise of the powers conferred on him by Section 25 of the Punjab Alienation of Land Act, 1900, the Lieutenant-Governor of the Punjab is pleased to prescribe the following rules as to the Revenue Officers to whom applications may be made for the exercise by a Deputy Commissioner of the powers conferred on him by the Punjab Alienation of Land Act, 1900, and as to the manner and form in which such applications shall be made and disposed of:—

RULES.

1. An application to a Deputy Commissioner for the exercise of any power conferred on him by the Punjab Alienation of Land Act shall be in writing and signed and verified by or on behalf of the person making it, and shall be accompanied by an extract from the annual record or record of rights sufficiently describing the land which is the subject of the application. The application shall bear a stamp of the value of eight annas; and the extract from the revenue records shall also be duly stamped in accordance with Section 6 and Schedule I, Number 9, of the Court Fees Act.

2. Such application may be received by the Deputy Commissioner or by any Assistant Collector of the 1st or 2nd Grade.

3. If the Assistant Collector receiving such an application is dealing with mutation cases and the application is made to him in connection with any such case, he shall proceed as directed in the addendum to the rules in Chapter V under the Punjab Land Revenue Act, published in Notification No. 23 S., dated the 22nd May 1901, and shall forward the application to the Deputy Commissioner with the mutation proceeding therein mentioned.

4. If the application is made to an Assistant Collector, but is not made in connection with a mutation case, the Assistant Collector shall, if generally or specially empowered in this behalf by an order in writing made by the Deputy Commissioner,

inquire into the case and transmit the application with a report of the results of his inquiry to the Deputy Commissioner for orders. The Assistant Collector, if not so empowered, shall transmit the application to the Deputy Commissioner for orders without remark.

5. The Deputy Commissioner, on receipt of an application made under these rules, may decide the case upon the application, or may himself make any inquiry which he considers necessary, or may refer the case to any Revenue Officer subordinate to him for investigation and report, and may decide the case upon the report or upon the results of his own inquiry as the case may be.

[No. 6.]

GAZETTE NOTIFICATION.

The 22nd May 1901.

No. 25 *S.—Notification.*—In exercise of the powers conferred on him by Section 25 of the Punjab Alienation of Land Act, 1900, the Lieutenant-Governor of the Punjab is pleased to make the following rule as to the exercise by a Deputy Commissioner of the powers conferred on him by that enactment in cases referred to him under the said Act, by a Civil Court :—

RULE.

When a Civil Court makes a reference to a Deputy Commissioner under the Punjab Alienation of Land Act, 1900, the Deputy Commissioner may exercise any power applicable to the case, which is conferred upon him by that Act, either upon the reference or after any further inquiry which he considers necessary, or after sending the reference to any Revenue Officer subordinate to him for investigation and report and upon consideration of the report so required.

[No. 7.]

Chief Court Circular Memo. No. 9—2178 G., dated Lahore, the 30th May 1901.

To all Civil Courts in the Punjab.

SUBJECT.
The Punjab Alienation of Land Act, XIII of 1900.

When a suit to which the provisions of Section 7 (3) of the Punjab Alienation of Land Act, XIII of 1900 apply, is brought before a Civil Court, the Court should, on the application of either of the parties, refer to the Deputy Commissioner to determine the proportion of the mortgage debt that is equitable, and keep the case pending until such determination has been made.

[No. 8.]

Financial Commissioner's Circular Letter No. 3441, dated Lahore, the 5th June 1901.

To all Commissioners and Deputy Commissioners in the Punjab.

THE Punjab Alienation of Land Act, No. XIII of 1900, has been brought into force with effect from the 1st instant; and it is very necessary that patwáris, kánúngos, all revenue officers, and indeed the agricultural community at large, should possess an adequate acquaintance with the objects and effect of the Act. Accordingly this Circular of instructions for working the Act has been approved by Government and is issued, by the direction of the Financial Commissioner, for the information and guidance of all concerned. Notifications 23 S., 24 S., and 25 S., dated 22nd May 1901, hereto annexed* have also been sanctioned by Government and issued in *Punjab Government Gazette, Extraordinary,* dated the 25th May 1901. They will be explained below so far as necessary.

2. In this Circular members of agricultural tribes within the meaning of the Act will be referred to briefly as zamíndárs; and the rest of the agricultural community will be described as "baniás and others" or as "baniás and persons other than zamíndárs."

3. An "agriculturist" within the meaning of the Act may be a zamíndár or a bania or any one else, provided that he holds agricultural land and was recorded in his own name or in the name of his ancestor in the male line at the first regular settlement (or in a few cases at some other settlement) as an owner of land or a hereditary or occupancy tenant in any estate. If the record has been corrected by a Civil Court or other competent authority, effect will in this behalf be given to the revised entry. As a general rule, every zamíndár will also be an "agriculturist;" but this will not deprive him of any privilege he has as a zamíndár. Baniás and others will not be "agriculturists" unless they exactly fulfil the requirements of the definition in Section 2 of the Act, which should be closely studied with reference to the above remarks. Throughout this circular the expression "agriculturists" is used as defined in Section 2 (1) of the Act.

4. As will be seen from Section 3 (1) (*b*), the object of thus defining "agriculturist" is to dispense with the sanction of the Deputy Commissioner when baniás and persons other than zamíndárs, who have held agricultural land since annexation or thereabouts, desire to permanently acquire such land in their own villages. It will be observed that from the date when the Act comes into force an agriculturist who is not a zamíndár will be unable without sanction to acquire land permanently from a zamíndár except in the

---

* NOTE.—Printed as Nos. 4, 5 and 6 above.

village in which he (the purchaser) is an agriculturist. The working of the definition should be very carefully watched. You will note that it may be extended or restricted without fresh legislation ; and when the Act has been in force for two years, or sooner if necessary, you should report whether any action seems needed in this respect.

5. The other definitions in Section 2 also need careful study. No immoveable property is affected by the Act, except "land" as here defined. You will notice that the definition is a somewhat enlarged version of that contained in Section 4 (1) of the Tenancy Act. The expression "permanent alienation" is so defined that the Act does not place any restriction on gifts for religious or charitable purposes. The working of this exemption is another point to watch, as it must not be allowed to become a cloak for evasions of the law.

6. You have already been informed in paragraph 6 of Punjab Government letter No. 117, dated the 12th November last, that the objects of the Act are "to restrict as much as possible the permanent alienation of their lands by peasant proprietors, to prevent the acquisition of these lands by non-agriculturists, and to do this without at the same time unduly limiting the credit on which the peasants depend for the means of cultivation." The agricultural tribes of your district or division have been enumerated and grouped by separate orders which have been notified in the *Gazette Extraordinary* referred to above under Notification No. 21 S., dated 22nd May 1901.

7. The restrictions on permanent alienation are imposed only on zamíndárs and on agriculturists as defined in the Act. Zamíndárs may without sanction permanently alienate their lands—

(*a*) to other zamíndárs of the same tribe or *group* of *tribes*, and

(*b*) to agriculturists (whether zamíndárs or not) who hold land in the village where the land alienated is situated.

But zamíndárs may not permanently alienate their lands to any one else without the sanction of the Deputy Commissioner.

8. Agriculturists who are also zamíndárs have the same power of permanent alienation as other zamíndárs. Agriculturists who are not zamíndárs may not permanently alienate land which they have acquired as agriculturists from zamíndárs after the Act comes into force except (1) to zamíndárs, or (2) to other agriculturists in the village, or (3) with the sanction of the Deputy Commissioner ; but they may freely alienate other land.

9. The annexed rules (Notification No. 23 S., dated 22nd May 1901), which have received the sanction of Government will show how Section 3 is to be worked. In the first instance the patwári, the field kánúngo and the Naib Tahsildar or Tahsildar dealing with mutation cases will have to come to a conclusion as to whether any permanent alienation entered in the mutation register requires the sanction of the Deputy Commissioner or not. If it is found that sanction is required, the case will be reported to the Deputy Commissioner as provided in the rules.

10. The "mutation proceeding" referred to in rules II (1), III, IV, V and VII of Notification 23 S., dated 22nd May 1901, is the same thing as the copy of the entry which, under rule 49 of Chapter V of the Rules under the Land Revenue Act, has to be filed with the *jamabandi*. The procedure is fully explained in paragraph 8 of the Circular of the Director of Land Records, No. 6, dated the 8th July 1891, and in his Circular No. 11, dated the 14th August 1897. The patwári retains the mutation register and his entries therein are copied on to a form or counterfoil on which the patwári writes his report and the revenue officer passes his order. It is this form or counterfoil, with the reports made on it, which is referred to in Notification No. 23 S., dated 22nd May 1901, as the mutation proceeding. Under the circumstances described in the Notification the form or counterfoil has to be sent to the Deputy Commissioner for orders instead of being taken away by the revenue officer to be made over to the office kánúngo.

11. In determining whether to grant or refuse sanction under Section 3, the Deputy Commissioner should be guided by the following instructions in which the term "alienation" is used to denote permanent alienations only :—

(i) Sanction should not be given unless the sanctioning officer is satisfied—

(*a*) that the transfer is really advantageous to the vendor and his family, and

(*b*) that no member of an agricultural tribe included in the same group as the vendor has offered or is ready to offer a fair price for the land.

(ii) The distinction between self-acquired and hereditary property has to be borne in mind. If there is no reason to suppose that the alienee is a mere intermediary intending to re-transfer the land to a money-lender (in which case instruction (viii) would apply), then, other things being equal, there should be less reluctance to sanction the alienation of self-acquired than of hereditary land.

(iii) If a zamíndár depends entirely or mainly on his land, no alienation should ordinarily be allowed which will reduce the land he retains to less than is required for the support of himself and his family.

(iv) If the Deputy Commissioner is satisfied that there is no intention of evading the Act, sanction may be given to the alienation of land for building purposes near towns or village sites.

(v) Sanction may be given to the alienation of land—

(*a*) by wealthy zamíndárs owning much land, for commercial reasons or to improve or consolidate their properties,

(*b*) by indebted zamíndárs owning mortgaged land and desiring to sell a part of their land in order to raise money to redeem the whole or part of the rest.

(vi) Zamíndárs who, by reason of their insignificant numbers, have not been classed in the particular district as members of agricultural tribes will ordinarily be able as agriculturists to acquire, under Section 3 (*i*) (*b*), land situated in their own villages. Subject to these instructions, and particularly to (*i*), and when there is no reason to suppose that such zamíndárs are mere intermediaries attempting to evade the Act, sanction may be freely given to alienations of land situated elsewhere proposed or effected in their favour.

(vii) The instructions in (vi) apply also in the case of persons holding land in districts of the North-Western Provinces adjoining Punjab districts who, if they had held land in the Punjab districts, would have been deemed to belong to agricultural tribes. To applications for sanction in favour of subjects of Native States adjoining Punjab districts somewhat different considerations apply ; and such applications should be dealt with on their merits.

(viii) No Deputy Commissioner, unless specially authorized in this behalf by the Local Government, may, on his own authority, sanction an alienation to a money-lender, whether the money-lender is a zamíndár or a bania or any one else. It will generally be possible to ascertain from the income-tax papers whether any person is a money-lender or not. If it is clear that sanction might be given consistently with the objects of the Act, and that there would be hardship in refusing it, the Deputy Commissioner may transmit the file to the Commissioner and ask his permission to give sanction. The case will then be disposed of as the Commissioner may direct. If, however, there is any doubt, the Deputy Commissioner should refuse sanction and leave the parties, if so minded, to appeal.

12. Deputy Commissioners will see from Section 5 of the Act, that in dealing with applications for sanction under Section 3 they need not go into any question of title or any question relating to any reversionary right or right of pre-emption.

13. What is said in paragraphs 11 and 12 above applies equally (1) whether the permanent alienation has already been made or is merely proposed to be made; and (2) whether the case is reported to the Deputy Commissioner through the mutation procedure as provided in Notification No. 23 S., dated 22nd May 1901, or comes to his notice in any other way—as by an application made under Notification No. 24 S., dated 22nd May 1901.

14. When the permanent alienation is merely proposed to be made and is disallowed it is only necessary to communicate the order to the parties or to the revenue officer dealing with the mutation case. But if the permanent alienation has already been made and the Deputy Commissioner refuses sanction he must pass an order under Section 14 of the Act, declaring that the transaction will take effect as a usufructuary mortgage in form (*a*) permitted by Section 6, and fixing the term and the conditions which he considers reasonable.

15. As regards the conditions little latitude is allowed because those prescribed in Section 6 (*1*) (*a*) and in Section 7 would be applicable. Conditions may, however, be added in accordance with Section 8.

16. Some further explanations seem necessary as to the effect and working of Notifications No. 23 S. and No. 24 S., dated 22nd May 1901.

17. Notification No. 23 S., dated 22nd May 1901, is operative only in regard to permanent or temporary alienations which contravene the Act. Mutations of names due to alienations which do not contravene the Act will continue to be dealt with in the usual way under Chapter V of the rules under the Punjab Land Revenue Act. A special procedure is laid down for the purpose of bringing to the notice of the Deputy Commissioner permanent alienations which require his sanction, because such sanction is necessary if the transaction as such is to be allowed or to hold good ; and because if the transaction as such is disallowed, the alienation, nevertheless, is not entirely void, but takes effect

under Section 14 as a usufructuary mortgage. An order of the Deputy Commissioner under that Section is therefore necessary before any fresh entry can be made in the annual record or record of rights.

18. The case of temporary alienations differs materially. Zamíndárs may make temporary alienations in any form to other zamíndárs who are members of their own tribe or of a tribe in the same group. Temporary alienations of land made by zamíndárs to baniás or others do not require sanction, but may be made only in the forms prescribed by Section 6 of the Act, or in accordance with Section 11 or Section 12. If such temporary alienations contravene the Act persons claiming under them will not be able to get them enforced by the Courts at any rate as regards those matters in respect of which the Act has not been complied with.

19. If the temporary alienation is a lease or farm or a further mortgage of which the conditions are in accordance with the Act, then the special point for attention is the term of the lease, farm or mortgage. Unless the parties agree to some term permitted by law, mutation of names is to be refused.

20. If the temporary alienation is a mortgage which ought to have been made in accordance with Sections 6, 7 and 8, and has actually been made otherwise, then mutation of names is to be refused, and the parties will have two opportunities of applying to the Deputy Commissioner to revise and alter the terms of the mortgage so as to bring them into accordance with the Act. The parties can either do this directly mutation of names is refused, or they can do it later if their case comes into Court and the Court refuses to enforce the irregular mortgage. It has been suggested that these cases should be reported to the Deputy Commissioner through the mutation procedure like cases of permanent alienation in contravention of the Act, but it is thought that the amount of work which would so arise would be excessive, and that the parties or any other person interested may be left to make applications under Notification No. 24 S., dated 22nd May 1901. If, however, they choose to file a separate and duly stamped application in the course of the mutation case, the application may be forwarded to the Deputy Commissioner under rule 3 of that Notification and he can dispose of it under rule 5.

21. Notification No. 24 S., dated 22nd May 1901, has been so framed as to regulate all applications made in a separate form for the exercise of any of the powers conferred on Deputy Commissioners by the Act.

22. The report which is deemed to be an application under Notification No. 23 S., dated 22nd May 1901, does not require any stamp, the mutation fee being considered sufficient. But any one may apply on eight-anna stamp paper either before or after the transaction for the sanction of the Deputy Commissioner to a permanent alienation requiring the same under Section 3. The procedure is in the alternative. If the case is taken up by the officials and reported, no separate application need be made. But a separate application may be made in any case if the parties or any of them so desire; and it may be presented to an Assistant Collector, though only the Deputy Commissioner has power to decide the case.

23. Other applications which may be made to the Deputy Commissioner are the following:—

(1) Under Section 6 (1) (*b*) to place the mortgagee in possession:

(2) Under Section 6 (2) to fix the term and mortgage-money of the usufructuary mortgage:

(3) Under Section 7 (3) to fix the proportion of the mortgage debt to be deemed equitable:

(4) Under Section 9 (1) to revise and alter the terms of the mortgage:

(5) Under Section 9 (2) to put the mortgagee to his election as therein prescribed:

(6) Under Section 13 to eject a mortgagee, lessee or farmer and place the person entitled in possession:

(7) Under Section 15 to sanction an alienation of or charge upon the produce of land for more than one year.

24. In all these cases the procedure will be regulated by Notification No. 24 S., dated 22nd May 1901. It will be observed that, in addition to applications from the parties, Deputy Commissioners will have references made to them by Civil Courts under Section 9 (3) with a view to their exercising the powers conferred upon them by Section 9 of the Act. Their procedure will then be regulated by Notification No. 25 S., dated 22nd May 1901, which is in substance the same as rule 5 of Notification No. 24 S., dated 22nd May 1901.

25. Some of the cases above enumerated, as those in which applications may be made to Deputy Commissioners, call for further remark.

Application No. (2).—Here an order of the Deputy Commissioner is necessary whether an application is made by any party or not. If the mortgagor is ejected, the revenue officer ordering the ejectment under Section 45 of the Tenancy Act must report the case to the Deputy Commissioner, so that he may exercise the powers conferred upon him. If the mortgagor relinquishes or abandons his cultivating occupancy of the land, the necessary report to the Deputy Commissioner should be made by the patwári, the field kánúngo and the Tahsildar. The usufructuary mortgage resulting from the proceedings should be entered in the annual record or record of rights.

Application No. (3).—If the mortgagor brings a suit for redemption, the case may be referred to the Deputy Commissioner by the Civil Court for determination of the proportion of the mortgage debt which is to be regarded as due. The procedure of the Deputy Commissioner will then be regulated by Notification No. 25 S., dated 22nd May 1901.

Application No. (6).—Care must be taken to see that the commencement of possession under Section 6, Section 11 or Section 12 is duly entered in the *jamabandi*. The term for which the person in possession is entitled to hold may not expire for many years. If that person wrongfully remains in possession after expiry of the term, the case must be reported by the patwári, field kánúngo and Tahsildar to the Deputy Commissioner for orders.

Application No. (7).—The object of Section 15 of the Act is to prevent the evasion of its provisions by the substantial mortgage of the land under colour of the alienation of, or of a charge upon its produce. It is not intended to prevent zamíndárs from borrowing on the security of the crops of the two next following harvests, nor to interfere with *bonâ fide* contracts for the disposal of produce to large firms engaged, for example, in the wheat export trade. When a case under this section comes before a Deputy Commissioner the main point for his consideration is whether the transaction for which his sanction is sought will amount to an evasion of the Act. If not, restraint of trade being obviously objectionable, sanction should be freely given. When, however, the contract is made for more than one year by a zamíndár in favour of a money-lender, it is most probable that an evasion of the Act is intended.

26. A few provisions of the Act remain to be noticed.

27. Section 61 (*d*) empowers the Local Government to permit other forms of mortgage besides those specified in the Act to be used by zamíndárs in mortgaging their land to baniás and others; and Section 8 (1) (*c*) gives the Local Government a similar power as regards conditions of mortgage. Wide as this authority is, it is not intended to relax the safeguards of the Act in the case of mortgages to baniás or money-lenders. The object is to permit forms of mortgage, such as the *niáwa* of the Dera Ismail Khan District,* which are really quite innocuous and conditions which may be useful and do not give any bania or money-lender any undue advantage over a zamíndár. Proposals under these provisions of the Act may be made whenever they are necessary.

28. Section 16 forbids the sale in execution of decree of land belonging to zamíndárs. Further instructions will be issued with reference to this section after communication with the Chief Court.

29. A Circular will be issued by the Inspector-General of Registration on the subject of Section 17.

30. Revenue officers will observe that, except as specially directed by this Circular and by Notifications Nos. 23 S., 24 S. and 25 S., dated 22nd May 1901, their proceedings under the Alienation of Land Act are to be regulated by Chapter II of the Punjab Land Revenue Act. This provides for appeal, review and revision.

[**No. 9.**]

Copy of a Memo. No. 3711, dated 17th June 1901, from M. S. D. BUTLER, Esquire, Junior Secretary to Financial Commissioner, Punjab, to all Commissioners, except Pesháwar, all Deputy Commissioners, except Simla, Hazára, Pesháwar and Kohát.

IN this office Circular Letter No. 3441, dated 5th June 1901, general instructions were issued for the working of the Punjab Alienation of Land Act, 1900. I am now directed to inform you that with reference to Section 23 of the Act it is not the present intention of Government to invest any officer of lower rank than a Deputy Commissioner with the powers of a Deputy Commissioner under the Act. Commissioners, it will be observed, already have the powers under the Section as it stands, Deputy Commissioners, until the routine part of the business is thoroughly understood by their subordinates, should themselves do all the work which, by the terms of the Act, has to be done by a Deputy Commissioner. If, however, any Deputy Commissioner finds that the amount of extra work falling on him is such that he needs relief, he may apply for relief in such a

---

* The *niáwa* mortgage is explained in paragraph 707 of Mr. H. St. G. Tucker's Dera Ismail Khan Settlement Report and on pages 220-224 of Vol. III of Punjab Customary Law. The niáwadár is a middleman who obtains from the proprietors the right to manage their land on advancing a sum of money known as *niáwa*, and he cannot be ousted until this advance has been paid back. The proprietors receive such rent as is agreed upon with the niáwadár, who in turn gets this out of his tenants with something extra as his own share.

way as may be most expedient in the circumstances of his district. Either some Assistant Commissioner or Extra Assistant Commissioner might then be invested under Section 23 with the powers of a Deputy Commissioner under the Act or the Deputy Commissioner might be relieved of some of his Section 30, Criminal Procedure Code, cases or other magisterial work.

2. I am to add that these instructions have been issued with the approval of the Local Government.

[**No. 10.**]

Financial Commissioner's Circular No. 4, dated Lahore, 20th June 1901.

To all Commissioners and Deputy Commissioners in the Punjab.

Treatment of applications for sale of land in execution of decrees.

IN continuation of the orders contained in this office Circular Memo. No. 3 of 1891, relating to the treatment of applications for the sale of land in execution of decrees, and with reference to the remarks contained in paragraph 28 of this office Circular letter No. 3441, dated 5th June 1901, the Financial Commissioner invites the special attention of Commissioners and Deputy Commissioners to the provisions of Section 16 (1) of the Punjab Alienation of Land Act, 1900.

2. Now that the Act has been brought into force by a notification under Section 1 (3), land, which is defined in Section 2 (3) of the Act and includes land applied to agriculture or pastoral purposes, is no longer saleable in execution of any decree or order of any Civil or Revenue Court when it belongs to a member of an agricultural tribe as notified in *Punjab Government Gazette* Notification No. 21 S., dated 22nd May 1901. Accordingly no proposal for the sale in execution of decree of land belonging to a member of an agricultural tribe can now be made except by mistake, and, if any such proposal should reach a Commissioner, his proper course will be to reject it as not being in accordance with law.

3. Section 16 (1) of the Act, however, does not prohibit the attachment in execution of decree of the land of members of agricultural tribes, and such land may therefore still be dealt with in accordance with Section 326 of the Code of Civil Procedure, and in intervening or refusing to intervene the Deputy Commissioner will be guided by the same considerations as heretofore.

4. Land which does not belong to a member of an agricultural tribe remains unaffected by the provisions of the Act, and the directions of Financial Commissioner's Circular Memo. No. 3 of 1891 will continue to be applicable to its treatment.

[**No. 11.**]

Correction Slip No. 2, Volume I, Rules and Orders, 2nd Edition, dated Lahore, the 26th June 1901.

Add the following to the note under "Part G" of No. V, at page 25 :—

NOTE.—Under the provisions of the Punjab Alienation of Land Act, XIII of 1900, land as defined in Section 2 (3) of that Act, which belongs to a member of an agricultural tribe, cannot now be sold in execution of any decree of a Civil Court, and a proposal to sell such land can now only be made by mistake. If a proposal is made, the Commissioner must reject it as not being in accordance with law.

(*ii*) The Act does not prohibit the *attachment* of land belonging to members of an agricultural tribe, and action under Section 326, Civil Procedure Code, may be taken in regard to such land.

It must be understood that this note does not apply to land belonging to persons who are not members of an agricultural tribe.

[**No. 12.**]

Financial Commissioner's Circular No. 6, dated Lahore, 19th July 1901.

To all Commissioners and Deputy Commissioners in the Punjab.

Application of Act XIII of 1900.

COMMISSIONERS and Deputy Commissioners will have observed that by Notification No. 20 S., dated 22nd May 1901, in a *Government Gazette, Extraordinary, Punjab and its Dependencies*, the Punjab Alienation of Land Act, 1900 (XIII of 1900), was declared to come into force from June 1st, 1901. It was subsequently noticed that to bring the Act into force a Notification in the *Gazette of India* was necessary, and Punjab Notification No. 20 S., dated 22nd May 1901, was accordingly withdrawn and the Act was brought into force with effect from June 8th, 1901, by Notification No. 1243, dated 8th June 1901, in a *Gazette of India, Extraordinary*.

2. The effect of Punjab Government Notifications Nos. 21 S.—25 S., inclusive, dated 22nd May 1901, which were published along with Notification No. 20 S., referred to above, remains however unimpaired by this change of date. Under the provisions of Section 22 of Act X of 1897 (The General Clauses Act) these Notifications could be made and published in anticipation of the commencement of the Act at any time after the passing of the Act and they have accordingly taken effect from June 8th, 1901, the date of the commencement of the Act as explained above.

[No. 13.]

Financial Commissioner's Circular No. 8, dated 14th August 1901.

To all Commissioners, except Peshâwar, and all Deputy Commissioners, except Simla, Hazára, Peshâwar and Kohát

Instructions how to deal with mutation proceedings relating to transfers made before the commencement of the Punjab Alienation of Land Act, 1900.

1. The Financial Commissioner has been asked for a ruling as to how Deputy Commissioners should deal with mutation proceedings referred to them under Rule II of the Rules published under Punjab Government Notification No. 23 S. of the 22nd May, and relating to transfers made before the commencement of the Punjab Alienation of Land Act, 1900.

2. The following instructions are issued with the approval of the Local Government.

3. It is only in the case of permanent alienations that a reference is required by Act XIII of 1900 and the rules thereunder to be made to the Deputy Commissioner. Except as regards conditions intended to operate by way of conditional sale (Section 9 (2) and (3)), and sale, in execution of decree, of land belonging to members of agricultural tribes (Section 16 (1)), the Act is not retrospective in its effect. If the permanent alienation has been completed before June 8th, 1901, there is therefore no need arising out of Act XIII of 1900 to refer the case to the Deputy Commissioner at all; and the whole Revenue staff should be instructed accordingly. If, however, a reference is made, the Deputy Commissioner should deal with it on the principle that no objection is to be raised to the mutation on any ground arising out of Act XIII of 1900, inasmuch as that Act does not apply to the case.

4. As to temporary alienations, the like principle applies. Here no reference would in any case, as a consequence of existing instructions, be made by an official as such to the Deputy Commissioner, but Revenue Officers should be instructed that they are not to refuse sanction to mutations under Rule II (2) of the notification above quoted if the temporary alienation has been completed before the same date.

5. As to determining when an alienation has been completed, the Financial Commissioner does not think it is wise by any general order to import into these cases the issue whether possession has been had or not. He would hold the transaction to be complete if both parties by some formal act, such as the execution of a deed, or a concurrent application for mutation, had signified that they had completed it. In cases where deeds of sale had been executed before June 8th, 1901, the Financial Commissioner would certainly hold that, for present purposes, the transactions were complete. It might of course happen in disputed cases, where it was contended by one party that the transaction was not complete, that the question of possession would be material to the decision of that issue. Ordinarily it should be avoided.

6. It should also be noted in this connection that in the case of documents compulsorily registerable under Section 17 of Act III of 1877, the transactions to which they relate cannot be deemed to be complete unless and until such documents are duly registered. If, however, such a document is subsequently registered, it will operate from the *date of its execution*, and not from the date of its registration (Section 47 of Act III of 1877), and, consequently, if executed before the 8th June 1901, will not be affected by the provisions of Act XIII of 1900.

[No. 14.]

Copy of a letter No. 233 S., dated 17th August 1901, from M. S. D. Butler, Esquire, Junior Secretary to Financial Commissioner, Punjab, to the Settlement Commissioner, Punjab.

In reply to your letter No. 1932, dated 7th August 1901, I am directed to say that the Financial Commissioner agrees with you that Settlement Officers have no concern with the administration of the Punjab Alienation of Land Act.

[No. 15.]

The 23rd August 1901.

No. 98.—*Notification.*—In exercise of the powers conferred on him by Section 2 (1) of Act XIII of 1900 (The Punjab Alienation of Land Act), the Lieutenant-Governor of the Punjab is pleased, by this order in writing, to determine that in the Muzaffargarh District the expression "agriculturist" means a person holding agricultural land who either in his own name, or in the name of his ancestor in the male line, was recorded as the owner of land, or as a hereditary tenant or as an occupancy tenant in any estate at the Summary Settlement of 1866.

Provided that, if since the making of such settlement, a Civil Court or other competent authority has, before the commencement of this Act, decided that any person was wrongly included in, or omitted from the record thereof, or that any right recorded in the record is erroneously stated, this definition shall be construed with due regard to such decision.

[**No. 16.**]

The 23rd August 1901.

No. 99.—*Notification.*—In exercise of the powers conferred on him by Section 2 (1) of Act XIII of 1900 (The Punjab Alienation of Land Act) the Lieutenant-Governor of the Punjab is pleased, by this order in writing, to determine that in the Bhakkar and Leiah Tahsils of the Dera Ismail Khan District the expression "agriculturist" means a person holding agricultural land, who either in his own name, or in the name of his ancestor in the male line, was recorded as the owner of land, or as a hereditary tenant or as an occupancy tenant in any estate at the Summary Settlement of 1862.

Provided that, if since the making of such settlement, a Civil Court or other competent authority has before the commencement of this Act decided that any person was wrongly included in, or omitted from the record thereof, or that any right recorded in the record is erroneously stated, this definition shall be construed with due regard to such decision.

[**No. 17.**]

The 17th October 1901.

No. 111.—*Notification.*—In supersession of Notification No. 22 S., dated the 22nd May 1901, and in exercise of the power conferred by Section 24 of the Punjab Alienation of Land Act, 1900 (XIII of 1900), the Lieutenant-Governor of the Punjab, with the previous sanction of the Governor-General in Council, is pleased to exempt—

(1) from the operations of the provisions of the said Act other than those of Section 10 the following parts of the Punjab, namely—

(*a*) the district of Simla,

(*b*) the district of Hazára,

(*c*) the district of Peshawar,

(*d*) the district of Kohát,

(*e*) the Bannu and Marwat Tahsils of the district of Bannu, and

(*f*) the Dera Ismail Khan, Kulachi and Tank Tahsils of the district of Dera Ismail Khan; and

(2) from the operation of the provisions of the said Act, other than those of Section 1, Section 2, clauses (1), (2), (3) and (6), Sections 4, 10 and 16, Section 17, sub-section (1), Section 18, sub-section (2), Section 21, sub-section (2), and Section 24, every area included within the limits of any cantonment or municipality in any part of the Punjab not exempted from the operation of all the provisions of the said Act by clause (1) of this Notification.

[**No. 18.**]

The 8th November 1901.

No. 44.—*Notification.*—In exercise of the powers conferred on him by Section 25 of Act XIII of 1900 (Punjab Alienation of Land Act), the Lieutenant-Governor of the Punjab is pleased to make the following rules for giving effect to the provisions of Section 17 of the said Act:—

1. (*a*) When an instrument which records or gives effect to a permanent alienation of land, requiring, under Section 3 of the Act, the sanction of the Deputy Commissioner, is presented to a registering officer unaccompanied by a certified copy of an order giving such sanction; or

(*b*) when an instrument of agreement purporting to charge or alienate the produce of land, which, under Section 15 of the Act, requires the sanction of the Deputy Commissioner, is presented unaccompanied by a certified copy of an order giving such sanction; or

(*c*) when an instrument of mortgage which is required to be made in one of the forms prescribed in Section 6 of the Act is presented not made in any such prescribed form;

the registering officer in refusing to admit the instrument to registration shall proceed in the following manner:—

He shall (*d*) record no endorsement upon the document itself, nor shall he make any entry of reasons for refusal to register in Register Book II;

but (*e*) he shall enter his reasons for not admitting the instrument to registration in a separate book (to be prescribed and provided by the Inspector-General of Registration), and shall give to the presenter of the instrument a copy of such entry, and shall at the same time return the instrument unendorsed to the presenter.

2. An instrument of the kinds mentioned in the foregoing rule which has been returned thereunder may be presented again for registration, and may then be admitted to registration if accompanied by the certified copy of the order which was required, or if amended by the parties themselves, or by the Deputy Commissioner acting under Section 9 of the Act, so as to make it conform to the prescribed form.

3. (*a*) In registering an instrument of the kinds mentioned in clauses (*a*) and (*b*) of Rule 1 the registering officer shall regard the accompanying order of the Deputy Commissioner giving the necessary sanction as a part of the instrument, and shall cause a copy of such order to be entered along with the copy of the instrument in the appropriate Register Book; and

(*b*) in registering an instrument of the kind mentioned in clause (*c*) of Rule 1, when the same has been revised or altered by the Deputy Commissioner acting under Section 9 of the Act, the registering officer shall regard such order of revision or alteration as a part of the instrument, and shall cause a copy of such order to be entered along with the copy of the instrument in the appropriate Register Book.

4. An appeal may be lodged to the Registrar against any return of an instrument made by a Sub-Registrar under clause (*e*) of Rule 1, and, if the Registrar directs that the instrument shall be registered in the form in which it was originally presented, the Sub-Registrar shall register it accordingly. If the Registrar directs that the instrument shall be registered only after specified amendment or addition, then the provisions of Rule 2 as to admission to registration shall apply.

[No. 19.]

Circular No. 9, from Inspector-General of Registration, Punjab, to all Registrars in the Punjab, dated 15th November 1901.

1. The attention of Registering Officers is drawn to the rules made by the Local Government under the Punjab Alienation of Land Act, 1900, and published under *Punjab Government Gazette* Notification No. 44, dated the 8th November 1901, concerning the duties of Registering Officers in refusing or admitting registration of instruments alienating rights in land.

2. These rules were required because Section 17 of the Punjab Alienation of Land Act, 1900, enjoins that when an instrument is presented for registration, which—

(1) contravenes any provision of the Act, or

(2) records, or gives effect to, any transaction which requires the sanction of the Deputy Commissioner under the Act, and the instrument is not accompanied by a certified copy of the order giving such sanction,

the instrument shall not be registered.

3. To apply the rules properly, Registering Officers must acquaint themselves with the meaning of the terms "agriculturist" and "agricultural tribe" as used in the Act.

The definition of the word "agriculturist" is given in Section 2 of the Act, and it means, generally speaking, a person holding agricultural land who either in his own name, or in the name of his ancestor in the male line, was recorded as the owner of land, or as a hereditary tenant, or as an occupancy tenant, in any estate at the first regular settlement, or, if the first regular settlement was made in or since the year 1870, then at the first regular settlement, or at such previous settlement, as the Local Government may, by order in writing, determine.

As to the meaning of the term "agricultural tribe" Punjab Government Notification No. 21 S., dated 22nd May 1901, has decided what persons are members of agricultural tribes in each district. In each district all the tribes named in the Notification opposite the name of that district form, to all intents and purposes, one society between the members of which alienations are not restricted by the Act.

Nor are alienations by persons who are not members of agricultural tribes restricted by the Act (except in one instance mentioned below).

4. Therefore when a deed of permanent alienation of land is presented to a Registering Officer his first business is to consider who the alienor is.

If the alienor is not a member of an agricultural tribe the deed may be registered without attention to the question of who the alienee is, except in one case, and that is when the alienor is an agriculturist who has acquired the land in question from a member of an agricultural tribe of his village. In such case the alienee must be a member of an agricultural tribe, or an agriculturist of the village in which the land is situate. If the alienee is not such a person the instrument should not be admitted to registration, action being taken under Rule 1.

5. When an instrument of permanent alienation of land is presented, if the alienor is a member of an agricultural tribe, then the Registering Officer should ascertain who the alienee is.

If the alienee is (1) an agriculturist in the village in which the land in question is situate, or (2) a member of one of the agricultural tribes in the same district as the alienor, or of the same agricultural tribe in another district, the instrument may be registered without question.

If the alienee is not such a person, the Deputy Commissioner's sanction to the transfer is required, and, if no copy of such order is produced, the document should be returned unendorsed under Rule 1, with instruction that a copy of the Deputy Commissioner's order of sanction is required, and that the instrument can only be admitted to registration when this defect has been supplied, and it has been presented again under Rule 2.

6. When a mortgage-deed is presented it is necessary to ascertain who the alienor is. If he is not a member of an agricultural tribe, the deed can be registered without question, even although it contains a condition intended to operate by way of conditional sale, for, although such condition would be void under Section 10 of the Act, the deed in other respects would not be necessarily invalid.

If the alienor is a member of an agricultural tribe, then, if the alienee is also a member of one of the agricultural tribes in the same district as the alienor, or of the same agricultural tribe in another district, the deed may be registered without question.

But if the alienor is a member and the alienee is not a member of an agricultural tribe, then the deed should be returned under Rule 1, unless it is drawn up in one or other of the following forms—

(*a*) in the form of a usufructuary mortgage, by which the mortagagor delivers possession of the land to the mortgagee, and authorises him to retain such possession and to receive the rents and profits of the land in lieu of interest and towards payment of the principal, on condition that after the expiry of the term agreed on, or (if no term is agreed on, or if the term agreed on exceeds twenty years) after the expiry of twenty years, the land shall be re-delivered to the mortgagor ; or

(*b*) in the form of a mortgage without possession, subject to the condition that, if the mortgagor fails to pay principal and interest according to his contract, the mortgagee may apply to the Deputy Commissioner to place him in possession for such term, not exceeding twenty years, as the Deputy Commissioner may consider to be equitable, the mortgage to be treated as a usufructuary mortgage for the term of the mortgagee's possession, and for such sum as may be due to the mortgagee on account of the balance of principal due, and of interest due not exceeding the amount claimable as simple interest at such rate, and for such period as the Deputy Commissioner thinks reasonable ; or

(*c*) in the form of a written usufructuary mortgage by which the mortgagor recognises the mortgagee as a landlord and himself remains in cultivating occupancy of the land as a tenant, subject to the payment of rent at such rate as may be agreed upon not exceeding sixteen annas per rupee of the amount of the land revenue in addition to the amount of the land revenue of the tenancy, and the rates and cesses chargeable thereon, and for such term as may be agreed on, the mortgagor having no right to alienate his right of cultivating occupancy, and the mortgagee having no right to eject the mortgagor unless on the grounds mentioned in Section 39 of the Punjab Tenancy Act, 1887.

When a mortgage-deed is returned owing to its not being drawn up in one or other of the above forms, it may be accepted for registration if presented again in amended form under Rule 2.

7. When an instrument purporting to alienate or charge produce of land is presented, it is necessary to ascertain who the alienor is. If he is a member of an agricultural tribe, then, if the deed purports to alienate or charge the produce for more than one year, the Deputy Commissioner's sanction to the alienation is required, and, if no copy of such order of sanction is produced, the deed should be returned under Rule 1 with instructions that a copy of the Deputy Commissioner's order of sanction is required before it can be admitted to registration under Rule 2.

8. An instrument of lease or farm made by a member of an agricultural tribe should not be refused admission to registration merely because the term of years prescribed in Section 11 of the Act is exceeded in the conditions of the instrument, as the instrument in other respects would not be necessarily invalid.

9. If when an instrument is returned for amendment under Rule 1 it is entirely re-written and re-executed so as to form a fresh document which conforms to the form

prescribed by the Act, such fresh document may of course be admitted to registration under Rule 2 just as if it were the original document amended.

10. (*a*) Delay in registering a document occasioned by the necessity of obtaining any order of a Deputy Commissioner under the Punjab Alienation of Land Act, 1900, should, in the absence of any reason to the contrary, be held by the Registering Officer to be a delay due to urgent necessity within the meaning, and for the purposes of, Sections 24 and 34 of Act III of 1877, and in such cases Sub-Registrars should take the orders of Registrars accordingly.

(*b*) If any delay occasioned by the necessity of obtaining an order of a Deputy Commissioner under the Punjab Alienation of Land Act, 1900, is not due to any default on the part of the person desiring registration, the Registrar, in directing the registration of the document, should, whether he is acting under Section 24 or Section 34 of Act III of 1877, require payment of only a nominal fine. It is obvious that the fine or additional fine should be as nominal as possible, and an order for the payment of an amount of even only one anna in excess of the proper registration fee would satisfy the rule as to fines or additional fines, made under Section 69 of Act III of 1877 to meet cases of this kind.

11. (*a*) It is necessary to add that "permanent alienations" mean sales, exchanges, gifts and wills, but not gifts for religious or charitable purposes whether made by gift or by will.

(*b*) Also that "land" means land which is not occupied as the site of any building in a town or village and is occupied or let for agricultural purposes, or for purposes subservient to agriculture, or for pasture, and includes—

(*a*) the sites of buildings and other structures on such land;

(*b*) a share in the profits of an estate or holding;

(*c*) any dues or any fixed percentage of the land revenue payable by an inferior land-owner to a superior land-owner;

(*d*) a right to receive rent; and

(*e*) any right to water enjoyed by the owner or occupier of land as such.

[No. 20]

The 6th December 1901.

No. 6167 *S. R.—Notification*—In exercise of the power conferred by Section 9, clause (a), of the Indian Stamp Act, 1899 (II of 1899), the Governor-General in Council is pleased, where a fresh mortgage-deed is executed in lieu of a previous mortgage-deed for the purpose of giving effect to the provisions of Section 9, sub-section (2), of the Punjab Alienation of Land Act, 1900 (XIII of 1900), to remit so much of the duty with which such fresh mortgage-deed is chargeable as is not in excess of the duty already paid in respect of such previous mortgage-deed.

[No. 21].

Chief Court Circular Memo. No. 3—1118 G., dated Lahore, the 18th March 1902.

To—All Civil Courts in the Punjab.

SUBJECT.

Interpretation and working of Section 9, sub-section 3, of Act XIII of 1900.

SOME difficulty having been felt in the interpretation and working of Section 9, sub-section 3, of Act XIII of 1900 (Punjab Alienation of Land Act), the Hon'ble Judges are pleased to issue the following instructions :—

2. The difficulty of interpretation is in connection with the words "Proceedings for the enforcement of a condition intended to operate by way of conditional sale."

The question has been raised whether they mean proceedings taken under Section 8 of Regulation XVII of 1806 *only*, or whether they include proceedings in suits, appeals or execution of decree as well.

This Court has now held that the words above quoted mean proceedings under Section 8 of Regulation XVII of 1806 *only, vide* this Court's ruling in Punjab Record No. 26 of 1902 (Civil).

3. The difficulty in the working of the sub-section relates to the stage at which a reference should be made by the Civil Courts to the Deputy Commissioner. The question is whether the Civil Court should not postpone reference until it has recorded a finding as to the validity of the mortgage or on any dispute concerning limitation. The section itself is silent on the subject, but the Act must be construed reasonably, and it is obvious that, unless the mortgage is a subsisting one and is not time-barred, to refer any matters connected with it to the Deputy Commissioner is to waste time.

The Hon'ble Judges accordingly direct that Civil Courts shall not make references to the Deputy Commissioner under Section 9, sub-section 3, until they have disposed of any objections brought by the mortgagor against the validity of the mortgage, or of any plea raised by him on the point of limitation.

[No. 22]

The 16th July 1902.

No. 114.—*Notification.*—Consequent on the issue of the Punjab Government Notification No. 84, dated the 14th May 1902, by virtue of which the provisions of the Punjab Alienation of Land Act, 1900 (XIII of 1900), extend to the Attock Tahsíl of the Ráwalpindi District; and in supersession of so much of Punjab Government Notification No. 21 S., dated the 22nd May 1901, as applies to the Ráwalpindi District, of which the Attock Tahsíl did not form part at the time the last mentioned notification was issued, the Lieutenant-Governor of the Punjab, in exercise of the powers conferred on him by Section 4 of the Punjab Alienation of Land Act, 1900 (XIII of 1900), and with the previous sanction of the Governor-General in Council, is pleased to determine that all persons either holding land or ordinarily residing in the Ráwalpindi District and belonging to any one of the tribes hereinafter named are to be deemed to be agricultural tribes within the district of Ráwalpindi for the purposes of the said Act, that is to say—

Awáns.	Dhunds.
Rájputs.	Sattis.
Syads.	Danials.
Patháns.	Kethwals.
Koreshís.	Maliárs.
Khattars.	Mughals.
Jodhrás.	Jats.
Ghakkars.	Gujars.

Biloches.

2. All such "agricultural tribes" within the District of Ráwalpindí shall be deemed to be a group of agricultural tribes.

[No. 23]

The 1st October 1902.

No. 157.—*Notification.*—In exercise of the powers conferred on him by Section 2 (1) of Act XIII of 1900 (The Punjab Alienation of Land Act), the Lieutenant-Governor of the Punjab is pleased, by this order in writing, to determine that in the Isa Khel and Miánwáli Tahsíls of the Miánwáli District the expression "agriculturist" means a person holding agricultural land who either in his own name or in the name of his ancestor in the male line was recorded as the owner of land or as a hereditary tenant or as an occupancy tenant in any estate at the summary settlement of 1854.

Provided that if since the making of such settlement a Civil Court or other competent authority has before the commencement of this Act decided that any person was wrongly included in or omitted from the record thereof or that any right recorded in the record is erroneously stated, this definition shall be construed with due regard to such decision.

[No. 24]

Financial Commissioner's Circular Letter No. 96, dated Lahore, 14th January 1903.

To All Revenue Officers in the Punjab.

I am directed to convey the following instructions which are issued with the concurrence of Government as to the applicability of the Punjab Alienation of Land Act (XIII of 1900) to cases of the creation or transfer of occupancy rights.

2. The instructions now issued should be acted on until they have been modified by an authoritative decision of the Courts or by Government.

3. If a proprietor creates in favour of any person a right of occupancy in his, the proprietor's, proprietary land, the transaction is, for the purposes of the Alienation of Land Act to be considered to be a lease for more than twenty years, and, therefore, in the circumstances set forth in Section 11 of the Act, is to be deemed to be a lease for a term not exceeding twenty years.

4. It was not the intention of the Legislature, in drawing up Act XIII of 1900, to impose upon occupancy tenants any fresh restrictions in regard to the alienation of their holdings. It was held that their powers of alienation were already sufficiently restricted by Chapter V of the Punjab Tenancy Act (XVI of 1877), and consequently, although it was declared that "land" includes "a right to receive rent," the correlative of that right in certain cases, *viz.*, a right of occupancy, was omitted. Accordingly if a tenant having a right of occupancy transfers or attempts to transfer that right by sale, gift or mortgage, his case should be dealt with under Chapter V of the Tenancy Act, and Act XIII of 1900 should not be applied.

[No. 25]

THE ANNUAL REPORT ON THE WORKING OF THE PUNJAB ALIENATION OF LAND ACT (XIII OF 1900).

THE annual report on the working of this Act will deal with the year ending on the 30th September next before the date fixed for the submission of the report.

Every Deputy Commissioner will submit his report to the Commissioner some time during the month of October in each year. The Commissioner will forward it to the Financial Commissioner not later than the 20th November.

In sending on the district reports Commissioners will make such remarks as they think necessary.

District reports should be as brief as possible consistent with a concise statement regarding the topics detailed in the accompanying memorandum or as many of them as can be usefully noted on.

The district reports should be written on half margin and the parts should be kept quite separate. The provincial report will be limited to 10 pages of printed matter exclusive of statements.

The form of statements to accompany the report are given at the end of the memorandum.

Detailed memorandum as to subjects to be dealt with in the report on the working of the Punjab Alienation of Land Act (XIII of 1900).

No. of subject.	Detail of subjects with notes as to treatment.	Reference to statements.
	PART I.	
	PRELIMINARY.	
1	How has the definition of agriculturist worked? (Section 2 (1)). In particular, is there any need for the extension or restriction of the definition of "agriculturist"?	
2	How have the other definitions in Section 2 of the Act worked? In particular, has the exemption of gifts for religious and charitable purposes from the definition of "permanent alienations" been made a cloak for evading the law? (Section 2 (4)).	
	PART II.	
	TRANSFERS OF LAND.	
3	Note the areas sold, mortgaged and redeemed. State what classes are parting with, and what classes are acquiring, interests in land. Discuss the matter with reference to the enumeration and grouping of tribes. In particular, notice what has been the effect on the smaller notified tribes of the present wide market of free transfer between members of different agricultural tribes in the same district. Have the stronger tribes tended to absorb the lands of weaker tribes?	Nos. I and III.
	PART III.	
	PERMANENT TRANSFERS.	
4	In taking action under Section 3 of the Act how far have the instructions conveyed in paragraph 11 of Financial Commissioner's Circular letter No. 3441 of 5th June 1901 been found sufficient? In particular—	
	(*a*) what steps have been taken to ascertain that no member of an agricultural tribe included in the same group as the vender has offered or is ready to offer a fair price for the land, sanction to the alienation of which is requested? (Paragraph 11 (*b*) of Circular);	
	(*b*) have applications for leave to permanently alienate land to subjects of Native States and residents of the North-Western Provinces adjoining Punjab districts been made, and, if so, how have they been treated?	
5	How have the rules published under Punjab Government Notification No. 23 S., dated 22nd May 1901, worked so far as they affect permanent alienations? Do any improvements in procedure suggest themselves?	
6	Give number of proceedings granting or refusing sanction to permanent alienations (column 2 of Statement II), and discuss any matters of interest which have arisen in connection therewith.	No. II.
	PART IV.	
	TEMPORARY ALIENATION OF LAND.	
7	Has any difficulty been found in working Section (6) (1) (*c*) of the Act owing to the prevalence of rents in kind? How have kind rents been expressed in terms of the land revenue?	
8	Is there any need to permit by virtue of the powers conferred by Section 6 (1) (*d*) of the Act, any other forms of mortgage besides those specified in the Act or to permit any special conditions to be made in accordance with the powers conferred by Section 8 (1) (*c*)?	

Detailed memorandum as to subjects to be dealt with in the report on the working of the Punjab Alienation of Land Act (XIII of 1900)—concluded.

No. of subject.	Detail of subjects with notes as to treatment.	Reference to statements.
	PART IV—*concluded.*	
9	Give the number and result of the various kinds of applications received during the year (columns 3 to 8 of Statement II), and discuss any matters of interest in this connection. In particular in cases under Section 7 (3) of the Act on what principles has the proportion of the mortgage debt equitably due been fixed?	No. II.
10	How have the rules published under Punjab Government Notification No. 23 S., dated 22nd May 1901, worked so far as they affect temporary alienations? Is it desirable that in accordance with a suggestion mentioned in paragraph 20 of this office Circular letter No. 3441, dated 5th June 1901, temporary alienations which contravene the provisions of Sections 6, 7 or 8 of the Act should be brought to the notice of the Deputy Commissioner as a part of the mutation procedure, or is it preferable to leave the parties to take action of themselves?	
11	Do any remarks as to leases and farms under Section 11 of the Act suggest themselves? Is there any tendency to employ these provisions to evade the Act, and if so, how?	
	PART V.	
	GENERAL PROVISIONS.	
12	Have any applications under Section 15 of the Act to sanction alienations of or charges upon the produce of land for more than one year been made? In particular— (*a*) is there any tendency to employ the provisions of this section to evade the Act? (*b*) have the provisions of this section been found to hamper trade?	
13	Do any remarks as to Section 17 of the Act suggest themselves? In particular, has the delay necessitated by the need of getting the Deputy Commissioner's sanction to alienations under Section 3 of the Act been found to be such that documents cannot be registered within the period required by law? If so, does the remedy indicated in the Inspector-General of Registrations' Circular No. 9 of 15th November 1901 on the subject suffice?	
14	Are any further exemptions necessary under Section 24 of the Act?	
15	What amount of extra work has been thrown on Revenue officials by the Act?	
	PART VI.	
	GENERAL REMARKS.	
16	How is the Act regarded by the people generally? In particular— (*a*) What devices have been resorted to for evading its provisions? Is there any tendency for the subterfuges referred to in paragraphs 11 (*ii*), (*iv*) and (*vi*) of this office Circular letter No. 3441, dated 5th June 1901, to be adopted? (*b*) Has there been any appreciable contraction of credit amongst zamíndárs or any increased demand for takávi on that account? (*c*) What has been the effect of the Act on the prices realised for land, and also on rents? Are they less than before the Act came into force or less than they were before its first publication? (*d*) Do money-lenders complain of injury to their business? If so, what do they suggest should be done in their interest?	
17	Any other remarks.	

STATEMENT No. I.

TOTALS OF SALES, MORTGAGES AND REDEMPTIONS AND OTHER TRANSFERS FOR THE YEAR ENDING JUNE 15TH, 1900.

STATEMENT No. II.

STATEMENT SHOWING THE NUMBER OF PROCEEDINGS TAKEN AND APPLICATIONS DISPOSED OF UNDER THE PUNJAB ALIENATION OF LAND ACT XIII OF 1900 DURING THE YEAR.

STATEMENT No. III.

STATEMENT SHOWING SALES AND MORTGAGES OF LAND MADE BY AGRICULTURAL TRIBES SINCE THE INTRODUCTION OF THE LAND ALIENATION ACT IN THE _____ DISTRICT.

The statements will be found printed with the report.

Proceedings of the Hon'ble the Lieutenant-Governor of the Punjab and its Dependencies in the Department of Revenue and Agriculture (Agriculture), No. 37, dated 19th March 1904.

READ—

Report on the working of the Punjab Alienation of Land Act, XIII of 1900, for the year ending 30th September 1903, forwarded with the letter of the Senior Secretary to the Financial Commissioner, Punjab, No. 162, dated 22nd February 1904.

REMARKS.—This report was due with the Local Government on the 31st January, but was not received until the 27th February. It is within the prescribed limits.

PART I.

The working of the Act.

2. Some difficulty is still experienced in working the definition of "agriculturist" contained in Section 2 of the Alienation of Land Act, and in understanding the special status assigned to an "agriculturist" by the provisions of the Act; but the Lieutenant-Governor hopes that careful compliance with the orders contained in the Director of Land Records' Circular No. 9, dated 20th November 1903, will obviate these difficulties in future. His Honour agrees with the Financial Commissioner that it is undesirable that Deputy Commissioners should, as has been done in some districts, prepare lists of people claiming the status of agriculturist after ascertaining that they really possess the necessary qualifications. His Honour also agrees that the enquiry suggested by the Commissioner of Delhi with a view to ascertain how far money-lenders come within the definition of agriculturist need not be undertaken, and that an examination of the certificates granted under the Circular just cited will serve the same purpose. There is at present no intention of undertaking legislation for the purpose of abolishing the statutory agriculturist, but the Lieutenant-Governor notices that this is one of the chief departures from the Punjab Act which is proposed in connection with the extension of similar legislation to the North-West Frontier Province. It is satisfactory to note that few cases of gifts for religious or charitable purposes being used as a subterfuge for evading the provisions of the Act have been reported. Doubts have in some cases arisen as to the exact meaning of the proviso as to gifts for such purposes, but no general ruling can be given, and each case must, as suggested, be determined on its merits.

3. Sir Charles Rivaz is glad to notice that the instructions issued for the guidance of Deputy Commissioners in determining whether to grant or refuse sanction in the case of permanent alienations are working well, and that the assistance of the *zaildári* and *inámdári* agency in arriving at a decision is being had recourse to. In all cases the grounds for refusal should be explained to the parties, and the attention of Deputy Commissioners is invited to the directions contained in this connection in Financial Commissioner's Circular No. 4, dated 9th September 1903. In the case of temporary alienations the rules are also reported to work well. If occasion arises, the Lieutenant-Governor will be prepared to consider the question of the amendment of the Act so as to allow forms of mortgage not at present consistent with its provisions, but His Honour doubts if such cases as that referred to in paragraph 7 of the Report are likely to be numerous. As with permanent alienations, it is equally desirable that the grounds of refusal in the case of temporary alienation to which sanction is not accorded should be explained to the parties. The point noticed in paragraph 8 of the Report as to whether a Civil Court is bound to refer to the Deputy Commissioner, when a suit is instituted for possession of proprietary right, in consequence of a mortgage after the proceedings under Regulation XVII of 1806 have been completed and a year of grace has expired, is an important one, which the Financial Commissioner will no doubt refer to Government in due course.

4. The attention of Deputy Commissioners is invited to the remarks made in paragraph 10 of the Report with regard to the necessity for the careful scrutiny of the working of Sub-Registrars so far as cases affected by the Act are in question. As the Financial Commissioner anticipates, the issue of general

instructions by the Inspector-General of Registration to Sub-Registrars informing them of the purport of the Circular quoted in paragraph 2 above should remove one of the chief difficulties with which a Sub-Registrar is at present confronted, that is to say, that of deciding as to the status of people claiming to be agriculturists. The question of the extension of the provisions of the Act to agricultural land in Municipal limits in certain cases should be separately referred for orders.

5. The Financial Commissioner reports that the Act continues to be popular with the zamindars and agriculturists, and that the idea that a sort of social distinction is conferred by membership of an agricultural tribe is spreading. Evasions of its provisions, which are rendered possible by the present law of pre-emption, are said to have occurred in several districts, and it is to be regretted that it has not been possible to carry out the amendment of that law as quickly as was anticipated. Some contraction of credit possibly continues, but there is no ground for assuming that it acts otherwise than in the direction of curtailing extravagant and needless expenditure. At the same time signs are not wanting that one of the dangers foreseen in passing the Act has begun to appear in so far as rich zamindars have in certain cases shown a tendency to supplant the village banker and turn money-lenders pure and simple. This is a tendency that, as previously observed, must be carefully watched and guarded against. On the other hand, it is gratifying to note that the attitude of the *bania* towards the Act has undergone a favourable change; that mortgages permitted by the Act which were formerly blindly refused are now not only accepted, but are on the way to become common; that there are good grounds for hoping that in due course the usual traditional relations between the village money lender and his clients will be resumed; and that the setting free of capital hitherto devoted to the encouragement of extravagant and unproductive expenditure will act as a stimulant to industrial enterprise. It is again noticed that the provisions of Section 15 of the Act regarding loans on the security of crops are still not generally known.

PART II.

Analysis of Statements.

6. The actual statistics in regard to gifts and exchanges call for no comment. The figures in regard to mortgages confirm the statement already made that forms of mortgage permitted by the Act are coming into use and also disclose a rise in the mortgage value of land as compared with the previous year, which is noteworthy in view of the anticipations entertained by many persons that one effect of the Act would be to permanently depreciate the value of land. It is, however, yet too early to draw any satisfactory conclusions as to the effect of the Act on the price of land. The area of land redeemed shows a decrease, most probably due to the harvest not being so good as that in the previous year, but though the actual area is smaller than might at first sight be expected, it is pointed out that it represents land really freed from encumbrance, and not a mere nominal redemption for the purpose of re mortgaging. Applications for sanction to transfers required by the Act, which show a marked rise and afford another sign of the Act being better understood than before, appear, as a rule, to have been dealt with judiciously by the District Officers, and misconceptions both as to the requirements and spirit of the Act seem to be less common.

7. No decided opinion can yet be formed as to the effect of the Act on the various agricultural tribes and agriculturists, and at present any attempt to do so is vitiated by the fact that figures relating to transfers include a comparatively large number of transactions not affected by the Act because completed before it came into force, but Jats and to a less extent some other tribes apparently are gaining land in some districts while Rajputs are losing ground. The Financial Commissioner is fully alive to the necessity for watching the effects of the Act in this respect and for taking steps to protect the poorer tribes against the encroachment of the richer ones, if this is required. The Lieutenant-Governor, however, agrees that we must first decide whether to abolish

the statutory agriculturist before we attempt any general regrouping of agricultural tribes, and His Honour is strongly inclined to think that the sooner a decision is come to on this point the better.

8. The general conclusions arrived at as to the working of the Act, which are summarised in paragraph 35 of the Report, agree with the results of the Lieutenant-Governor's own enquiries during his tours in different parts of the province. Sir Charles Rivaz thinks that it may be safely asserted that the Act has achieved its main object of placing material checks on alienations of land without unduly impairing agricultural credit and without causing any substantial depreciation of the value of land, while it has had a highly beneficial effect in the direction of curbing the natural proneness of the Punjabi zamindar to habits of profuse extravagance. There are weak points in the Act which have been noticed in the preceding paragraphs of this review, and which require to be very carefully watched, and if necessary, remedied ; but, as regards the general effect of the Act since it came into operation in June 1901, Sir Charles Rivaz thinks it may be reasonably claimed that the hopes and expectations of its authors and supporters have been realised so far, at all events, to a highly satisfactory extent.

ORDER.—Ordered that the above remarks be printed and circulated with the Report ; also that they be published in the *Punjab Government Gazette*, be communicated to the Financial Commissioner, Punjab, and forwarded to the Government of India, Revenue and Agricultural Department, with the usual number of spare copies of the Report.

By order of the Hon'ble the Lieutenant-Governor,

J. F. CONNOLLY,

Offg. Revenue and Finl. Secy. to Govt., Punjab.

Punjab Government Press, Lahore—21.3.04—400.—C. L.

No. 162.

STATEMENTS.

Nos.

I.—Totals of sales, mortgages and redemptions and other transfers.

II.—Statement showing the number of proceedings taken and applications instituted and disposed of under the Punjab Alienation of Land Act, XIII of 1900.

III.—Showing details of mortgages.

IV.—Showing details of sales.

V.—Abstract of sales and mortgages by districts.

VI.—Statement showing losses by, and gains to, agricultural tribes by sales and mortgages.

VII.—Showing redemptions of mortgages by members of notified agricultural tribes.

APPENDIX.

Orders and instructions issued under Act XIII of 1900.

ANNUAL REPORT

OF THE

WORKING OF THE PUNJAB ALIENATION

OF

LAND ACT, XIII OF 1900,

FOR THE YEAR ENDING 30TH *SEPTEMBER*, 1903.

PART I.—The working of the Act.

SECTION I.—PRELIMINARY.

1. In this report, unless the contrary appears from the context, the word "zamíndár" will be used as the equivalent of "member of an agricultural tribe," and the word "agriculturist" will be used only in the technical sense given to it by the Act.

Working of the definitions.

2. The general conclusion to be gathered from reading the district reports is that the special status of "agriculturist" is not understood yet by the people generally or even by some Revenue Officers. A certain amount of difficulty has been experienced in ensuring that people claiming the status of agriculturists shall really possess the necessary qualifications. In some districts, *e.g.*, Ludhiána and Siálkot, the Deputy Commissioners are making out lists of such people by villages, but the Financial Commissioner agrees generally with the Commissioner of Lahore when he gives it as his opinion that the preparation of such lists is not advisable as it is a means of bringing to light the persons who can act as intermediaries, and moreover the principle which has always been kept in view is that the onus of proving his status should always rest on the man who claims it. The existing orders on the subject are contained in Director of Land Records' Circular No. 9, dated 20th November 1903, which is printed as No. 32 of the Appendix to the present report. It provides for the grant of certificates on application after due inquiry, and it is hoped that it will obviate the difficulties which have hitherto been experienced. The Commissioner of Delhi suggests that a general inquiry should be made with a view to ascertaining how far money-lenders come within the definition of agriculturists, but as this would involve the preparation of lists by villages which, as it has been seen, the Financial Commissioner does not favour, Sir Lewis Tupper thinks it better not to make such an inquiry at present. An analysis of the certificates which are granted under the orders contained in the circular above quoted will serve the same purpose and the subject will be included in the scheme for next year's report. Were early legislation contemplated for the purpose of abolishing the statutory agriculturist the objection to preparing village lists of agriculturists would cease to apply and the general inquiry suggested by Mr. Gordon Walker might be a useful preliminary.

In the Hissár and Jhelum reports the question has been raised whether a *jogi* or the person in charge of a shrine can be held to be an agriculturist where his predecessor in interest, of whom he is not however the lineal descendant in the male line, held land at the first regular settlement. The wording of Section 2 (1) of the Act must, the Financial Commissioner thinks, be construed literally, and accordingly he sees no reason for holding that a person who is not in the male line of descent, but only the *chela* or disciple of his predecessor in interest, possesses the status of an agriculturist.

It is interesting to note that it is now under consideration to introduce an Act similar to Act XIII of 1900 in the North-West Frontier Province.

The chief departures proposed from the Punjab Act are the omission of the statutory agriculturist and the extension of the protection of the Act to occupancy tenants.

Gifts for religious purposes.

3. Few cases of gifts for religious or charitable purposes being used as a subterfuge for evading the provisions of the Act have been reported. Where they have occurred, they have as a rule presented no difficulty. In the Hoshiárpur and Amritsar reports however some doubt is expressed as to the exact scope of the proviso as to gifts for such purposes not coming under the meaning of "permanent alienation." Instances would be gifts to a menial, or to a mirási or Brahmin on the birth of a son. The Commissioner of Jullundur gives it as his opinion that a gift to a family priest would fall under the proviso, but that a gift to a menial would not. The point turns on the meaning of the words "charitable purpose." Broadly speaking, the Financial Commissioner is of opinion that the Commissioner is right, but he thinks the question is not one on which a general ruling can be given in an annual report and that each case must be decided on its merits.

Section II.—Permanent Transfers.

Working of instructions.

4. The instructions conveyed in paragraph 11 of the Financial Commissioner's Circular letter No. 3441, dated 5th June 1901, have been generally found sufficient. The tahsil agency is generally employed in making inquiries as to eligible purchasers when application is made by a member of an agricultural tribe to sell land to a person other than a zamíndár or agriculturist. In some districts it is reported that proclamation is made in the village and surrounding villages, and the Financial Commissioner is glad to see that the suggestion made in last year's report, that the *zaildári* and *inámdári* agency should be made use of in this connection, has been acted on by some Deputy Commissioners. These inquiries necessarily include inquiries into what is a fair price of the land.

Only two cases have been reported of permanent transfers to men living in Native States. One of these is from Hoshiárpur. Permission to sell was at first refused, but as it was ascertained that, though a native of Kapúrthala, the alienee was also a zamíndár of the Hoshiárpur District through owning land there, mutation of names was sanctioned. The other case occurred in Gurdáspur, where the alienee was a native of Jammu. Sanction was granted as the alienee was related to the vendor and had only recently settled in Jammu. No cases of sales to residents in other Provinces have been reported.

Working of the rules.

5. The rules published under Punjab Government Notification No. 23 S., dated the 22nd May 1901, as far as they affect permanent alienations, appear to be working well. The only suggested improvement is that when a Revenue Officer refuses sanction to a mutation which contravenes the Act he should explain to the parties concerned the reasons of the rejection, ascertain their wishes and meet them then and there as far as possible, provided they agree to a course of action permitted by the Act. No change in the published rules is however required, and Financial Commissioner's Circular No. 4, dated the 9th September 1903, printed as No. 30 in the Appendix to this report, meets the case.

Section III.—Temporary Alienation of Land.

Mortgages under Section 6 (1) (c).

6. No cases whatever of mortgages in the form permitted by Section 6 (1) (*c*) of the Act have occurred, except one doubtful case which will presently be referred to, and consequently no difficulties have arisen on account of rent being paid in kind. The doubtful case is reported from Dera Gházi Khan. In this a zamíndár mortgaged his land with possession to a non-agriculturist for Rs. 300 for a period of 20 years, and on the same day the latter leased the land back to the mortgagor for cultivation on payment of Rs. 50 per annum for the same period. Taking these two transactions together a mortgage in the form contemplated by Section 6 (1) (*c*), but in which the annual payment exceeded that permitted by the Act, was the result and mutation was accordingly refused and the parties directed to apply to have the terms revised.

Need for any other forms of mortgage.

7. In many districts mortgages in the form allowed by Section 6 (1) (*a*) are now coming into use, especially in Hoshiárpur, Jullundur and Ferozepore. No suggestions have been made as to the necessity for permitting any other forms of mortgage or conditions besides those permitted by the Act except in the case of Hoshiárpur and Jullundur. In these districts apparently cases have arisen where a zamíndár who had mortgaged his entire holding to a *bania* before the coming into force of the Act in a form not permitted by the Act now finds himself in a position to redeem that mortgage by re-mortgaging a portion of his holding on the same terms to another *bania*. Such a case is probably rendered possible by the increased value of the land in the interval succeeding the first mortgage, and it would be to his advantage to conclude the second mortgage as he would thereby free a portion of his holding from encumbrance, but in the Hoshiárpur case the new mortgage was not consistent with the Act and the Deputy Commissioner though applied to had no power to sanction it. Such cases are not likely to be numerous, but if they do tend to become so they will undoubtedly deserve consideration.

The working of the rules.

8. The rules published in Punjab Government Notification No. 23 S., dated the 22nd May 1901, as far as they concern temporary alienations appear to have worked well. As regards the vexed question whether transactions which contravene the provisions of Sections 6, 7 or 8 of the Act should be brought to the notice of the Deputy Commissioner as part of the mutation proceedings or not, a step in advance has been taken by the issue of Financial Commissioner's Circular No. 3, dated the 10th August 1903, printed as No. 29 in the Appendix to the present report. It will be seen that the Financial Commissioner has decided against the report to the Deputy Commissioner as part of the mutation proceedings, and relies on the careful scrutiny of decided cases to bring mistakes to light. The reasons which led to the adoption of this view are set forth in paragraph 2 of the Circular and need not be repeated here. As in the case of permanent alienations, so here it is of importance that Revenue Officers when refusing sanction to a mutation, because the transaction contravenes Sections 6, 7 or 8 of the Act, should explain carefully to the parties concerned the reasons for refusal. As has been reported by more than one Deputy Commissioner it is believed that the parties will in many cases modify the terms of the transaction at once to bring them into accordance with the Act and then a new mutation can be drawn up and sanctioned, saving trouble to the parties and to the Revenue Officers concerned.

The Financial Commissioner has under consideration the question whether a Civil Court is bound to refer to the Deputy Commissioner when a suit is instituted for possession or proprietary right in consequence of a mortgage after the proceedings under Regulation XVII of 1806 have been completed and the year of grace has expired.

Leases and Farms.

9. There is little to comment on with regard to the working of Section 11 of the Act. A case is reported from Gurdáspur where a zamíndár borrowed money from a *bania* on a simple bond with a specified rate of interest and gave the latter a lease of his land in lieu of the interest. The Commissioner remarks that this may be in reality a permanent mortgage and he is asking the Deputy Commissioner to report the case more fully.

Section IV.—General Provisions.

The Act and Registration.

10. There is nothing of interest to record under this head. The instructions issued by the Inspector-General of Registration in his Circular No. 9, dated the 1st November 1901, are found to meet all requirements. It seems doubtful whether some of the unofficial sub-registrars have made themselves properly familiar with the provisions of the Act, and Deputy Commissioners in their capacity as Registrars of their districts should carefully scrutinize the working of their sub-registrars, with special attention to cases affected by the Act. One of a sub-registrar's chief difficulties hitherto has been to satisfy himself as to the status of people claiming to be agriculturists. Circular No. 9 of the 20th November 1903, issued by the Director of Land Records, to which the attention of the Inspector-General of Registration has been drawn with a view to the issue of general

instructions to sub-registrars, informing them of its purport, will, it is hoped, obviate the difficulties in this respect which they have hitherto experienced. False declarations as to the tribe or caste of the alienor or alienee by persons presenting deeds for registration appear to occur occasionally. It therefore behoves all officers registering deeds affected by the Act to verify carefully the tribe or caste of the parties before admitting a deed to registration.

Local extent.

11. No changes have been made in the local extent of the Act during the year; and, except as will presently be mentioned, none appear to be called for at present. The Deputy Commissioner of Lahore, however, draws attention to the advisability of extending the provisions of the Act to agricultural land within Municipal limits where such is considerable. The Commissioner agrees with the Deputy Commissioner and says: "There is no reason why a zamíndár near a town should not be protected merely because an arbitrary line includes his village within Municipal limits. The notification should remain, but Government might in special cases exclude from its operation purely agricultural villages which have for convenience of boundary demarcation been included in the Municipal area." The point was also referred to in paragraph 25 of last year's Provincial report. It is certainly one for further consideration if the difficulties as to notification can be overcome satisfactorily. The point is one, however, which must be separately considered.

Extra work caused by the Act.

12. In no district has the amount of extra work entailed by the Act been found to be excessive. In fact there is a very general opinion that the Act has led to a net decrease of work all round including litigation. The volume of work varies from district to district according to local conditions; for instance, in Hissár and Ferozepore there is still much to be done in dealing with the conditional sale clause in mortgages; and generally the instructions relating to the scrutiny of mutation papers must for a time increase work until all the old cases have been carefully examined and mistakes put right. The work generally is likely to decrease as people and officials become better acquainted with the Act, and as the necessity for issuing new circular orders becomes less.

Section V.—General Remarks.

Reception of the Act.

13. The Act continues to be popular with the zamíndár and agriculturist. The idea that a sort of social distinction is conferred by membership of an agricultural tribe notified under the Act, which was noticed in last year's report, appears to be spreading, and anxiety on the part of a good many tribes who have not been notified to be included in the list has been evinced in various districts. In Multan it is reported again that the poorer zamíndárs often find themselves in difficulties owing to the contraction in their credit caused by the Act, and their consequent inability to raise loans. Judging by the district report it would appear that the attitude of money-lenders in Multan towards the Act is more hostile than it is anywhere else in the province, but the Commissioner seems inclined to doubt whether the Deputy Commissioner has not taken a somewhat exaggerated view of the situation. In the adjoining district of Dera Gházi Khan the Deputy Commissioner observes: "The most marked features of the administration of the Act are to my mind the smooth and easy manner in which it has been generally accepted, the rapidity with which its principles and provisions seem to have become generally known, and the remarkably few cases in which evasions are attempted. On the whole the Act seems to me to be becoming gradually popular with the agricultural classes. The *bania* accepts it with resignation."

Evasions of the Act.

14. Cases similar to those reported from Hissár and Shahpur and referred to in the last annual report, where a *bania* in collusion with a zamíndár brings a suit for pre-emption and the zamíndár confesses judgment, are again reported from several districts and show the necessity which exists for amending our law of pre-emption. *Benámi* transactions also appear to have been fairly common despite the fact that the real vendee possesses no legal status with reference to the transaction. The more general *modus operandi* appears to be as follows:—the nominal mortgagee, a

zamíndár, takes land on mortgage from the zamíndár mortgagor, the *bania* supplies the money and the nominal mortgagee executes a registered bond for the amount. The *bania* takes possession of the land as a tenant-at-will of the nominal alienee and enjoys the profits in lieu of interest for which he gives him receipts annually. The general opinion, however, is that owing to the insecure position of the *bania*, such cases are not likely to be very numerous. The Commissioner of Delhi reports that in Rohtak a good many cases have occurred in which a suit has been brought on a mortgage which includes a condition of sale, this condition has been dropped and the parties have agreed to a compromise by which the mortgagor undertakes to pay a sum of money (by instalments or at once) with the condition that if default is made in payment the mortgagee will be entitled to get possession, in a few cases actually as owner, generally by way of mortgagee for an indefinite period. The Civil Court makes no reference to the Deputy Commissioner, possibly because of the compromise. The decree is generally in the form of a money decree and if the money is paid no question concerning the Act arises. But the decree is further for possession according to the agreement in default of payment. As the Commissioner states that he is referring the various points involved separately the Financial Commissioner will not discuss the matter further at present until he has had an opportunity of seeing the reference.

Contraction of credit.

15. There is not much to add to the remarks made in paragraph 29 of last year's report as to the effect of the Act on credit. Crops were generally fairly good and no difficulties are reported to have been felt except perhaps in Multan to which reference has already been made in a previous paragraph. It is only in Lahore, Multan and Muzaffargarh that an increased demand for *tákkavi* loans is ascribed to contraction of credit caused by the Act, and even in these districts it appears very doubtful whether the Act is really a cause of the increased demand. The following remarks of the Deputy Commissioner, Hoshiárpur, probably apply to the other districts of the Jullundur Division. "The more well-to-do zamíndárs are taking the place of sáhúkárs in financing their poorer brethren, while the process of curtailment in extravagant and needless expenditure has, I think, continued without trenching on that which is necessary for agricultural efficiency." In some of the reports it is said that poor zamíndárs are able to obtain loans when wealthy zamíndárs give security for them; and so far as the tendency is for the rich to help the poor the result is quite satisfactory. But so far as the rich zamíndár turns money-lender and acts as such merely with the object of enriching himself still further one of the dangers foreseen in passing the Act has begun to appear. The Act has, as far as can be ascertained, had no effect on rents throughout the province.

Money-lenders and the Act.

16. The attitude of money-lenders towards the Act and towards zamíndárs appears to have undergone some little change during the year. They have no suggestions to offer except the total abolition of the Act, but signs are not wanting nevertheless that loans—generally small ones however—are more easily made to zamíndárs than they were when the Act first came into force. Favourable harvests have helped no doubt to produce this effect, and it is a fortunate circumstance that for the first two years since the Act has been in operation there has been nothing approaching famine in any part of the province. Too severe a strain has thus not been put on the Act in the beginning, and the initial *non possumus* attitude adopted by the money-lenders is, it is believed, gradually changing to a more favourable one with greater acquaintance with the Act and its provisions and possibilities. It was observed at first that *banias* would have nothing to do with mortgages in the forms permitted by the Act; but it now appears that their objection is relaxed in a good many districts and such mortgages are on the way to become common. The reports generally go to confirm the belief that after a time the usual traditional relations between the village money-lender and his clients will be resumed, but with the difference that rural extravagance on ceremonial occasions will have been greatly checked. If so, there will be surplus capital for more productive expenditure; and it is noticed in many of the district reports that money-lenders are turning their attention to trade to a considerable degree. The Deputy Commissioner of Hoshiárpur makes some interesting remarks in this connection. He says: "Money-lenders of course complain of injury to

their business, but, as noted last year, this is being more and more diverted into the channels of legitimate trade, and this process appears to be introducing keener competition into the business of distribution with corresponding advantage to the consumer. At Jejon in the Garhshankar Tahsil, where there is a considerable trade in European piece-goods and country cloth, it is said that, owing to the withdrawal of capital from agriculturists and the consequent surplus in the hands of money-lenders and cloth dealers, European piece-goods, which used to be sold at a profit of one anna and a half per rupee, have, since the new Act, commenced to sell at a profit of six pies per rupee only. Whatever may be the precise amount of truth in this statement it tends to indicate a direction in which the Act is having important economic effects. One result of the Act will, I think, be to promote, in some degree, the industrial as opposed to the agricultural development of the more advanced portions of the province. It need hardly be pointed out that this will re-act not unfavourably on the agricultural classes by providing employment in tracts where holdings are becoming too small to enable agriculture alone to provide a fully sufficient livelihood. On the other hand the opportunities for the investment of capital in trade and industry must, for a considerable time to come, be limited though gradually increasing." It will certainly be most fortunate if one of the unexpected effects of the Act is to stimulate legitimate commerce and manufacturing industries by setting free capital hitherto devoted to loans for extravagant and unproductive expenditure. In the Punjab agricultural development has received a great impetus from canals and colonies; but industrial development lags behind; and anything which promotes it is to be welcomed as on the true lines of advance. Many of the protestations of money-lenders as to the effect of the Act on their business appear to be made with a view to getting a reduction of their income-tax, but as mentioned in last year's report such statements must be received with caution and examined carefully, for, as the Commissioner of Jullundur points out, "new shops are being opened and incomes are becoming liable to income-tax which were not previously liable."

Other matters. Loans on the security of crops.

17. As regards loans on the security of crops no very detailed information is forthcoming, but as far as can be ascertained they seem to have been very generally made. Only one application under Section 15 of the Act to charge produce for more than a year has been recorded in Statement II, but the Commissioner of Lahore has submitted a case from Montgomery which apparently required the sanction of the Deputy Commissioner under that section, and such agreements are reported to be common in the district. It seems as if the provisions of this section are not generally known, and, as noted in last year's report, it appears likely that its operation will only be tested when a case comes into court.

Settlement Officers and the Act.

18. The position of Settlement Officers with regard to the Act, which was explained in paragraph 33 of the last Annual Report, has now been slightly modified by the instructions issued in Financial Commissioner's Circular No. 563 of the 25th January 1904, printed as No. 33 in the Appendix to the present report. While powers of sanction will still remain with the Deputy Commissioner in a district under settlement, the Settlement Officer is now given certain duties with reference to the scrutiny and preparation of mutations which are affected by the Act. It is, however, provided that in tracts where large extensions of canal irrigation are taking place and numerous exchanges of land which amount to permanent transfers within the meaning of the Act occur, the Settlement Officer may, if necessary, be recommended for powers of a Deputy Commissioner under the Act to dispose of these purely formal transactions.

Agricultural banks, &c.

19. The subject of agricultural banks and that to be presently referred to are intimately bound up with the Alienation of Land Act, and accordingly the state of the case as regards them must be referred to. A Bill to legalise the constitution of co-operative credit societies has been framed by the Imperial Legislature and was circulated for opinion. The Financial Commissioner has submitted the opinions of Revenue Officers to Government with his advice which has been framed with special reference to the needs of the province under the conditions created by the Alienation of Land Act.

The other subject is the extension of the period of limitation for suits for simple debts and unregistered bonds. The Bill has been introduced in the local Legislative Council and has been considered by a select Committee. A further expression of public opinion consequent on the publishing of the report of the select Committee is now awaited.

The Appendix.

20. The collection of rules and orders in the Appendix to the last Annual Report has been found so useful by many District Officers that this year instead of merely printing new additions to the circulars and orders it has been decided to bring the whole collection up to date. It has been suggested by more than one Deputy Commissioner that the collection should be translated and issued separately as a pamphlet, prefaced by a Vernacular copy of the Act, for the use of Tahsildars and Revenue Assistants who are unacquainted with English. The suggestion will be duly considered by the Financial Commissioner.

PART II.—Analysis of Statements.

Statement I.

21. Statement I deals generally with all transfers, mutations regarding which were sanctioned during the year. Although the Act has now been in force for more than two years a considerable number of transactions are included which took place before the 8th June 1901, but mutations regarding which were only sanctioned during the year under report. Next year the number of such transfers ought to be insignificant.

Gifts and exchanges.

22. The number of gifts and exchanges has this year risen from 21,543 to 23,102 and the area transferred from 95,283 to 125,249 acres. The figures under superior ownership and occupancy rights call for no remark. It is in the case of ownership that the greatest fluctuation is seen. Here the area transferred has risen from 79,017 to 116,386 acres. Several districts contribute to the increase, but the figures are considerable only in the case of Shahpur (12,217), Ráwalpindi (8,070) and Jhang (5,241). In Shahpur and Jhang the cause has evidently been the rectification of boundaries along the lines of squares and *killas* owing to the spread of irrigation and the adoption of the *killabandi* system. No reason has been given for the large increase in the case of Ráwalpindi.

Mortgages.

23. Although the number of mortgages, including transfers by order of a court, has risen from 84,210 to 88,152 the total and the cultivated area transferred has fallen from 305,869 and 207,501 acres, respectively, to 246,799 and 199,505 acres. The average area transferred by each transaction has thus fallen considerably, but the proportion of cultivated area in each transaction is larger than it was before. In the following districts the areas transferred under this head were larger than in the previous year:—Gurgáon, Kángra, Hoshiárpur, Ludhiána, Ferozepore, Gurdáspur, Siálkot, Gujrát and Muzaffargarh. In Gurgáon the increase is due to the figures including $2\frac{1}{2}$ months more than the year in preparation for the approaching settlement and generally to greater activity in connection with mutation work in consequence. In Ferozepore it is stated that the increase is mainly due to the transfer of 4,710 acres by order of court. In the other districts the increases are small and call for no comment. In the districts other than those mentioned above the areas transferred show a decrease which, however, is not large except in the case of Miánwáli, where it amounts to 43,622 acres. No reasons are given for this in the district report. If, therefore, we exclude Miánwáli, where the figures have not been explained, the totals for the rest of the province as regards proprietary rights are not far different from what they were last year. It is also to be noted that this year the amount of the mortgage money has risen from Rs. 1,29,64,793 to Rs. 1,30,36,012, and the average mortgage money per cultivated acre has increased from Rs. 62 to Rs. 66. It will thus be seen that the effect of the Act, which at first was practically to put a stop to all mortgage transactions between members of agricultural tribes and others, is

apparently disappearing and bears out the remarks made in a previous paragraph that mortgages between such people in forms permitted by the Act are now coming into use. The rise in the mortgage value of land is very remarkable in view of the confident prophecies that one effect of the Act would be serious depreciation of the value of land.

Redemptions.

24. In commenting on the area redeemed (251,597 acres) in last year's report the Financial Commissioner remarked that in view of the excellent rabi crop of 1901 it was disappointingly small. This year the area is still smaller, 212,641 acres. It is to be remembered, however, that the crops were not so abundant as they were in that harvest. The mortgage money discharged was Rs. 77,98,096 as against Rs. 79,80,949 in 1901-02 which is a higher figure proportionately than the total area redeemed compared with the figures for the previous year, as it represents an average per acre of Rs. 36 as against Rs. 31 the year before. In the following districts the area redeemed was larger than last year:—Gurgáon, Hoshiárpur, Ludhiána, Montgomery, Gurdáspur, Siálkot, Gujrát, Shahpur, Jhang, Muzaffargarh and Dera Gházi Khan. In the case of Gurgáon the cause appears to be the same as in the case of mortgages, *viz.*, preparation for settlement, for in Hissár and Rohtak there were considerable decreases probably due to the poor crops in that part of the province. In Montgomery, Muzaffargarh and Dera Gházi Khan no particular reasons have been assigned in the district reports, but in Shahpur and Jhang extension of irrigation and consequent increase in production was probably the chief contributing cause. In the other districts named the variations are comparatively small and call for no particular comment. As has been pointed out in several of the district reports one of the most weighty reasons for the smallness of the area redeemed since the introduction of the Act is that now the area redeemed very largely represents, so far as zamíndárs at any rate are concerned, land really freed from encumbrance, because since the Act came into force it is less easy than it was to re-mortgage the land. Before the Act came into force a very large part of the redemptions were undoubtedly made only with a view to re-mortgaging the land. In examining the figures, therefore, this is an important point to bear in view.

Sales.

25. Sales and permanent transfers for value this year represent a total and cultivated area of 258,371 and 152,555 acres, respectively, as against 283,015 and 161,278 acres last year, and the purchase money has fallen from Rs. 1,07,06,954 to Rs. 1,01,23,585. The average price per acre of proprietary rights on the total area transferred has risen, however, from Rs. 40·6 to Rs. 41·5, and the average price per cultivated acre of the same rights has remained practically stationary, having fallen only two points from Rs. 70·7 to Rs. 70·5. The general opinion to be gathered from the reports is that it is still too early to draw any satisfactory conclusions as to the effect of the Act on the price of land. Taking the totals of all sales and transfers for value the average price per acre in 1900-01 for the province, including the Frontier, and when the Alienation of Land Act had only been in force for three months of the year, was Rs. 41·7; last year for the province as now constituted it had fallen to Rs. 37·8, whereas now it stands at Rs. 39·1 for the year under report. So far as any conclusions can be drawn from these figures they seem to point to the fact that the depression in the value of land which apparently took place after the introduction of the Act does not promise to be permanent; but as stated already it is yet too soon to be certain. Ferozepore is the only district which definitely reports that the decision that occupancy rights are not subject to the restrictions imposed by the Act has led to a tendency for non-agriculturists to acquire such rights. In the Jhang District, however, a slight tendency towards more frequent alienations of occupancy rights is conjectured to be due to the same cause.

Land under mortgage.

26. The total cultivated area under usufructuary mortgage is now reported to be 3,560,742 acres representing 13·3 per cent. of the total cultivated area of the province, as against 3,625,097 acres and 13·5 per cent. reported last year. The difference though small is, however, in the right direction.

STATEMENT II.

Proceedings under the Act.

27. The number of applications under Section 3 (2) for sanction to make a permanent alienation has risen from 478 to 823 of which 264 were granted. As far as particulars of these cases

have been given in the district reports the Financial Commissioner is glad to see that the sanctions have been generally justified. Practically in every case the sale was either for the purpose of acquiring a building site (*e.g.*, in Ludhiána in 29 out of the 30 cases in which sanction was given this was the purpose in view, and the total area involved was about one acre, and in Gujrát the whole number (73) were for building sites); or sale was allowed of part of the applicant's holding where it appeared that by so doing he could free part of his land from encumbrances. In one case in Delhi it is said that sanction was accorded because none of the members of agricultural tribes came forward to offer a fair market price. The Commissioner remarks that this was not a sufficient reason and the Financial Commissioner agrees with him. As remarked in paragraph 15 of last year's report, the object of the Act is not to get a zamíndár a good price for his land but to prevent his parting with it. In Lahore there was a case of a zamíndár holding a mortgage from another zamíndár since before the commencement of the Act selling his rights as mortgagee to a non-zamíndár after the coming into force of the Act. The mortgagee's rights in this case came within the definition of land. In this case the Financial Commissioner held that it was not contrary to the policy of the Act to grant sanction to the transfer as the original *zamíndári* owner's claim to recover the land was not prejudiced. A curious case is reported from Montgomery where a man applied for leave to sell all his land as he said it was not enough for his maintenance and he wanted to go and work in the Chenáb Colony. Apparently his real idea was to endeavour to obtain a square of land in the colony and he adopted this method as applications for land are not now taken in that district.

Nearly one-half of the total work under the Act relating to mortgages occurred in the Hissár and Rohtak Districts which shows how very general the custom of making mortgages with a conditional sale clause included was in those districts. Only one case to fix the proportion of a mortgage debt to be deemed equitable under Section 7 (3) is recorded, *viz.*, in Gujránwála, but no particulars have been given in the district report to show how it was dealt with.

A considerable number of applications under the Act still appear to be made under misapprehension, but this is perhaps only to be expected for some time to come. Most of these have naturally been included in column 9 of the statement. Perhaps the commonest mistake is that mortgages by zamíndárs to others require the sanction of the Deputy Commissioner. Of course the mutation of names requires the sanction of a Revenue Officer and if the mortgage contravenes the Act such sanction should be refused. But in some cases it appears that the Deputy Commissioner has refused to sanction the transaction itself. This is incorrect. If he is asked to sanction he should merely explain to the parties the effect of the Act referring them to Section 6 and then file the application with a note saying that the above has been done. The Deputy Commissioner is not empowered by Section 6 to sanction or to refuse to sanction any mortgage whether it contravenes the Act or not.

The statement appears to be sufficient to show the nature of the work arising under the Act and may, the Financial Commissioner thinks, be allowed to stand as it is for the present. It undoubtedly may be a little difficult for a Muharrir to classify the applications and proceedings properly, but this difficulty will be a decreasing one and it ought to be easy for the Deputy Commissioner when dealing with cases to indicate where they should be shown when there appears to be any doubt on the point.

STATEMENTS III—VI.

Mortgages and sales.

28. No attempt has been made this year to eliminate from the statements those transactions which took place before the Act came into force but in which mutations were sanctioned during the year. The attempt made last year was not successful and so it was thought better not to try it again. In examining these statements, therefore, this fact must be remembered as it not only swells the figures in the case of agricultural tribes and agriculturists, but also accounts for a proportion of the transactions between zamíndárs and agriculturists on the one hand and *banias* and others on the other hand.

Statements III and IV give the details of the transactions regarding mortgages and sales. Statement V gives the district totals and Statement VI shows the net gains and losses by the agricultural tribes. For the province as a whole the net result is that agricultural tribes have mortgaged 37,289 acres more than they took on mortgage, but have bought 5,980 acres more than they sold. As already remarked with reference to the other effects of the Act, the general opinion is that it is yet too soon to form any decided opinion as to the effect of the Act on the various agricultural tribes and on agriculturists and, except in the case of the few tribes such as Jats and Rájpúts which form the bulk of the rural population, the numbers of transactions are so small that one large sale or mortgage in a district may upset the average and vitiate the conclusion, added to which the number of transactions not affected by the Act, because completed before it came into force, is still comparatively large. An examination of Statements III and IV will show that by far the greater number of transfers are inter-tribal, not only in the sense that they occur within the circle of notified tribes generally, but also that they occur within the circle of each tribe itself, Jats selling and mortgaging most to Jats, Rájpúts to Rájpúts, Awáns to Awáns, Aráíns to Aráíns, and so forth.

Agricultural tribes.

29. Lahore is the only district in the province in which the zamíndárs have acquired more land on mortgage than they have mortgaged. The Jats and Aráíns are mainly responsible for this, the Rájpúts having lost ground as they have in most other districts. Besides Lahore the only other districts in which Jats have taken more land on mortgage than they mortgaged are Delhi, Hoshiárpur, Ráwalpindi and Miánwáli, but the net gain is in each case inconsiderable, except in Hoshiárpur, where it amounts to 906 acres. The Deputy Commissioner explains that in that district the Jat has begun to replace the sáhúkár in the land market. In Ferozepore the Hindu Jats show a slight net gain. It is noted that they have made considerable encroachments on other tribes, especially on Rájpúts. A number of them also are money-lenders and are reported to be more exacting than ordinary *banias*. If this acquisitiveness on their part continues to be marked in future years it may be necessary to consider the question of restricting the field of their operations by forming sub-groups. Rájpúts on the whole have lost ground; in Hissár, Gurgáon, Amballa, Jullundur, Ferozepore, Gurdáspur and Jhang they have mortgaged more than 1,000 acres more than they took on mortgage; in Jhang the net loss amounted to 3,036 acres. Aráíns and Kambohs appear to be generally gaining but not largely.

As regards sales Jats have generally gained largely while Rájpúts have lost also largely. Rájpúts are, as a rule, indifferent zamíndárs, and there has always been more or less a tendency for them to get into difficulties. In the Delhi Division they have been losing generally to Jats. The Commissioner of Delhi thinks it will be necessary eventually to differentiate between different tribes though possibly not in every district. The tendency of the stronger and more thrifty tribes to absorb those less so will be more marked in some districts than in others. But there is one point to be noticed in this connection if we were to depart from the present arrangement by which all the agricultural tribes in a district are "grouped" together, a Rájpút (say) would then not have the power to alienate to a Jat, but he might alienate to a *bania* who was an "agriculturist" of the village; not a very desirable result. The Financial Commissioner agrees in these remarks; as already stated he thinks the statutory agriculturist was a mistake, and it seems clear that he must be done away with before we can take up the question of the subdivision of groups. The Deputy Commissioner of Jullundur says that the expropriation of Rájpúts would probably proceed under any circumstances, and that the Act has retarded the process. In Ludhiána it is reported that the loss of the Sayads is accounted for by a particularly extravagant family at Jagráon, and that Hindu Jats are gradually encroaching upon their Muhammadan neighbours. In Montgomery it is noticeable that all the agricultural tribes have gained on sales, even Rájpúts show a net gain of 3,515 acres. A total of 18,020 acres was acquired by agricultural tribes from "others." This might have been expected to merit some explanation, but none is given in the district report. In Gurdáspur, Jats, Gujars and Sainís appear to be absorbing the lands of the weaker tribes, *e.g.*, Rájpúts, &c., and Aráíns that of Sayads. In Gujrát the Deputy Commissioner notes that Gujars,

Rájpúts, Mughals, Awáns, Baloches and Pathâns seem to be losing land to Jats, Sayads and Aráíns. In Jhelum in the Talagang Tahsil there are a large number of well-to-do Awáns who appear to be absorbing the lands of the poorer proprietors. A further explanation is reported to be that they are so unruly that money-lenders are chary of taking their lands on mortgage or sale. The Commissioner remarks that it will be well to watch the working of the Act carefully in this tahsil. In Multan the general order of things has been reversed and Jats have lost 718 acres, whereas Rájpúts have gained 1,216 acres.

Agriculturists.

30. The transactions in which agriculturists have been concerned are comparatively few. They mortgaged 19,130 acres and took 14,894 acres on mortgage, they sold 31,896 acres and bought 26,817 acres. So both as regards mortgages and sales there was a net loss. It is doubtful how far the figures regarding mortgages are reliable, as the status of agriculturist conveys no privileges with respect to them, and accordingly it is not so carefully examined. As regards sales the preponderating opinion is that the status is not understood or claimed, but the district reports vary on this point, and some say that the agriculturist knows his rights and is prepared to assert them. In Gurgáon the Deputy Commissioner notes that a great many mutations in favour of agriculturists were rejected by Revenue Officers by mistake and no appeals were preferred against their orders. In Dera Gházi Khan it is reported that the status of agriculturist is fully understood and claimed. Three or four cases occurred in this district in which agriculturists endeavoured to acquire lands for non-agricultural relatives, but their efforts were frustrated. The Deputy Commissioner remarks that it is difficult to say on the strength of an odd case or two that there is any real tendency on the part of agriculturists to become go-betweens for the purpose of evading the Act, but he thinks there is a chance of this occurring on a larger scale, and that there can be very little doubt that the statutory agriculturist is distinctly the weak point and source of danger in the Act. Dera Gházi Khan is the only district from which this subterfuge is reported.

Enumeration of tribes.

31. The correction and revision of the list of tribes notified under the Act is now practically settled and a draft notification has been submitted for the approval of Government. It has been decided for the present to limit revision to the correction of obvious errors and to the inclusion of those sub-tribes as to whose inclusion in a specific main tribe there was room for doubt, while their claims to the protection afforded by the Act were undeniable. The case of Brahmans, Kaláls, Lobánas and Sheikhs has been reserved for future consideration. The difficulty is that in some districts or parts of districts these tribes are not purely or even mainly agricultural in character. In Lahore, however, Lobánas have been notified as they are in that district mainly agricultural. In the case of Sheikhs, owing to the inclusion of sub-tribes, it has been found possible to discriminate, and it is now proposed to notify Koreshís and Ansárís in certain districts where they are undoubtedly agricultural. The point in dealing with these doubtful tribes is that the dangerously acquisitive members of them shall not be free to acquire the lands of zamíndárs without sanction. Two expedients seem possible; *viz.*, (1) to notify the doubtful tribe as a separate group, or (2) to notify territorially, *e. g.*, the Brahmans of such and such a tahsil or assessment circle or other group of villages. The first method is open to the objection that by putting a tribe in a separate group we deprive the members of it of the power of disposing of their land to the other agricultural tribes, and restrict them to (1) their own tribe, or (2) agriculturists of the village. As already explained the latter would be an undesirable result. To the second method the Financial Commissioner sees no particular objection even if we have to publish lists of villages. The question would be one of fact: would the notified villages or other areas contain Brahmans, &c., who are money-lenders or otherwise dangerously acquisitive? As at present advised the Financial Commissioner proposes to pursue the question of these doubtful tribes on the lines of this latter method. In the case of tribes already notified he is not prepared, without further experience of the working of the Act, to propose sub-groups within districts and, as already implied, he is inclined to hold that in respect of such tribes it would not be consistent with the policy of the Act to make sub-groups until we have first abolished the agriculturist.

Statement VII.

Redemption of mortgages by agricultural tribes.

32. The total area in which proprietary rights were redeemed from mortgage amounted to 195,276 acres, of which 124,679 acres were redeemed by members of agricultural tribes or a percentage of 63 on the total area. Comparing the total mortgages by agricultural tribes as given in the last column of Statement III with the redemptions by them as shown in Statement VII, we find that in Karnál, Jullundur, Montgomery, Lahore, Ráwalpindi, Multan and Dera Gházi Khan the tribes redeemed more than they mortgaged. It is only however in Lahore (2,975), Multan (3,495) and Dera Gházi Khan (3,582) that the differences are considerable. In the Delhi Division especially, which is still suffering more or less from a run of bad years, and to a less extent in the rest of the province also, the area redeemed by agricultural tribes is smaller than it might have been expected to be under more favourable circumstances. It cannot of course be said in what percentage of cases redemptions were followed by fresh mortgages, but, as already noted in dealing with the subject of redemptions generally, it is believed that it is smaller than it would have been had the restrictions imposed by the Act not been in force. So far as the Act has tended to limit the number of redemptions it may safely be assumed that it has been a preventive of further indebtedness or of permanent alienations by imposing some obstacle to the practice of redemption merely for the purposes of further mortgage or sale.

Concluding Remarks.

District reports.

33. The district reports are forwarded in manuscript for reference if required.

New instructions for working the Act.

34. The new instructions issued by the Financial Commissioner during and since the year under report have been for the most part mentioned in preceding paragraphs. They may here be briefly recapitulated.

Appendix No. 26.—The effect of the Act on the attempted creation and the transfer of occupancy rights was explained, a right of occupancy being held not to be "land" within the meaning of the Act.

Appendix No. 27.—The case of a mortgagor refusing a proceeding under Section 9, to execute a revised mortgage was dealt with.

Appendix No. 28.—Revised instructions were issued for the preparation of the Annual Report.

Appendix No. 29.—Detailed instructions were given for the scrutiny of mutations in mortgage cases to prevent violations of the Act.

Appendix No. 30.—Attention was called to the procedure which should be followed in applying Section 14 of the Act.

Appendix No. 31.—Provision was made for the enforcement of the restrictions of the Act upon permanent alienations by agriculturists and for enabling the Deputy Commissioner to eject mortgagees and others holding beyond the legitimate term.

Appendix No. 32.—A procedure was prescribed for granting certificates of status to agriculturists, and the points to be brought on record in the case of temporary alienations were specified.

Appendix No. 33.—The relations between Deputy Commissioners and Settlement Officers in connection with the Act were defined on the principle that its working is entrusted to the Deputy Commissioner, though the Settlement Officer should assist and may, in certain special cases, be invested with powers to sanction exchanges.

Summary.

35. The prominent features of the year are that the depreciation on the value of land, which was observed at first, has been arrested; and that the *banias* have begun to accept mortgages in the forms prescribed by the Act. The rules under the Act have worked well and smoothly, but further detailed instructions on subsidiary points have been required. As before, there is reason to believe that extravagance on

ceremonial occasions has been checked; and signs are not wanting that capital so set free is being diverted to more productive channels. The statistics are not yet clear of the effect of transactions antecedent to the Act, and it is premature to generalise upon the consequences of applying the principle of one district one group. It may be accepted that the Act has strengthened the position of the rich zamíndár and bettered his prospects of acquiring the lands of his neighbours. But Jats were acquisitive and Rájpúts apt to lose their lands before the Act came into force, and Aráins and Kambohs are thrifty peasants likely to acquire lands in any case. In one or two places Hindu Jats appear to be gaining on Rájpúts or on their Muhammadan neighbours, but it is too soon to offer any confident opinion as to the absorption by one tribe of the possessions of any other or as to Jat money-lenders taking the place of those with whom the business of money-lending is hereditary. So far as experience has shown up to date the Act is fulfilling its purpose very well without appreciable increase, perhaps even with some net decrease, of official labour. The chief defect is the wholly artificial status of the agriculturist founded on nothing which is any real part of the structure of society. This defect is likely to become more apparent when the status itself is more widely understood and claimed.

On the whole Sir Lewis Tupper is satisfied with the working of the Act and is confirmed in the view that it has conferred a great benefit on the notified agricultural tribes.

GAZETTE OF INDIA NOTIFICATION.

No. 1243, *dated* SIMLA, *the 8th June* 1901.

In exercise of the powers conferred by Section 1, sub-section (3), of the Punjab Alienation of Land Act, 1900 (XIII of 1900), the Governor-General in Council is pleased to direct that the said Act shall come into force from the 8th June 1901.

[No. 2]

GAZETTE NOTIFICATION.

The 22nd May 1901.

No. 21 *S.—Notification.*—In exercise of the powers conferred by Section 4 of the Punjab Alienation of Land Act, 1900 (XIII of 1900), and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor of the Punjab is pleased to issue the following orders determining what bodies of persons are to be deemed to be agricultural tribes or groups of agricultural tribes for the purposes of the said Act:—

(1) In each district of the Punjab mentioned in column 1 of the Schedule annexed to this notification, all persons either holding land or ordinarily residing in such district and belonging to any one of the tribes mentioned opposite the name of such district in column 2 shall be deemed to be an "agricultural tribe" within that district.

(2) All the "agricultural tribes" within any one district shall be deemed to be a group of agricultural tribes.

[No. 3]

GAZETTE NOTIFICATION.

The 22nd May 1901.

No. 23 *S.*—*Notification.*—In exercise of the powers conferred on him by Sections 19 and 25 of the Punjab Alienation of Land Act, 1900, and Section 17 of the Punjab Land Revenue Act, 1887, the Lieutenant-Governor of the Punjab is pleased to make the following rules and to direct that they shall be read as an addendum to Chapter V of the Rules made under the last-named enactment relating to Mutation Lists, Parchas, Báchh Papers and Orders of Court :—

Addendum to Chapter V of the Rules under the Punjab Land Revenue Act.

I.—If any alienation of land is made otherwise than in accordance with the provisions of the Punjab Alienation of Land Act, 1900, or involves any condition contrary to those provisions, the patwári shall nevertheless enter the same, when it comes to his knowledge, in his register of mutations for the village where it occurred.

II.—An entry made under the preceding rule shall be dealt with like other entries in the register of mutations which are made under this chapter, except that the Revenue Officer to whom the register is submitted for orders under Rule 48 of this chapter shall, after hearing the parties and recording a note of their representations,—

(1) in the case of any permanent alienation, transmit the mutation proceeding with his recommendation, as to whether sanction should be granted or refused, to the Deputy Commissioner for his orders under Section 3 (2) and (3) of the Punjab Alienation of Land Act ; or

(2) in the case of any temporary alienation refuse to sanction mutation of names and refer the parties to the provisions of the Punjab Alienation of Land Act which they have contravened.

III.—The Deputy Commissioner on receipt of any mutation proceeding transmitted to him under Rule II (1) shall, after such further inquiry, if any, as he may consider necessary, grant or refuse the sanction required by sub-section (2) of Section 3 of the Punjab Alienation of Land Act. For the purposes of any further inquiry under this rule the Deputy Commissioner may refer the case to any Revenue Officer subordinate to him for investigation and report and may decide the case upon the report.

IV.—When the Deputy Commissioner has decided any case dealt with under Rule III, he shall record his order upon the mutation proceeding and direct the same to be returned to the Revenue Officer whose duty it is to dispose of mutation cases arising in the village where the land alienated is situated.

V.—If the Deputy Commissioner sanctions the alienation, the record of his sanction made upon the mutation proceeding shall be deemed to be sufficient evidence of the order of sanction for the purposes of Section 18 of the Punjab Alienation of Land Act, and the Revenue Officer whose duty it is to dispose of the mutation case shall dispose of the same and shall not refuse mutation on the ground of any objection arising out of the said Act.

VI.—If the Deputy Commissioner refuses to sanction the alienation, the Revenue Officer disposing of the mutation case shall pass such order in the case as may be in accordance with the order of the Deputy Commissioner refusing sanction.

VII.—When a mutation proceeding has been transmitted to the Deputy Commissioner under Rule II (1) the transmission thereof shall be deemed to be an application to the Deputy Commissioner to exercise the powers conferred upon him by Section 3 of the Punjab Alienation of Land Act. Such application need not be stamped nor is any separate application necessary for the exercise of those powers in the same case.

VIII.—Nothing in these rules shall be so construed as to disallow applications to the Deputy Commissioner for the exercise of any power conferred upon him by the Punjab Alienation of Land Act, 1900, which are made in any other manner authorized by law or by rules having the force of law.

[No 4.]

GAZETTE NOTIFICATION.

The 22nd *May* 1901.

No. 24 *S.—Notification.*—In exercise of the powers conferred on him by Section 25 of the Punjab Alienation of Land Act, 1900, the Lieutenant-Governor of the Punjab is pleased to prescribe the following rules as to the Revenue Officers to whom applications may be made for the exercise by a Deputy Commissioner of the powers conferred on him by the Punjab Alienation of Land Act, 1900, and as to the manner and form in which such applications shall be made and disposed of :—

RULES.

1. An application to a Deputy Commissioner for the exercise of any power conferred on him by the Punjab Alienation of Land Act shall be in writing and signed and verified by or on behalf of the person making it and shall be accompanied by an extract from the annual record or record of rights sufficiently describing the land which is the subject of the application. The application shall bear a stamp of the value of eight annas ; and the extract from the revenue records shall also be duly stamped in accordance with Section 6 and Schedule I, Number 9, of the Court Fees Act.

2. Such application may be received by the Deputy Commissioner or by any Assistant Collector of the 1st or 2nd Grade.

3. If the Assistant Collector receiving such an application is dealing with mutation cases and the application is made to him in connection with any such case, he shall proceed as directed in the addendum to the rules in Chapter V under the Punjab Land Revenue Act, published in Notification No. 23 S., dated the 22nd May 1901, and shall forward the application to the Deputy Commissioner with the mutation proceeding therein mentioned.

4. If the application is made to an Assistant Collector, but is not made in connection with a mutation case, the Assistant Collector shall, if generally or specially empowered in this behalf by an order in writing made by the Deputy Commissioner, inquire into the case and transmit the application with a report of the results of his inquiry to the Deputy Commissioner for orders. The Assistant Collector, if not so empowered, shall transmit the application to the Deputy Commissioner for orders without remark.

5. The Deputy Commissioner, on receipt of an application made under these rules, may decide the case upon the application, or may himself make any inquiry which he considers necessary, or may refer the case to any Revenue Officer subordinate to him for investigation and report, and may decide the case upon the report or upon the results of his own inquiry as the case may be.

[No. 5.]

GAZETTE NOTIFICATION.

The 22nd May 1901.

No. 25 *S.—Notification.*—In exercise of the powers conferred on him by Section 25 of the Punjab Alienation of Land Act, 1900, the Lieutenant-Governor of the Punjab is pleased to make the following rule as to the exercise by a Deputy Commissioner of the powers conferred on him by that enactment in cases referred to him under the said Act by a Civil Court :—

RULE.

When a Civil Court makes a reference to a Deputy Commissioner under the Punjab Alienation of Land Act, 1900, the Deputy Commissioner may exercise any power applicable to the case, which is conferred upon him by that Act, either upon the reference or after any further inquiry which he considers necessary, or after sending the reference to any Revenue Officer subordinate to him for investigation and report and upon consideration of the report so required.

[No. 6]

Chief Court Circular Memo. No. 9—2178 G., dated Lahore, the 30th May 1901.
To All Civil Courts in the Punjab.

SUBJECT.
The Punjab Alienation of Land Act, XIII of 1900.

When a suit to which the provisions of Section 7 (3) of the Punjab Alienation of Land Act, XIII of 1900, apply, is brought before a Civil Court, the Court should, on the application of either of the parties, refer to the Deputy Commissioner to determine the proportion of the mortgage debt that is equitable, and keep the case pending until such determination has been made.

[No. 7]

Financial Commissioner's Circular Letter No. 3441, dated Lahore, the 5th June 1901.
To all Commissioners and Deputy Commissioners in the Punjab.

THE Punjab Alienation of Land Act, No. XIII of 1900, has been brought into force with effect from the 1st instant; and it is very necesssary that patwárís, kánúngos, all revenue officers, and indeed the agricultural community at large, should possess an adequate acquaintance with the objects and effect of the Act. Accordingly this Circular of instructions for working the Act has been approved by Government and is issued, by the direction of the Financial Commissioner, for the information and guidance of all concerned. Notifications 23 S., 24 S., and 25 S., dated 22nd May 1901, hereto annexed* have also been sanctioned by Government and issued in *Punjab Government Gazette, Extraordinary*, dated the 25th May 1901. They will be explained below so far as necessary.

2. In this Circular members of agricultural tribes within the meaning of the Act will be referred to briefly as zamíndárs; and the rest of the agricultural community will be described as "baniás and others" or as "baniás and persons other than zamíndárs."

3. An "agriculturist" within the meaning of the Act may be a zamíndár or a bania or any one else, provided that he holds agricultural land and was recorded in his own name or in the name of his ancestor in the male line at the first regular settlement (or in a few cases at some other settlement) as an owner of land or a hereditary or occupancy tenant in any estate. If the record has been corrected by a Civil Court or other competent authority, effect will in this behalf be given to the revised entry. As a general rule, every zamíndár will also be an "agriculturist;" but this will not deprive him of any privilege he has as a zamíndár. Baniás and others will not be "agriculturists" unless they exactly fulfil the requirements of the definition in Section 2 of the Act, which should be closely studied with reference to the above remarks. Throughout this circular the expression "agriculturists" is used as defined in Section 2 (1) of the Act.

4. As will be seen from Section 3 (1) (*b*), the object of thus defining "agriculturist" is to dispense with the sanction of the Deputy Commissioner when baniás and persons other than zamíndárs, who have held agricultural land since annexation or thereabouts, desire to permanently acquire such land in their own villages. It will be observed, that from the date when the Act comes into force an agriculturist who is not a zamíndár will be unable without sanction to acquire land permanently from a zamíndár except in the village in which he (the purchaser) is an agriculturist. The working of the definition should be very carefully watched. You will note that it may be extended or restricted without fresh legislation; and when the Act has been in force for two years, or sooner if necessary, you should report whether any action seems needed in this respect.

5. The other definitions in Section 2 also need careful study. No immoveable property is affected by the Act, except "land" as here defined. You will notice that the definition is a somewhat enlarged version of that contained in Section 4 (1) of the Tenancy Act. The expression "permanent alienation" is so defined that the Act does not place any restriction on gifts for religious or charitable purposes. The working of this exemption is another point to watch, as it must not be allowed to become a cloak for evasions of the law.

6. You have already been informed in paragraph 6 of Punjab Government letter No. 117, dated the 12th November last, that the objects of the Act are "to restrict as much as possible the permanent alienation of their lands by peasant proprietors, to prevent the acquisition of these lands by non-agriculturists, and to do this without at the same time unduly limiting the credit on which the peasants depend for the means of cultivation." The agricultural tribes of your district or division have been enumerated and grouped by separate orders which have been notified in the *Gazette Extraordinary* referred to above under Notification No. 21 S., dated 22nd May 1901.

7. The restrictions on permanent alienation are imposed only on zamíndárs and on agriculturists as defined in the Act. Zamíndárs may without sanction permanently alienate their lands—

(*a*) to other zamíndárs of the same tribe or *group* of *tribes*, and

(*b*) to agriculturists (whether zamíndárs or not) who hold land in he village where the land alienated is situated.

*NOTE.—Printed as Nos. 3, 4 and 5 above.

But zamindárs may not permanently alienate their lands to any one else without the sanction of the Deputy Commissioner.

8. Agriculturists who are also zamíndárs have the same power of permanent alienation as other zamíndárs. Agriculturists who are not zamíndárs may not permanently alienate land which they have acquired as agriculturists from zamíndárs after the Act comes into force except (1) to zamíndárs, or (2) to other agriculturists in the village, or (3) with the sanction of the Deputy Commissioner, but they may freely alienate other land.

9. The annexed rules (Notification No. 23 S., dated 22nd May 1901,) which have received the sanction of Government, will show how Section 3 is to be worked. In the first instance the patwári, the field kánungo and the Naib Tahsildar or Tahsildar dealing with mutation cases will have to come to a conclusion as to whether any permanent alienation entered in the mutation register requires the sanction of the Deputy Commissioner or not. If it is found that sanction is required, the case will be reported to the Deputy Commissioner as provided in the rules.

10. The "mutation proceeding" referred to in Rules II (*1*), III, IV, V and VII of Notification 23 S., dated 22nd May 1901, is the same thing as the copy of the entry which, under Rule 49 of Chapter V of the Rules under the Land Revenue Act, has to be filed with the *jamabandi*. The procedure is fully explained in paragraph 8 of the Circular of the Director of Land Records, No. 6, dated the 8th July 1891, and in his Circular No. 11, dated the 14th August 1897. The patwári retains the mutation register and his entries therein are copied on to a form or counterfoil on which the patwári writes his report and the revenue officer passes his order. It is this form or counterfoil, with the reports made on it, which is referred to in Notification No. 23 S., dated 22nd May 1901, as the mutation proceeding. Under the circumstances described in the Notification the form or counterfoil has to be sent to the Deputy Commissioner for orders instead of being taken away by the revenue officer to be made over to the office kánúngo.

11. In determining whether to grant or refuse sanction under Section 3, the Deputy Commissioner should be guided by the following instructions in which the term "alienation" is used to denote permanent alienations only :—

(i) Sanction should not be given unless the sanctioning officer is satisfied—

(*a*) that the transfer is really advantageous to the vendor and his family, and

(*b*) that no member of an agricultural tribe included in the same group as the vendor has offered or is ready to offer a fair price for the land.

(ii) The distinction between self-acquired and hereditary property has to be borne in mind. If there is no reason to suppose that the alienee is a mere intermediary intending to re-transfer the land to a money-lender (in which case instruction (viii) would apply), then, other things being equal, there should be less reluctance to sanction the alienation of self-acquired than of hereditary land.

(iii) If a zamíndár depends entirely or mainly on his land, no alienation should ordinarily be allowed which will reduce the land he retains to less than is required for the support of himself and his family.

(iv) If the Deputy Commissioner is satisfied that there is no intention of evading the Act, sanction may be given to the alienation of land for building purposes near towns or village sites.

(v) Sanction may be given to the alienation of land—

(*a*) by wealthy zamíndárs owning much land, for commercial reasons or to improve or consolidate their properties.

(*b*) by indebted zamíndárs owning mortgaged land and desiring to sell a part of their land in order to raise money to redeem the whole or part of the rest.

(vi) Zamíndárs who, by reason of their insignificant numbers, have not been classed in the particular district as members of agricultural tribes, will ordinarily be able as agriculturists to acquire, under Section 3 (*i*) (*b*), land situated in their own villages. Subject to these instructions, and particularly to (*i*), and when there is no reason to suppose that such zamíndárs are mere intermediaries attempting to evade the Act, sanction may be freely given to alienations of land situated elsewhere proposed or effected in their favour.

(vii) The instructions in (vi) apply also in the case of persons holding land in districts of the North-Western Provinces adjoining Punjab districts who, if they had held land in the Punjab districts, would have been deemed to belong to agricultural tribes. To applications for sanction in favour of subjects of Native States adjoining Punjab districts somewhat different considerations apply; and such applications should be dealt with on their merits.

(viii) No Deputy Commissioner, unless specially authorized in this behalf by the Local Government, may, on his own authority, sanction an alienation to a money-lender, whether the money-lender is a zamindár or a bania or any one else. It will generally be possible to ascertain from the income-tax papers whether any person is a money-lender or not. If it is clear that sanction might be given consistently with the objects of the Act, and that there would be hardship in refusing it, the Deputy Commissioner may transmit the file to the Commissioner and ask his permission to give sanction. The case will then be disposed of as the Commissioner may direct. If, however, there is any doubt, the Deputy Commissioner should refuse sanction and leave the parties, if so minded to appeal.

12. Deputy Commissioners will see from Section 5 of the Act, that in dealing with applications for sanction under Section 3 they need not go into any question of title or any question relating to any reversionary right or right of pre-emption.

13. What is said in paragraphs 11 and 12 above applies equally (1) whether the permanent alienation has already been made or is merely proposed to be made; and (2) whether the case is reported to the Deputy Commissioner through the mutation procedure as provided in Notification No. 23 S., dated 22nd May 1901, or comes to his notice in any other way—as by an application made under Notification No. 24 S., dated 22nd May 1901.

14. When the permanent alienation is merely proposed to be made and is disallowed it is only necessary to communicate the order to the parties or to the revenue officer dealing with the mutation case. But if the permanent alienation has already been made and the Deputy Commissioner refuses sanction he must pass an order under Section 14 of the Act, declaring that the transaction will take effect as a usufructuary mortgage in form (*a*) permitted by Section 6, and fixing the term and the conditions which he considers reasonable.

15. As regards the conditions little latitude is allowed because those prescribed in Section 6 (1) (*a*) and in Section 7 would be applicable. Conditions may, however, be added in accordance with Section 8.

16. Some further explanations seem necessary as to the effect and working of Notifications No. 23 S. and No. 24 S., dated 22nd May 1901.

17. Notification No. 23 S., dated 22nd May 1901, is operative only in regard to permanent or temporary alienations which contravene the Act. Mutations of names due to alienations which do not contravene the Act will continue to be dealt with in the usual way under Chapter V of the rules under the Punjab Land Revenue Act. A special procedure is laid down for the purpose of bringing to the notice of the Deputy Commissioner permanent alienations which require his sanction, because such sanction is necessary if the transaction as such is to be allowed or to hold good; and because if the transaction as such is disallowed, the alienation, nevertheless, is not entirely void, but takes effect under Section 14 as a usufructuary mortgage. An order of the Deputy Commissioner under that Section is therefore necessary before any fresh entry can be made in the annual record or record of rights.

18. The case of temporary alienations differs materially. Zamíndárs may make temporary alienations in any form to other zamíndárs who are members of their own tribe or of a tribe in the same group. Temporary alienations of land made by zamnídárs to baniás or others do not require sanction, but may be made only in the forms prescribed by Section 6 of the Act, or in accordance with Section 11 or Section 12. If such temporary alienations contravene the Act persons claiming under them will not be able to get them enforced by the Courts at any rate as regards those matters in respect of which the Act has not been complied with.

19. If the temporary alienation is a lease or farm or a further mortgage of which the conditions are in accordance with the Act, then the special point for attention is the term of the lease, farm or mortgage. Unless the parties agree to some term permitted by law, mutation of names is to be refused.

20. If the temporary alienation is a mortgage which ought to have been made in accordance with Sections 6, 7 and 8, and has actually been made otherwise, then mutation of names is to be refused, and the parties will have two opportunities of applying to the Deputy Commissioner to revise and alter the terms of the mortgage so as to bring them into accordance with the Act. The parties can either do this directly mutation of names is refused, or they can do it later if their case comes into Court and the Court refuses to enforce the irregular mortgage. It has been suggested that these cases should be reported to the Deputy Commissioner through the mutation procedure like cases of permanent alienation in contravention of the Act, but it is thought that the amount of work which would so arise would be excessive, and that the parties or any other person interested may be left to make applications under Notification No. 24 S., dated 22nd May 1901. If, however, they choose to file a

separate and duly stamped application in the course of the mutation case, the application may be forwarded to the Deputy Commissioner under rule 3 of that Notification end he can dispose of it under rule 5.

21. Notification No. 24 S., dated 22nd May 1901, has been so framed as to regulate all applications made in a separate form for the exercise of any of the powers conferred on Deputy Commissioners by the Act.

22. The report which is deemed to be an application under Notification No. 23 S., dated 22nd May 1901, does not require any stamp, the mutation fee being considered sufficient. But any one may apply on eight-anna stamp paper either before or after the transaction for the sanction of the Deputy Commissioner to a permanent alienation requiring the same under Section 3. The procedure is in the alternative. If the case is taken up by the officials and reported, no separate application need be made. But a separate application may be made in any case if the parties or any of them so desire; and it may be presented to an Assistant Collector, though only the Deputy Commissioner has power to decide the case.

23. Other applications which may be made to the Deputy Commissioner are the following:—

(1) Under Section 6 (1) (*b*) to place the mortgagee in possession:

(2) Under Section 6 (2) to fix the term and mortgage-money of the usufructuary mortgage:

(3) Under Section 7 (3) to fix the proportion of the mortgage debt to be deemed equitable:

(4) Under Section 9 (1) to revise and alter the terms of the mortgage:

(5) Under Section 9 (2) to put the mortgagee to his election as therein prescribed:

(6) Under Section 13 to eject a mortgagee, lessee of farmer and place the person entitled in possession:

(7) Under Section 15 to sanction an alienation of or charge upon the produce of land for more than one year.

24. In all these cases the procedure will be regulated by Notification No. 24 S., dated 22nd May 1901. It will be observed that, in addition to applications from the parties, Deputy Commissioners will have references made to them by Civil Courts under Section 9 (3) with a view to their exercising the powers conferred upon them by Section 9 of the Act. Their procedure will then be regulated by Notification No. 25 S., dated 22nd May 1901, which is in substance the same as rule 5 of Notification No. 24 S., dated 22nd May 1901.

25. Some of the cases above enumerated, as those in which applications may be made to Deputy Commissioners, call for further remark.

Application No. (2).—Here an order of the Deputy Commissioner is necessary whether an application is made by any party or not. If the mortgagor is ejected, the revenue officer ordering the ejectment under Section 45 of the Tenancy Act must report the case to the Deputy Commissioner, so that he may exercise the powers conferred upon him. If the mortgagor relinquishes or abandons his cultivating occupancy of the land, the necessary report to the Deputy Commissioner should be made by the patwári, the field kánúngo and the Tahsildar. The usufructuary mortgage resulting from the proceedings should be entered in the annual record or record of rights.

Application No. (3).—If the mortgagor brings a suit for redemption, the case may be referred to the Deputy Commissioner by the Civil Court for determination of the proportion of the mortgage debt which is to be regarded as due. The procedure of the Deputy Commissioner will then be regulated by Notification No. 25 S., dated 22nd May 1901.

Application No. (6).—Care must be taken to see that the commencement of possession under Section 6, Section 11 or Section 12 is duly entered in the *jamabandi*. The term for which the person in possession is entitled to hold may not expire for many years. If that person wrongfully remains in possession after expiry of the term, the case must be reported by the patwári, field kánúngo and Tahsildar to the Deputy Commissioner for orders.

Application No. (7).—The object of Section 15 of the Act is to prevent the evasion of its provisions by the substantial mortgage of the land under colour of the alienation of, or of a charge upon its produce. It is not intended to prevent zamíndárs from borrowing on the security of the crops of the two next following harvests, nor to interfere with *bonâ fide* contracts for the disposal of produce to large firms engaged, for example, in the wheat export trade. When a case under this section comes before a Deputy Commissioner the main point for his consideration is whether the transaction for which his sanction is sought will amount to an evasion of the Act. If not, restraint of trade being obviously objectionable, sanction should be freely given. When, however, the contract is made for more than one year by a zamíndár in favour of a money-lender, it is most probable that an evasion of the Act is intended.

26. A few provisions of the Act remain to be noticed.

27. Section 61 (*d*) empowers the Local Government to permit other forms of mortgage besides those specified in the Act to be used by zamíndárs in mortgaging their land to baniás and others; and Section 8 (1) (*c*) gives the Local Government a similar power as regards conditions of mortgage. Wide as this authority is, it is not intended to relax the safeguards of the Act in the case of mortgages to baniás or money-lenders. The object is to permit forms of mortgage, such as the *niáwa* of the Dera Ismail Khan District,* which are really quite innocuous and conditions which may be useful and do not give any bania or money-lender any undue advantage over a zamíndár. Proposals under these provisions of the Act may be made whenever they are necessary.

28. Section 16 forbids the sale in execution of decree of land belonging to zamíndárs. Further instructions will be issued with reference to this section after communication with the Chief Court.

29. A Circular will be issued by the Inspector-General of Registration on the subject of Section 17.

30. Revenue Officers will observe that, except as specially directed by this Circular and by Notfications Nos. 23 S., 24 S., and 25 S., dated 22nd May 1901, their proceedings under the Alienation of Land Act are to be regulated by Chapter II of the Punjab Land Revenue Act. This provides for appeal, review and revision.

[No. 8.]

Copy of a Memo. No. 3711, dated 17th June 1901, from M. S. D. BUTLER, Esquire, Junior Secretary to Financial Commissioner, Punjab, to all Commissioners except Peshawar, all Deputy Commissioners except Simla, Hazára, Peshawar and Kohat.

IN this office Circular Letter No. 3441, dated 5th June 1901, general instructions were issued for the working of the Punjab Alienation of Land Act, 1900, I am now directed to inform you that with reference to Section 23 of the Act it is not the present intention of Government to invest any officer of lower rank than a Deputy Commissioner, with the powers of a Deputy Commissioner under the Act. Commissioners, it will be observed, already have the powers under the section as it stands; Deputy Commissioners, until the routine part of the business is thoroughly understood by their subordinates, should themselves do all the work which, by the terms of the Act, has to be done by a Deputy Commissioner. If, however, any Deputy Commissioner finds that the amount of extra work falling on him is such that he needs relief, he may apply for relief in such a way as may be most expedient in the circumstances of his district. Either some Assistant Commissioner or Extra Assistant Commissioner might then be invested under Section 23 with the powers of a Deputy Commissioner under the Act or the Deputy Commissioner might be relieved of some of his Section 30, Criminal Procedure Code, cases or other magisterial work.

2. I am to add that these instrnctions have been issued with the approval of the Local Government.

[No. 9.]

Financial Commissioner's Circular No. 4, dated Lahore, 20th June 1901.

To all Commissioners and Deputy Commissioners in the Punjab.

Treatment of applications for sale of land in execution of decrees.

IN continuation of the orders contained in this office Circular Memo. No. 3 of 1891, relating to the treatment of applications for the sale of land in execution of decrees, and with reference to the remarks contained in paragraph 28 of this office Circular Letter No. 3441, dated 5th June 1901, the Financial Commissioner invites the special attention of Commissioners and Deputy Commissioners to the provisions of Section 16 (1) of the Punjab Alienation of Land Act, 1900.

2. Now that the Act has been brought into force by a Notification under Section 1 (3), land, which is defined in Section 2 (3) of the Act and includes land applied to agriculture or pastoral purposes, is no longer saleable in execution of any decree or order of any Civil or Revenue Court when it belongs to a member of an agricultural tribe as notified in *Punjab Government Gazette* Notification No. 21 S., dated 22nd May 1901. Accordingly no proposal for the sale in execution of decree of land belonging to a member of an agricultural tribe can now be made except by mistake, and, if any such proposal should reach a Commissioner, his proper course will be to reject it as not being in accordance with law.

---

*The *niáwa* mortgage is explained in paragraph 707 of Mr. H. St. G. Tucker's Dera Ismail Khan Settlement Report and on pages 220-224 of Vol. III of Punjab Customary Law. The niáwadár is a middleman who obtains from the proprietors the right to manage their land on advancing a sum of money known as *niáwa* and he cannot be ousted until this advance has been paid back. The proprietors receive such rent as is agreed upon with the niáwadár, who in turn gets this out of his tenants with something extra as his own share.

3. Section 16 (1) of the Act, however, does not prohibit the attachment in execution of decree of the land of members of agricultural tribes, and such land may therefore still be dealt with in accordance with Section 326 of the Code of Civil Procedure, and in intervening or refusing to intervene the Deputy Commissioner will be guided by the same considerations as heretofore.

4. Land which does not belong to a member of an agricultural tribe remains unaffected by the provisions of the Act, and the directions of Financial Commissioner's Circular Memo No. 3 of 1891 will continue to be applicable to its treatment.

[No. 10.]

Correction Slip No. 2, Volume I, Rules and Orders, 2nd Edition, dated Lahore, the 26th June 1901.

Add the following to the note under "Part G" of No. V, at page 25 :—

NOTE.—Under the provisions of the Punjab Alienation of Land Act, XIII of 1900, land as defined in Section 2 (3) of that Act, which belongs to a member of an agricultural tribe, cannot now be sold in execution of any decree of a Civil Court, and a proposal to sell such land can now only be made by mistake. If a proposal is made, the Commissioner must reject it as not being in accordance with law.

(*ii*) The Act does not prohibit the *attachment* of land belonging to members of an agricultural tribe, and action under Section 326, Civil Procedure Code, may be taken in regard to such land.

It must be understood that this note does not apply to land belonging to persons who are not members of an agricultural tribe.

[No. 11.]

Financial Commissioner's Circular No. 6, dated Lahore, 19th July 1901.

To All Commissioners and Deputy Commissioners in the Punjab.

Application of Act XIII of 1900.

COMMISSIONERS and Deputy Commissioners will have observed that by Notification No. 20 S., dated 22nd May 1901, in a *Government Gazette, Extraordinary, Punjab and its Dependencies,* the Punjab Alienation of Land Act, 1900 (XIII of 1900), was declared to come into force from June 1st, 1901. It was subsequently noticed that to bring the Act into force a Notification in the *Gazette of India* was necessary, and Punjab Notification No. 20 S., dated 22nd May 1901, was accordingly withdrawn and the Act was brought into force with effect from June 8th, 1901, by Notification No. 1243, dated 8th June 1901, in a *Gazette of India, Extraordinary.*

2. The effect of Punjab Government Notifications Nos. 21 S.—25 S., inclusive, dated 22nd May 1901, which were published along with Notification No. 20 S., referred to above, remains however unimpaired by this change of date. Under the provisions of Section 22 of Act X of 1897 (The General Clauses Act) these Notifications could be made and published in anticipation of the commencement of the Act at any time after the passing of the Act and they have accordingly taken effect from June 8th, 1901, the date of the commencement of the Act as explained above.

[No. 12.]

Financial Commissioner's Circular No, 8, dated 14th August 1901.

To all Commissioners, except Pesháwar, and all Deputy Commissioners, except Simla, Hazára, Pesháwar and Kohát.

Instructions how to deal with mutation proceedings relating to transfers made before the commencement of the Punjab Alienation of Land Act, 1900.

THE Financial Commissioner has been asked for a ruling as to how Deputy Commissioners should deal with mutation proceedings referred to them under Rule II of the Rules published under Punjab Government Notification No. 23 S. of the 22nd May, and relating to transfers made before the commencement of the Punjab Alienation of Land Act, 1900.

2. The following instructions are issued with the approval of the Local Government.

3. It is only in the case of permanent alienations that a reference is required by Act XIII of 900 and the rules thereunder to be made to the Deputy Commissioner. Except as regards conditions intended to operate by way of conditional sale (Section 9 (2) and (3)), and sale, in execution of decree, of land belonging to members of agricultural tribes (Section 16 (1)), the Act is not retrospective in its effect. If the permanent alienation has been completed before June 8th, 1901, there is therefore no need arising out of Act XIII of 1900 to refer the case to the Deputy Commissioner at all; and the whole Revenue staff should be instructed accordingly. If, however, a reference is made, the Deputy Commissioner should deal with it on the principle that no objection is to be raised to the mutation on any ground arising out of Act XIII of 1900, inasmuch as that Act does not apply to the case.

4. As to temporary alienations, the like principle applies. Here no reference would in any case, as a consequence of existing instructions, be made by an official as such to the Deputy Commissioner, but Revenue Officers should be instructed that they are

not to refuse sanction to mutation under Rule II (2) of the Notification above quoted if the temporary alienation has been completed before the same date.

5. As to determining when an alienation has been completed, the Financial Commissioner does not think it is wise by any general order to import into these cases the issue whether possession has been had or not. He would hold the transaction to be complete if both parties by some formal act, such as the execution of a deed, or a concurrent application for mutation, had signified that they had completed it. In cases where deeds of sale had been executed before June 8th, 1901, the Financial Commissioner would certainly hold that, for present purposes, the transactions were complete. It might of course happen in disputed cases, where it was contended by one party that the transaction was not complete, that the question of possession would be material to the decision of that issue. Ordinarily it should be avoided.

6. It should also be noted in this connection that in the case of documents compulsorily registerable under Section 17 of Act III of 1877, the transactions to which they relate cannot be deemed to be complete unless and until such documents are duly registered. If, however, such a document is subsequently registered, it will operate from the *date of its execution*, and not from the date of its registration (Section 47 of Act III of 1877), and, consequently, if executed before the 8th June 1901, will not be affected by the provisions of Act XIII of 1900.

[No. 13.]

Copy of a letter No. 233 S., dated 17th August 1900, from M. S. D. BUTLER, Esquire, Junior Secretary to Financial Commissioner, Punjab, to the Settlement Commissioner, Punjab.

IN reply to your letter No. 1932, dated 7th August 1901, I am directed to say that the Financial Commissioner agrees with you that Settlement Officers have no concern with the administration of the Punjab Alienation of Land Act.

[No. 14.]

The 23rd August 1901.

No. 98.—*Notification.*—In exercise of the powers conferred on him by Section 2 (1) of Act XIII of 1900 (The Punjab Alienation of Land Act), the Lieutenant-Governor of the Punjab is pleased, by this order in writing, to determine that in the Muzaffargarh District the expression "agriculturist" means a person holding agricultural land who either in his own name, or in the name of his ancestor in the male line, was recorded as the owner of land, or as a hereditary tenant or as an occupancy tenant in any estate at the Summary Settlement of 1866.

Provided that, if since the making of such settlement, a Civil Court or other competent authority has, before the commencement of this Act, decided that any person was wrongly included in, or omitted from the record thereof, or that any right recorded in the record is erroneously stated, this definition shall be construed with due regard to such decision.

[No. 15.]

The 23rd August 1901.

No. 99.—*Notification.*—In exercise of the powers conferred on him by Section 2 (1) of Act XIII of 1900 (The Punjab Alienation of Land Act) the Lieutenant-Governor of the Punjab is pleased, by this order in writing, to determine that in the Bhakkar and Leiah Tahsils of the Dera Ismail Khan District the expression "agriculturist" means a person holding agricultural land, who either in his own name, or in the name of his ancestor in the male line, was recorded as the owner of land, or as a hereditary tenant or as an occupancy tenant in any estate at the Summary Settlement of 1862.

Provided that, if since the making of such settlement, a Civil Court or other competent authority has before the commencement of this Act decided that any person was wrongly included in, or omitted from the record thereof, or that any right recorded in the record is erroneously stated, this definition shall be construed with due regard to such decision.

[No. 16.]

Financial Commissioner's Circular Letter No. 6014, dated 9th October 1901.

To all Commissioners except Peshâwar, all Deputy Commissioners except Simla, Peshâwar, Hazâra and Kohât.

THE opinion of the Financial Commissioner has been requested as to whether, if under Section 9 (2) of Act XIII of 1900 (Punjab Alienation of Land Act) the mortgagee accepts a mortgage in a new form a new mortgage deed is to be drawn up, or whether it is enough to record on the file the alterations made in the existing deed, and further, whether, if a new mortgage deed is to be drawn up, the mortgagor or the mortgagee is to bear the cost. The following instructions are issued with the approval of the Local Government.

2. If the condition intended to operate by way of conditional sale is to the effect that, in default of payment of the mortgage money or interest at a certain time, the land will be absolutely transferred to the mortgagee, and if the mortgagee agrees to the said condition being struck out, no new mortgage-deed need be drawn up, and it will be sufficient for the Deputy Commissioner to strike out such condition and attest the alteration so made.

3. If, however, the mortgagee elects "to accept in lieu of the said mortgage" a mortgage which may at his option be either in Form (*a*) or Form (*b*) as permitted by Section 6 of the Act, a new deed of mortgage will have to be executed, as in such a case there is no mere alteration of a subsisting mortgage but the substitution of one mortgage of one kind for another mortgage of a different kind. In this case stamp duty will have to be paid on the new instrument, and in accordance with Section 29 of the Stamp Act this would, in the absence of any contract to the contrary between the mortgagor and mortgagee, fall upon the mortgagor. So, too, under the ordinary rule of law, the mortgagor will have to meet other expenses incidental to the new mortgage.

4. I am to add that the Government of India will be moved under Section 9 (*a*) of the Stamp Act to remit this stamp duty, but the law now applicable is as stated above.

[No. 17.]

The 17th October 1901.

No. 111.—*Notification.*—In supersession of Notification No. 22 S., dated the 22nd May 1901, and in exercise of the power conferred by Section 24 of the Punjab Alienation of Land Act, 1900 (XIII of 1900), the Lieutenant-Governor of the Punjab, with the previous sanction of the Governor-General in Council, is pleased to exempt.—

(1) from the operations of the provisions of the said Act other than those of Section 10 the following parts of the Punjab, namely—

(*a*) the district of Simla,

(*b*) the district of Hazára,

(*c*) the district of Peshâwar,

(*d*) the district of Kohát,

(*e*) the Bannu and Marwat Tahsils of the district of Bannu, and

(*f*) the Dera Ismail Khan, Kuláchi and Tánk Tahsils of the district of Dera Ismail Khan, and

(2) from the operation of the provisions of the said Act, other than those of Section 1, Section 2, clauses (1), (2), (3) and (6), Sections 4, 10 and 16, Section 17, sub-section (1), Section 18, sub-section (2), Section 21, sub-section (2), and Section 24, every area included within the limits of any cantonment or municipality in any part of the Punjab not exempted from the operation of all the provisions of the said Act by clause (1) of this Notification.

[No. 18.]

The 8th November 1901.

No. 44.—*Notification.*—In exercise of the powers conferred on him by Section 25 of Act XIII of 1900 (Punjab Alienation of Land Act), the Lieutenant-Governor of the Punjab is pleased to make the following rules for giving effect to the provisions of Section 17 of the said Act:—

1. (*a*) When an instrument which records or gives effect to a permanent alienation of land, requiring, under Section 3 of the Act, the sanction of the Deputy Commissioner, is presented to a registering officer unaccompanied by a certified copy of an order giving such sanction; or

(*b*) when an instrument of agreement purporting to charge or alienate the produce of land, which, under Section 15 of the Act, requires the sanction of the Deputy Commissioner, is presented unaccompanied by a certified copy of an order giving such sanction; or

(*c*) when an instrument of mortgage which is required to be made in one of the forms prescribed in Section 6 of the Act is presented not made in any such prescribed form;

the registering officer in refusing to admit the instrument to registration shall proceed in the following manner:—

He shall (*d*) record no endorsement upon the document itself, nor shall he make any entry of reasons for refusal to register in Register Book II;

but (*e*) he shall enter his reasons for not admitting the instrument to registration in a separate book (to be prescribed and provided by the Inspector-General of Registration), and shall give to the presenter of the instrument a copy of such entry, and shall at the same time return the instrument unendorsed to the presenter.

2. An instrument of the kinds mentioned in the foregoing rule which has been returned thereunder may be presented again for registration, and may then be admitted to registration if accompanied by the certified copy of the order which was required, or if amended by the parties themselves, or by the Deputy Commissioner acting under Section 9 of the Act, so as to make it conform to the prescribed form.

3. (*a*) In registering an instrument of the kinds mentiond in clauses (*a*) and (*b*) of Rule 1 the registering officer shall regard the accompanying order of the Deputy Commissioner giving the necessary sanction as a part of the instrument, and shall cause a copy of such order to be entered along with the copy of the instrument in the appropriate Register Book; and

(*b*) in registering an instrument of the kind mentioned in clause (*c*) of Rule 1, when the same has been revised or altered by the Deputy Commissioner acting under Section 9 of the Act, the registering officer shall regard such order of revision or alteration as a part of the instrument, and shall cause a copy of such order to be entered along with the copy of the instrument in the appropriate Register Book.

4. An appeal may be lodged to the Registrar against any return of an instrument made by a Sub-Registrar under clause (*e*) of Rule 1, and, if the Registrar directs that the instrument shall be registered in the form in which it was originally presented, the Sub-Registrar shall register it accordingly. If the Registrar directs that the instrument shall be registered only after specified amendment or addition, then the provisions of Rule 2 as to admission to registration shall apply.

[No. 19.]

Circular No. 9, from Inspector-General of Registration, Punjab, to all Registrars in the Punjab, dated 15th November 1901.

1. The attention of registering officers is drawn to the rules made by the Local Government under the Punjab Alienation of Land Act, 1900, and published under *Punjab Government Gazette* Notification No. 44, dated the 8th November 1901, concerning the duties of registering officers in refusing or admitting registration of instruments alienating rights in land.

2. These rules were required because Section 17 of the Punjab Alienation of Land Act, 1900, enjoins that when an instrument is presented for registration, which—

(1) contravenes any provision of the Act, or

(2) records, or gives effect to any transaction which requires the sanction of the Deputy Commissioner under the Act, and the instrument is not accompanied by a certified copy of the order giving such sanction,

the instrument shall not be registered.

3. To apply the rules properly, registering officers must acquaint themselves with the meaning of the terms "agriculturist" and "agricultural tribe" as used in the Act.

The definition of the word "agriculturist" is given in Section 2 of the Act, and it means, generally speaking, a person holding agricultural land who either in his own name, or in the name of his ancestor in the male line, was recorded as the owner of land or as a hereditary tenant, or as an occupancy tenant, in any estate at the first regular settlement, or, if the first regular settlement was made in or since the year 1870, then at the first regular settlement, or at such previous settlement, as the Local Government may, by order in writing, determine.

As to the meaning of the term "agricultural tribe," Punjab Government Notification No. 21 S., dated 22nd May 1901, has decided what persons are members of agricultural tribes in each district. In each district all the tribes named in the Notification opposite the name of that district form, to all intents and purposes, one society between the members of which alienations are not restricted by the Act.

Nor are alienations by persons who are not members of agricultural tribes restricted by the Act (except in one instance mentioned below).

4. Therefore when a deed of permanent alienation of land is presented to a registering officer his first business is to consider who the alienor is.

If the alienor is not a member of an agricultural tribe the deed may be registered without attention to the question of who the alienee is, except in one case, and that is when the alienor is an agriculturist who has acquired the land in question from a member of an agricultural tribe, of his village. In such case the alienee must be a member of an agricultural tribe, or an agriculturist of the village in which the land is situate. If the alienee is not such a person the instrument should not be admitted to registration, action being taken under Rule 1.

5. When an instrument of permanent alienation of land is presented, if the alienor is a member of an agricultural tribe, then the registering officer should ascertain who the alienee is.

If the alienee is (1) an agriculturist in the village in which the land in question is situate, or (2) a member of one of the agricultural tribes in the same district as the alienor, or of the same agricultural tribe in another district, the instrument may be registered without question.

If the alienee is not such a person, the Deputy Commissioner's sanction to the transfer is required, and, if no copy of such order is produced, the document should be returned unendorsed under Rule 1, with instruction that a copy of the Deputy Commissioner's order of sanction is required, and that the instrument can only be admitted to registration when this defect has been supplied, and it has been presented again under Rule 2.

6. When a mortgage-deed is presented it is necessary to ascertain who the alienor is. If he is not a member of an agricultural tribe, the deed can be registered without question, even although it contains a condition intended to operate by way of conditional sale, for, although such condition would be void under Section 10 of the Act, the deed in other respects would not be necessarily invalid.

If the alienor is a member of an agricultural tribe, then, if the alienee is also a member of one of the agricultural tribes in the same district as the alienor, or of the same agricultural tribe in another district, the deed may be registerd without question.

But if the alienor is a member and the alienee is not a member of an agricultural tribe, then the deed should be returned under Rule 1, unless it is drawn up in one or other of the following forms :—

(*a*) in the form of a usufructuary mortgage by which the mortgagor delivers possession of the land to the mortgagee, and authorises him to retain such possession and to receive the rents and profits of the land in lieu of interest and towards payment of the principal, on condition that after the expiry of the term agreed on, or (if no term is agreed on or if the term agreed on exceeds twenty years) after the expiry of twenty years, the land shall be re-delivered to the mortgagor ; or

(*b*) in the form of a mortgage without possession, subject to the condition that if the mortgagor fails to pay principal and interest according to his contract, the mortgagee may apply to the Deputy Commissioner to place him in possession for such term, not exceeding twenty years, as the Deputy Commissioner may consider to be equitable, the mortgage to be treated as a usufructuary mortgage for the term of the mortgagee's possession, and for such sum as may be due to the mortgagee on account of the balance of principal due, and of interest due not exceeding the amount claimable as simple interest at such rate, and for such period as the Deputy Commissioner thinks reasonable ; or

(*c*) in the form of a written usufructuary mortgage by which the mortgagor recognises the mortgagee as a landlord and himself remains in cultivating occupancy of the land as a tenant, subject to the payment of rent at such rate as may be agreed upon not exceeding sixteen annas per rupee of the amount of the land revenue in addition to the amount of the land revenue of the tenancy, and the rates and cesses chargeable thereon, and for such term as may be agreed on, the mortgagor having no right to alienate his right of cultivating occupancy, and the mortgagee having no right to eject the mortgagor unless on the grounds mentioned in Section 39 of the Punjab Tenancy Act, 1887.

When a mortgage-deed is returned owing to its not being drawn up in one or other of the above forms, it may be accepted for registration if presented again in amended form under Rule 2.

7. When an instrument purporting to alienate or charge produce of land is presented, it is necessary to ascertain who the alienor is. If he is a member of an agricultural tribe, then, if the deed purports to alienate or charge the produce for more than one year, the Deputy Commissioner's sanction to the alienation is required, and if no copy of such order of sanction is produced, the deed should be returned under Rule 1 with instructions that a copy of the Deputy Commissioner's order of sanction is required before it can be admitted to registration under Rule 2.

8. An instrument of lease or farm made by a member of an agricultural tribe should not be refused admission to registration merely because the term of years prescribed in Section of the Act is exceeded in the conditions of the instrument, as the instrument in other respects would not be necessarily invalid.

9. If, when an instrument is returned for amendment under Rule 1 it is entirely re-written and re-executed so as to form a fresh document which conforms to the form

prescribed by the Act, such fresh document may of course be admitted to registration under Rule 2 just as if it were the original document amended.

10. (*a*) Delay in registering a document occasioned by the necessity of obtaining any order of a Deputy Commissioner under the Punjab Alienation of Land Act, 1900, should, in the absence of any reason to the contrary, be held by the registering officer to be a delay due to urgent necessity within the meaning, and for the purposes of Sections 24 and 34 of Act III of 1877, and in such cases Sub-Registrars should take the orders of Registrars accordingly.

(*b*) If any delay occasioned by the necessity of obtaining an order of a Deputy Commissioner under the Punjab Alienation of Land Act, 1900, is not due to any default on the part of the person desiring registration, the Registrar, in directing the registration of the document, should, whether he is acting under Section 24 or Section 34 of Act III of 1877, require payment of only a nominal fine. It is obvious that the fine or additional fine should be as nominal as possible, and an order for the payment of an amount of even only one anna in excess of the proper registration fee would satisfy the rule as to fines or additional fines, made under Section 69 of Act III of 1877 to meet cases of this kind.

11. (*a*) It is necessary to add that "permanent alienations" mean sales, exchanges, gifts and wills, but not gifts for religious or charitable purposes whether made by gift or by will.

(*b*) Also that "land" means land which is not occupied as the site of any building in a town or village and is occupied or let for agricultural purposes, or for purposes subservient to agriculture, or for pasture, and includes—

(*a*) the sites of buildings and other structures on such land;

(*b*) a share in the profits of an estate or holding;

(*c*) any dues or any fixed percentage of the land-revenue payable by an inferior land-owner to a superior land-owner;

(*d*) a right to receive rent; and

(*e*) any right to water enjoyed by the owner or occupier of land as such.

[No. 20]

The 6th December 1901.

No. 6167 *S. R.*—*Notification*—In exercise of the power conferred by Section 9, clause (*a*), of the Indian Stamp Act, 1899 (II of 1899), the Governor-General in Council is pleased, where a fresh mortgage-deed is executed in lieu of a previous mortgage-deed for the purpose of giving effect to the provisions of Section 9, sub-section (2), of the Punjab Alienation of Land Act, 1900 (XIII of 1900), to remit so much of the duty with which such fresh mortgage-deed is chargeable as is not in excess of the duty already paid in respect of such previous mortgage-deed.

[No. 21]

Chief Court Circular Memo. No. 3—1118 G., dated Lahore, the 13th March 1902.

To all Civils Courts in the Punjab.

SUBJECT.

Interpretation and working of Section 9, sub-section 3, of Act XIII of 1900.

SOME difficulty having been felt in the interpretation and working of Section 9, sub-section 3, of Act XIII of 1900 (Punjab Alienation of Land Act), the Hon'ble Judges are pleased to issue the following instructions:—

2. The difficulty of interpretation is in connection with the words "Proceedings for the enforcement of a condition intended to operate by way of conditional sale."

The question has been raised whether they mean proceedings taken under Section 8 of Regulation XVII of 1806 *only*, or whether they include proceedings in suits, appeals or execution of decree as well.

This Court has now held that the words above quoted mean proceedings under Section 8 of Regulation XVII of 1806 *only*, *vide* this Court's ruling in Punjab Record No. 26 of 1902 (Civil).

3. The difficulty in the working of the sub-section relates to the stage at which a reference should be made by the Civil Courts to the Deputy Commissioner. The question is whether the Civil Court should not postpone reference until it has recorded a finding as to the validity of the mortgage or on any dispute concerning limitation. The section itself is silent on the subject, but the Act must be construed reasonably, and it is obvious that unless the mortgage is a subsisting one and is not time-barred, to refer any matters connected with it to the Deputy Commissioner is to waste time.

The Hon'ble Judges accordingly direct that Civil Courts shall not make references to the Deputy Commissioner under Section 9, sub-section 3, until they have disposed of any objections brought by the mortgagor against the validity of the mortgage, or of any plea raised by him on the point of limitation.

GAZETTE NOTIFICATION.

[No. 22]

The 14th May 1902.

No. 84.—*Notification.*—In exercise of the power conferred by Section 24 of the Punjab Alienation of Land Act, 1900 (XIII of 1900), and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor of the Punjab is pleased, in supersession of so much of the Notification of the Government of the Punjab in the Department of Revenue and Agriculture, No. 111, dated the 17th October 1901, as affects the territories administered by him, to exempt—

(1) from the operation of the provisions of the said Act other than those of Section 10, the District of Simla; and

(2) from the operation of the provisions of the said Act, other than those of Section 1, Section 2, clauses (1), (2), (3) and (6), Sections 4, 10 and 16, Section 17, sub-section (1), Section 18, sub-section (2), Section 21, sub-section (2), and Section 24, every area included within the limits of any cantonment or municipality in any part of the Punjab, other than the district of Simla.

[No. 23]

The 16th July 1902.

No. 114.—*Notification.*—Consequent on the issue of the Punjab Government Notification No. 84, dated the 14th May 1902, by virtue of which the provisions of the Punjab Alienation of Land Act, 1900 (XIII of 1900), extend to the Attock Tahsil of the Ráwalpindi District, and in supersession of so much of Punjab Government Notification No. 21 S., dated the 22nd May 1901, as applies to the Rawalpindi District, of which the Attock Tahsil did not form part at the time the last mentioned notification was issued, the Lieutenant-Governor of the Punjab, in exercise of the powers conferred on him by Section 4 of the Punjab Alienation of Land Act, 1900 (XIII of 1900), and with the previous sanction of the Governor-General in Council, is pleased to determine that all persons either holding land or ordinarily residing in the Ráwalpindi District and belonging to any one of the tribes hereinafter named are to be deemed to be agricultural tribes within the district of Ráwalpindi for the purposes of the said Act, that is to say—

Awáns.	Dhunds.
Rájputs.	Sattis.
Sayads.	Danials.
Patháns.	Kethwals.
Koreshis.	Maliárs.
Khattars.	Mughals.
Jodhrás.	Jats.
Ghakkars,	Gujars.

Biloches.

2. All such "agricultural tribes" within the District of Rawalpindi shall be deemed to be a group of agricultural tribes.

[No. 24]

The 1st October 1902.

No. 156.—*Notification.*—In exercise of the powers conferred on him by Section 2 (1) of Act XIII of 1900 (The Punjab Alienation of Land Act), the Lieutenant-Governor of the Punjab is pleased, by this order in writing, to determine that in the Isa Khel and Miánwáli Tahsils of the Miánwáli District the expression "agriculturist" means a person holding agricultural land who either in his own name or in the name of his ancestor in the male line was recorded as the owner of land or as a hereditary tenant or as an occupancy tenant in any estate at the Summary Settlement of 1854.

Provided that if since the making of such settlement a Civil Court or other competent authority has before the commencement of this Act decided that any person was wrongly included in or omitted from the record thereof or that any right recorded in the record is erroneously stated, this definition shall be construed with due regard to such decision.

[No. 25]

Financial Commissioner's Circular Letter No. 96, dated Lahore, 14th January 1903.

To all Revenue Officers in the Punjab.

I am directed to convey the following instructions which are issued with the concurrence of Government as to the applicability of the Punjab Alienation of Land Act (XIII of 1900) to cases of the creation or transfer of occupancy rights.

2. The instructions now issued should be acted on until they have been modified by an authoritative decision of the Courts or by Government.

3. If a proprietor creates in favour of any person a right of occupancy in his, the proprietor's proprietary land, the transaction is, for the purposes of the Alienation of Land Act to be considered to be a lease for more than twenty years, and, therefore, in the circumstances set forth in Section 11 of the Act, is to be deemed to be a lease for a term not exceeding twenty years.

4. It was not the intention of the Legislature, in drawing up Act XIII of 1900, to impose upon occupancy tenants any fresh restrictions in regard to the alienation of their holdings. It was held that their powers of alienation were already sufficiently restricted by Chapter V of the Punjab Tenancy Act (XVI of 1877), and consequently although it was declared that "land" includes "a right to receive rent," the correlative of that right in certain cases, *viz.*, a right of occupancy, was omitted. Accordingly if a tenant having a right of occupancy transfers or attempts to transfer that right by sale, gift or mortgage, his case should be dealt with under Chapter V of the Tenancy Act, and Act XIII of 1900 should not be applied.

[No. 26.]

GAZETTE NOTIFICATION.

The 6th April 1903.

No. 34—*Notification.*—In exercise of the powers conferred by Section 4 of the Punjab Alienation of Land Act, 1900 (XIII of 1900), and in supersession of so much of Punjab Government Notification No. 21 S., dated the 22nd May 1901, as relates to the Dera Gházi Khan District, the Lieutenant-Governor of the Punjab, with the previous sanction of the Governor-General in Council, is pleased to determine that, for the purposes of the said Act,—

(*a*) all persons either holding land or ordinarily residing, in the Dera Gházi Khan District, and belonging to any one of the tribes hereinafter named, shall be deemed to be agricultural tribes within that District, that is to say,—

Beloches,	Mughals,	Koreshis,
Jat,	Rájpúts,	Mujáwars, and
Syads,	Aráins,	Khetrans.
Pathán,	Máchhis,	

(*b*) all such "agricultural tribes" within the District of Dera Gházi Khan shall be deemed to be a group of agricultural tribes.

[No. 27.]

Circular Letter No. 3482, Financial Commissioner's Office, dated Lahore, 6th June 1903, from Senior Secretary to the Financial Commissioner, Punjab, to all Commissioners and Deputy Commissioners in the Punjab.

Sub-head No. 441, No. 100.

In this office Circular Letter No. 6014, dated the 9th October 1901, the question was discussed as to the circumstances under which, in pursuance of the provisions of Section 9 (2) of the Punjab Alienation of Land Act, a fresh mortgage-deed should be drawn up. Certain other aspects of the case were also discussed in paragraph 10 (1) and (2) of the annual report on the working of the Act for 1900-01.

2. By Government of India Notification No. 6167 S. R., dated the 6th December 1901, so much of the stamp duty on a new mortgage-deed drawn up as referred to above as is not in excess of the duty already paid in respect of the previous mortgage was remitted.

3. It was hoped that this concession would obviate any objection on the part of a mortgagor to executing a revised mortgage, but apparently in a good many cases it has not been sufficient to secure this end. The question therefore has come up for decision as to what the legal position is as regards the rights of a mortgagor and mortgagee when the former refuses to execute the fresh mortgage; and the following instructions are issued for information and guidance with the approval of Government.

4. Where a mortgage made before the commencement of the Act and still current, is brought to the notice of the Deputy Commissioner and the mortgagee does not agree to the striking out of the conditional sale clause, but elects (as he is at liberty to do) to accept an approved form of mortgage in lieu of the original mortgage, and the mortgagor refuses to execute such fresh mortgage, the only course open to the Deputy Commissioner to adopt is to refrain from further action and leave matters as he found them.

5. If the mortgagee on being put to his election by the Deputy Commissioner prefers to accept another mortgage instead of merely having the conditional sale clause struck out his consent is conditional on his receiving such other mortgage, and if the mortgagor declines to execute the latter, the mortgagee can justly claim that, inasmuch as he has done everything required of him by the Act, his original mortgage should be left unaltered.

6. The parties will thus be relegated to their former position, and it seems probable that the mortgagee will in due course follow the procedure laid down in Regulation XVII of 1806. At any rate the case will pass out of the hands of Revenue Officers, and it remains to be seen how it will be dealt with by the Civil Courts. If a Deputy Commissioner or Commissioner becomes acquainted with any ruling of a Civil Court not open to appeal or no longer open to appeal which shows how a mortgage thus left in its original condition by a Deputy Commissioner has been dealt with by such Court, he should report the same for the information of the Financial Commissioner.

No. 28.]

Memo. No. 86 S., dated Simla, 22nd June 1903, from Senior Secretary to Financial Commissioner, Punjab, to all Commissioners of Divisions and Deputy Commissioners in the Punjab.

I am directed to communicate the annexed revised scheme for the annual report on the working of the Alienation of Land Act (XIII of 1900) in supersession of the detailed instructions contained in Revised Revenue Circular No. 61. The general instructions contained in that Circular relating to the preparation of all annual reports should, of course, be carefully followed.

THE ANNUAL REPORT ON THE WORKING OF THE PUNJAB ALIENATION OF LAND ACT (XIII OF 1900).

THE annual report on the working of this Act will deal with the year ending on the 30th September next before the date fixed for the submission of the report.

Every Deputy Commissioner will submit his report to the Commissioner some time during the month of October in each year. The Commissioner will forward it to the Financial Commissioner not later than the 20th November.

In sending on the district reports Commissioners will make such remarks as they think necessary.

District reports should be as brief as possible consistent with a concise statement regarding the topics detailed in the accompanying memorandum or as many of them as can be usefully noted on.

The district reports should be written on half-margin and the parts and sections should be kept quite separate. The provincial report will be limited to 15 pages of printed matter exclusive of statements.

The form of statements to accompany the report are given at the end of the memorandum.

Detailed memorandum as to subjects to be dealt within the report on the working of the Punjab Alienation of Land Act (XIII of 1900).

No. of subject.	Detail of subjects with notes as to treatment.
	PART I.—THE WORKING OF THE ACT.
	SECTION I.—PRELIMINARY.
1	How has the definition of agriculturist worked? (Section 2 (1)). In particular, is there any need for the extension or restriction of the definition of "agriculturist"?
2	How have the other definitions in Section 2 of the Act worked? In particular, has the exemption of gifts for religious and charitable purposes from the definition of "permanent alienation" been made a cloak for evading the law? (Section 2 (4)).
	SECTION II.—PERMANENT TRANSFERS.
3	In taking action under Section 2 of the Act how far have the instructions conveyed in paragraph 11 of Financial Commissioner's Circular letter No. 3441 of 5th June 1901 been found sufficient? In particular— (*a*) what steps have been taken to ascertain that no member of an agricultural tribe included in the same group as the vendor has offered or is ready to offer a fair price for the land sanction to the alienation of which is requested? (Paragraph 11 (*b*) of circular); (*b*) have applications for leave to permanently alienate land to subjects of Native States and residents of the North-Western Provinces adjoining Punjab districts been made, and, if so, how have they been treated?
4	How have the rules published under Punjab Government Notification No. 23 S., dated 22nd May 1901, worked so far as they affect permanent alienations? Do any improvements in procedure suggest themselves?
	SECTION III.—TEMPORARY ALIENATION OF LAND.
5	Has any difficulty been found in working Section 6 (1) (*c*) of the Act owing to the prevalence of rents in kind? How have kind rents been expressed in terms of the land revenue?
6	Is there any need to permit, by virtue of the powers conferred by Section 6 (1) (*d*) of the Act any other forms of mortgage besides those specified in the Act or to permit any special conditions to be made in accordance with the powers conferred by Section 8 (1) (*c*)?
7	How have the rules published under Punjab Government Notification No. 23 S., dated 22nd May 1901, worked so far as they affect temporary alienations? Is it desirable that in accordance with a suggestion mentioned in paragraph 20 of this office Circular letter No. 3441, dated 5th June 1901, temporary alienations which contravene the provisions of Sections 6, 7 or 8 of the Act should be brought to the notice of the Deputy Commissioner as a part of the mutation procedure, or is it preferable to leave the parties to take action of themselves?
8	Do any remarks as to leases and farms under Section 11 of the Act suggest themselves? Is there any tendency to employ these provisions to evade the Act, and, if so, how?
	SECTION IV—GENERAL PROVISIONS.
9	Do any remarks as to Section 17 of the Act suggest themselves? In particular, has the delay necessitated by the need of getting the Deputy Commissioner's sanction to alienations under Section 8 of the Act been found to be such that documents cannot be registered within the period required by law? If so, does the remedy indicated in the Inspector-General of Registration's Circular No. 9 of 15th November 1901 on the subject suffice?
10	Are any further exemptions necessary under Section 24 of the Act?
11	What amount of extra work has been thrown on Revenue officials by the Act?

Detailed memorandum as to subjects to be dealt with in the report on the working of the Punjab Alienation of Land Act (XIII of 1900)—concluded.

No. of subject.	Detail of subjects with notes as to treatment.
	SECTION V.—GENERAL REMARKS.
12	How is the Act regarded by the people generally? In particular— (*a*) What devices have been resorted to for evading its provisions? Is there any tendency for the subterfuges referred to in paragraphs 11 (*ii*), (*iv*) and (*vi*) of this Office Circular letter No. 3441, dated 5th June 1901, to be adopted? (*b*) Has there been any appreciable contraction of credit amongst zamindars or any increased demand for takavi on that account? (*c*) What has been the effect of the Act on rents? Are they less than before the Act came into force or less than they were before its first publication? (*d*) Do money-lenders complain of injury to their business? If so, what do they suggest should be done in their interest?
13	Any other remarks.
	PART II.—ANALYSIS OF STATEMENTS.
	STATEMENT I.
14	Note the areas mortgaged, sold and remdeemed generally and discuss any abnormal feature disclosed. Compare the market value of land as shown by sale price and mortgage money with what it was before the passing of the Act. Is there any tendency towards the more frequent sale or mortgage of rights of occupancy because they are not affected by the restrictions of the Act? Are redemptions gaining on mortgages and is the area under usufructuary mortgage at all decreasing in consequence of the Act?
	STATEMENT II.
15	Comments should always be made in columns 2 and 9. In the case of column 2 describe in brief and general terms the reasons why applications were granted, or, if no applications were granted, why this was so. In the case of column 9 give a sufficient description of the proceedings to enable the Financial Commissioner to judge both of the nature of the work arising under this head and of the expediency of prescribing additional columns to show the working of the Act in fuller details. Then scrutinise columns 3 to 8 and say anything that is worth saying. In considering what is worth saying the points to be borne in mind are— (1) whether the applications were made under a misapprehension; (2) the numbers granted or refused; (3) the reasons for the decisions; (4) whether there have been decisions of superior authority on questions of principle; (5) whether devices have been perceived for the evasion of the Act. If cases have occurred under column 5 the principles upon which the proportion of the mortgage debt equitably due has been fixed should be stated. If cases have occurred under column 8 notice any tendency of the provisions of Section 15 to hamper trade or to use the provisions to evade the Act. If evasions of the Act have already been or will be sufficiently noticed under subjects 2, 8, 12 (*a*) or 17 and 18 of the report it will suffice to give the reference.
	STATEMENTS III—VI.
16 and 17	*Mortgages and Sales.*—State what tribes are gaining or losing lands or interests in lands and from and to what other classes. Is there any tendency for the big tribes to absorb the lands of the smaller tribes? What is the effect of the Act on permanent alienations by members of agricultural tribes (1) to "agriculturists" who are not members of such tribes, (2) to other persons also not being such members. Discuss the position of the "agriculturists" generally. Is the status understood and claimed? Does the "agriculturist" tend to become a go-between utilised for the purpose of evading the Act? Supplement here any remarks made under subject 1; note what good or harm is done by the existence of the class "agriculturists" and remark on the question whether the enumeration or grouping of tribes calls for any improvement.
	STATEMENT VII.
18	Discuss the question of redemptions of mortgages by members of agricultural tribes as compared with redemptions as a whole dealt with under subject 14.

STATEMENT No. I.

Totals of Sales, Mortgages and Redumptions and other Transfers for the year ending 15th June 190 .

STATEMENT No. II.

Statement showing the number of Proceedings taken and Applications instituted and disposed of under the Punjab Alienation of Land Act, XIII of 1900, *during the year ending 30th September* 190 .

STATEMENTS Nos. III and IV.

Statement showing details of Mortgages for the year ending 15th June 190 .

STATEMENT No. V.

Abstract of Sales and Mortgages by Districts for the year ending 15th June 190 .

STATEMENT No. VI.

Statement showing losses by and gains to Agricultural Tribes by Sales and Mortgages for the year ending 15th June 190 .

STATEMENT No. VII.

Statement showing Redemptions of Mortgages by Members of Notified Agricultural Tribes for the year ending 15th June 190 .

[No. 29.]

Circular No. 3, dated Lahore, the 10th August 1903, from Senior Secretary to the Financial Commissioner, Punjab, to all Revenue Officers in the Punjab.

Scrutiny of mutations of mortgages in order to detect violations of the Act which may have passed unnoticed by Revenue Officers.

THE directions as to the procedure to be followed by Revenue Officers in mutation proceedings concerning mortgages by members of agricultural tribes which contravene the provisions of the Land Alienation Act are contained in paragraph II (2) of Government Notification No. 23 S. of the 22nd May 1901, and are as follows :—

"The Revenue Officer, after hearing the parties, and recording a note of their representations, shall, in the case of any temporary alienation (which contravenes the provisions of the Act), refuse to sanction mutation of names and refer the parties to the provisions of the Land Alienation Act, which they have contravened."

2. The reasons for adopting this procedure are given in paragraph 20 of Financial Commissioner's Circular Letter No. 3441, dated the 5th June 1901. The procedure has, however, been the subject of considerable difference of opinion in the Annual Reports, received from districts, and it has been pointed out that a certain number of alienations which contravene the Act have been allowed to pass unnoticed by Revenue Officers. To remedy this, it has been suggested that all cases of mortgages should be reported to Deputy Commissioners as a part of the Mutation Proceedings. The Financial Commissioner is, however, unwilling to take this extreme step which would involve a great deal of extra work, and he hopes that if provision is made for systematic scrutiny of mutation cases with the object of detecting violations of the Act, and if Deputy Commissioners and Revenue Assistants take every opportunity of satisfying themselves that subordinate Revenue Officers are conversant with the Act and Rules thereunder, the decisions of subordinate Revenue Officers will in future be more frequently in accordance with the law.

3. As to the manner in which Deputy Commissioners should arrange for the systematic scrutiny required, the Financial Commissioner does not wish to lay down hard and fast rules, but Deputy Commissioners should consider the following suggestions and should note in the next Annual Report on the working of the Act the plan, whatever it may be, that they adopt. One suggestion is that Revenue Assistants in their periodical inspections of tahsils should carefully scrutinise one quarter or some other fixed proportion of the mutation proceedings which have been filed since their last visit; and in doing this should examine a number of mutations from each patwari's circle. They should then send at once to the Deputy Commissioner for such orders as he may deem fit to pass all mutation proceedings which they find to be irregular by reason of any departure from the provisions of the Alienation of Land Act or of the rules thereunder. This procedure may be suitable where the Revenue Assistant is himself well acquainted with the Act and rules and can be trusted to do the work well and thoroughly. Another suggestion is that, say with four tahsils to manage, the Deputy Commissioner should order all mutations affected by the Act from two tahsils to be sent in for information through the Revenue Extra Assistant Commissioner or other Extra Assistant Commissioner or Assistant Commissioner for one month and from the other two for the next month. In the first month it would be seen whether the scrutinising and mutating officers understood their work, and if so, no further orders in mutation would need to be sent in and periodical inspections of filed mutation orders would suffice. On the contrary if any vagueness was found to exist, orders would continue to be sent in until the Deputy Commissioner was satisfied that his subordinates understood their work. Other suggestions may occur to different officers. The desire of the Financial Commissioner is that each Deputy Commissioner shall give in his own district such orders as shall in his own judgment best conduce to the attainment of the end in view.

4. No general rules are necessary or desirable as to the steps which Deputy Commissioners should take when mutation proceedings vitiated in some way by a violation of the Act or rules are brought to their notice. They will act according to the circumstances of the case, remembering that where they have not power to act themselves, but some order of superior authority is needed to set a case right, it is always open to them to initiate revision proceedings under Section 16 of the Land Revenue Act which has been made applicable to Alienation of Land cases by Section 19 of Act XIII of 1900. As an illustration of what may be done under such circumstances the case may be taken of mutations of mortgages not allowed by the Act and wrongly accepted. Here under Section 9 (1) of the Act the Deputy Commissioner can, *suo motu*, revise or alter the terms of the mortgage. If he does this he can then order a fresh mutation in accordance with facts. The alternative course is, as already indicated, to initiate revision proceedings under Section 16 of the Land Revenue Act, leaving the parties to themselves revise their contract. The Deputy Commissioner can decide at his discretion to follow either course. He will, however, bear in mind that conditions not permitted by or under the Act are null and void (Section 8 (2)). If the parties hold to their contract for a time, the position of the mortgagee would be altogether insecure, for his mortgagor might at any time apply to the Deputy Commissioner under Section 9 (1) to revise and alter the mortgage ; and if the mortgagee sued on his mortgage, then the Court, under Section 9 (3) would have no option but to refer the case to the Deputy Commissioner for the same purpose. Other cases of irregularity do not at present call for any remarks. The Financial Commissioner thinks it is specially necessary to guard against the erroneous acceptance of mortgages in mutation proceedings, and he has therefore commented on this part of the subject in some detail.

[No. 30]

Circular No. 4, dated Lahore, the 9th September 1903, to all Commissioners and Deputy Commissioners in the Punjab.

WHEN in connection with a mutation proceeding it comes to the notice of a Deputy Commissioner that a permanent alienation of land has been made which, under the provisions of the Alienation of Land Act, cannot take effect as such unless and until he gives sanction thereto and he decides that he will not give sanction, he may indeed dispose of the mutation proceeding by refusing mutation, but such an order is not sufficient to dispose of the case. Effect must be given to Section 14 of the Act unless the parties elect, as they are free to do, to cancel the transaction, the alienor being restored to possession, if he has parted with it, and the purchase money being repaid. If the parties elect for the benefit of Section 14, then the form of the mortgage to be substituted for the permanent alienation is determined by the Act itself, *viz.*, form (*a*) in Section 6 ; but the term, not exceeding 20 years, and the conditions of the mortgage must be fixed by the Deputy Commissioner.

2. Accordingly, on refusing mutation he should call for a report as to the wishes of the parties ; and, if they elect for a mortgage, for such particulars as will enable him to settle its duration and conditions.

The final result of the proceedings whether the permanent alienation be cancelled or a mortgage be substituted for it, should be brought on to the annual record by means of the mutation procedure.

3. Commissioners of Divisions should carefully scrutinise the quarterly business returns of cases disposed of under the Alienation of Land Act, and should from time to time call for a few specimen cases in order to satisfy themselves that the principles of the Act are being duly observed. If in connection with any cases so called for points of doubt or difficulty arise, a reference may be made for the orders of the Financial Commissioner.

[No. 31]

Circular Letter, No. 7, dated Lahore, the 29th October 1903, from Director of Land Records and Agriculture, Punjab, to all Commissioners, Deputy Commissioners, Settlement Officers and Colonisation Officers in the Punjab.

1. UNDER the directions of the Financial Commissioner, I have the honour to address you with reference to certain matters connected with the efficient working of the Land Alienation Act.

2. In the case of an "agriculturist" who has obtained a permanent alienation of land from a member of an agricultural tribe after the commencement of the Act (June 8th, 1901), his power of subsequent permanent alienation is restricted under the proviso to Section 3 of the Act. It is consequently very important that Revenue Officers should be able to identify such parcels of land with facility, and, to provide for this, the following orders are issued :—

(*a*) Patwáris will now overhaul all entries in their mutation registers made after June 8th, 1901, and in the case of all permanent alienations effected after that date, where the alienee is an "agriculturist," but is not a member of an agricultural tribe, they will note in the column of remarks in the *jamabandi*, opposite to the land alienated as the case may require, remarks as follow :—

(*i*) "Acquired from a member of an agricultural tribe, after the" "Act came into force (bád ijrae Act, zaráiti kaum ke zamíndár" "se hásil kí)," or

(*ii*) "Not acquired from a member of an agricultural tribe (zaráiti" "kaum ke zamíndár se nahín hásil kí)."

(*b*) In future, one of these notes will be made in the *jamabandi* in the case of all permanent alienations of this kind, and the remark will be carried on from one *jamabandi* to another.

(*c*) Patwáris will keep land acquired by agriculturists from members of agricultural tribes in separate holdings in the *jamabandi*. But where an agriculturist has acquired several such plots from different zamíndárs after the commencement of the Act, they may be clubbed together in one holding, if this is not otherwise objectionable.

3. Turning to temporary alienations, the Deputy Commissioner, under Section 13 of the Act, can, of his own motion, eject a mortgagee, lessee or farmer in possession after the expiry of the term for which he is entitled to hold under his mortgage, lease or farm under Sections 6, 11, or 12 of the Act.

The following rules are framed to enable the Deputy Commissioner to determine the cases in which he can exercise this authority.

(*a*) In the case of a mortgage, lease or farm effected with possession after June 8th, 1901, by a member of an agricultural tribe to a person who is not a member of an agricultural tribe whether he be an "agriculturist"

or not, the patwári shall enter in the remarks column of the *jamabandi*, a note stating:—

the date of the commencement and, except in the case of a mortgage under Section 6 (*c*), the date of expiry of the term of possession.

(*b*) This remark will be made for all such mortgages, leases or farms executed after the commencement of the Act, and the Mutation Register since 8th June 1901 should be gone through for the purpose of writing up these remarks.

(*c*) These remarks also will be carried from one *jamabandi* to another during the currency of the mortgage, lease, or farm.

[No. 32]

Circular No. 9, dated Lahore, the 20th November 1903, from Director of Land Records and Agriculture, Punjab, to all Commissioners, Deputy Commissioners, Settlement Officers, and Colonisation Officers in the Punjab.

THE following instructions are issued, with the approval of the Financial Commissioner, in order to facilitate the application of the Land Alienation Act by Revenue Officers, when they are attesting mutations of permanent or temporary alienations of agricultural land.

Permanent alienations.

2. In the case of a permanent alienation of land, if the alienor is a member of an agricultural tribe, or an "agriculturist" who has acquired the land from a member of an agricultural tribe under Section 8 (1) of the Act, it is necessary for the attesting officer to ascertain who the alienee is. A mutation relating to an alienation to a member of the same agricultural tribe, or to a member of an agricultural tribe in the same group, may be sanctioned, so far as the Land Alienation Act is concerned, for that imposes no restriction; but when the alienee is not a member of an agricultural tribe, the mutation proceeding must be transmitted to the Deputy Commissioner for orders, unless the alienee is an "agriculturist" as defined in Section 2 (1) of the Act, holding land in the village where the land alienated is situated. In the last case, the attesting officer can himself sanction the mutation, but he must first satisfy himself that the alienee has the status which he alleges. I am directed by the Financial Commissioner to prescribe the following procedure for enquires into the status of alienees who allege that they are "agriculturists."

Procedure in granting certificates of status to "agriculturists."

3. Such alienees shall be instructed by the patwári, when he reports the transaction in his favour, to obtain a certificate of status in the attached form from District head-quarters, or from the tahsil, in cases where the relevant Settlement Records are kept at the tahsil. When the certificate is granted at the Sadr, it will be signed by the Sadr Kánúngo, or his assistant if the Sadr Kánúngo is on tour, and it will also be attested by an Extra Assistant Commissioner, to be nominated for this purpose by the Deputy Commissioner. Trustworthy evidence as to the descent of the applicant will be necessary where the genealogical table is not up to date, and where no genealogical table has been prepared, as is often the case with occupancy tenants. This evidence need not be recorded in writing, but the statements should be made before the gazetted officer attesting the certificate, and the names of the persons making the statement should be entered in the certificate. Where copies of the relevant Settlement Records are at the tahsil, the certificate may be granted there, the Tahsildar or Naib Tahsildar attesting it in the same manner. Bound volumes, each containing one hundred certificates in duplicate, will be procurable on indent to the Director of Land Records in the usual way. The same details must be entered in the foil and counterfoil, and one copy will remain permanently in the office of issue. A certificate may be granted for more villages than one.

Procedure of attesting officers in mutation proceedings of permanent alienation in which "agriculturists" are alienees.

4. The certificate should not be attached to the mutation proceedings. It will always remain in the possession of the person in whose favour it has been granted; and he will thus be able to use it on any number of occasions, and in registration as well as in mutation proceedings. The attesting officer in mutation proceedings should, however, be careful to note in his order the serial number, date, and office of issue of the certificate. He is also reminded that he must satisfy himself that the person using the certificate is the person in whose favour it was granted, and that such person holds agricultural land as an agriculturist at the time of the permanent alienation in the village in which the land alienated is situated.

Patwárí's duties in the matter of temporary alienations, including mortgages, farms and leases.

5. In the matter of temporary alienations, where the alienor is a member of an agricultural tribe, and the alienee is not, it is necessary that the Revenue Officer should know what the terms of the contract are. At present, under paragraph 37 of Revenue Circular 28, the patwári, in his report, where a written deed has been prepared, has to note—

(*a*) the nature of the deed;

(*b*) the names of the parties;

(*c*) the date of execution;

(*d*) the date of registration if any ;

and (*e*) any other necessary details.

In future, where the alienor is a member of an agricultural tribe and the alienee is not, the patwári must also note briefly the terms of the deed as to possession, period, rent, interest, redemption, &c., and the attesting officers must satisfy themselves of the correctness of these entries.

6. Where there is no written deed, the patwári should note the terms agreed to by the parties, or, when they do not agree, he should record the terms alleged by each. The attesting officer will then proceed to pass suitable orders on the mutation. If the provisions of the Act are not contravened by the terms of the contract, he will direct a mutation ; otherwise he will refuse mutation.

LIBRARY OF THE BOMBAY BRANCH OF THE ROYAL ASIATIC SOCIETY.

Certificate granted to persons who claim to be "agriculturists" as defined in Section 2 (1) of Act XIII of 1900.

Serial No. *of* 19 , *dated* 19 .

Certified that _____, son of _____, caste _____, resident of _____, is recorded as holding the land noted on the reverse as an $\frac{\text{owner}}{\text{occupancy tenant}}$ in village _____, tahsil _____, in the Settlement Record of 18 , and that _____, son of _____, caste _____, resident of _____, is a direct descendant in the male line of the above-named, in the manner shown by the genealogical tree on the reverse, which is a true copy from the Settlement Record of 18 , or which has been deposed to by _____

Office Seal.

Signed.

Office or Sadr Kánúngo.

Attested.

E. A. C.,

Tahsildar or Naib Tahsildar.

NOTE.—For officers attesting mutations and Registration officers.

Before the holder of this certificate can acquire land permanently in any village above-named, he must prove further that he holds agricultural land in such village at the time of the permanent alienation.

Khewat numbers of land recorded as held by applicant or his ancestor in the male line.

Genealogical tree of the applicant.

Khewat numbers of land recorded as held by applicant or his ancestor in the male line.

Genealogical tree of the applicant.

[No. 33]

Circular Letter No. 563, dated Lahore, the 25th January 1904, from Senior Secretary to the Financial Commissioner, Punjab, to all Commissioners of Divisions and Settlement Commissioner, Deputy Commissioners and Settlement Officers in the Punjab.

Sub-head No. 113.
File No. 441.

By this office letter No. 233 S., dated the 17th August 1901, which is printed as No.14 in the Appendix to the Annual Report for the year 1901-02 on the working of the Alienation of Land Act, it was laid down that Settlement Officers have no concern with the administration of the Act. In amplification of these orders, I am directed to convey the following instructions.

2. In districts under settlement mutation proceedings relating to transfers which are sent to Deputy Commissioners under Rule II (*i*) issued with Punjab Government Notification No. 23 S., dated the 22nd May 1901, should be transmitted to him through the Settlement Officer who is responsible for seeing that each case is ready for transmission. The Settlement Officer is not required to make any recommendation as to whether sanction should be given or refused. His function is limited to seeing that the case is ready for transmission. The Deputy Commissioner may, however, if he wishes, ask the advice of the Settlement Officer ; but he is in no way bound to do so.

3. In districts under settlement, although the record work is in the hands of the Settlement Officer and his establishment, and the mutation work is performed under his control, the discretion of the Deputy Commissioner under paragraph 3 of this office Circular No 3, dated the 10th August 1903, to take any steps which seem to him to be necessary in order to satisfy himself that the Alienation of Land Act is being properly worked, is not curtailed, but it is part of the duty of the Settlement Officer and his establishment to bring to the notice of the Deputy Commissioner, for such orders as he may deem fit to pass, all mutation proceedings which they find to be irregular by reason of any departure from the provisions of the Act or the rules thereunder. The Settlement Department in the ordinary course of attestation work will scrutinise mutations ; but in other respects the functions proposed in paragraph 3 of the Circular above quoted to be entrusted to a really competent Revenue Assistant should be discharged by the Settlement Officer and his establishment.

4. It is especially necessary that all mutation proceedings referred to the Deputy Commissioner by the Settlement Officer as directed in paragraph 2 *supra* should be promptly disposed of by the Deputy Commissioner.

5. Cordial co-operation between the District and Settlement authorities is very necessary.

6. As an exception to the usual rules of procedure above explained it may be necessary where *killabandi* proceedings are in progress to invest the Settlement Officer with the powers of a Deputy Commissioner under the Alienation of Land Act for the limited purpose of sanctioning exchanges of small plots, which are often essential in order to make the boundaries of holdings coincide with those of *killas*. The possession of these powers by Settlement Officers would save delay and obviate a number of merely formal references to Deputy Commissioners. The powers in question can be conferred by the Local Government under Section 23 of the Act; and it will be moved to confer them when necessary.

STATEMENTS.

Nos.
I.—Totals of sales, mortgages and redemptions and other transfers.
II.—Statement showing the number of proceedings taken and applications disposed of under the Punjab Alienation of Land Act, XIII of 1900.
III.—Showing details of mortgages.
IV.—Showing details of sales.
V.—Abstract of sales and mortgages by districts.
VI.—Statement showing losses by, and gains to, agricultural tribes by sales and mortgages
VII.—Showing redemptions of mortgages by members of notified agricultural tribes.
VII (*a*).—(Results of Statements III and VII).

APPENDIX.

Orders and instructions issued under Act XIII of 1900.

Proceedings of the Hon'ble the Lieutenant-Governor of the Punjab and its Dependencies in the Department of Revenue and Agriculture (Agriculture), No. 55, dated 24th March 1905.

READ—

Report on the working of the Punjab Alienation of Land Act, XIII of 1900, for the year ending 30th September 1904, forwarded with the letter of the Senior Secretary to the Financial Commissioner, Punjab, No. 132, dated 14th February 1905.

REMARKS.—The report exceeds the prescribed limit by 2 pages and was submitted a fortnight late.

PART I.

The working of the Act.

1. The Act generally appears now to be well understood, and the various instructions issued have simplified the application of it. The Lieutenant-Governor agrees with the Financial Commissioner that no modification is necessary in the procedure prescribed for obtaining the agriculturists' certificate. He also agrees with the Financial Commissioner that the rule objected to by the Deputy Commissioner of Rohtak, which enjoins enquiries being made as to eligible zamindar purchasers before an alienation to a bania is sanctioned, is a very necessary one and should be maintained.

2. The ruling of the Chief Court that land as defined in the Act includes occupancy rights in land, though contrary to the intention of the legislature, which was not to make the Act apply to such property, sets at rest a disputed question, and, as the Financial Commissioner points out, is open to no practical objection. Pending any amendment to either Act, Section 53 of the Tenancy Act must in practice be treated as modified by this decision in any case in which the landlord is not a member of an agricultural tribe or an agriculturist. It is satisfactory to notice that there is no general tendency to evade the law by the subterfuge of a pretended charitable gift, and His Honour agrees with the Financial Commissioner that no amendment of the law on this point is at present required. The substitution of the word "institutions" for "purposes" in Section 2(4) might tend to unduly confine the class of alienations which are legitimately exempted from the restriction of the Act. The question raised by the Deputy Commissioner of Dera Ghazi Khan of the desirability of empowering the investigating Revenue Officer to make a full report to the Deputy Commissioner both as to the circumstances of permanent alienations which have been contracted against the provisions of the Act and as to the wishes of the parties in the event of the Deputy Commissioner's sanction being refused, is one that merits attention.

3. Subject to the remarks in the next paragraph the provisions of the Act governing temporary alienations generally appear to work satisfactorily, and attempted evasions are not numerous. The ingenious character of some of those now reported shows at least that the law is clearly understood. No immediate amendment of the law is called for, but the Lieutenant-Governor approves of the Financial Commissioner's proposal to analyse the various forms of evasions practised. It is satisfactory to see that the Act is now so well established as to add but little to the volume of current district work. The contraction of credit that has resulted is, as the Financial Commissioner points out, neither extensive nor altogether regrettable. If the establishment of co-operative banks ultimately succeeds so far as to supply the place of the bania, the latter will, it may be hoped from the cases mentioned by the Deputy Commissioners of Ferozepore and Hoshiarpur, gradually learn that his money can be profitably invested in commercial undertakings. It is significant that the process of recovery in the price of land towards the figures that prevailed before 1900 which was noticed in last year's report has continued, and Sir Charles Rivaz considers that the satisfaction expressed in the review of last year's report has been justified by the record of another year's experience.

PART II.

Analysis of Statements.

4. The conclusions to be drawn from the statements appended to the report are somewhat vitiated by the inclusion in them of figures for the period preceding 1901, owing to transactions belonging to that period having been brought on record during the year. Notwithstanding this the diminution from year to year in the area sold since the introduction of the Act has been steady and continuous. It is otherwise, however, with the area under mortgage, which has risen from a total acreage of 3,625,097 in 1901-02 to 3,868,587 in 1903-04. The latter figure shows an increase of 307,845 acres on the area, 3,560,742 acres, under mortgage in 1902-03, although the total areas transferred by mortgage and redeemed in 1903-04 are given in Statement I as 261,972 and 239,925 acres respectively. The apparent discrepancy between these two sets of figures is doubtless capable of explanation, but the Lieutenant-Governor is not quite satisfied as to the correctness of the Financial Commissioner's conclusion that the redemptions of the year were largely real ones and not redemptions for the purpose of mortgaging again. And His Honour is inclined to think that, while the Act has been effective in stopping sales, greater resort is now being had to mortgage. It must be remembered that in addition to the recorded area under mortgage given above there is also the area which has been mortgaged contrary to the provisions of the Act, and which is consequently not shown in the records, because in accordance with the rules mutation of names in respect of it has been refused. The Lieutenant-Governor is glad to observe that the Financial Commissioner proposes to devise some means of obtaining a return of the area so transferred. His Honour will also be obliged if the Financial Commissioner will consider whether in future in one or other of the statements the areas transferred prior to 8th June 1901, though not shown as transferred till the year under report, can be shown separately from the other areas recorded as transferred in that year. For many years to come settlement operations will keep bringing to light transfers which occurred in years prior to 1901, but were not brought on record at the time of their occurrence. The rise in the value of land has been already noticed in paragraph 3. The fact that the great bulk of alienations is intertribal is noteworthy.

5. The Report is a very interesting one, and His Honour is in full agreement with its general conclusions. The question of the amendment of the Act, with special reference to the elimination of the statutory agriculturist, will shortly come under consideration, and, as noticed by the Financial Commissioner, the working of the Act since its introduction has brought to light a few other points also on which some of its present provisions may probably be revised with advantage.

ORDER.—Ordered that the above remarks be printed and circulated with the Report, also that they be published in the *Punjab Government Gazette*, be communicated to the Financial Commissioner, Punjab, and forwarded to the Government of India, Revenue and Agricultural Department, with the usual number of spare copies of the Report.

By order of the Hon'ble the Lieutenant-Governor,

A. H. DIACK,

Chief Secretary to Government, Punjab.

Punjab Government Press, Lahore—25-3 05—397—C. L.

No. 132.

FINANCIAL COMMISSIONER'S OFFICE,

Dated LAHORE, *the* 14*th February* 1905.

FROM

L. H. LESLIE-JONES, ESQUIRE,

Senior Secretary to Financial Commissioner, Punjab,

To

DIACK, ESQUIRE,

Offg. Chief Secretary to Government, Punjab.

SIR,

I AM directed to forward the Annual Report on the working of the Alienation of Land Act during the year ending 30th September 1904.

I have the honour to be,
Sir,
Your most obedient servent,
L. H. LESLIE-JONES,
Senior Secretary to Financial Commissioner, Punjab.

ANNUAL REPORT

OF THE

WORKING OF THE PUNJAB ALIENATION

OF

LAND ACT, XIII OF 1900,

FOR THE YEAR ENDING 30TH *SEPTEMBER* 1904.

PART I—The working of the Act.

SECTION I.—PRELIMINARY.

1. IN this report, unless the contrary appears from the context, the word "zamíndár" will be used as the equivalent of "member of an agricultural tribe," and the word "agriculturist" will be used only in the technical sense given to it by the Act.

Working of the definitions.

2. The issue of Director of Land Record's Circular No. 9, dated 20th November 1903, which was printed as No. 32 of the Appendix to last year's report, has had the desired effect of obviating, so far as revenue officers are concerned, the difficulties which had formerly been experienced in working the definition of agriculturist. The Deputy Commissioner of Delhi thinks the instructions of the Circular too elaborate, and the Commissioner is inclined to agree with him. The Circular requires persons claiming the status of an agriculturist to obtain from a competent authority a certificate supporting their claim. The Financial Commissioner does not think the procedure or inquiry could be shortened or dispensed with if we are to give proper effect to the Act as it stands. The trouble involved is due not to the Circular but to the law, and is one of the reasons for the proposed amendment of the law.

From the Hissár report it appears that in that District the definition of the "agriculturist" has been misapplied ever since the Act came into force, and the discovery of the error is practically due to the Circular. It appears that the Settlement of 1863 has been taken in the greater part of the District as the first Regular Settlement instead of the Settlement of 1840. Fortunately the number of alienations made to agriculturists in this District is small, and the Deputy Commssioner has been able to go through every file in which a permanent alienation had been made to an agriculturist and correct the mistakes. Very few persons of the money-lending classes are able to prove that they or their ancestors held land either as owners or occupancy tenants at the Settlement of 1840. In those parts of the District where the Settlement of 1852 or 1856 is the first Regular Settlement, the proportion of agriculturists is slightly greater, and it is greater still in the Settlement of 1863 which applies to the Sirsa Tahsil. In the Kángra District the issue of certificates has been complicated by the fact that all over the District at the first Settlement the name of only one member of a family was entered in the record of rights, and there was also no record as to the ownership of *muáfi* plots. The Deputy Commissioner has refused the certificate where the applicant's name was not recorded, but has accepted established ownership without record of the name as a good ground for sanctioning particular alienations. The Financial Commissioner thinks that this was right. Further difficulty has been caused in the same District by the destruction by fire in many villages of the only extant copy of the record of the first Regular Settlement, and in Rohtak the destruction of Settlement records at the time of the Mutiny has now again made itself felt. These are, however, special cases. In the Province generally the certificate system is now well understood, and it is, in the Financial Commissioner's opinion, working as well as could be expected.

Statutory agriculturists.

3. In his Circular No. 4036, dated 30th June 1904, which was issued after reference to Government, and is printed as No. 40 of the Appendix of the present report, the Financial Commissioner has asked for opinions as to whether the statutory agriculturist should be abolished or not. These have not all been received, and the Financial Commissioner is not at present in a position to make any definite recommendations, which will form the subject of a separate report; but though there are dissentients the preponderating opinion, so far, is that the statutory agriculturist should be eliminated.

Occupancy rights.

4. In their judgment, reported in the *Punjab Record* as No. 11 of 1904 (Civil), the Chief Court have held that the word "land," as defined in Section 2 (3) of the Act, includes occupancy rights in land. In his Circular No. 5555, dated 14th September 1904, printed as No. 43 of the Appendix, the Financial Commissioner has accordingly cancelled his Circular letter No. 96, dated 14th January 1903, in which he held that although it was declared that "land" includes "a right to receive rent," the correlative of that right in certain cases, *viz.*, a right of occupancy, was omitted, and that accordingly a transfer or attempt to transfer a right of occupancy by sale, gift or mortgage should be dealt with under Chapter V of the Tenancy Act, and that Act XIII of 1900 should not be applied until these instructions were modified by an authoritative decision of the Courts or by Government.

It was not the intention of the Legislature to impose on occupancy tenants any restrictions in regard to the alienation of their holdings beyond those already imposed by the Tenancy Act. Under the Chief Court ruling such alienations are now subject to all the restrictions of the Act to which this report relates. It has not been thought necessary as yet to move for any amendment of the law because there is much to be said in favour of the situation which has thus been brought about. Occupancy tenants are often themselves zamíndárs, and there is no objection arising out of the policy of the Act to extending to them as such the protection already given to zamíndár landowners. The real reasons why occupancy tenants were at first excluded were that no one could foresee exactly how the Act would work in all particulars, that it seemed prudent to limit its provisions so far as this could be done consistently with its policy, that there was no burning question of the alienation of occupancy holdings to money-lenders, and that transfers of occupancy right were under considerable restrictions already. But since the passing of the Act of 1900 it has been seen that a zamíndár can evade it, as it was intended to be interpreted, by alienating to a *bania* not indeed his proprietary right but an occupancy right carved out of it, and thus transferring nearly its whole value. The Chief Court decision by closing this door of evasion really gives better effect to the policy of the Act, and may thus be welcomed by Revenue Officers. No doubt it will be desirable on some suitable opportunity to bring the language of the Act, which is at present ambiguous, into conformity with that decision. Moreover, in his present report, the Deputy Commissioner of Ferozepore notes a curious anomaly which is a consequence of the Chief Court decision. A zamíndár occupancy tenant holding under a *bania* landlord cannot sell his holding to him except with the sanction of the Deputy Commissioner under the Act of 1900; whereas under Section 53 of the Tenancy Act the landlord is entitled to the first offer of the holding, failing which he can have an alienation to another set aside. In the legislation which has recently applied the Alienation of Land Act, with some modifications to the North-West Frontier Province, occupancy rights are dealt with as "land"; and when this point is similarly treated in the Punjab—as no doubt it will be in course of time—the anomaly described above will come under consideration.

Gifts for religious purposes.

5. It does not appear from the local reports that there is any general tendency to use the exemption of gifts for charitable or religious purposes from the definition of "permanent alienation" as a cloak for evading the law, though some such cases have been reported. For instance, the Deputy Commissioner of Jhelum says that, according to a not uncommon practice in his District, zamíndárs alienate to Mirásís and others by gifts land amounting in some cases to as much as four and five acres, and that such transactions are not really charitable gifts, but transfers for value, and they are so treated. A few cases of attempted evasion under this head

are also reported from Rohtak, Delhi and Hoshiárpur. As remarked in last year's report, each such case must be decided on its merits.

The Deputy Commissioner of Lahore suggests that it would be better to substitute the word "institutions" for "purposes," and he is supported by Mr. Alex. Anderson, but it is evident that the intentions of the Act are not being defeated on any appreciable scale by these evasions, and the Financial Commissioner is not at present prepared to suggest in this behalf any alteration of the law.

Section II.—Permanent Transfers.

Working of instructions.

6. As was reported last year the instructions, conveyed in paragraph 11 of the Financial Commissioner's Circular letter No. 3441, dated 5th June 1901, are working well. There are some remarks in the Rohtak report which seems to imply an imperfect idea of the objects of the Act, and to suggest that the inquiries as to eligible purchasers are inadequate in that District. The instructions require, amongst other things, that an alienation by a zamíndár to a *bania* or other such person shall not be sanctioned unless the sanctioning officer is satisfied that no member of an agricultural tribe included in the same group as the vendor has offered or is ready to offer a fair price for the land. The Deputy Commissioner of Rohtak objects to this rule as unnecessary, as involving an undesirable amount of interference, and as imposing additional work on the revenue staff. He thinks that if the other instructions in paragraph 11 of the Circular are observed, and under them a proposed alienation to a certain person appears unobjectionable, sanction should be given as a matter of course. This view is perhaps shared by the Deputy Commissioner of Gurgáon, who reports that inquiries as to possible purchasers have not been necessary. It is not accepted by the Financial Commissioner. Theoretically it would be best that land proposed to be alienated by any zamíndár should be kept in the hands of his own tribe. Neither law nor rules go as far as to insist upon this. But it is a main object of the Act to keep lands proposed to be alienated by zamíndárs in the hands of zamíndárs; and the rule to which the Deputy Commissioner of Rohtak takes exception has this object in view. In other districts the matter seems to have been better understood. Generally in the Province the inquiries for eligible purchasers appear to be sufficient. In Multán it is represented that Tahsildars are too busy to advertise the sale adequately, but as a rule there are no complaints of excess of work from this cause, nor should there be. It is a feature of the present reports that the Act has produced its intended effect of checking alienations; and the applications for permission to alienate to *baniás* and the like are by no means so numerous that they cannot be properly attended to. Inquiries for suitable purchasers are usually made through Tahsildars and sometimes, but probably not often enough, through zaildárs and inámdárs and pretty frequently by local proclamation and other forms of notice in the village and its neighbourhood. All these courses are satisfactory. The Deputy Commissioner of Ferozepore suggests that applications for sale by zamíndárs should be taken up on a fixed day monthly at each tahsil and zamíndár purchasers invited to attend by proclamation; but this procedure would go beyond the necessities of the case. As the Commissioner points out it would tend to encourage sales—a thing which is not desired; and it would diminish the chance of the land being kept in the same tribe—a thing which is desired, though; in order to avoid depreciation in the value of land, and to minimise interference with transactions which may prove harmless, we are not prepared to insist on it.

As some doubt had arisen as to the meaning of the words "member of the same tribe" in Section 3 (1) (*c*) of the Act, the Financial Commissioner has ruled in his Circular letter No. 5407, dated 5th September 1904 (printed as No. 42 of the Appendix), that they should be held to be equivalent to "member of the same agricultural tribe in the same District." Circular No. 9, dated 15th November 1901, of the Inspector-General of Registration, has been accordingly amended by the issue of his Circular No. 5, dated 20th October 1904, printed as No. 46 of Appendix.

In another case the Financial Commissioner has had occasion to modify the instructions given in paragraph 11 (*viii*) of his Circular letter No. 3441, dated 5th June 1901, in order to bring them into better conformity with the law. The revised instructions have been included in Circular letter No. 6272, dated

19th October 1904, which is printed as No. 45 of the Appendix to the present report. The case is an illustration of the difficulties in which we are placed by the legal existence of the statutory agriculturist.

Only one application has been made for leave to permanently alienate land to subjects of Native States or to residents of Provinces adjoining Punjab districts. The case occurred in Hoshiárpur. The Deputy Commissioner sanctioned an unobjectionable exchange between a Jat of the Kapurthala State and a Jat from a neighbouring village in his own District.

Working of the rules.

7. The rules published in Punjab Government No. 23 S., dated 22nd May 1901, are generally reported to be working well, but the Deputy Commissioner of Dera Gházi Khan makes some interesting remarks. He says:

"The rules affecting permanent alienations have worked well where the alienation is merely proposed to be made; but where the transaction has been completed, then I think there is room for improvement. Circular No. 4, dated the 9th September 1903, does not appear to me to meet the case. What is desired is that the Revenue Officer who takes up the mutation on the spot should be allowed to explain to the parties that the mutation will probably be rejected, and ascertain their wishes in the event of its rejection and report all relevant facts. The Deputy Commissioner would then be able to dispose of the matter finally in most cases by one order. It seems a waste of time for a Revenue Officer who knows well that a mutation will be refused to send it up in a form necessitating a call for a further report. This means that he will have to go to the spot again, and get the parties together again, and the Deputy Commissioner will have to reconsider forgotten facts which he had once mastered and on which he might, if allowed, have passed final orders then and there."

The Deputy Commissioner's suggestion appears to the Financial Commissioner to be reasonable and he proposes to examine it further.

Section III.—Temporary Alienations of Land.

Mortgages under Section 6 (1) (*c*).

8. It has been reported by the Deputy Commissioner of Muzaffargarh that a form of mortgage is prevalent in his District by which the mortgagor retains cultivating possession and pays the revenue himself. The mortgage is for an indefinite period and the mortgagee takes in lieu of interest (*a*) a cash rent, or (*b*) a rent in kind, or (*c*) a grain-fee, usually one-seventeenth of the tenant's share of the gross produce, locally known as *lichh*. The Deputy Commissioner considers that it is not possible to ascertain at the time of the mortgage how much of the produce will be included in the *lichh*, and therefore impossible to determine whether the mortgagee's profits exceed the rent to which he is entitled under Section 6 (1) (*c*). He accordingly recommends that, where there is an agreement to pay on the *lichh* system, there should be a time limit to the mortgage.

It is clear that the Deputy Commissioner does not quite understand Section 6 (1) (*c*). The essence of it is that the mortgagor, as tenant of the mortgagee, has a status practically equivalent to that of an occupancy tenant at a rent which may be either in cash or in kind, but which must not exceed double the land revenue plus rates and cesses. As the mortgagor retains possession no time limit is required. It is not apparent why there should be any difficulty in ascertaining whether or no the *lichh* exceeds the rent limit fixed by the Act. The customary rate of *lichh* is either known or can be readily ascertained, and the estimate of the value of the produce represented by it should be made as such estimates usually are made in Settlement proceedings. Probably the value of the *lichh* will always be within the limit fixed by the law. The condition that the mortgagor shall pay the land revenue is probably not opposed to the Act, provided, of course, that the rent is no more than sixteen annas in the rupee of the land revenue. The intention is that the tenant should pay land revenue and cesses plus a *málikána*. It does not matter whether he pays the land revenue to the Government or to his landlord, but he should not pay it to both.

No other difficulties have been brought to notice in connection with cases of mortgages in the form permitted by Section 6 (1) (*c*) of the Act, and almost all districts report that no such mortgages have been made.

Need for any other forms of mortgage.

9. The Deputy Commissioner of Hissár is the only District Officer who thinks that it is necessary to permit the inclusion of special conditions in accordance with the powers conferred under Section 8 (1) (*c*). He states that in settling cases under Section 9

(2) he has frequently felt the want of a condition which could be embodied in mortgages under Section 6 (1) (*a*) whereby the mortgagor might be permitted to occupy the land as tenant of the mortgagee, paying him a rent in kind. In cases which fall under Section 9 (2) the Hissár mortgagee usually asks for a mortgage under 6 (1) (*a*), but he does not want the land or desire to cultivate it himself. He only gives it out for a rent in kind; and he is quite willing that the mortgagor should cultivate it himself if he will pay the same rent as other tenants. But as no such condition is at present permissible, the mortgagee finds it necessary to take steps at once to eject the mortgagor. Bad blood is engendered with the upshot that once the mortgagor is ejected, the mortgagee is determined not to let the land to the mortgagor, and to give as much trouble as the law permits to prevent the mortgagor from regaining prompt possession on the termination of the mortgage.

From the Ambala report it would appear that in the case of mortgages under form 6 (1) (*a*) the mortgagor usually, in practice, cultivates the land as the mortgagee's tenant, paying him the rent prevalent in the neighbourhood.

The Financial Commissioner remarks that all that is here urged was probably well understood when the Act was passed. He believes that the object in view was not at all to prevent the very usual arrangement that the mortgagor shall become the tenant of his mortgagee, but to ensure that, when this is the arrangement preferred, the mortgagor shall have the favourable status under Section 6 (1) (*c*) above described. That clause at present seems to be a dead letter. Until it is better understood and applied under Section 9 (1) or otherwise it would be premature to consider an addition to the forms of mortgage recognised by Section 6 of the Act. If, however, it is eventually shown that the limitation of the rent in Section 6 (1) (*c*) is such that parties decline to resort to it, the question whether we should authorise a form of mortgage, with a time limit, but allowing the mortgagor to be a tenant of the mortgagee at the rent in kind prevalent in the neighbourhood, might very well come up for consideration.

On a reference made by the Deputy Commissioner of Jullundur as to mortgages under Section 6 (1) (*a*), which include a stipulation that the mortgagor shall pay the land revenue assessed on the land, the Financial Commissioner, after consulting the Legal Remembrancer, ruled that the stipulation is null and void under Section 8 (2) of the Act, and that a Deputy Commissioner has power under Section 9 (1) to amend such a mortgage by striking out the condition as to the payment of land revenue. As noted above this ruling would not apply to mortgages under Section 6 (1) (*c*).

The working of the rules.

10. The rules published under Punjab Government No. 23 S, dated 22nd May 1901, appear to be working just as well in the case of temporary as of permanent alienations; as was said last year, parties are left to take action when the provisions of Sections 6, 7 and 8 of the Act are contravened, such cases not being brought to the notice of the Deputy Commissioner as part of the mutation proceedings.

The Deputy Commissioner of Ludhiána has remarked that cases occur where the parties to a temporary alienation which contravenes the Act ignore the order of the Revenue Officer refusing the mutation, with the result that the alienee remains in possession and the revenue records are at variance with the actual facts. The insecurity of the legal position of the mortgagee is no doubt such that these cases are not likely to be very common or to appreciably impair the effect of the Act; but it is not satisfactory that the records should not express the facts which have occurred. The parties should not have the benefit of a presumption in their favour, but in some way the facts of actual possession and the fact that mutation has been refused should be brought on the record. The Financial Commissioner will consult with the Director of Land Records as to how this should be done.

It was mentioned in paragraph 8 of last year's report that the Financial Commissioner had under consideration the question whether a Civil Court is bound to refer to the Deputy Commissioner when a suit is instituted for possession of proprietary right in consequence of a mortgage after the proceedings under Regulation XVII of 1806 have been completed and the year of grace has expired

This question was decided in the Chief Court Civil Reference Case No. 14 of 1903, in which it was held that Section 9 of Act XIII of 1900 does not apply to a suit brought by a quondam mortgagee, who is out of possession, to be put in possession after the expiry of the year of grace, as his suit is not one on a mortgage. This result has already been reported to Government.

The Deputy Commissioner of Jullundur mentions a case in which a Civil Court overlooking a material irregularity in a mortgage purporting to be under Section 6 (1) (*b*) gave the mortgagee a decree for possession for twenty years. The mortgage stipulated that redemption could not take place until the full period of twenty years (which had not been fixed by the Deputy Commissioner) had elapsed. The case only came before the Deputy Commissioner when the mortgagor appealed to him for assistance, which he considered himself powerless to give. He represents that the possibility of such illegality on the part of a Civil Court illustrates the necessity of the inclusion of a provision in Act XIII of 1900 similar to that of Section 24 (1) of the Pre-emption Bill, which will enable the Deputy Commissioner to apply for a revision order to correct the mistakes of Civil Courts, which are as likely to occur under Act XIII of 1900 as under the Pre-emption Bill. The Commissioner supports Mr. Fenton, and the Financial Commissioner thinks that the suggestion is a very good one, which should be borne in mind when the Act comes under amendment, as is likely to happen soon if Government decides to abolish the agriculturist. Either the very case mentioned by the Deputy Commissioner of Jullundur or another on all fours with it was lately before the Financial Commissioner on the revision side; but it is unnecessary to give in this report any further particulars.

Leases and farms.

11. There is apparently a tendency for leases, under Section 11, to increase in the Western Districts, and in some cases at least they are being used with the intention of evading the provisions of the Act. Thus in Dera Gházi Khan it has been noticed that the rent paid by a non-agriculturist to a zamíndár was in one case no more than two-fifths of the annual net profits, so that a loan or advance of rent may have been made to the zamíndár and the transaction may have been a usufructuary mortgage in disguise. The possibility of such evasion was of course seen when the Act was framed, and the provision that the term of such leases shall not exceed twenty years, gives the lessor an opportunity of regaining possession. There is, however, nothing to prevent him from leasing the land again for a similar period; and if he chooses thus to decline the assistance which the Act affords him, there is, the Financial Commissioner is afraid, no help for it.

The Officiating Financial Commissioner had occasion to rule in a case where it was reported that a zamíndár borrowed from a money-lender on a simple bond with a specified rate of interest and then gave a lease in lieu of interest, that such a transaction could not be called an evasion of the Act. This decision appears to have been correct, because the lease was for twenty years, and thus after the period recognised by the Act the zamindar would regain possession. Besides the Dera Gházi Khan case noted above, some other cases have come to light, which call for further inquiry. Thus in the Shahpur District leases have occurred with conditions that a debt due by the lessor is to be set off against the rent for the term of the lease, and the land not to be re-delivered to the lessor until a payment is made in compensation for improvements. The Commissioner, Mr. Meredith, notes that the lessee would have no lien on the land after twenty years, and this seems right, but the intention to evade the law is nevertheless pretty clear. From Ludhiána the device is reported of obtaining cumulative leases in favour of several members of a non-agricultural family. It is obvious that if such leases are so arranged that the terms of twenty years, in the several cases follow each other, there is a practically perpetual demise in open violation of the Act. The Deputy Commissioner of Hoshiárpur mentions a case (which did not, however, arise in his district), where a mortgagee, in addition to a mortgage under Section 6 (1) (*a*), took a bond binding the mortgagor to repay the whole principal at the end of the term or in default to give a fresh mortgage. This is so palpably a plan to defeat the Act that the Financial Commissioner agrees with the Commissioner, Mr. H. A. Anderson, in thinking that no Court would uphold it. From the Hoshiárpur District also are reported some *bendmi* usufructuary mortgages in favour of village bankers. The mortgage is nominally in favour of a person in

debt to the banker, really to the banker himself. The pretended mortgagee by reason of his indebtedness is at the mercy of the banker who securely reaps the fruit of the pretended mortgagee's possession. Evasions of the same type have occurred in the Jullundur District. There zamíndárs are employed as nominal mortgagees by money-lenders, the persons selected being generally under the power of the money-lender, while fidelity in the specific transaction is secured by the execution of a money bond by the nominal mortgagee. Whether the Courts would give effect to such a bond is, as Mr. Fenton points out, very doubtful. The Deputy Commissioner should (as he probably intends) investigate this matter more fully and report the result. In Amritsar a case occurred in which a zamíndár borrowed money from a *bania* on a simple bond with a specified rate of interest and gave the latter a lease of his land in lieu of interest. The term of the lease is not stated.

Sir Lewis Tupper thinks that probably the only way to deal successfully with evasions such as those above referred to is to set out in full an exact description of each objectionable transaction and then declare by law that such a transaction is null and void. In order that he may judge whether this course is practicable and expedient he proposes to call for the evasion cases, or, where they are numerous, for specimens of such cases, which have occurred in the Dera Gházi Khan, Shahpur, Ludhiána, Hoshiárpur, Jullundur and Amritsar Districts, and have a careful analysis of them made for record in his office and consideration in connection with any amendments of the Act that may be decided upon.

Section IV.—General Provisions.

The position of mortgagees.

12. The operation of Section 9 (2) is discussed at considerable length by the Deputy Commissioner of Hissár. In condition of sale cases he admits that the mortgagee should be put to his election as between the excision of the condition of sale and a new mortgage in accordance with the Act. But where the election is for a new mortgage the Deputy Commissioner evidently regards the law as hard on the mortgagee.

If the mortgagor accepts a mortgage under Section 6 (1) (*a*) and then refuses to give possession, the practice of the Deputy Commissioner has been to put the mortgagee in possession by executive order and to show his action under Section 6 (1) (*b*); but, as the Deputy Commissioner admits, this Section does not apply to such a case, and the mortgagee's legal remedy is a civil suit for possession. Litigation may then, it is argued, be prolonged for three or four years, but there is no provision by which the term of mortgage can be extended; and the longer such litigation lasts the worse becomes the position of the mortgagee, who can only recover the sum he has lost by a suit for mesne profits. If therefore the law were strictly followed all mortgagees would elect to have the condition of sale struck out, which the Deputy Commissioner thinks was not the intention of the Legislature in framing the Act.

The fact is that conditions of sale in mortgages of agricultural land were regarded as an unmixed evil, so much so that by Section 10 of the Act they were declared void in future transactions. Section 9 (2) was a compromise. Some would have applied the principle of Section 10 retrospectively and cancelled conditions of sale in all mortgages of "land" as defined in the Act at the time of its commencement. The opposite opinion was that the Act should have no retrospective effect and that conditions of sale already agreed to should be left to their operation. In Section 9 (2) the object was to eliminate the condition of sale wherever this could be done without unduly impairing the mortgagee's security. As conditions of sale were either never seriously meant to be enforced, or, if so meant, were usually the results of unconscionable bargains, it was thought that ample consideration was shown to the mortgagee if he could in the alternative obtain a new mortgage in a form allowed by the Act. Indeed, it would have been inconsistent to allow him any other kind of mortgage supposing that he wished to relinquish his own. If, then, the Act has the effect of inducing the mortgagees in the majority of cases to agree to the condition of sale being struck out, there is nothing whatever to regret in the circumstance. No doubt where the mortgagor is recalcitrant and refuses possession on the new mortgage, it would be convenient if the Deputy Commissioner had legal power to place the mortgagee in possession, and this point may be noted for consideration when the Act comes under amendment, as it probably will before long, with reference

to the proposal to eliminate the agriculturist. So also it may be found expedient to provide that the term fixed in the new mortgage shall run from the date of possession unless delay in obtaining possession is the fault of the mortgagee. But neither point is very urgent; and, meanwhile, until the points come under the consideration of the Legislature, where a mortgagor refuses to give possession under a new mortgage ordered with reference to Section 9 (2), the Deputy Commissioner would be quite justified in calling him up and revising his order in a sense unfavourable to the interest of the mortgagor, seeing that he is unfairly prejudicing his mortgagee.

The Act and Registration.

13. One of the points on which a report is required is, whether the necessity of obtaining the sanction of the Deputy Commissioner to alienations under Section 3 of the Act causes so much delay that parties who have to register documents are unable to present them in time. The present reports are clear that no such delay occurs. Either the applications are few and are promptly disposed of, or, as most frequently happens, sanction to a permanent alienation is obtained before the deed of sale is executed. Only two cases have been mentioned in which it was necessary to inflict nominal fines, this being the expedient approved for avoiding the consequence of delay not due to the fault of the parties.

The issue of the instructions conveyed in Director of Land Records' Circular No. 9, dated 20th November 1903, and in Inspector-General of Registration's Circular No. 2, dated 19th May 1904, have largely removed the difficulties with which Sub-Registrars were previously confronted. These are the circulars which prescribe the certificate procedure already fully discussed in paragraph 2 above. In connection with that discussion it is to be borne in mind that the certificates are really invaluable in registration proceedings.

Local extent.

14. The question of the extension of the provisions of the Act to agricultural land in municipal limits is still engaging the Financial Commissioner's consideration.

Extra work caused by the Act.

15. The work entailed by dealing with the conditional sale clause in mortgages is still considerable in Hissár, but it is very clear that this extra work was most necessary. It is stated that almost every mortgage in the district contains a condition of sale, and the Deputy Commissioner thinks that the words were merely a formula not intended to be acted on. If so, the sooner we get rid of so dangerous a formula the better. Necessarily the scrutiny of mutation proceedings required by the Financial Commissioner's Circular No. 3, dated 10th August 1903 (*vide* page xx of Appendix to last Report), has caused a considerable expenditure of time, but generally the extra work arising under the Act is said to be small, and it is believed that the Act may eventually have the effect of decreasing work owing to the diminution of the number of mutations and general litigation.

Where details are given on this point they are usually interesting. Even in Hissár, where the conditional sale work is so heavy, the extra work is estimated at about four hours a week for the Deputy Commissioner and an average of two hours a week for each Tahsildar. In Shahpur it is said that the Deputy Commissioner has perhaps an addition of three or four days' work in the year; and that though there is some increase in the burdens of the Revenue Assistant and the Tahsildars, it is difficult to calculate its amount as it comes into the day's work and is not felt.

Doubtless there is and has been some temporary pressure in the application of the provisions as to conditional sale and in the very necessary scrutiny of mutation proceedings. In both cases the pressure—nowhere severe—will rapidly diminish. In ordinary case work under the Act the Financial Commissioner thinks there is no pressure. The cases are almost always short and rather interesting. And there is a compensation, as already indicated, of some decrease of work in other ways.

Section V.—General Remarks.

Reception of the Act.

16. There is no doubt that the Act continues to be highly popular with zamíndárs and agriculturists. Money-lenders still complain, and it would seem that the business of pleaders has been injuriously affected, but the former class can offer no suggestion

except the total abolition of the Act. That money-lenders are no longer *ordinarily able to* acquire land from zamíndárs is an undoubted fact, and the Deputy Commissioner of Delhi remarks that in his District it is generally taken for granted that sanction to such alienations will not be given, and that few attempts are made to obtain it. The Deputy Commissioner of Jullundur also notes that, when such applications are made by zamíndárs, the zamíndár often goes away with a smiling face when his application to sell land to a money-lender is refused. Signs are by no means wanting that capital is being drawn into worthier channels of enterprise. Thus the Deputy Commissioner of Ferozepore quotes the case of a village *bania* who has advanced a loan of Rs. 50,000 to a Cotton Ginning Firm at 5½ per cent. per annum on a book entry; and the Deputy Commissioner of Hoshiárpur believes that the influx of capital into trade has continued to depress the normal rate of trade profit.

One effect of the Act worth notice is mentioned in the Rohtak report. *Bania* mortgagees being uncertain of their new position are induced by this uncertainty to sue for possession. There may be some slight increase of litigation in consequence, but where the mortgage includes a condition of sale the transaction is drawn under the operation of the Act to the advantage of the zamíndár.

Effect on credit,

17. The Act has no doubt produced some contraction of credit, but this effect was of course foreseen, and the question is whether the contraction has operated to aid or to hamper the zamíndár. The Financial Commissioner believes that such contraction of credit as has occurred is beneficial to the zamíndár's interest, because it curtails extravagance without depriving thrifty men of the means of obtaining reasonable loans. The number of mortgages in approved forms appears to be increasing. There is mutual credit amongst the zamíndárs themselves. The Deputy Commissioner of Hissár gives it as his opinion that the honest zamíndár can get as much credit as he wants, and that the only person who has suffered is the thriftless ne'er-do-well, who was formerly content to sell his birthright for a mess of pottage, and that in some cases loss of credit has induced such persons to turn to honest work. The Commissioner of Lahore, Mr. Alex. Anderson, has also remarked that he does not think that there is much evidence of the contraction of credit, and that there is more evidence of the contraction of expenditure.

Evasions of the Act.

18. As to evasions of the Act pre-emption suits and *benámi* transactions similar to those reported last year still appear to be fairly common. The Deputy Commissioner of Rohtak also reports the cases of verbal mortgages for an indefinite period falsely alleged to have been made before the Act came into force; but the instructions issued in the Financial Commissioner's Circular No. 6, dated 20th July 1904 (which is printed as Appendix 41), should, if followed, always secure the detection of such attempted evasions. The Deputy Commissioner of Attock notices a case of a carpenter passing himself off as an Awán, and therefore as a member of an agricultural tribe. Allusion has already been made to evasions made under the colour of charitable gifts. The Financial Commissioner does not view any of the forms of evasions which have hitherto come to notice as likely to seriously undermine the provisions of the Act. It may be said of most of them that the risk run by the alienee is too great for the particular practice to be widespread. One common form of evasion will cease when the Pre-emption Bill becomes law, and the continued watchfulness of District Officers will no doubt in time impress on other schemers the general futility of their operations. The use of leases to evade the Act has been fully discussed in paragraph above. The year has of course been a good one, and the evidence afforded by applications for *takávi* would not, therefore, be conclusive, but there has been no increased demand for such loans. It does not appear that the Act has had the slightest effect upon rents.

Co-operative Societies.

19. Lastly, mention should be made of the appointment of a Registrar of Co-operative Credit Societies in the Punjab with the object of pushing the development of agricultural banks. There is legitimate ground to hope that zamíndárs really feeling any contraction of credit may take advantage of the facilities which are now to be offered to them in the way of organising Co-operative Credit Societies.

PART II.—Analysis of Statements.

STATEMENT No. I.

20. Statement No. I deals generally with all transfers regarding which mutations were sanctioned during the year, but the statement which was made in last year's report to the effect that the number of transfers now included, though actually dating from before 8th June 1901, would be insignificant, has not been fully realised. For instance, in Statement IV Hissár shows 211 sales by zamíndárs to non-agriculturists, all of which undoubtedly took place before the Act came into force. On this analogy the other figures must be similarly vitiated, and the same remark must equally apply to other districts, particularly to those which are now coming under Settlement where the revision of the record stimulates the disposal of mutation arrears. It will apparently therefore be some time yet before the influence of such transactions is entirely eliminated. Allusion has already been made to the possibility of evasion of the Act due to misrepresentation with regard to dates of transfers which are alleged to have preceded the Act.

Gifts and exchanges.

21. Gifts and exchanges show a small decrease from 23,102 to 22,901 though the area so transferred rises from 125,249 to 212,281 acres. Statement No. I includes occupancy rights, but it is only necessary to discuss the figures relating to ownership. The whole of the increase of 80,650 acres under this head is more than accounted for by *killábandi* operations in the Montgomery District, which alone shows an increase of over 84,000 acres. The same cause has been in operation to some extent in the Gujránwála District. The decrease in Ráwalpindi of 9,739 acres held in ownership is largely due to the formation of the Attock District. An increase of 5,091 acres in Dera Gházi Khan has not been explained, but on the whole the area transferred by private gifts and exchanges as distinguished from the area affected by *killábandi* proceedings in consequence of Settlement operations has slightly fallen.

Mortgages.

22. The number of mortgages including transfers by order of a Court has fallen from 88,152 to 87,238, but the total and cultivated area transferred has risen by 15,173 and 7,219 to 261,972 and 206,724 acres, respectively. The average area affected by such transactions, which fell last year, has again risen considerably, but the proportion of the cultivated to the total area has fallen. The increases in the area transferred have been, in acres, in Hissár 7,944, Rohták 2,333, Delhi 1,087, Karnál 4,343, Hoshiárpur 7,439, Ferozepore 1,960, Lahore 6,440, Amritsar 1,403, Shahpur 1,274, Multán 1,468, Muzaffargarh 1,276; while Simla, Jullundur, Ludhiána and Gujránwála all show increases of less than 1,000 acres.

The increase in Hissár is not explained, but the Deputy Commissioner, inasmuch as antecedent transactions have not been eliminated, does not think the figures are worth analysis. In Karnál the increase is said to be mainly due to the revision of records. In the case of Hoshiárpur it is attributed mainly to transfers by orders of Courts affecting 7,128 acres, of which 3,834 acres were on account of mortgages effected prior to the Act; and the Deputy Commissioner explains that the money-lender now sues for possession as soon as he is enabled to do so by a breach of contract, because the law affords him no hope that he wil force a permanent transfer by a policy of procrastination. Lahore is another instance of a large increase which does not appear to be sufficiently explained by old transactions and the inclusion of Municipal figures. In this District, however, redemptions are gaining on mortgages. In regard to Municipal lands the Commissioner makes the interesting remark that the eyes of money-lenders are turned to Municipal limits, and the temptation held out to Aráins and others, who own land near towns, is great.

The decrease in Ráwalpindi is accounted for by the formation of the Attock District. In Gurgáon it must be largely due to the fact that in the case of more than half the villages the period dealt with is only 9½ months, while last year it covered 14½ months, the extra months being included in preparation for the approaching settlement.

In Kángra no mutations took place after February owing to the fire which has been referred to above. In Siálkot the decrease is said to be due to the

operation of the Act. For Gujrát no explanation is given. The decrease in Miánwáli is ascribed to the dislike of money-lenders to the forms of mortgage permitted by the Act. The amount of the mortgage money has risen from Rs. 1,30,36,012 to Rs. 1,43,67,573, and the average per cultivated acre from Rs. 66 to Rs. 69. These figures, so far as they go, again illustrate the falseness of the view that the Act would necessarily cause a serious depreciation of the value of land, but the Financial Commissioner does not wish to attach too much importance to them in view of the undoubted fact that the transactions recorded do not concern only the year under report.

Redemptions.

23. The area redeemed exceeds that redeemed in the previous year by 27,284 acres, and the amount of the mortgage money discharged has risen from Rs. 77,98,096 to Rs. 91,26,882 with an average per acre of Rs. 38 against Rs. 36 in the preceding year. The districts which do not show a larger redeemed area than last year are Gurgáon, Kángra, Montgomery, Siálkot, Gujrát, Jhelum, Pindi, Miánwáli and Multán. Excepting Ráwalpindi and Kángra, where the special reasons for decrease have already been alluded to, only Siálkot gives a decrease of over 2,000 acres, and there the fall in redemption closely follows the decrease of the area mortgaged.

Of the districts showing large increases that in Gujránwála is mainly due to sales effected by mortgagors in order to clear off their debts, but Lahore appears to have been affected by the general prosperity and same is probably true of Ferozepore also. The Deputy Commissioner of Hoshiárpur mentions that he is in the habit of giving preliminary sanction to alienations conditional on final redemption, with the condition that the sanction will be affirmed when redemption has been carried out to the satisfaction of the Revenue Officers. This procedure amounts to a promise to give sanction if a certain thing is done. The Financial Commissioner thinks it is unobjectionable and quite consistent with the Act.

The remarks made in last year's report, to the effect that redemptions now are for the most part real and not a mere prelude to remortgage, still hold good; and, bearing this fact in mind, the figures now given are, the Financial Commissioner thinks, distinctly encouraging, and it is not too much to hope that the excellent crop of Rabi 1904 will influence the redemptions of next year also in the right direction.

Sales.

24. Sales and permanent transfers for value now represent a total and cultivated area of 249,352 and 148,192 acres, respectively, as against 258,371 and 152,555 acres last year, but the purchase money has risen from Rs. 1,01,23,585 to Rs. 1,18,51,705. Similarly, the average price per acre of ownership rights has risen from Rs. 41·5 to Rs. 50·3, and the price per cultivated acre from Rs. 70·5 to Rs. 85·3. Moreover, the totals of all transfers for value give an average price of Rs. 47·5 per acre compared with Rs. 39·1 last year. In commenting on the rise in Hoshiárpur of the sale value of land from Rs. 124 to Rs. 141, a rate higher than that prevailing in 1900-01, the Deputy Commissioner remarks that zamíndárs can pay a better price for land than money-lenders as they are able to secure a better return from it, and the fact that land prices now largely represent transactions in hard cash, instead of accounts swollen by long accumulated and unrealizable interest, suggests that the actual increase in land value on sales is even greater than is apparent from figures only.

The question of occupancy rights has already been dealt with in a preceding paragraph, but it is interesting to observe that, except in the Hoshiárpur and Ludhiána Districts, no tendency to use was noticed in the acquisition of such rights as a means of evading the Act.

Usufructuary mortgages.

25. The total cultivated area under usufructuary mortgage has risen from 35,60,742 acres to 38,63,587 acres, or 14·1 per cent. of the cultivated area as against 13·3 per cent. reported last year. The difference is not a great one, but the increase is common to the majority of districts in a greater or less degree.

The most notable instance is that of Delhi, where the area under usufructuary mortgages has risen from 84 to 81,332 acres, but the increase has not

been explained in the District Report, and it seems probable that the figures recorded last year were incorrect.

It is not easy to account for the general increase, as the number of cases in which the mortgagee was put to his election under Section 9 (2) has only risen from 799 to 826, but the Financial Commissioner thinks that it may perhaps be attributed to the fact that while money-lending mortgagees were often content with mortgages without possession, the zamíndár usually prefers a form of mortgage which enables him to cultivate the land himself.

STATEMENT II.

Proceedings under the Act.

26. The number of applications under Section 3 (2) for sanction to make a permanent alienation has risen from 823 to 967, and 481 were granted, a much larger proportion than last year, when only 264 were allowed. Some applications were made under misapprehension, but it would seem that the provisions and objects of the Act are now generally better understood. The reasons for granting applications appear to have been good in the great majority of cases, the objects of the transfers being the provision of building or factory sites or gardens, the discharge of mortgage or other debts by part sale of the debtor's land, the merely commercial disposal of mortgages held by zamíndárs as mortgagees, exchanges of land to facilitate cultivation, and, it is said in a few instances, religious and charitable ends. In these last cases the entries are correct if the transactions were really sales and not gifts. It may be added that some of the sales allowed were in favour of village menials. Jullundur heads the list of applications granted with 125; but of these 107 were exchanges made to consolidate well holdings. Out of 26 applications allowed in Hoshiárpur 12 are stated to have been for religious and charitable purposes. Ludhiána shows 69 transfers permitted, and of these 57 were for building sites. Last year Gujrát had the highest figure of applications allowed, *viz.*, 73. This year the Gujrát figure 62 is third, being next after Jullundur and Ludhiána. In the report the only explanation given is that applications were generally made for the purpose of redeeming mortgaged land with the sale-proceeds of a part of it. This is satisfactory so far as it goes, but the Deputy Commissioner should give a fuller analysis on future occasions.

A doubtful case is reported from Delhi, where the Deputy Commissioner sanctioned a sale of heavily mortgaged garden land for Rs. 18,900 for the purpose of building a house, on the ground that the highest bid offered by an agriculturist was Rs. 12,000, but it is not definitely stated that the purchaser was a money-lender. Having regard to the character of the land, the purpose of the purchaser and the large sum (Rs. 6,000) by which the zamíndár benefited, it seems probable that the sale was rightly allowed. A gift in the Amritsar District of 10,795 acres by a Rájpút to his servant looks suspicious, but details have not been given. A ruling of the Deputy Commissioner of Ludhiána that a Jat who becomes an Udási Faqír is no longer a member of an agricultural tribe, apparently resembles that mentioned in paragraph 2 of the Report for the year ending 30th September 1902. In the previous case the Deputy Commissioner's decision was upheld. The Financial Commissioner has called for the file of the Ludhiána case now reported.

The Hissár and Rohtak Districts again account for the bulk of the work relating to mortgages, but the 162 cases in Hissár shown in column 4 as falling under Section 6 (1) (*b*) do not, as has been stated in a previous paragraph, really pertain to that section.

This year again there is only one case of an application to fix the proportion of a mortgage debt under Section 7 (3), *vide* column 6 of the statement. It comes, as before, from Gujránwála. The Deputy Commissioner probably alludes to it in his remark that an application made for fixing the amount of a mortgage debt was disallowed as the mortgage was with possession. The case will be called for by the Financial Commissioner as there is probably some misapprehension. Section 7 (3) may come to have great importance as the numbers of mortgages by zamíndárs to others increase. In the case of mortgages under Section 6 it allows the mortgagor to redeem his land at any time during the currency of the mortgage on payment of the mortgage debt, or in the case of a mortgage in form (*a*) (which is a usufructuary mortgage) or form (*b*) (which is in the first instance a collateral

mortgage), on payment of such proportion of the mortgage debt as the Deputy Commissioner determines to be equitable. The reason why this equitable power is not applicable to a mortgage in form (*c*) is that in that form no term is fixed for the mortgage nor is the rent (which discharges the interest) applied to the reduction of the principal. In the other two forms there is necessarily an account on redemption as part of the principal either must or may have been already paid off. The defect in Section 7 (3) is that it merely declares the right to redeem without giving the Deputy Commissioner power to effect the redemption. In connection with a co-operative bank lately started in the Lyallpur District it has been brought to the Financial Commissioner's notice that zamíndárs with money ready to redeem their mortgaged lands may be temporarily defeated and put to great expense by the mortgagee simply refusing to allow redemption and referring the zamíndár to a civil suit. If he sues, litigation may run up to the Chief Court, and it may take him two years or more to get a decree affirmed in his favour. What appears to be wanted is a provision that where the record of rights clearly establishes a mortgage under Section 6 and the zamíndár deposits the mortgage money or the amount found to be due with a Revenue Officer, such officer shall have power to put him in possession; the mortgagee, if he declines to accept payment and contests the zamíndár's right of re-entry, being left to sue. This throws the *onus* on the proper party, and Sir Lewis Tupper thinks this suggestion might be considered when the Act comes under amendment.

Many of the entries in column 10 (other proceedings, &c.,) relate to applications made under a misapprehension when no sanction was required. The 62 cases shown by Gujrát, and most of the cases shown in column 10 by Karnál, were applications from persons claiming the status of agriculturists. It is doubtful whether this work should be shown as falling under the Act though it is a consequence of it. The point is of the less importance as the agriculturist is likely to be abolished before long. Meantime the Financial Commissioner thinks these cases may be shown in column 10, the nature of the entry being always explained in the Deputy Commissioner's report.

No definite proposals have been made with a view to the alteration of the form of Statement II, and it seems generally to serve the purpose for which it is intended. In Jullundur and Jhelum, however, the Deputy Commissioners believe that many more cases occurred under Section 3 (2) than are shown in column 2 of the statement, the omission in Jullundur being due to the neglect of a clerk, and in Jhelum to the orders under the Act being given in mutation proceedings and not separately registered. These are defects in the compilation of the statement which can easily be obviated by a little more care.

The Deputy Commissioner of Muzaffargarh shows no less than 833 proceedings under column 10. It appears from his report that he has checked all the mutations sanctioned in his District since the 8th June 1901, with the exception of those already incorporated in the detailed *jamabandis*, which he is about to go through. The check which has already taken place resulted in the return of 832 mutations for review by Tahsildars and Naib Tahsildars.

Statements III—VI.

Mortgages and sales.

27. As was explained in paragraph 28 of last year's report, Statements III—VI do not distinguish between transactions which took place before and after the Act came into force, and as there are still a considerable number of mutations effected during the past year relating to the former class, the figures are to this extent swollen throughout. Statements III and IV give the details of the transactions regarding mortgages and sales. Statement V gives the district totals, and Statement VI shows the net gains and losses by the agricultural tribes. For the Province as a whole the net result is that agricultural tribes have mortgaged 40,448 acres more than they took on mortgage, compared with a loss of 37,289 acres last year, while they have lost 11,674 acres on sales, compared with a previous gain of 5,980 acres. The areas lost and gained on sales by agriculturists are almost identical, and the gain of non-agricultural tribes must be mainly attributable to transactions prior to the Act and to decrees of Court based on such transactions, as the effect of the Act has been practically to stop all such permanent alienations by members of agricultural tribes to others.

Both in the case of permanent and temporary alienations the transactions are still mainly inter-tribal in the fullest sense of the term, the members of each tribe mortgaging and selling more frequently to members of the same tribe than to any other. This is quite the leading feature in the statements here under consideration, and it is a very encouraging one. To the extent that transfers are fully inter-tribal one great object of the Act, *viz.*, the retention by each old agricultural tribe of its tribal lands, is being fulfilled.

Agricultural tribes.

28. This year Ferozepore is the only District in which zamíndárs have acquired more land on mortgage than they have mortgaged, but the gain is only 451 acres, for which the Hindu Jats are responsible. They have also continued to gain at the expense of Rájpúts to the extent of 940 acres, and their net gain in the year is 2,143 acres. The statements of other districts do not distinguish between Hindu and Musalmán Jats, but there has been a gain to the tribe of 4,015 acres in Hoshiárpur, as also insignificant gains in Jullundur, Lahore, Ráwalpindi and Kángra. The Deputy Commissioner of Hoshiárpur reports that the well-to-do Jats are financing their poorer brethren. The mortgage figures of this district in which Jats have acquired 4,676 acres from Rájpúts are not very valuable, owing to the large *taluqdári* area which has been transferred. The net loss of Jats throughout the Province has been 4,091 acres. Rájpúts have gained ground slightly in Kángra, Jhelum, Dera Gházi Khan, Karnál, Lahore, Shahpur and Multan, but they have lost in all the other districts. In Karnál their gain was due to acquisition from Rors, who were formerly their dependents and are still settled among them in Rájpút villages. Their net loss in the Province generally amounts to 23,058 acres. The districts where they have fared worst are Hoshiárpur (11,473), Hissár (3,043), Ambala (1,199), Jhang (1,890), Gurdáspur (1,112) and Ferozepore (1,074).

Aráins and Kambohs have gained 924 and 194 acres, respectively.

Sales.

Only in Karnál (794), Jullundur (324), Montgomery (179), Lahore (985) and Amritsar (209) have Jats gained more than 100 acres by sales. In Ferozepore the Hindu Jats have lost 288 acres compared with 49 acres lost by Jat Musalmáns, but it may be that in other districts the acquisitiveness of the Hindu Jat would be more marked if it were possible to distinguish him from his Musalmán tribesman. The net loss by Jats amounts to 7,173 acres. Rájpúts have not lost very heavily. They have gained 1,736 acres in Miánwáli, 446 in Multan, 300 in Gujránwála and 201 in Shahpur, acquiring also smaller areas in Kángra and Ferozepore. Their net loss on sales in all districts amounts to 1,039 acres, but, except in Hissár (1,966) and in Jhang (215), they have nowhere lost more than 200 acres in any one District. So far therefore as sales are concerned the Act would appear to have had considerable influence in arresting their expropriation. Aráins and Kambohs, both thrifty tribes, have gained in sales, as they did in mortgages, to the extent of 934 and 243 acres, respectively. In commenting on the Lahore and Amritsar reports, the Commissioner states that he thinks there is more evidence than before of gains to Jats, Aráins and Kambohs and of losses to Rájpúts, but there are no great changes in the position of any of these tribes in either District, and in Lahore, where the Rájpúts lost 165 acres by sale, they gained 209 by mortgage. Mr. Anderson looks forward to the day when all the tribes will not form one group. But where the matter is discussed in the District reports it is usually stated that there is no tendency for the larger tribes to absorb the smaller, though the Deputy Commissioner of Hoshiárpur remarks that while the more important of the smaller tribes are holding their own, the weaker, such as Patháns and Awáns, are losing ground, and the Deputy Commissioner of Ludhiána says that there is a feeling in his District that the Jats and Aráins should be grouped separately from the remaining tribes, or at any rate from Rájpúts and Gujars. On the other hand, the Deputy Commissioner of Dera Gházi Khan states that in his District the tendency now is for the smaller tribes to acquire at the expense of the larger ones.

As, however, was stated in last year's report, the Financial Commissioner thinks that the abolition of the statutory agriculturist is a necessary preliminary to any sub-division of groups, and he is not at present convinced even that such sub-division is necessary. It will, he believes, be possible to discuss the question

profitably when, as is not at present the case, the statistics are free from transactions dating from a period prior to the Act, and there are more reliable data available as to inter-tribal alienations.

The gains and losses of the several tribes must not only be cleared from the effects of transactions prior to the Act, but must also be observed over a considerable number of years before we can reach really sound conclusions.

Agriculturists.

29. Agriculturists do not figure prominently in the statements. They mortgaged 16,728 acres, and took only 11,553 on mortgage while their sales cover an area of 22,412 acres compared with 22,473 which they acquired by purchase. It would seem therefore that the returns generally do not shew that the position given to agriculturists by the Act has so far enabled them to make large acquisitions from zamíndárs. Possibly the area mortgaged to them would have been larger if the forms of mortgage permitted by the Act were more to their liking. Their status is now apparently understood in most districts, though in Gurgáon they are only now beginning to apply for certificates, and in Delhi there have been few such applications. There is practically no evidence that the status of the agriculturist has been used as a means of evading the Act, though the Deputy Commissioner of Lahore thinks such evasion would soon have been tried, and the Deputy Commissioner of Gujrát evidently holds the same opinion.

Enumeration of tribes.

30. In supersession of Punjab Government Notifications Nos. 21 S., dated 22nd May 1901, 114, dated 16th July 1902, and 34, dated 6th April 1903, Notification No. 63, dated 18th April 1904, which is printed as Appendix 35 to the present report, amended the list of agricultural tribes in the direction of correcting errors, removing difficulties and including small tribes which, when different considerations prevailed, were excluded as insignificant in number or as bodies which could not be conveniently grouped. Thus Ansárís and Kureshís have been included in the Karnál list, and Kureshís also in those of some other districts, as they are undoubtedly agricultural, but were previously excluded owing to the hesitation which was felt as to the treatment to be accorded to Sheikhs, of whom they are sub-divisions.

Mahtons have been included in Hoshiárpur and Jullundur, but the amplification of the Jhelum list, where the largest number of new names occur, is merely due to the inclusion of sub-tribes, with undeniable claims to protection, but whose inclusion in a specific main tribe was at least doubtful. On the other hand the Bhátia clan, which is not agricultural, has been specifically excluded from the Multan list. Opinions have been called for with the previous approval of Government with reference to proposals to notify Labánas and Brahmans in certain districts as agricultural tribes, and the Financial Commissioner still has their cases under consideration. As regards a proposal to include the Kaláls in Ludhiána, the Financial Commissioner thinks that it is desirable to await the accumulation of experience in other districts, and the same remark applies equally to Sheikhs considered as a main tribe.

Statement No. VII.

Redemption of mortgages by agricultural tribes.

31. The total area in which proprietary rights were redeemed from mortgage amounts to 217,713 acres, of which 162,829 acres were redeemed by zamíndárs, or 74·8 per cent. of the whole area so redeemed. A comparison of the total mortgages by agricultural tribes as shown in the last column of Statement III with their redemption as given in Statement VII demonstrates that zamíndárs have altogether lost by mortgage 30,811 acres more than they have redeemed.

The districts in which zamíndárs have redeemed more than they mortgaged are: Kángra (1,004 acres), Jullundur (779), Montgomery (1,670), Lahore (2,523), Gujránwála (5,007), Shahpur (3,858), Jhelum (135), Attock (2,748), Jhang (571), Multan (4,597), Muzaffargarh (646), and Dera Gházi Khan (6,199). In the majority of cases the gain has been due to the Jat tribe, but in Kángra the Rájpút Military pensioners have largely contributed; while in Montgomery the gain is attributable to Rájpúts and Kharrals. The latter class hold a large area in the Chenáb Colony. In Attock the Awán tribe has been the most successful.

No District in the Delhi Division has gained, and zamíndárs in Hissár have lost 9,117 acres. Hoshiárpur shows a net loss of 13,550 acres, but the mortgage figures include those relating to *talukdári* rights. In Miánwáli there is a deficit of 10,526 acres.

The other districts which show the largest losses are Rohtak, Gurgáon, Siálkot and Ferozepore. It is a curious fact that zamíndárs should have redeemed more than they mortgaged in four out of five districts in the Multan Division, where the population is so largely Muhammadan. Jhang certainly and Multan possibly have been assisted by grants in the Chenáb Colony, but the cases of Muzaffargarh and Dera Gházi Khan do not admit of the same explanation, and it is noticeable that of the other districts which have benefited most largely by colony grants or extension of irrigation, Lahore, Montgomery, Gujránwála and Jullundur alone show net gains. On the other hand, with the exception of Hoshiárpur, where few Rájpúts received grants, none of the congested districts have fared very badly.

A supplementary statement prepared in the Financial Commissioner's Office for the purpose of bringing together the results of Statements III and VII will be found annexed to this report as Statement No. VII (*a*).

Concluding Remarks.

District Reports.

32. The District Reports are forwarded in manuscript for reference if required.

New instructions for working the Act.

The new instructions issued during and since the year under report have been for the most part mentioned in the preceding paragraphs. They are here briefly recapitulated.

Appendix No. 34.—Calls for reports on the subject of the inclusion of Brahmans in the list of notified tribes in certain districts.

Appendix No. 35.—A Gazette Notification No. 63 dated 18th April 1904, revising the list of agricultural tribes.

Appendix No. 36.—Points out that if a mortgagee refuses to elect under Section 9 (2), the Deputy Commissioner should then act for him.

Appendix No. 37.—Instructs Registering Officers on the subject of the certificates to be furnished by agriculturists.

Appendix No. 38.—Revised instructions issued for the preparation of the annual report.

Appendix No. 39.—Calls for data with reference to a proposal made by the military authorities to include Labánas in the list of notified tribes.

Appendix No. 40.—Asks for opinions on the question of the abolition of the agriculturist.

Appendix No. 41.—Gives instructions with a view to the prevention of evasions by persons who collude to represent an alienation as having taken place before the Act came into force.

Appendix No. 42.—Lays down that the words "member of the same tribe" should be held to be equivalent to "member of the same agricultural tribe in the same District."

Appendix No. 43.—Cancels Circular letter No. 96 of 1903 and gives instructions that transactions affecting occupancy rights must be dealt with under the Act.

Appendix No. 44.—The same, issued by the Inspector-General of Registration, Punjab, to Registrars.

Appendix No. 45.—Draws attention to common mistakes made in dealing with questions arising out of the Act.

Appendix No. 46.—Contains instructions issued by the Inspector-General of Registration designed to bring registration procedure into harmony with the Financial Commissioner's instructions, as in Appendix No. 42 above.

Summary.

33. Almost everything that was said in the summary of last year's report might be repeated on the present occasion. In the opinion of Sir Lewis Tupper the Act continues to work very well. It is better understood now, alike by officials and the peasantry. Both substantive provisions and procedure are gradually becoming familiar to those concerned. The effect of the Act is not to be measured by the alienations or applications made under it but by the number of undesirable alienations which it prevents—a total which no statistics can give us. There is, the Financial Commissioner believes, a general abstention by zamíndárs from permanent alienations to others; and if this is so, one of the main objects of the Act has been attained. So far there is no proof that big tribes are absorbing the possessions of little ones; and it is a conspicuous feature of the present report that land transfers mainly occur between members of the same tribe. At first some slight depreciation in the value of agricultural land was admitted: but the statistics of sales and mortgages now show it to be rising; and so remarkable are the figures that the Financial Commissioner thinks there is much to support the view that the fall in price of land foretold by those who prophesied evil of the Act is, in the pithy language used by the Hon'ble Mr. Alex. Anderson, "a bogey which we have not yet seen."

At the same time the experience now gained of the working of the Act has brought to light several points for consideration when it comes under amendment. Probably, as judicially decided, occupancy holdings will be treated as "land." The question whether the statutory agriculturist should be eliminated will shortly come before Government for decision. Possibly another form of mortgage should be allowed to zamíndárs. Provision might be made for applications by Deputy Commissioners for the revision of orders, held by them to be wrong, which have been passed by Civil Courts. The evasions of the Act which are being attempted by the substitution of leases for mortgages might be checked by suitable provisions, and powers might be conferred on Deputy Commissioners to place mortgagees in possession when entitled to it under their orders and mortgagors in possession when, being entitled to redeem, they have deposited the amounts due from them. Such are some of the improvements in the Act or (in the case of a new form of mortgage) measures which may be taken under it which the Financial Commissioner thinks deserve notice in connection with the present report. They will be taken up fully and separately should the Government decide to amend the law when the reports regarding the statutory agriculturist come before it.

LIBRARY OF THE BOMBAY BRANCH OF THE ROYAL ASIATIC SOCIETY

No. 34]

Copy of a Circular Memo. No. 2441, dated 15th April 1904, from R. Humphreys, Esquire, Senior Secretary to Financial Commissioner, Punjab, to the Commissioners, Delhi, Jullundur, Lahore and Ráwalpindi.

I AM directed to address you on the subject of the further enquiries to be made in certain districts into the question of the inclusion of Brahmins among the lists of tribes notified under the Punjab Alienation of Land Act. The districts in which enquiries should now be made are all the districts of the Delhi Division, except Simla, the districts of the Jullundur Division, those of the Lahore Division, except Montgomery, and Ráwalpindi in the Ráwalpindi Division.

2. The lines on which the enquiries should be made are those indicated in paragraph 31 of the annual report on the working of the Alienation of Land Act for the year 1902-03 with a view to notifying territorially. The object should be a decision on broad and general lines. If by selecting villages or assessment circles or tahsils the aim in view, *viz.*, the exclusion of Brahmin money-lenders, can be almost completely attained, the probable presence of a few money-lenders scattered about in one or two places in a considerable tract should not be regarded as a conclusive bar to notification. On the other hand, if it were known that in any particular village there were several Brahmin money-lenders who did a good deal of business as such, that might be a good reason for excluding such village.

3. I am to request that the results of these enquiries may be reported with your advice on the question.

No. 35]

AGRICULTURE.

The 18th April 1904.

No. 63.—*Notification.*—In exercise of the powers conferred by Section 4 of the Punjab Alienation of Land Act, 1900 (XIII of 1900), and in supersession of Punjab Government Notifications Nos. 21 S., dated the 22nd May 1901, 114, dated the 16th July 1902, and 34, dated the 6th April 1903, the Lieutenant-Governor of the Punjab, with the previous sanction of the Governor-General in Council, is pleased to determine that for the purposes of the said Act,—

(1) In each district of the Punjab mentioned in column 1 of the Schedule annexed to this notification, all persons either holding land or ordinarily residing in such district and belonging to any one of the tribes mentioned opposite the name of such district, in column 2, shall be deemed to be an "agricultural tribe" within that district.

(2) All the "agricultural tribes" within any one district shall be deemed to be a group of agricultural tribes.

No. 36]

Financial Commissioner's Circular Letter, No. 2858, dated Lahore, 2nd May 1904, to all Commissioners and Deput Commissioners in the Punjab.

It has come to the notice of the Financial Commissioner that occasionally a mortgagee, when put to his election by the Deputy Commissioner, under Section 9 (2) of the Alienation of Land Act as to whether he will agree to the conditional sale clause being struck out of the deed, or accept a mortgage in one of the forms permitted by Section 6 (*a*) and (*b*) of the Act, refuses to adopt either course. In such a case the Deputy Commissioner should explain to the mortgagee that he is not at liberty thus to attempt to defeat the law, that he must choose one of the two courses provided for him by the section of the Act, and that the only practical result of his refusal to elect is that he leaves it to the Deputy Commissioner to make the election for him. If in the face of such an explanation the mortgagee still refuses to act, the Deputy Commissioner should then act for him and define what the mortgage is to be in accordance with the powers conferred upon him by Section 9 (2).

2. In such a case ordinarily the best course will be to strike out the condition intended to operate by way of conditional sale, because this avoids the further complication that if a new mortgage is ordered, the mortgagor may decline to execute it. What is to be done in such a case has been explained in this office circular letter, No. 3482,* dated the 6th June 1903. One of the objects of the Act was to cancel conditional sales with retrospective effect subject to an arrangement by which the mortgagee should not lose his security. When he would have adequate security with the sale clause struck out, there need be no hesitation in compelling him to accept that arrangement if he will not do so voluntarily. It is only when the mortgage deed, with the sale condition excised, would not afford adequate security and when the mortgagee refuses to exercise the option allowed to him by law, that the Deputy Commissioner need of his own motion order a new mortgage.

* No. 27 in Appendix to Annual Report for 1902-03.

No. 37]

Circular No. 2, dated Lahore, the 19th May 1904, from the Inspector-General of Registration, Punjab, to all Registrars in the Punjab.

Every alienee who alleges himself to be an "agriculturist" as defined in Section 2 (1) of the Punjab Alienation of Land Act, is required to supply himself with a certificate in the attached form, which is obtainable either at the tahsil (in which case it will be signed by the Tahsildar, or Naib Tahsildar), or at the district head-quarters (in which case it will be signed either by the Sadar Kánúngo or his assistant, and countersigned by an Extra Assistant Commissioner).

Having satisfied themselves that the holder is the person whom the certificate names, Registering Officers should accept this certificate as evidence that he is "an agriculturist" in the the village or villages to which it relates, and should decline to accept any other evidence of the fact.

2. After the document presented by the holder of the certificate has been admitted to registration, the certificate should be returned to him: but the Registering Officer should note in his endorsement the serial number, date and office of issue of the certificate.

3. Registering Officers should understand clearly that no certificate is required from a member of an agricultural tribe, but only from an "agriculturist" as defined in Section 2 (1) of the Act; and also that the same certificate may be used on any number of occasions, and in mutation as well as in registration proceedings.

DISTRICT

OR TAHSIL DISTRICT.

Certificate granted to persons who claim to be "agriculturists" as defined in Section 2 (1) of Act XIII of 1900.

Serial No. , of 19 dated 19 .

Certified that , son of , caste ,

resident of , is recorded as holding the land noted on the reverse as an

owner / occupancy tenant in village , tahsil , in the Settlement Record

of 18 , and that , son of , caste , resident of ,

is a direct descendant in the male line of the above-named, in the manner shown by the genealogical tree on the reverse, which is a true copy from the Settlement Record of 18 , or which has been deposed to by

Office Seal.

(Sd.)

OFFICE OR SADAR KANUNGO.

Attested.

Extra Assistant Commissioner.

Tahsildar or Naib-Tahsildar.

NOTE.—For Officers attesting mutations and Registration Officers.

Before the holder of this certificate can acquire land permanently in any village above-named, he must prove further that he holds agricultural land in such village at the time of the permanent alienation.

Khewat numbers of land recorded as held by applicant or his ancestor in the male line.

Genealogical tree of the applicant.

[No. 38,]

Financial Commissioner's Memo. No. 3481, dated Lahore, 1st June 1904, to all Commissioners and Deputy Commissioners in the Punjab.

THE revised scheme for the annual report on the working of the Alienation of Land Act (XIII of 1900), communicated with this office Memo. No. 86 S., dated 22nd June 1903, is amended as under:—

Cancel the second sentence of head 7 of Section III—*Temporary Alienation of Land*—in Part I—*The working of the Act*—and *substitute* the following:—

"Note any improvements that might be proposed in procedure."

[No. 39.]

Financial Commissioner's Memo. No. 3994, dated Lahore, 28th June 1904, to all Commissioners, except Multán.

With reference to correspondence 1903,) on the subject of the inclusion of the tribe of Labánas among the lists of agricultural tribes notified under the Alienation of Land Act (XIII of 1900) in certain districts of your Division, I am directed to send a copy of a letter, No. 1716 S., dated 3rd September 1903, from the Revenue Secretary to Government, Punjab, to the address of the Deputy Adjutant-General, Punjab Command, and also a copy of paragraph 31 of the annual report on the working of the Alienation of Land Act for the year 1902-03, and to convey the following remarks.

2. The petitions of certain Native Officers of the 48th Bengal Pioneers, which originated the correspondence quoted in the preceding paragraph, referred to the Hoshiárpur, Jullundur, Gurdáspur and the Gujrát Districts. A subsequent letter of their Commanding Officer, communicated to the Financial Commissioner under cover of Punjab Government endorsement No. 175, dated 4th December 1902, added the Ambala, Kángra, Amritsar, Siálkot, Gujránwála and Gujrát Districts. Accordingly these are the districts which we have more particularly to consider in order to enable Government to send a further reply to the Deputy Adjutant-General, Punjab Command, *vide* their No. 1716 S., dated 3rd September 1903, already referred to.

3. The Financial Commissioner, however, thinks we may include the Ludhiána and Ferozepore Districts (where the numbers of male Labánas according to the recent Census are 568 and 1,029, respectively), in order to complete the case.

4. As it appears to be the opinion of the Military authorities that the exclusion of Labánas from the list of notified tribes may have an unfavourable effect on recruitment for the army, it is very desirable to lay before Government conclusive data as regards all the districts concerned.

5. In the case of the Ambala District, Mr. Meredith gives some useful particulars in his letter No. 141-784 R., dated 22nd April 1903 (copy enclosed), and he advises, for reasons which seem sufficient, if the Labánas are not in this District money-lenders, that they be notified in his District as an agricultural tribe. It appears that the Ambala Labánas are nearly all engaged in agriculture, or the relations or dependants of men so engaged. Under the present system of grouping the small total of the tribe is not material. It remains to supply, if practicable, a list of villages or tracts for notification, to report whether there are money-lenders amongst the Labánás, and, if that be so, whether it is possible to exclude all or most of the money-lenders in framing the list of villages or tracts.

6. Turning to the Jullundur Division, it appears that though many of the Labánas in the Kángra District own land, their main source of livelihood is the carrying trade. Under these circumstances the Financial Commissioner thinks that, unless further facts are subsequently adduced in favour of notifying the Kángra Labánas, this should not be done. The total number of males of this tribe in the District is only 893.

7. As regards the other districts of this Division the percentage of Labána proprietors to others is immaterial; it is unnecessary to consider whether their acceptance would form a precendent for the acceptance of Kaláls, as it is quite obvious that it need not do so; the fact that the tribe is of little social importance is not a conclusive bar, because their inclusion in the list is really suggested on Military grounds. At the same time it would be an abuse of the Act to notify under it a tribe which is not really an agricultural one. A report is therefore required for the Hoshiárpur, Jullundur, Ludhiána and Ferozepore Districts showing, so far as is practicable, the number or percentage of Labánas actually engaged in agriculture, whether any Labánas are money-lenders, and whether it is possible to supply a list of villages or tracts for notification so framed as to include the Labánas, who are *bonâ fide* dependent on agriculture from those who lend money or make their livelihood as carriers or mat and rope-makers, even though they may also own a little land. If this is possible, a list of villages or tracts should be submitted. If not, the Military authorities should in due course be so informed.

8. The same instructions *mutatis mutandis* apply to all districts of the Lahore Division, except Lahore, where the Labánas have already been notified, and Montgomery, where there are none. Mr. Alex. Anderson's letter No. 183, dated 7th April 1903 (extract paragraphs 3 and 4 enclosed), was before Government when their letter No. 1716 S., dated 3rd September 1903, was written. If lists of villages or tracts can be prepared on the principles indicated above, it seems probable that Labánas should be notified in the Gurdáspur and Gujránwála Districts. In Amritsar also the smallness of the total number of males (*viz.*, 298) need not be regarded as a conclusive objection. In the Siálkot District the 17 Labána villages should be more closely examined, and an endeavour should be made to ascertain in what villages the Labánas are money-lenders and what proportion of the tribe is addicted to the practice of money-lending.

9. In the case of the Gujrát District, the Deputy Commissioner, Mr. Loxton, hesitated to accept the report of the Tahsildar that 50 per cent. of the Labánas are money-lenders. Of course if that report is correct they cannot be notified. But a village to village inquiry should be made as in other cases; and if it is impracticable to frame a list of villages which will exclude nearly all the money-lenders and admit only Labánas *bonâ fide* engaged in agriculture, the fact should be recorded, so that the Military authorities may be informed.

10. I am accordingly to request that, after enquiries have been made on the lines indicated in this letter in the Districts of your Division referred to, the results may be communicated with your opinion.

No. 40].

Financial Commissioner's Circular Letter No. 4036, dated 30th June 1904, to all Commissioners in the Punjab.

I AM directed to address you as follows on the subject of the statutory "agriculturist" as defined in Section 2 of the Punjab Alienation of Land Act (XIII of 1900).

2. Before any Bill, of what was afterwards to become Act XIII of 1900, was drawn up, a Committee sat at Barnes Court on 1st and 2nd July 1898 to consider certain proposals of the Government of India for the restriction of alienation of land in the Punjab. The following two resolutions, passed by the Conference, may be referred to in this connection :—

"Resolved—

VII.—That permanent alienation of land as defined in the Punjab Tenancy Act, Section 4 (1), *to a non-agriculturist without the sanction of the Collector, shall be void.*

XIII.—That with a view to defining 'non-agriculturists,' whatever enactment is drafted should contain a section as follows :—

The Local Government may declare for any District or part of a District what classes of persons shall be deemed to be non-agriculturists for the purpose of this Act. Until such a declaration is made, all 'new agriculturists,' as defined in Chapter V of the rules under the Land Revenue Act, shall be deemed to be 'non-agriculturists.'"

The definition referred to runs as follows:—"All persons who, neither in their own names nor in the names of their agnate ancestors, were recorded as owners of land or as hereditary tenants in any estate at the first Regular Settlement."

3. The original Bill was then drawn up by the Government of India and circulated for opinion. It was pointed out by several officers that the word "agriculturist" was so defined as to include many persons who did not belong to agricultural tribes and with whose alienations we did not wish to interfere, while we did wish to limit their acquisitions.' The Financial Commissioner proposed that the whole of Section 2 (1) should be struck out, and that there should be no definition of an "agriculturist." In submitting the case to the Government of India, however, Sir Mackworth Young defended the statutory agriculturist, which was the outcome of Resolution XIII of the Barnes Court Conference reproduced above, in the following terms :—

"I see no reason for receding from the position that the person, who not being a member of an agricultural tribe has been connected with agricultural land from an early period in British rule, must be treated as an agriculturist of the village in which that land is situated, and not as a non-agriculturist. There are two reasons for adhering to this position. The first is, that it is defensible on the merits. The policy of the British Government has been to maintain, as far as possible, the status attained under previous Governments, and it is in accordance with this policy to deem those persons agriculturists who had embarked in agricultural enterprise before our revenue system was regularized. The definition of 'new agriculturists,' embodied in the note on the yearly totals of transfers following Rule 56 of the Rules under the Punjab Land Revenue Act, was framed for statistical purposes, but it was based upon the considerations of policy above indicated. And to degrade the class hitherto regarded as old agriculturists to the level of the money-lender, who has embraced the facilities afforded him by a settled administration to effect an entrance into the land-owning class, would be at once harsh and a breach of continuity of our land record system. The second reason is, that the maintenance of the position of the non-agriculturist, who had obtained land in the early days of British administration, has been indicated in the Bill which has now been before the public for some months. I do not think it would be wise to make a complete change in this respect without a further appeal to public opinion, which I deprecate.

At the same time I do not think it is necessary to extend the full privilege of the agricultrual tribe to the *quasi*-agriculturists of the definition . . . . . it is sufficient, in my opinion, that he should enjoy the privilege in respect of the village from which he derives his qualification."

4. This then is the case for the statutory agriculturist. On the other hand, his inclusion has led to great difficulties in working the Act. The status is a highly technical one, and the people and the majority of our Revenue Officers have had difficulty in comprehending the exact position which the "agriculturist" occupies under the Act. To a person knowing Urdu only it necessarily seems a contradiction in terms to refer to a Mahájan as a *zara'at pesha shakhs*. Moreover, in some districts the records of the first Regular Settlement, or of the Settlement fixed for the purposes of determining who are agriculturists, do not contain the names of all the proprietors or occupancy tenants, which renders it difficult to determine whether persons claiming the status actually possess it. A further difficulty has been caused by the necessity for providing that our Revenue records shall show details of land purchased by agriculturists from members of agricultural tribes for the purpose of checking subsequent sales of the same land, *vide* the proviso to Section 3 (1) (*b*) of the Act.

5. These difficulties, however, are comparatively small matters, and are merely mentioned for what they are worth. The fundamental objection to the present state of the law is that the so-called "agriculturist" is in many cases not really an agriculturist at all, and that when he is not a member of an agricultural tribe, he is a member of those classes whose acquisition of the lands of agricultural tribesmen it is the primary and avowed object of the Act to prevent. In every village where there are agriculturists, who are not members of agricultural tribes, there is a standing menace to the successful working of the Act. If a *bania* has held land for thirty or forty years in a village, he does not thereby cease to be a *bania*; and if he is a landowner, it does not follow that he is not also a money-lender. There is nothing in the structure of rural society in the Punjab to separate *banias* who have held lands since the first Regular Settlement from others. The statutory agriculturist is, in Sir Lewis Tupper's opinion, the mere creature of the fears with which the working of the Alienation of Land Act was regarded by those who had no real faith in its principles. Now that we have had a sufficient experience of the Act, these fears may, in his opinion, be laid aside. It may be added that cases have occurred where statutory agriculturists have endeavoured to use their privileges by acting as go-betweens for the purpose of evading the Act and acquiring lands for non-agricultural relatives.

6. It has lately been under consideration to extend the Alienation of Land Act to the North-West Frontier Province, but in making his proposals, the Hon'ble the Chief Commissioner has strongly recommended the omission of the statutory agriculturist, on the ground that the provisions regarding him had not worked well in the Punjab, and his inclusion would extend his privileges to a large proportion of the money-lenders in the Province.

7. It is also worthy of notice that in the Bundelkhand Alienation of Land Act (II of 1903) the statutory agriculturist finds no place.

8. I am to request that, after reference to the District Officers of your Division, you will record your opinion as to whether the statutory agriculturist should be abolished or not. If he is, the following provisions of Act XIII of 1900 will have to be repealed: Sections 2 (1), 3(1) (*b*), and the proviso to the latter. It may be further noted that if the statutory agriculturist is to be eliminated from the Act, the sooner this is done the better. At present he is in a position of great advantage, because the door closed upon the mass of the money-lending classes is left wide open to certain members of those classes who, by the absence of competition of their class, have better opportunities now of permanently acquiring the lands of zamíndárs than they had before the Act was passed. This privileged position will shortly be recognised and eagerly claimed; and it will be far more difficult to eject the occupants from it a few years hence than it is now.

9. I am to add that this letter was drafted under the orders of Sir Lewis Tupper before he went on leave, and its issue has been delayed by the necessity for a previous reference to Government.

[No. 41].

Financial Commissioner's Circular, No. 6, dated Lahore, 20th July 1904, to all Commissioners and all Deputy Commissioners, except Simla.

WITH a view to the prevention of evasions of the provisions of the Alienation of Land Act by persons who collude to represent an alienation as having taken place before the Act came into force, the following instructions are issued for the guidance of Revenue Officers in supersession of those contained in paragraph 5 of Financial Commissioner's Circular, No. 8, dated the 14th August 1901, which have become unsuitable now that the Act has been in operation for more than three years.

2. When a mutation comes up relating to an alienation which contravenes the provisions of the Alienation of Land Act, but in which it is alleged that the alienation was completed before the Act came into force, the attesting officer must decide whether the alienation took place before or after 8th June 1901. It is important that there should be a careful enquiry, reference being made to the revenue records, and the parties being given an opportunity of producing

evidence. The record of the proceeding should be in some detail. The nature and amount of the evidence required will vary with the circumstances of each case. A registered deed will not ordinarily require much, if any, corroboration; but an unregistered deed or an oral contract will demand close examination. A scrutiny of the girdáwari register will show who has been in possession since the alleged date of the alienation. If the alienee did not obtain possession himself or through an agent or through a tenant before the 8th June 1901 or within a reasonable time, it is for him to explain why he did not take advantage of his rights.

No. 42.]

Financial Commissioner's Circular Letter No. 5407, dated Lahore, 5th September 1904, to all Commissioners and Deputy Commissioners in the Punjab.

A DOUBT having arisen as to the meaning of the words "member of the same tribe" in Section 3 (1) (*c*) of the Punjab Alienation of Land Act (XIII of 1900), I am directed to explain that they should be held to be equivalent to "member of the same agricultural tribe in the same district." It follows therefore that a permanent alienation of land by a member of an agricultural tribe to a member of the same tribe in another District, even though the tribe may also have been notified as an agricultural tribe in the latter District, requires the sanction of the Deputy Commissioner of the District in which the land is situated. *A fortiori*, a permanent alienation of land in a British District, by a member of an agricultural tribe to a member of the same tribe residing in a Native State, requires the sanction of the Deputy Commissioner of the District. In such cases the instructions contained in paragraph 11 (*vii*) of Financial Commissioner's Circular Letter No. 3441, dated the 5th June 1901, as to the giving or withholding of sanction should be followed.

2. The same words recurring in Section 6 (1) of the Act relating to temporary alienations of land should be similarly interpreted, and accordingly mortgages by a member of an agricultural tribe to a member of the same tribe in another District or in a Native State are invalid, unless they are in one of the approved forms given in the section referred to.

No. 43.]

Financial Commissioner's Circular Letter No. 5555, dated Lahore, 14th September 1904, to all Revenue Officers in the Punjab.

THIS office Circular Letter No. 96, dated 14th January 1903, conveyed certain instructions as to how questions relating to occupancy rights should be dealt with with reference to the Punjab Alienation of Land Act (XIII of 1900), and it was said that these instructions should be acted on until they should be modified by an authoritative decision of the Courts or by Government. It has now been ruled by the Punjab Chief Court in their decision reported in the Punjab Record as No. 11 of 1904 (Civil) that the word "land" as defined in Section 2 (3) of the Alienation of Land Act includes occupancy rights in land. This office Circular Letter No. 96 of 1903, above referred to, is accordingly cancelled, and in future transactions affecting occupancy rights in land must be dealt with under the Act.

No. 44.]

Circular No. 4, dated Lahore, 5th October 1904, from Inspector-General of Registration, Punjab, to all Registrars in the Punjab.

OWING to the issue of the Financial Commissioner's Circular Letter No. *5555, dated 14th September 1904, this office Circular No. 1, dated 21st April 1904, is cancelled, and in future Registering Officers should deal with occupancy rights in the same way as with proprietary rights, for the purposes of the Punjab Alienation of Land Act (XIII of 1900).

*Published at page 1259, Part III, of the *Punjab Government Gazette*, dated 15th September 1904.

No. 45.]

Financial Commissioner's Circular Letter No. 6272, dated 19th October 1904, to all Commissioners and Deputy Commissioners in the Punjab.

I AM directed by the Financial Commissioner to draw attention to the following mistakes which appear to be common in dealing with questions arising out of the Punjab Alienation of Land Act (XIII of 1900), and to point out how they should be avoided.

2. *Disposal of applications under the Act by Deputy Commissioners.*—Unnecessary trouble is often caused by the failure of Deputy Commissioners to carefully examine applicants as to the nature of their application, and to specify clearly in sending the application to a subordinate Revenue Officer for enquiry and report the exact point or points which require elucidation. Tahsildars have been known to send in long reports in cases where all that was required was a verification of the statement in the application that the land in question was within municipal limits. So also it is not uncommon for applications to be made to Deputy Commissioners for permission to mortgage land to persons not members of agricultural tribes in forms other than those approved in Section 6 of the Act. Such permission cannot be granted in any case, and it is unnecessary to send such applications for report. All applications for permission to mortgage should be disposed of at

Applicants to be carefully examined.

once by the Deputy Commissioner, for in the case of the alienee being a member of an agricultural tribe there is no need of permission, and if he is not a member (even though he be an agriculturist), permission cannot be given.

3. *Defective mutation proceedings.*—It is often impossible to say from the mutation record as it stands whether mutation should have been allowed or refused. Paragraphs 5 and 6 of Director of Land Records' Circular, No. 9, dated 20th November 1903, will, if observed, remove most of the objections; but at present the circular does not appear to receive sufficient attention. The Revenue Officer attesting a mutation should himself see the deed on which it is based, if one exists. This is the only way in which he can satisfy himself as to its conditions. The caste or tribe of the parties must in all cases be recorded; in many cases this information is omitted, and perhaps the omission is intentional. If the caste or tribe is one of those notified by Government as agricultural tribes, it should be entered under the name used in the Government notification, and not by vague terms, such as "zamíndár," &c. The Revenue Officer in his order should always state what the caste of each party is.

Caste or tribe always to be recorded.

4. *Disposal of mutations regarding mortgages.*—Revenue Officers rarely write correct orders in cases of refusal of mutation regarding mortgages. The order is generally found to be—"mutation refused because the alienee is not a member of an agricultural tribe." But this is not a sufficient reason, nor is it the reason which as a fact the Revenue Officer has in his mind. The real reason is that the form of mortgage approved for use where the alienee is not a member of an agricultural tribe and the alienor is, has not been followed. He should state that fact, and show in what respect the mortgage does not comply with the conditions of the Act.

Reasons for refusal to grant mutation should always be given.

5. *Permanent alienations.*—In regard to permanent alienations a very common mistake is for Revenue Officers to dispose of cases by refusal of mutation, instead of by a reference to the Deputy Commissioner. Where a permanent alienation requires and has received the sanction of the Deputy Commissioner, if the Deputy Commissioner's sanction is not on the mutation proceedings themselves, the attesting Revenue Officer should note that he has seen a certified copy of the sanction or the original order. It is not sufficient to take the statement of the parties as showing that sanction has been given.

Mutations regarding permanent alienations to be carefully considered.

6. *Temporary alienations.*—A common form of mortgage is that in which the mortgagee gets possession on the condition that he will re-deliver possession when the profits cover the principal and interest. The custom appears to be to hold that such a mortgage contravenes the Act because no term is fixed, and mutation is refused. This is quite wrong. In such a case the Act (Section 6 (1) (*a*)) fixes the period at 20 years, and the mortgage should be accepted as legal subject to the condition attached to it by law, and the mutation should be sanctioned as for a period of 20 years. The same applies *mutatis mutandis* to a case where the term in the deed is over 20 years. The mortgage should be treated as a mortgage for 20 years. Where there is no period the mortgagor may suffer, and so when the period is over 20 years he will gain. In accordance with the instructions in paragraph 3 (*b*) of Director of Land Records' Circular, No. 7 of 1903, the term of the mortgage should be shown as 20 years in the remarks column of the *jamabandi*.

Procedure when term of a mortgage contravenes the Alienation of Land Act.

7. *The same.*—In mortgages which otherwise comply with the conditions of Section 6 (1) (*a*) of the Act, there are frequently other conditions, *e.g.*, (*a*) that, within the term fixed, redemption shall not be allowed, or (*b*) that redemption shall be allowed only on payment (*i*) of the whole mortgage money, which means that the profits are to be in lieu of interest only, and not in lieu of both principal and interest, or (*ii*) of a sum equal to the mortgage money multiplied by a fraction represented by the remaining term of the mortgage divided by the whole term. Such conditions are all contrary to Section 7 (3) as read with Sections 6 and 8, and mutation should be refused. It is for the Deputy Commissioner to determine the amount to be paid in such cases where the mortgagor wishes to redeem his land during the currency of the mortgage. Similarly, in the case of mortgages which otherwise comply with the conditions of Section 6 (1) (*b*) of the Act, there may be a condition saying that on non-payment of the interest the mortgagor shall give possession to the mortgagee for 20 years. This is illegal, and mutation should be refused. The sub-section leaves it to the Deputy Commissioner to determine the period.

Procedure when other conditions in a deed of mortgage contravene the Act.

8. *The same.*—Where a temporary alienation contravenes the Act, mutation must be refused; but cases sometimes occur where the parties under such circumstances come to an agreement in the course of the mutation proceedings which brings the alienation into conformity with the Act. In such cases the Revenue Officer should instruct the parties that they may apply to the Deputy Commissioner to exercise the powers conferred upon him by Section 9 (1), and if they agree, the mutation proceedings should be forwarded to the Deputy Commissioner as their application.

Procedure when parties agree to amend the conditions of a mortgage.

9. *The same.*—There are many cases of mortgages executed before the Alienation of Land Act came into force, according to which possession is not to pass until there has been default in the payment of principal or interest. Where this contingency arises after the 8th June 1901, the Act does not apply, as the mere passage of possession in accordance

Case of mortgages executed before 8th June 1901, where default is made after that date.

with the terms of the original mortgage cannot be construed as constituting a new mortgage made after the coming into force of the Act.

Deputy Commissioner's sanction to leases of fruit gardens for more than one year necessary.

10. *Working of Section* 15.—There is some doubt as to the effect of Section 15 in cases where the fruit of gardens is sold for several years in advance. In the Financial Commissioner's opinion, where the sale is for more than one year, the Deputy Commissioner's sanction is necessary.

Treatment of money-lenders with regard to permanent alienations.

11. *Interpretation of paragraph* 11 (*viii*) *of Financial Commissioner's Circular Letter No.* 3441, *dated* 5th *June* 1901.—Some doubts have been felt as to the proper interpretation of paragraph 11 (*viii*) of Financial Commissioner's Circular Letter No. 3441, dated 5th June 1901. I am to refer to *Punjab Record* Ruling No. 5 of 1904—Revenue—in which the Financial Commissioner's views are explained; they are to the following effect:—

The money-lender may be (1) a member of an agricultural tribe, or (2) an agriculturist within the meaning of Section 2 (1) of the Act, or (3) some other person.

If the money-lender falls under the third category there is no difficulty. The instructions of the Circular Letter apply without explanation.

If the money-lender is a member of an agricultural tribe, and of the same tribe or a tribe in the same group as the alienor, the sanction of the Deputy Commissioner to the transaction is not required.

Nor is it required if the money-lender is an agriculturist within the meaning of the Act holding as such land in the village where the land alienated is situated.

Where the Deputy Commissioner's sanction is not required, his proper course is to inform the parties accordingly, and, so far as the proceedings under the Alienation of Land Act are concerned, to consign the case to the record room. But if mutation of names is applied for, it should be granted or refused on general grounds, and not refused for any reason arising out of the Alienation of Land Act or the Financial Commissioner's circular.

On the other hand, if it is found that the money-lender, though a member of an agricultural tribe, is not a member of the same tribe as the alienor or of a tribe in the same group, or, though an agriculturist within the meaning of the Act, does not as such hold land in the village where the land alienated is situated, then paragraph 11 (*viii*) of the Circular Letter of 5th June 1901 applies without explanation as in the case of "(3) some other person" dealt with above.

No. 46]

Circular No. 5, dated Lahore, 20th October 1904, from Inspector-General of Registration, Punjab, to all Registrars in the Punjab.

In order to bring paragraphs 5 and 6 of my office Circular, No. 9, dated 15th November 1901, into harmony with the law as laid down in the Financial Commissioner's Circular Letter No. 5407, dated 5th September 1904, the following modifications in them are heredy made:—

In line 8 of paragraph 5 the words "or of the same agricultural tribe in another district" are struck out.

In lines 10 and 11 of paragraph 6 the words "or of the same agricultural tribe in another district" are struck out.

For the purposes of registration procedure, an alienee, who is a member of an agricultural tribe, even though it be the same tribe as that of the alienor, in another British District or in a Native State, should be treated as though he were not a member of an agricultural tribe.

Proceedings of His Honour the Lieutenant-Governor in the Department of Revenue and Agriculture (Agriculture)

No. 109, dated 10th April 1906.

READ—

The annual report on the working of the Punjab Alienation of Land Act, XIII of 1900, for the year ending the 30th of September 1905.

REMARKS.—The discussion which took place during the year under report regarding the desirability of amending the Act by abolishing the statutory agriculturist and in other particulars obviates the necessity of considering in much detail the remarks made regarding the working of the Act. In drafting the new bill it is observed that Sir Lewis Tupper proposes finally to set at rest the doubts which have been felt as to the correctness of including occupancy rights in the definition of land, and of interpreting a creation or alienation of such rights as a permanent alienation. Mr. Gordon Walker's treatment of the difficulty raised on account of the apparent conflict between section 3 of the Act and section 53 of the Tenancy Act appears to have been quite appropriate, and the matter will no doubt be borne in mind when the new bill is being considered in Committee.

2. It appears that fictitious gifts intended to cloak evasions of the Act have been rare. They are not, however, unknown, and the Lieutenant-Governor agrees that the action proposed by the Financial Commissioner, *viz.*, to prescribe that the Deputy Commissioner shall see all cases of such gifts, is desirable: no further precautions seem necessary in this direction. The amendment in procedure adopted at the suggestion of the Deputy Commissioner of Dera Ghazi Khan will, it is hoped, secure greater despatch in disposing of cases in which the Act has been contravened. The rules relating to permanent alienations of land call for no criticism. The Lieutenant-Governor, while accepting the Financial Commissioner's view that the rule which allows sanction to be given to alienations made in order to redeem part of a mortgaged estate does not need any amendment thinks that the danger pointed out by the Commissioner of Delhi is a real one, and that such sanctions should be granted with caution.

3. Shortly after the close of the year under report, the notification of agricultural tribes in the Attock District was issued. Labanas have recently been notified in some of the central districts of the Punjab. The Lieutenant-Governor notices that the Financial Commissioner is still considering the desirability of notifying Brahmans, Ramgarhias and certain other tribes. Sir Charles Rivaz is of opinion that great caution should be exercised about extending the agricultural status to tribes which although some of their members practise agriculture, yet are in the main inclined to non-agricultural occupations by heredity and disposition, and whose chief object in wishing to be notified as "agricultural" is not for protection, but in order to obtain greater facilities for acquiring land from true agricultural tribes. His Honour agrees that at present there is no necessity for altering the present arrangements of grouping tribes.

4. In paragraph 16 the Financial Commissioner discusses the proposal that a condition might be embodied in mortgages under section 6 (1) (*a*), prescribing that the mortgagor should become a tenant of the mortgagee paying rent in kind. As was pointed out in last year's report, section 6 of the Act in no way operates to prevent such leases, and as there is nothing in clause 6 (1) (*c*) to prevent the payment of rent in kind, the necessity for the proposal made by the Commissioner of Delhi is not clear. The question whether the proposed arrangements can be embodied in the mortgage in the absence of any declaration under section 8 (1), is one on which the Legal Remembrancer might be consulted by the Financial Commissioner. It appears, however, that the form of mortgage prescribed in section 6 (1) (*c*) is very rarely utilized, apparently on account of the restrictions imposed on the rent payable by the mortgagor tenant: and it might be advisable as suggested by the Financial Commissioner in paragraph 9 of last year's Report to recognize another form under which, while the mortgagee would be able to exact a more unrestricted amount of rent, the position of the mortgagor would be safeguarded by the

imposition of a time limit, upon the expiry of which the mortgage would automatically be redeemed. The Lieutenant-Governor would be glad if the Financial Commissioner when he has considered these questions would report his conclusions in a separate reference.

5. It appears that the examination of statistics made in paragraph 4 of last year's review was stultified by the existence of a printer's error. This year, comparison with the figures of previous reports is rendered difficult by the exclusion of all transactions prior to the 8th June 1901 in all the statements except No. II and columns 20 and 21 of Statement No. I. It appears, however, from the figures in these columns that there has been a fall in the total area under mortgage, though the fall is quite a small one. A thousand fewer exchanges and gifts were registered than in the previous year, representing a lakh of acres, of which 82,000 were accounted for by the cessation of 'killabandi' operations in Montgomery. As above remarked, no conclusions can be drawn from the decrease in usufructuary mortgages and sales on last year's figures, but the large increase in the number of redemptions is satisfactory, even though, no doubt, redemptions followed by remortgages are numerous. The average amount of mortgage money discharged, which shews a slight rise, is still much lower than the amount for which land appears to be mortgaged and the explanation is not far to seek. At the same time while the area of property sold has continued to decrease, the average price has increased and the anticipations that the Act would depreciate land shew no signs of being fulfilled.

6. Business under the Act remained practically stationary, but there was a great rise in institutions in Jullundur, Ludhiana, Gujrat, Rawalpindi and Muzaffargarh. The pending files in Sialkot and Rawalpindi seem heavy.

7. The Lieutenant-Governor has read with much interest Sir Lewis Tupper's observations on the effect of the Act upon trade and credit. The contraction of extravagant expenditure on the part of zamindars, besides being a wholesome feature of the results of the Act, has no doubt set free a considerable amount of capital, which might be devoted to developing Indian industries, and there are signs that the money-lending community are now beginning to turn to more profitable and legitimate spheres of commercial enterprise than the exploitation of the zamindar. If, as has been proposed, the duties of Government with regard to trade and commerce are now concentrated in one bureau and placed under the charge of the Director of Land Records more light will be thrown on this movement, and Government will continue to watch it with interest.

ORDER.—Ordered that the above remarks be printed and circulated with the Report, also that they be published in the *Punjab Government Gazette*, be communicated to the Financial Commissioner, Punjab, and forwarded to the Government of India, Revenue and Agricultural Department, with the usual number of spare copies of the Report.

By order of His Honour the Lieutenant-Governor,

E. D. MACLAGAN,

Offg. Chief Secretary to Government, Punjab.

Punjab Government Press, Lahore—11-4-06—1718—377—C. L.

No. 103.

FINANCIAL COMMISSIONER'S OFFICE :

Dated LAHORE, *the* 12*th February* 1906.

FROM

L. H. LESLIE-JONES, ESQUIRE,
Senior Secretary to Financial Commissioner, Punjab,

TO

E. D. MACLAGAN, ESQUIRE,
Chief Secretary to Government, Punjab.

SIR,

I AM directed to forward the Annual Report on the working of the Alienation of Land Act during the year ending 30th September 1905.

I have the honour to be,
SIR,
Your most obedient servant,

L. H. LESLIE-JONES,
Senior Secretary to Financial Commissioner, Punjab.

(Maximum limit of the Report 15 Pages).

ANNUAL REPORT

OF THE

WORKING OF THE PUNJAB ALIENATION

OF

LAND ACT XIII OF 1905.

FOR THE YEAR ENDING 30th SEPTEMBER 1905.

PART I.—The Working of the Act.

SECTION I.—PRELIMINARY.

IN this report, unless the contrary appears from the context, the word "zamindar" will be used as the equivalent of "member of an agricultural tribe" and the word "agriculturist" will be used only in the technical sense given to it by the Act.

Working of the definitions.

2. Many of the District Reports refer to the desirability of abolishing the statutory agriculturist, and in some cases it appears either that the definition is not yet fully understood by the people, or that there is a difficulty in its application. In view, however, of a proposed amendment of the Act, which will, if passed, abolish the 'agriculturist,' it does not appear to the Financial Commissioner necessary to discuss questions relating to this matter which have been mentioned in the District Reports.

Occupancy rights.

3. In a judgment, to which reference was made in paragraph 4 of last year's Report, the Chief Court held that the word "land" as defined in Section 2 (3) of the Act included occupancy rights in land. As the result of this decision a question was raised by the Settlement Officer of Rawalpindi as to whether the creation of occupancy rights was a lease or a permanent alienation. The Legal Remembrancer gave the opinion that a sale of occupancy rights amounts merely to a conveyance of leasehold rights for a consideration; and he would apparently have also held that the creation of such rights by a landlord in favour of a tenant is a lease and not a permanent alienation. The Hon'ble Judges, to whom the matter was referred, were unwilling to discuss in detail a matter which might come before them judicially, but the majority of them were not disposed to agree with the Legal Remembrancer's opinion, and they held that the creation of occupancy rights is a permanent alienation of "land" which must therefore be regulated by the provisions of Section 3 of the Act. In accordance with the view held by the Hon'ble Judges the Officiating Financial Commissioner, the Hon'ble Mr. Gordon Walker, issued a Circular Letter No. 6044, dated 16th October 1905, which is printed as Appendix No. 50 to this Report. Sir Lewis Tupper has since recommended that the view of the Hon'ble Judges should be covered expressly by an amendment of the Act. It is consistent with their decision that "land" as defined in the Act shall include a right of occupancy and it may prove useful should resort be had by zamindars for the purpose of evading the Act to the expedient of permanently alienating occupancy rights to banias in lieu of the whole proprietary right. Where no such evasion is intended and landlords merely give clearing tenants occupancy rights in a customary way the sanction necessitated by Section 3 (2) should, if the tenants are not members of agricultural tribes, be freely accorded. In the Rawalpindi Report and the Commissioner's remarks thereon a question is raised, whether the definition of "agriculturist" should be extended so as to include the *Mukarraridars* of the Rawalpindi (and it may be added) Attock districts in the class of occupancy tenants from whom agriculturists derive their status. The *Mukarraridar*, as the

Commissioner, Mr. Meredith, rightly notes, is not an occupancy tenant as he has superior rights, short of full proprietary right. It is in Sir Lewis Tupper's opinion unnecessary to extend the definition in this behalf; first because, as the Commissioner observes, the suggestion is for consideration only if the agriculturist is not abolished and, secondly, because the present definition includes hereditary tenants as well as occupancy tenants, and were the question to arise in a concrete case it would probably be held that *Mukarraridars* are hereditary though not occupancy tenants. But for the purpose of bringing land held in occupancy right or otherwise as a permanent tenancy under the definition of "land" of which it is necessary to restrict the permanent alienation it is no doubt advisable to consider the *Mukarraridar* status. The point will be taken up by the Financial Commissioner in connection with the other amendments of the Act which he has proposed.

Adhlapi transaction.

4. The Deputy Commissioner of Muzaffargarh is dealing quite rightly with adhlapi transactions, in which a man secures proprietary right in part of a holding, in reward for clearing the whole as permanent alienations. Such transactions are economically good, and when sanction is required and the transaction is a *bonâ fide* one there should be no hesitation in giving the necessary permission. The subject was fully discussed in paragraph 3 of the Report for the year ending 30th September 1901.

Alienation of occupancy rights to landlords.

5. A reference was made in paragraph 4 of last year's Report to an anomaly, which arose out of the Chief Court's decision that occupancy rights on land, namely that while a zamindar occupancy tenant holding under a bania landlord cannot alienate his rights to his landlord without the sanction of the Deputy Commissioner under the Act of 1900, his landlord can prevent him from selling his rights to any one else, *vide* Section 53 of the Tenancy Act. The Act is not, however, intended to prevent alienations by a tenant to his landlord, and accordingly in his Circular Letter No. 6043, dated 16th October 1905, which is printed as Appendix No. 49, the Officiating Financial Commissioner, the Hon'ble Mr. Gordon Walker, directed that sanction should always be given in such cases, when required under Section 3 (3) of the Act irrespective of the tribe or calling of the landlord.

Gifts for religious purposes.

6. Cases in which fictitious gifts for religious or charitable purposes have been made a cloak for attempted evasions of the law have been very rare. Most districts report that no such cases have come to light. The Deputy Commissioner of Rohtak, however, reports that some such spurious gifts are made and he thinks it would be an advantage if such transfers are included in the term, permanent alienation, and the exception made in Section 2 (4) of the Act abolished. The Commissioner thinks the suggestion is worthy of consideration, and the same view is apparently taken by the Commissioner of Lahore.

7. The subject of these gifts is also noticed in the Karnál, Gurgaon, Hoshiárpur, Jullundur, Ludhiána, Lahore, Gurdáspur and Siálkot Reports in connection either with attempted evasions of the Act or with mistakes in its application. It appears to be a usual practice for cases of this class to be submitted to Deputy Commissioners for orders and the Financial Commissioner thinks that this practice is sound and he will prescribe it by Circular. But he does not think that any amendment of the law is required in this behalf. If only the cases are brought to notice the attempts at evasion do not seem at all difficult to detect. The freedom from restriction of *bonâ fide* gifts for religious or charitable purposes is quite in accordance with popular sentiment, was allowed as a concession to the opponents of the Act, and, in Sir Lewis Tupper's opinion, does no harm and does not interfere with its policy. But it is necessary to see that the particular transaction is a gift and not a disguised sale, and that the purpose is really a religious or charitable one. This the Deputy Commissioner should do on perusal of the case when submitted to him. He has full power to hold that the transaction is not a gift or not made for a prescribed purpose; and if he so holds, he should treat it like any other transaction to which the Act applies. Thus in the Sialkot District certain gifts to village menials were rightly excluded from the freedom allowed by the definition because they were not made for a charitable or religious purpose. Similarly in the Jullundur District gifts to *Mirasis* or

Nais on the birth or betrothal of a son were treated as remuneration for services. Cases which have occurred elsewhere and in which consideration really passed but was concealed require no comment. The Commissioner of Lahore remarks that only a Civil Court can finally decide whether a gift is *bonâ fide* for a religious or charitable purpose. No doubt the Civil Court would be competent to entertain the question if it came before it; but as a consequence of Section 21 (1) of the Act it would have no jurisdiction to interfere with the order of a Deputy Commissioner under the Alienation of Land Act deciding, for the purposes of that Act, that any particular transaction was or was not a *bonâ fide* gift for one of the prescribed purposes. For all practical purposes connected with the working of the Act the Financial Commissioner thinks this is quite sufficient.

Definition of 'ancestor.'

8. During the year under report the Financial Commissioner had occasion to rule that the term 'ancestor' in Section 2 (1) of the Act should be construed to include uncles and grand-uncles. The point will have no importance once the statutory agriculturist is abolished.

9. A curious passage occurs in the Kángra Report. The Deputy Commissioner writes:—"In Kulu a non-agriculturist outcasted frequently becomes a member of an agricultural tribe. This is particularly noticeable when the man has been outcasted for marrying a woman of a tribe reputed lower than his own." Sir Lewis Tupper does not understand this and the Deputy Commissioner should report what is meant. The explanation may be interesting, as it is known that the social barriers between tribes are not so rigid in Kulu as in most parts of the country.

Notifications.

10. No agricultural tribes have been notified in the new Lyallpur District, but the question is under the consideration of the Settlement Commissioner. Apparently, however, there have been no undesirable alienations by colonists whose conditions allow them to alienate. The great majority of them are debarred from alienations by Act III of 1893.

A draft Notification of the agricultural tribes in the Attock District, which is merely an extract from the existing notifications regarding Rawalpindi and Jhelum, has been submitted to Government.

Section II.—Permanent Transfers.

Working of instructions.

11. It is a satisfactory feature of the present reports that they contain little under this head that requires comment. The instructions conveyed in paragraph 11 of the Financial Commissioner's Circular letter No. 3441, dated 5th June 1901, continue to work well. The Commissioner of Delhi is, however, apparently inclined to take exception to the injunction that sanction may be given to alienation of land in cases where indebted zamindars owning mortgaged land desire to sell a part of it in order to raise money to redeem the whole or part of the rest. A case which came before him in a district which is not named involved the transfer of a considerable area from an agricultural family, and he thinks that the indiscriminate application of the instructions is to be guarded against. In this the Financial Commissioner agrees, but he does not think that amplified instructions are necessary. The object in view will be sufficiently attained if it is borne in mind that even in such cases the transfer must be one which is really advantageous to the vendor, and that the sale to a member of a non-agricultural family should only be sanctioned when no member of an agricultural tribe is ready to offer a fair value for the land. From a remark made by the Commissioner of Lahore it appears that the necessity of obtaining the Commissioner's sanction to a sale in favour of a money-lender has not always been remembered in the Lahore District.

Irregular registration.

12. The Commissioner of Delhi notices a case reported from the Ambala District, in which a Sub-Registrar apparently registered a deed of sale executed by a Jat in favour of a Khatri, though he brought the matter to the notice of the Deputy Commissioner. The Commissioner rightly remarks that in registering such a deed the Sub-Registrar infringed the provisions of rule I (*a*) published with Punjab Government Notification No. 44, dated 8th November 1901, which were explained by the Inspector-General of Registration in his Circular No. 9 of 15th November 1901. The document should have been returned unendorsed with instructions that a copy of the

Deputy Commissioner's order of sanction was required. The Sub-Registrar's mistake was apparently not realised by the Deputy Commissioner. The Commissioner should now point out to them the proper course of action.

Eligible purchasers.

13. The inquiries for eligible purchasers appear to be generally sufficient. The only comment the Financial Commissioner has to make is that more use might probably be made of the zaildar agency. The Siálkot Report is the only one in which it is mentioned that zaildars are used at all for this purpose. The Deputy Commissioner of Gujrát remarks that it is very seldom that a zamindar of the village or of the tribe to which the vendor belongs comes forward with a reasonable price. If zamindars are not willing to pay for land prices as high as may be offered by banias one reason probably is that suggested by the Deputy Commissioner of Shahpur, who makes a similar remark, namely, the fear that the land is subject to some lien, and that even if possession can be obtained the title will not be good. Another reason may often be that the price which the purchaser is prepared to pay represents a debt due to him with accumulated interest and much exceeds the true market value.

Applications from Native States.

14. But few applications have been made for leave to alienate land permanently to subjects of Native States or to residents of provinces adjoining Punjab districts. In a case which occurred in the Hissar District, where the alienee was a resident of Patiala, sanction was refused, but the reason is not stated. In the Ludhiana Report it is remarked that a few unauthorised mutations relating to cases of this description were sanctioned by Tahsildars but cancelled by the Collector. In Ferozepore an application for leave to sell land to a resident of the Faridkot State was dismissed in default.

Investigations by Revenue Officers.

15. The Financial Commissioner has examined further the suggestion made by the Deputy Commissioner of Dera Gházi Khan, to which reference was made in paragraph 7 of last year's Report. After taking the opinions of Revenue Officers he considered it desirable to empower an investigating Revenue Officer to make a full report to the Deputy Commissioner, both as to the circumstances of permanent alienations which have been made in contravention of the provisions of the Act, and as to the wishes of the parties in the event of the Deputy Commissioner's sanction being refused. The necessary instructions have been embodied in a Circular letter No. 181, dated 10th January 1906 (printed as Appendix No. 51 to this Report) in amendment of paragraph 2 of Financial Commissioner's Circular No. 4, dated 9th September 1903. It was not considered necessary to amend the rules published in Punjab Government Notification No. 23 S., dated 22nd May 1901. No other suggestion for their amendment has been made, and the rules appear to be working quite satisfactorily.

Section III.—Temporary Alienations of Land.

Mortgages under Section 6 (1) (c).

16. The present Deputy Commissioner of Hissar is in favour of the proposal made by his predecessor, to which reference was made in paragraph 9 of last year's Report, that a form of mortgage should be authorized whereby the mortgagor might be permitted to occupy the land as tenant of the mortgagee paying him a rent in kind. The form of mortgage allowed by Section 6 (1) (*c*) is apparently being tried, as the Deputy Commissioner remarks that mortgagees will not often agree to it. The mortgagee is, however, generally willing to allow a mortgagor under Section 6 (1) (*a*) to cultivate the land himself on payment of a rent in kind. The Commissioner of Delhi is in favour of authorizing a new form of mortgage, which would admit of the payment of a rent in kind but would otherwise follow the conditions prescribed by Section 6 (1) (*c*). The Financial Commissioner discussed this subject in paragraphs 8 and 9 of the last Annual Report and said in paragraph 33 of the same Report that possibly another form of mortgage should be allowed to zamindars. He does not quite agree with Mr. Gordon Walker that we should proceed on the basis of revising form (*c*), because that form prescribes no term for the automatic redemption of the mortgage; and if the mortgagor is to remain on the land as its permanent tenant he should not have a less favourable status than form (*c*) provides. But Sir Lewis Tupper would himself be even now prepared to hold that where there is a usufructuary

mortgage in form (*c*), and the mortgagee therefore obtains possession of the land and is entitled "to receive the rents and profits of the land in lieu of interest and towards payment of principal" it is quite open to him to let the land, if he so desires to his mortgagor on such terms as may be agreed upon. This could be done by a lease separate from but framed in continuation of the mortgage-deed : and the Financial Commissioner sees no reason why the Deputy Commissioner should not advise the parties accordingly when bringing mortgages into accordance with the Act under Section 9 (1). If, however, this is all legal and expedient it would simplify procedure and save the parties trouble and expense if the lease to the mortgagor were included in the mortgage-deed, which could be done only if the Local Government declared the condition admissible under Section 8 (1) (*c*). It will be observed that this proposal leaves form (*a*) as it is and detracts in no way from the favourable position of the mortgagor under that form, the mortgage still being automatically redeemed in twenty years at the most. It gives the mortgagor the additional advantage of remaining in possession as a tenant. Whether the lease to him by the mortgagee should be for the term of the mortgage or merely from year to year, giving him the status of a tenant-at-will, is a point for consideration if the proposal is elaborated in detail. If the Lieutenant-Governor is disposed to share the Financial Commissioner's views on this subject the Legal Remembrancer will be consulted and the advice of some selected officers asked and the result reported to Government. There is no question here of amending the law, as any action that may be found necessary could be taken either under Section 6 (1) (*d*) or under Section 8 (1) (*c*) or under both utilised simultaneously.

17. The Deputy Commissioner of Shahpur states that mortgagees who accept mortgages under Section 6 (1) (*a*) often try to reserve their right to compensation for improvements, a condition which the Deputy Commissioner considers undesirable. A condition of this nature is not, however, covered by the Act, and under Section 8 (2) of the Act would be null and void. Where it is inserted the Deputy Commissioner can strike it out under Section 9 (1).

Working of rules.

18. The rules published under Punjab Government Notification No. 23 S., dated 22nd May 1901, are apparently working well in the case of temporary alienations.

Evasions.

19. A remark was made in paragraph 10 of the last Report that in cases where the Revenue Officer refuses a temporary alienation, but his order is disregarded and the alienee remains in possession, these facts should in some way be brought on the record. The Lieutenant-Governor also desired that some means of obtaining a record of the area so transferred might be devised. The question was accordingly examined, but the Officiating Financial Commissioner concurred with the Settlement Commissioner and Director of Land Records in thinking that such transactions should be entirely ignored so far as the revenue papers are concerned, as any recognition in our records would be thought to be an encouragement to leave things as they stand. This view has recently been accepted by Government who remarked that the endeavour to obtain exact statistics of the areas transferred by mortgages of the above description should be dropped as likely to lend an air of validity to the transactions. The view was, however, also expressed that the subject is one which should receive the close attention of District Officers and their assistants who may be able in the course of their inspections to gain an idea of the extent to which irregular mortgages prevail, and it was asked that the point might always be examined in the Annual Reports. These orders were received after the present District Reports had been prepared, but the necessary instructions for the future guidance of District Officers will now be issued.

20. The only Deputy Commissioners who mention that the provisions of Section 11 are being utilised or are likely to be utilised in attempted evasions of the Act are those of Ferozepore, Gurdaspur, Lahore and Multan. Thus in Lahore it is stated that leases are given for twenty years in payment of outstanding debts on the understanding that "the lessor shall remain liable both for the land revenue and for compensation for improvements made by the lessee; the intention of the lessee being to force the lessor to grant a new lease on the expiry of the term." Whether this understanding is entered in the lease is not stated, but in any case the lessee would have no lien on the land on the expiry of the first term, and if the lessor refused to renew the lease, the lessee's only remedy would be a civil action for the money.

21. The Multan cases are analogous to those reported last year from Dera Gházi Khan, the main feature of them being the inadequacy of the consideration for the leases which cloak disguised mortgages. In a case reported from Muzaffargarh a money-lender is in possession of land of his debtor, the consideration being his willingness to forego a suit on a simple bond during such time as he remains in possession. He can, however, at any time be ejected by the owner whose remedy lies in his own hands. The Deputy Commissioner of Ludhiána mentions that cases have occurred where leases for twenty years have been granted of land required for building purposes on which factory sites have been built. In such cases he would have sanctioned applications for permanent alienations had they been made. He thinks, however, that in such cases leases for ninety-nine years might be allowed. If as seems certain, the lessees wish to retain the land permanently, they should induce the lessor to apply for permanent alienation. At present their position is most insecure. But the proposal to extend the term of lease admissible does not commend itself to the Financial Commissioner. It would open wide the door to possible evasions in cases where the purpose of the parties was other than that given, and it would be inconsistent with one of the principles of the Act which everywhere treats an alienation for more than twenty years as a permanent alienation.

22. Practically therefore there is nothing new to record on this subject. In this connection, I am to quote paragraph 11 of the Financial Commissioner's letter No. 943, dated 21st December 1905, regarding the amendment of the Act. When that paragraph was written Sir Lewis Tupper had not read the present reports, but there is nothing in them which would induce him to alter the view then recorded as follows:—

"A list of evasions is given in paragraph 11 of the Land Alienation Report for 1904. Mr. Gordon Walker called for and examined the cases which had occurred in various districts as was proposed in that paragraph. He came to the conclusion that none of them could be made the basis of any legislation, and they were returned to Commissioners. In evasions where there is simply fraud and the alleged mortgagee is a man of straw while the real mortgagee in the background finds the money, we must, Sir Lewis Tupper thinks, leave the Courts to deal with the matter. So also where bonds are given in contravention of the Act, as, for instance, to repay the whole of the principal on the expiry of the term of the mortgage, to execute a fresh mortgage after the expiry of the twenty years allowed by the Act, or to secure a concealed mortgagee against fraud upon him by his fraudulent representative, we must assume either that the Courts will disallow the transaction, or that if a Subordinate Court fails in this respect, the power now proposed to be conferred on the Deputy Commissioner to apply to the Appellate Court for revision will, in the great majority of cases, ensure that the provisions of the Act shall be upheld. One very mischievous form of evasion that has come to notice is that the parties file a collusive suit and then offer a compromise, including a permanent transfer from a *zamindar* to a *bania*, in contravention of the Act. The Court confirms the compromise and the transfer, though opposed to law, has the support of a decree. This case too, it is anticipated, could be met by the Deputy Commissioner's power to apply for revision; it could, and probably would, be brought to his notice through the mutation procedure. Evasions which consist of attempts to unduly prolong the term of any mortgage, lease or farm should be checked by the application of Section 12 (2). Thus after careful consideration Sir Lewis Tupper has at present no suggestions to make, for the amendment of the law with a view to prevent evasion beyond the very important recommendation contained in proposed new Section 21-A."

23. The proposed new Section 21-A follows Section 27 of the Punjab Pre-emption Act, and enables the Deputy Commissioner to apply to an Appellate Civil Court for an order revising the decree or order of a Subordinate Civil Court which appears to him to be contrary to the provisions of the Act. Reference to this point was first made in paragraph 10 of last year's Report.

IV.—General Provisions.

The position of mortgagees

24. Cases falling under Section 9 (2) are still common in the Hissar District, but they must of course eventually disappear. The Commissioner of Lahore is of the opinion that this section

is defective in two respects. The first is that it does not admit of the substitution of a mortgage under Section 6 (1) (*c*). The reason why a mortgage in this form was not included was consideration for the interests of the mortgagee, as the terms of such a mortgage are not so favourable to him as those under Section 6 (1) (*a*). The Financial Commissioner sees no reason to reconsider this point. The second defect is that the section confers no power on the Deputy Commissioner similar to that given by 9 (1) to alter the mortgage of his own motion in cases where the mortgagee is willing to accept a new mortgage, but the mortgagor is unwilling to execute it. All the 26 cases taken up by the Deputy Commissioner of Gujranwala this year ended without the execution of a new mortgage, entirely owing to the action of the mortgagors, who, the Deputy Commissioner thinks, preferred to leave the matter open to the uncertainty of the Civil Courts. This unwillingness of the mortgagor to execute a new mortgage has been noticed before, and it has been dealt with in paragraph 7 of the Financial Commissioner's letter No. 943, dated 21st December 1905, an extract from which is quoted below :—

"*Section* 9.—The amendment here provides for a case which has not been infrequent in practice. The mortgagee who is put to his election asks for a fresh mortgage and the mortgagor refuses to execute one. What then is to be done ?. The proceedings are brought to a deadlock. Sir Lewis Tupper thinks that if the mortgagor will not accept the help we offer him, he must be left to his fate, and that when he has had his chance of help and has refused it, we must allow the mortgage to be foreclosed against him precisely as if Section 9 (2) did not exist. The matter is not very important because in any case the provision is transitory. The case only arises where there is a condition intended to operate by way of conditional sale in a mortgage of land made before the commencement of the Act. In any mortgage of land made after such commencement such a condition is null and void under Section 10. Old mortagages will, however, continue to be dealt with for a good many years to come and the amendment is considered advisable."

The Act and Registration.

25. Delay in registration is seldom caused by the necessity of obtaining the sanction of the Deputy Commissioner. As was remarked last year, sanction is usually obtained before deeds are executed. Nominal fines were inflicted in a few cases in Gujrat (the number is not stated) and in four in Mianwali. The Deputy Commissioner of Shahpur remarks that Sub-Registrars have registered mortgages purporting to be in the form prescribed by Section 6 (1) (*a*) which contain conditions not admissible under that section or under Section 8 (1). It is not stated whether mutation was refused, but presumably this was so. It is unnecessary to discuss registration in its relation to the statutory agriculturist

Local extent.

26. The question of the extension of the provisions of the Act to agricultural land in municipal limits has not yet been reported upon by the Financial Commissioner. From the Lahore Report it appears that about one-third of the area sold in the district in the past year was sold within municipal limits. It was also about double the area so sold in the previous year. The Financial Commissioner agrees with the Deputy Commissioner that this state of things should be checked at an early date.

Extra work caused by Act.

27. There is still a good deal of work entailed by dealing with the conditional sale clause in Hissar and Rohtak, but it is of course transitory. The scrutiny of mutations enjoined by the Financial Commissioner's Circular No. 3, dated 10th August 1903 (*vide* page xx of the Appendix to the Report for 1902-03) is still causing extra work, particularly in Muzaffargarh and Hoshiarpur. The Commissioner remarks of the latter district that the scrutiny does not bring many serious errors to light. Reference has already been made in a preceding paragraph 7 to the necessity of scrutinizing the papers connected with gifts; but the extra work due to the Act is evidently no great burden to District Officers or to their subordinate staff. Most of the former remark that it is insignificant or slight, and it is counterbalanced by the decrease of ordinary mutation work and of suits for rent and ejectment or otherwise connected with the possession of land. In some districts inquiries relating to the status of persons claiming to be agriculturists have involved a certain expenditure of time, but this effect of the Act will cease when the agriculturist is abolished. Applications for sales for the purposes of building sites seem likely to increase, but they will be numerous rather than troublesome.

28. The Financial Commissioner is about to issue Handbooks in vernacular containing a translation of the Act and principal Circulars for the use of the field establishment, and as they become better acquainted with the provisions of the Act the trouble caused by their mistakes should diminish.

Issue of Handbooks.

Section V.—General Remarks.

29. The District Reports show that the popularity of the Act with zamindars and agriculturists is undiminished. Money-lenders still complain and several Deputy Commissioners note that pleaders have suffered a loss of business. The Deputy Commissioner of Hissar reports an increasing tendency on the part of the bania to accept mortgages in forms permitted by the Act, while the Deputy Commissioner of Hoshiarpur thinks this tendency is confined to mortgages in satisfaction of old debts.

Reception of the Act.

30. There is now further evidence of the statement made last year that capital is being drawn into wealthier channels of enterprise, such as cotton factories and wholesale trade. Remarks to this effect are made by the Deputy Commissioners of Hissar, Ferozepore, Rohtak, Jullundur, Sialkot and Gujranwala. This commercial employment of capital is a very important consequence of the Act and accords with present economic tendencies in the Province. The spread of irrigation has been great. Agricultural development is being fostered. Railways are being multiplied. What we must now endeavour to promote is the growth of manufacturing industries; and the diversion of part of the bania's capital from the mischievous exploitation of the zamindar to beneficial investment in manufacture and wholesale trade should be of considerable value in that enterprise. The Financial Commissioner does not doubt that there will always be in the villages banias enough with enough capital to finance the zamindars to the extent of their legitimate needs as peasants. The surplus fund which the banias as a class can now spare for investment in commerce is the amount formerly frittered away in unproductive expenditure on marriage ceremonies and the like under conditions which brought about the ruin of the zamindar by means of his own extravagance.

Effect on trade.

31. There is indeed plenty of evidence that the Act has induced a contraction of extravagant expenditure, and little doubt also that this result of the Act is viewed with no disfavour by the zamindar. On the other hand the money-lender would apparently be quite ready to take advantage of any distress on the part of the zamindar to force high rates of interest upon him. Thus, in Montgomery and Attock, where zamindars have required advances for seed, money-lenders refused to lend money at reasonable rates until confronted with the competition of takavi advances. At the same time, as just implied, the scope for capital in industrial development is not great enough to allow the bania to refuse entirely financial assistance to the zamindars. The Deputy Commissioner of Hoshiarpur says that the bania's advances are now made with care and discrimination, and with reference to the circumstances and position of the client, not as formerly as a device for entrapping the zamindar in the meshes of a complicated debt account with a view to forcing ultimately an alienation of land. Some other interesting remarks of Mr. Fagan's on this subject are subjoined.

Effect on credit.

"They (*i.e.*, money-lenders) are, I think, gradually coming to recognize that (*i.e.*, the Act) has inaugurated in rural economies a new and more healthy era to which their business must conform. The village sahukar has now to exercise discrimination in selecting his clients and in fixing the amount of advances. He can no longer lend with apparent recklessness confident that his advances will be more than repaid in land. At the same time there is, I am confident, much capital in the hands of village bankers which has been drawn in in consequence of the effects of the Act and awaits utilization. A genuine movement for the promotion of native industries which could attract it would be most beneficial. I do not know that there is much which can be done for the money-lenders by State action beyond facilitating and accelerating, as far as possible, the realization of just claims."

On this the Commissioner, Mr. H. A. Anderson, remarks :—

"This movement is at present attracting attention in Hoshiárpur; but the leaders do not command confidence and the general opinion is that it will not retain permanent interest. Capitalists, however, are looking out for new channels for investment and capital is available for the promotion of native industries."

Evasions of the Act.

32. Evasions of the Act are, of course, still attempted. Some of these, such as verbal mortgages falsely alleged to have been made before the Act came into force, can always be checked by careful scrutiny. Benami transactions made through the medium of agriculturists will be stopped by the amendment of the Act if carried, and the same remark applies to the confession in Civil Courts of decrees contravening the Act. In the meanwhile on some cases reported from the Rohtak District the Financial Commissioner has inquired whether the Hon'ble Judges are of the opinion that any general instructions should be issued by them to Civil Courts to prevent compromises in contravention of the Act being supported by decrees.

The extension of the application of the Act to occupancy rights has undoubtedly shut the door to a possible means of evasion, and the case of charitable gifts has been discussed in a preceding paragraph. Cases have occurred of attempts to include illegal conditions in mortgages, but they can always be checked by vigilance. The Deputy Commissioner of Attock reports that menials who have acquired money are attempting to get themselves recorded as members of agricultural tribes with a view to acquiring land, and he suggests that every mutation by which it is proposed to change tribe designation from a non-agricultural tribe to an agricultural tribe should be reported for orders to an Assistant Collector of the 1st grade. This particular form of evasion can, of course, only be attempted by persons who are already recorded in the revenue papers as having rights in land, but there are many such who might use it to defeat the Act, and the Financial Commissioner will consider whether any orders on the subject are necessary. In this connection it may be remarked that the wholesale acceptance by the Deputy Commissioner of Jullundur of the Sheikh Ansaris in two bastis of Jullundur City as Pathans and consequently as members of an agricultural tribe on what appears to be an inconclusive statement made by the Census Superintendent with regard to their descent, appears to the Financial Commissioner to be a much more serious matter. It was not separately reported to the Commissioner, and has only come to light through the present Report, but further inquiries will be made.

Takkavi and rents.

33. Applications for takkavi for seed have perhaps been increased by the Act, but the issue of takkavi has, as has already been remarked, had a tendency to restore matters to an equilibrium. The new method of distributing takkavi locally is, however, likely to have a much more marked effect on the number of applications There has been no fall in rents consequent on the Act. Where rents have fallen, other causes, such as plague and emigration to colonies, are apparently responsible.

Concluding Remarks.

34. The District Reports are forwarded in manuscript for reference if required.

The following new instructions have been issued during and since the year under report. They are numbered from 47, the number of the last appendix to the report for 1903-04 being 46.

Appendix No. 47.—Punjab Government Notification No. 68, dated 4th April 1905, making an addition to Rule II (2) of the Rules published in Punjab Government Notification No. 23 S., dated 22nd May 1901.

Appendix No. 48.—Directs the exclusion of all figures relating to transactions which took place prior to 8th June 1901, from certain statements for the year ending 15th June 1905, attached to the Alienation Report for 30th September 1905.

Appendix No. 49.—Directs that when an occupancy tenant proposes to alienate his land to his landlord and sanction is required under Section 3 (2) of the Act sanction should always be given as a matter of course, irrespective of the tribe or calling of the landlord.

Appendix No. 50.—Directs that as the creation ofoccupancy rights by a landlord is a permanent alienation it should be dealt with in accordance with the provisions of Section 3 of the Act.

Appendix No. 51.—Amends paragraph 2 of Financial Commissioner's Circular No. 4 of 9th September 1903.

Appendix No. 52.—Contains instructions regarding cases where the parties to a temporary alienation which contravenes the Act ignore the order of the Revenue Officer refusing the mutation.

Concluding remarks.

35. No summary of this Report appears necessary this year. The leading features of the situation have been set forth in the last few paragraphs; and Sir Lewis Tupper has fully explained in a separate communication from which some quotations have been made the points on which some amendment of the Act seems to him to be required.

PART II.—Analysis of Statements.

Statement No. I.

Revision of statements.

36. In paragraph 4 of the Review on last year's Report it was remarked that the conclusions to be drawn from the statements appended to the report were somewhat vitiated by the inclusion in them of figures for the period preceding 1901, owing to transactions belonging to that period having been brought on record during the year. The Financial Commissioner was accordingly asked to consider whether in one or other of the statements the areas transferred prior to the 8th June 1901, though not shown as transferred till the year under report, could be shown separately from the other areas recorded as transferred in that year. On examining the question the Financial Commissioner found that it would be necessary to duplicate all statements except Statement No. II; and after consulting the Director of Land Records, who reported that if any change was to be made it was necessary that orders should issue immediately, Mr. Gordon Walker, following a suggestion which had been made by Sir Lewis Tupper, directed that in compiling the present returns all transactions prior to 8th June 1901 should be excluded from all statements except Statement No. II and columns 20 and 21 of Statement No. I. This has accordingly been done, and it is in the Financial Commissioner's opinion the most direct method of securing the desired object. From next year it will be possible to compare the returns with those for the year under report without any disturbing element. The figures for the present Report cannot of course be compared exactly with those of 1903-04, but this could not have been done, even if they had been compiled on the old system, by which both would have been inherently vitiated.

Gifts and exchanges.

37. The number of gifts and exchanges shows a small decrease from 22,901 to 21,888, but the area transferred has fallen from 212,281 acres to 111,308 acres. This decrease is mainly due to cessation of exchanges consequent on killabandi in the Montgomery District. An increase of exchanges in Gujránwála is, on the other hand, due to killabandi operations. No districts now show very large figures under this head and they do not require further comment.

Mortgages.

38. The number of mortgages including transfers by order of a Court has fallen from 87,238 to 80,380 and the total and cultivated area from 261,972 and 206,724 to 237,026 and 194,738 acres. The average area affected by such transactions which rose last year has slightly fallen in the year under report, but the proportion of the cultivated to the total area has risen. Gurgaon, Kángra and Ferozepore now show increases of 2,340, 1,838 and 6,676 acres, respectively. The principal decreases in the area transferred have been in acres in Karnál 4,765, Hoshiárpur 12,228, Jullundur 1,512, Ludhiána 1,097, Lahore 2,112, Gurdáspur 1,903, Gujránwála 1,280, Shahpur 1,912, Jhang 5,306, Muzaffargarh 2,062, and Dera Gházi Khan 2,684. The variations in other districts are less than 1,000 acres. The largest increase is that of Ferozepore. Here the Deputy Commissioner remarks that "temporary alienations for periods under twenty years are now frequently made." A number of cases have also occurred in which the conditional sale clause has been struck out and the mortgagees have obtained decrees for possession, mutation following during the year under report. It

seems doubtful whether these transactions should have been included in the returns. In Gurgaon the increase is due to the transfer by the order of a Court of $\frac{3}{8}$ths of one village. The Kángra figures are vitiated by the fact that no mutations were written up during the last $4\frac{1}{2}$ months of the preceding year. The present figures therefore represent returns for $16\frac{1}{2}$ months. As compared with the figures for 1903, there has been a decrease in mortgages in Kángra.

The most considerable decrease is in Hoshiárpur. It is not explained in the Deputy Commissioner's Report, but is most probably due to the omission of mortgages affected before the commencement of the Act. The fall in Jhang is attributed by the Deputy Commissioner to the formation of the Lyallpur District where, however, there has only been one transaction concerning 225 acres, and to the depreciation of the value of land caused by the Act. It may more properly be attributed to the prosperity already induced by the Chenáb Canal and that anticipated from the Jhelum Canal. The revision of records in Karnál led to an increase of 4,343 acres last year, and the present decrease of 4,765 acres brings the figures to very much what they were in 1902-03.

In Rohtak it is stated that mortgages to banias have practically ceased; but in Hissar, where there is a slight increase, the Deputy Commissioner thinks that the aversion of the bania from mortgages on land is gradually disappearing. These statements may appear somewhat contradictory, but probably what has happened is that the initial effect of the Act in checking mortgages to banias has begun to wear away more quickly in the Hissar than in the Rohtak District. In the Gujrát Report it is observed that the bulk of the mortgage transactions have been between zamindars. In most cases no doubt the small decreases recorded are partly due to the exclusion of old transactions.

Amount of mortgage money.

The amount of the mortgage money has fallen from Rs. 1,43,67,573 to Rs. 1,33,09,102 and the average per cultivated area from Rs. 69 to Rs. 68. The total decrease is perhaps ascribable to the exclusion of figures prior to 1901. The variation in the average is very slight. In Hissar it is said to be due to the action of the Deputy Commissioner, who in determining the conditions of mortgages under Section 6 (1) (*a*) always cuts down the bania's interest and frequently his principal; but the Commissioner considers this explanation very doubtful. In Ambala it is put down to the limitation to twenty years and the exclusion of the banias. What is meant is that the restrictions of the Act result in larger areas being mortgaged for less money.

Redemptions.

39. The redeemed area again largely exceeds that redeemed in the previous year, this time by 27,350 acres. The amount of mortgage money discharged has also risen from Rs. 91,26,882 to Rs. 1,03,57,475 with an average of Rs. 39 per acre against Rs. 38 in the last year. The districts which show the largest redeemed area compared with last year are Hissar (+5,007), Rohtak (+2,588), Kángra (+2,229), Ferozepore (+16,170), Montgomery (+2,890), Miánwéli (+5,725), and Multan (+5,670).

The most striking increase is that of Ferozepore, where the money value of the redemptions has increased from Rs. 5,58,279 to Rs. 13,14,533. The Deputy Commissioner only remarks that sahukar mortgagees are making unsuccessful attempts to evade redemptions. In this district the increase of the redeemed area far exceeds the increase of mortgaged area. The increase in Rohtak is attributed to better agricultural conditions. In Montgomery, where the area redeemed is more than four times the area mortgaged, and even exceeds the areas sold and mortgaged combined, this very satisfactory result is put down to the prosperity due to the "Kitchin Bund." From Hoshiárpur it is reported that the money-lender occasionally tries to prevent redemptions by releasing without payment a small portion of the mortgaged area. Several Deputy Commissioners remark that redemptions with possession are followed by re-mortgages of a portion of the land, in some cases to fellow-tribesmen.

The only districts which do not show increases are Delhi, Karnál, Jullundur, Gurdáspur, Siálkot, Shahpur, Attock, Jhang, and Dera Gházi Khan. In some of these the decrease is quite trivial. In four only, *viz.*, Karnál, Shahpur, Attock, and Jhang, does the decrease exceed 2,000 acres. Both in Jhang and Karnál it is more than counterbalanced by a decrease in mortgages, while even

in Shahpur the area covered by redemptions is 45 per cent. in excess of that mortgaged during the year. In Attock also there has been a decline in mortgages. Following the large increase of redemptions reported last year, the Financial Commissioner thinks that this feature in the present Report, which shows results in accordance with the anticipations of the Report for 1903-04, is very satisfactory. We can hardly, however, expect such goodresults next year owing to the failure of the kharif crop of 1905.

Sales.

40. Sales and permanent transfers for value now represent a total and cultivated area of 226,878 and 136,707 acres, respectively, as against 249,352 and 148,192 acres last year, and the purchase money has decreased from Rs. 1,18,51,705 to Rs. 1,12,05,754. On the other hand the average price per acre of ownership rights has risen from 50·3 to 52·8 and the price per cultivated acre from 85·3 to 86·4. Moreover the totals of all transfers for value give an average price of Rs. 49·3 per acre compared with 47·5 last year.

The remarkable rise in Hoshiarpur, to which reference was made in paragraph 26 of last year's Report, has been maintained, the average sale price of land being now Rs. 143 against Rs. 141 and the Deputy Commissioner gives the same reason for it, *viz.*, the ability of zamindars to pay a better price for land as they are able to secure a better return for it. The Deputy Commissioner of Ferozepore makes some interesting remarks on this subject which are printed in the margin.

"There is no indication whatever that the price of land has suffered in consequence of the new Act; on the other hand, I have noticed in the course of my tours that the price of the land is slowly but steadily rising. The Jats and some other classes of the district are too strong to be handicapped by the withdrawal of the sahukars from the land market. In one Arain village, where land used to pass freely at about Rs. 50 per ghumao, the competition of the neighbouring Jat village has forced the price up to Rs. 200 or Rs. 300. There are more money-lenders and men of capital among agricultural tribes than among other classes."

Speaking generally the figures of sales and permanent transfers for value lend no support to the view that the Act would seriously depreciate the value of land and there seems to be little doubt that such value is steadily rising. A notable proof of this was given by the prices realised at the Chunian Colony sale. The rise is no doubt partly due to the extension of railways; and the figures, as some Deputy Commissioners remark, have been influenced also by the high prices paid for sites for commercial purposes.

Usufructuary mortgages.

41. The figure of usufructuary mortgages given in last year's Report was incorrect, owing to a printer's error in a proof statement. The correct figure was 3,668,587 acres, the present figure is 3,671,602. After allowing for a large error in the figures reported from Delhi in 1902-03 both figures approximate closely to those of that year. Accordingly no inference can be drawn from them, as was suggested in the Review of last year's Report, that mortgages have been more frequent since the passing of the Act. In the same Review a discrepancy was noticed between the results shown by the statistics of cultivated areas mortgaged and redeemed in Statement No. I and the apparent increase in the total cultivated area under usufructuary mortgage. This discrepancy was partly due to the cause above explained, but some discrepancy must always occur, because columns 7 and 12 of Statement No. I are filled up from Mutation Registers and column 20 from Quadrennial Returns. This year there is the additional disturbing element that column 20 includes and column 7 and 12 exclude figures of transaction prior to 8th June 1901.

Statement No. II.

Applications for permanent alienation.

42. The number of applications under Section 3 (2) for sanction to make a permanent alienation has risen from 967 to 1,337. Of these 740 were sanctioned compared with 481, a slightly larger proportion than last year. The District Reports again show that some of the applications were made under a misapprehension, and in some cases also sanction was accorded to applications which did not require sanction under the Act. As was remarked last year the reasons for granting the applications were usually good and similar to those then recorded. Jullundur again heads the list with 195 applications granted. Of these the majority related to exchanges; the remainder dealt with alienations to menials and on account of building sites. In Ludhiána, Gujrát and Jhelum, the three other districts which supply the next highest figures, the transfers were mainly for building sites.

Mortgage proceedings.

No remark is made in the Hissar Report with regard to the ninety proceedings under Section 6 (1) (*b*), and it is impossible to say whether these cases should really have been included in column 4 of the statement, *vide* the remarks made in paragraph 12 of last year's Report. Nor has any explanation of the Rawalpindi and Gujránwála figures 41 and 23 been given. The Deputy Commissioners concerned should report what these cases really were. Section 6 (1) (*b*) is applicable only where there is a mortgage without possession and the mortgagor has failed to pay principal and interest according to his contract.

The only cases of applications to fix the proportion of a mortgage debt under Section 7 (3), (*vide* column 6 of the statement), come from Hissar (1) and Rawalpindi (2). The Hissar case was filed, as the parties did not appear. The result of the Rawalpindi cases is not stated. Inquiry will be made. The report called for with regard to the case of a similar application in Gujránwála last year showed that no such case had occurred, the entry in column 6 of the district statement being due to an error.

Deposit of mortgage money.

The suggestion made in last year's Report that a Revenue Officer should be given power to place in possession a zamindar who deposits with a Revenue Officer the mortgage money, or the amount found to be due, has been included amongst certain proposed amendments of the Act on which the Financial Commissioner has called for the opinions of selected officers.

Work under Section 9 (2).

The bulk of the work under Section 9 (2) (column 8 of the statement) is again accounted for by Hissar and Rohtak. No explanation is given of the figures of either district, but they are doubtless explained by the great prevalence in that part of the Punjab of mortgages providing for conditional sale.

Miscellaneous proceedings.

43. The total number of miscellaneous proceedings (column 10 of statement) is only 812 as compared with 1,234 last year, when the figures were swollen by the check of mutations undertaken by the Deputy Commissioner of Muzaffargarh. The Muzaffargarh figure (173) of this year is due to the same cause. In Gujrát with one exception the figure 97 deals with applications for certificates by persons claiming to be statutory agriculturists. The Rawalpindi figures (193) are not explained, and the Deputy Commissioner should now explain them. In Ludhiana the cases dealt with were mainly applications for certificates, inspections of files relating to gifts (of which three were found to be spurious), and revisions of incorrect mutation orders by Revenue Officers, some of whom altered the terms of mortgages on their own motion without reference to the Deputy Commissioner. When the statutory agriculturist is abolished, the figures shown in the column will consequently be greatly reduced. The Deputy Commissioner of Siálkot thinks that a more elaborate form of Statement No. II is necessary, but he has made no suggestion for its amendment.

Questions of status.

44. The case of the Udasi Faqir of the Ludhiána District, to which reference was made in paragraph 26 of the last Report, was dealt with by the Officiating Financial Commissioner on the revision side. A Jat, who had become an Udasi Faqir, mortgaged his land to another Faqir. Mr Gordon Walker held that a Jat who has inherited land which would pass on to his natural heirs cannot by calling himself a Faqir escape the restriction imposed by the Alienation of Land Act. This case differed from that previosly reported from Lahore in that in the former case the Faqir was the alienee, not the alienor.

In the Ferozepore District three cases have occurred in which persons shown in the Revenue records as Beragi Sadhus applied for a change in their description as they were originally Jats. The applications were rejected. The cases will be called for and the Financial Commissioner will pass such orders on them as they may appear to him to require.

In a case referred by the Inspector-General of Registration the Financial Commissioner has had occasion to hold that a person who is by descent a member of an agricultural tribe does not change his status by adopting a profession usually followed by menials.

In the Jullundur and Ludhiána districts cases occurred in which sanction to permanent alienations was refused because the alienees were members of agricultural tribes in other districts and thus did not belong to the same groups as the alienors. Cases of this class should be dealt with in a liberal spirit. One object of the Act is to keep the land in the hands of agricultural tribesmen, and that object is not defeated if the alienee happens to live the other side of a geographical boundary. If he is an absolute stranger to the locality or himself a money-lender or land-grabber these may be good reasons for refusing sanction; but if he is a man to whom these objections do not apply and who has some connection with the district of the alienor, as for instance, if he belongs to a tribe owning lands, and especially, contiguous lands in both districts, sanction may be freely given.

Additional mortgages.

45. In the Amritsar, Gurdáspur and Siálkot Reports reference is made to applications for sanction to mortgages or additional mortgages or further charges upon mortgaged land. If these applications were made under the Act and were not merely applications for mutation of names it was a mistake to deal with them. Deputy Commissioners have no power under the Act either to sanction mortgages or to refuse sanction to mortgages as such. They can, of course, disallow mutations in the case of mortgages made in contravention of the Act; for the rest the remedy is to revise and alter the terms of the mortgage under Section 9 (1).

STATEMENTS NOS. III—VI.

Mortgages and sales.

46. As in other statements transactions which took place before the Act came into force have been excluded. Statements Nos. III and IV give the details of the trasanctions regarding mortgages and sales. Statement No. V gives the district totals and Statement No. VI shows the net gains and losses by the agricultural tribes. The net result for the province is that agricultural tribes have mortgaged 17,474 acres more than they took on mortgage, compared with a loss of 40,448 acres last year, while they have gained 1,040 acres on sales, compared with a previous loss of 11,674 acres.

Agriculturists have lost 9,771 in mortgages and gained 3,205 acres in sales. Non-agricultural tribes have gained 27,245 acres on mortgages at the expense of agricultural tribes (17,474 acres) and agriculturists (9,771 acres), but they have lost 4,245 acres by sales. Of this area the agricultural tribes have acquired 1,040 acres and agriculturists 3,205 acres. The loss on sales by members of non-agricultural tribes must be greater than is apparent from the figures, because areas taken up under the Land Acquisition Act are included in sales to others. Fresh sales in favour of banias have been practically stopped.

Mortgages of zamindars.

Last year Ferozepore was the only district in which zamindars acquired more land on mortgage than they had mortgaged. This year Ferozepore again heads the list with a gain of 1,891 acres, for which Hindu Jats, who counterbalance the losses of other tribes, are responsible. They gained 4,589 acres, of which 2,092 acres were from members of other agricultural tribes; but six other districts, *viz.*, Kángra 339, Montgomery 154, Lahore 822, Amritsar 68, and Gujránwála 67 also show gains. In Lahore, where the gain is most considerable, it is due mainly to Jats and in a lesser degree to Arains and Kambohs.

Throughout the province Jats have gained 171 acres. Their largest gain is in Ferozepore, where Musalman Jats lost 320 acres but Hindu Jats gained 4,589; their heaviest losses being in Hissar and Multan, though in Hissar they gained on sales.

Rajputs have gained small areas in Kángra, Montgomery and Mianwali, but their net loss is 13,381 acres, compared however with a loss of 23,058 acres last year. They have fared worst in Hissar, Gurgaon and Ambala, in each of which districts their loss exceeds 2,000 acres. Arains and Kambohs have again gained 1,109 and 546 acres, respectively.

Sales of zamindars.

47. Last year the net loss of Jats by sales amounted to 7,173 acres. This year their gain is 3,614 acres. They acquired over a thousand acres in Hissar, Karnál and Gujránwála, their rincipal losses being in Multan, Muzaffargarh and Dera Gházi Khan. In Ferozepore Hindu Jats gained 1,022 acres, while Musalman Jats lost 141. Rajputs have lost 2,342 acres as compared with 1,039 acres last year; but their losses are

nowhere very heavy, the principal one being the sale of 855 acres in Ferozepore. Arains and Kambohs have again gained to the extent of 1,064 and 374 acres, respectively.

Grouping.

48. The Deputy Commissioner of Ludhiána still thinks that Jats and Arains should be grouped separately as they are buying up the land of the Rajputs and Gujars, and the Deputy Commissioner of Ferozepore holds a similar opinion in regard to the Jat Sikhs of his district. But as the Commissioner remarks, the necessity for such changes is not borne out by the present figures. Thus in Ludhiána Jats have only gained 10 acres and Arains 14 acres on sales from both Rajputs and Gujars, while in Ferozepore the gain to Hindu Jats has been mainly at the expense of agriculturists and others. These Jats have in Ferozepore only gained 337 acres from members of other agricultural tribes, their gain from Rajputs being 88 acres. They have, however, gained 1,204 acres from Rajputs by mortgages and their progress requires watching, but it is not yet so striking as to demand action. The bulk of their transactions was inter-tribal, and this remark applies generally to all tribes in all districts. There is no evidence to show that larger tribes are absorbing smaller ones. There is, on the other hand, an apparent tendency for the thrifty and industrious to gain at the expense of the lazy and extravagant, but this is not a matter for regret. The Deputy Commissioner of Montgomery remarks that the Act is all in favour of the big zamindar, and no doubt the capitalist is always at an advantage if he is also thrifty, but this virtue on the part of large landowners cannot always be predicated.

Notifications of new tribes.

49. No new tribes have been notified during the year. A report upon a proposal to notify Labanas in certain districts is at present with Government. The opinions of Revenue Officers regarding the notification of Brahmans have been received and are now under the Financial Commissioner's consideration. Other applications for inclusion, which have been dealt with by the Financial Commissioner, are from Ramgarhias generally, Sheikhs and Sayads in Ferozepore, Pirzadas in the Delhi Division, Pathans and Turks in Jhang and Koreshis in Siálkot. Of these the Financial Commissioner has only determined to recommend the notification of the Koreshis in Siálkot and the Pathans and Turks in Jhang. He is also considering a recommendation by the Deputy Commissioner of Shahpur to notify a large number of sub-tribal names, as the people in that district are better known by such names than by the generic name of Jat or Rajput, &c. The object is to facilitate recognition of persons claiming to be members of agricultural tribes.

STATEMENTS NOS. VII AND VII (*a*).

Redemptions from mortgage.

50. The total area redeemed from mortgage amounts to 267,166 acres, of which 199,179 acres were redeemed by zamindars or 74·5 per cent. of the whole area redeemed. A comparison of the total mortgages by agricultural tribes as shown in the last column of Statement No. III, with their redemptions as given in Statement No. VII is made in Statement No. VII (*a*) and shows that zamindars in the province as a whole have gained by redemption 5,030 acres more than they have mortgaged, as compared with a loss of 30,811 acres last year. The exclusion of old figures no doubt contributes to this result, but the figures for this year taken by themselves are quite satisfactory. With the exception of Sialkot, Rawalpindi and Mianwali, all the districts of the Lahore, Rawalpindi and Multan Divisions show gains. The only other districts with gains are Karnal, Kángra and Jullundur.

In the great majority of cases the gain is due to the Jat tribe, but large redemptions have been made by Arains in Jullundur and Rajputs in Karnál, Jullundur and Gurdáspur. This tribe has also done well in some districts which have lost on the whole, as for instance in Hissar and Ambala. In Attock Awans have been the most successful.

The principal losses are in Hissar (—9,845) where it is attributed to recklessness following bad years, Gurgaon (—4,388), Rohták (—2,848) where similar conditions prevail, Siálkot (—3,370), Miánwáli (—2,583), Ferozepore (—2,333) and Hoshiárpur (—1,711); but with the exception of Hissár, where the difference is slight, every one of these districts shows a gain on the figures of last year. It is also satisfactory that the largest gains in the present year are in the Muhammadan districts of Montgomery, Multan and Dera Gházi Khan, the next best being Gujránwála.

APPENDIX.

TABLE OF CONTENTS.

AGRICULTURE.

The 4th April 1905.

No. 68.—*Notification.*—With reference to Punjab Government Notification No. 25, dated the 18th February 1905, and in exercise of the power conferred on him by Section 25 of the Punjab Alienation of Land Act (XIII of 1900) and Section 17 of the Punjab Land Revenue Act (XVII of 1887), the Hon'ble the Lieutenant-Governor is pleased to make the following addition to Rule II (2) of the Rules published in *Punjab Government Gazette* Notification No. 23-S., dated the 22nd May 1901 :—

ADDITION.

"Except in the case of a mortgage which purports to be in form (*a*) described in Section 6 (1) of the Act, where the only contravention of the Act is as to the term of the mortgage. In this case mutation should be allowed subject to the condition attached to the mortgage by law, namely, that its term shall be for twenty years."

[No. 48.]

Memo. No. 3850, dated 16th June 1905, from Senior Secretary to Financial Commissioner, Punjab, to all Commissioners and Deputy Commissioners in the Punjab.

I am directed by the Financial Commissioner to request that all figures relating to transactions which took place prior to 8th June 1901 may be excluded in preparing Statements Nos. I (except columns 20 and 21), III, IV, V, VI and VII for the year ending 15th June 1905, attached to the annual Report on the Alienation of Land Act for the year ending 30th September 1905.

[No. 49.]

Financial Commissioner's Circular letter No. 6043, dated Lahore, 16th October 1905, to all Revenue Officers in the Punjab.

Sub-head 441. File No. 116.

I am directed to refer you to the instructions conveyed in this office Circular letter No. 5555, dated 14th September 1904, and to say that when an occupancy tenant proposes to alienate his land, *i.e.*, his occupancy holding to his landlord, and sanction is required under Section 3 (2) of Act XIII of 1900, sanction should always be given as a matter of course, irrespective of the tribe or calling of the landlord.

[No. 50.]

Financial Commissioner's Circular letter No. 6044, dated Lahore, 16th October 1905, to all Revenue Officers in the Punjab.

Sub-head 441. File No. 116.

I am directed to say that the question whether the creation of occupancy rights by a landlord is a permanent alienation of land within the definition contained in Section 2 (4) of Act XIII of 1900 has been referred to the Financial Commissioner for his decision.

2. As at present advised, the Financial Commissioner is of the opinion that it is such an alienation, and must therefore be dealt with in accordance with the provisions of Section 3 of the Act.

No. 51.]

Financial Commissioner's Circular letter No. 181, dated Lahore, 10th January 1906, to all Commissioners and Deputy Commissioners in the Punjab.

The Financial Commissioner has considered a suggestion, which was made by the Deputy Commissioner of Dera Ghazi Khan in his annual report for the year 1903-04, that it is desirable to empower an investigating Revenue Officer to make a full report to the Deputy Commissioner, both as to the circumstances of permanent alienations which have been made in contravention of the provisions of the Alienation of Land Act and as to the wishes of the parties in the event of the Deputy Commissioner's sanction being refused.

2. He is of the opinion that it is desirable to amend paragraph 2 of Financial Commissioner's Circular No. 4, dated 9th September 1903. That paragraph enjoins a procedure which may not be required at all if the original report made by the Revenue Officer is complete, and I am to request that the following may now be substituted for paragraph 2 of the Circular above quoted—

"2. Accordingly when a Revenue Officer who submits a mutation proceeding to the Deputy Commissioner does not recommend the sanction of permanent alienation, he should ascertain whether in the event of sanction being refused by the Deputy Commissioner, both parties wish—

(*a*) that the transaction be wholly cancelled, the alienor being restored to possession, if he has parted with it, and the purchase-money being repaid; or

(*b*) that the provisions of Section 14 of the Act be applied, the transaction being converted into a mortgage in the form described in Section 6 (1) (*a*).

In the latter case he should report the wishes of the parties as to the term of the mortgage and the conditions which should attach to it, and also any facts which will assist

the Deputy Commissioner in deciding what term and what conditions would in the circumstances be reasonable. If the parties are in agreement he should take from them a written application requesting the Deputy Commissioner to exercise his powers in a particular way, and transmit it with the mutation proceedings to the Deputy Commissioner."

3. I am to add that the amended paragraph has been approved by Government and that it has been decided that it is unnecessary to revise the rules published under Punjab Government Notification No. 23-S., dated 22nd May 1901.

[No. 52.]

Financial Commissioner's Circular letter No. 777, dated Lahore, 1st February 1906, to all Commissioners and Deputy Commissioners in the Punjab.

I am directed to refer you to the remarks made in paragraph 10 of the report on the working of the Alienation of Land Act for the year 1903-04 and in paragraph 4 of the Government Review regarding cases where the parties to a temporary alienation which contravenes the Act ignore the order of the Revenue Officer refusing the mutation, with the result that the aleenee remains in possession and the revenue records are at variance with the actual facts.

2. It has, I am to say, been decided that the endeavour to obtain exact statistics of the areas transferred irregularly by mortgages of the above description should be dropped as being likely to lend an air of validity to the transactions. But the subject is one which should receive the close attention of District Officers and their Revenue Assistants who may be able in the course of their inspections to gain an idea of the extent to which irregular mortgages prevail in their districts, and I am to ask that it may always be examined in the annual report under the head of temporary alienations.

TO

A. B. KETTLEWELL, ESQUIRE,
Officiating Chief Secretary to Government, Punjab.

SIR,

I am directed to forward the Annual Report on the working of the Alienation of Land Act during the year ending the 30th September 1906, and in doing so I am to explain that it was drafted before the date of the meeting of the Legislative Council which was held on the 21st of February 1907 and of which the Punjab Land Alienation Amendment Act, 1907, was passed.

I have the honour to be,
Sir,
Your most obedient servant,

A. L. DANSON,
Officiating Senior Secretary to Financial Commissioner, Punjab.

Proceedings of His Honour the Lieutenant-Governor, Punjab, in the Department of Revenue and Agriculture (Agriculture), No. 85, dated 4th May 1907.

READ—

The annual report on the working of the Punjab Alienation of Land Act, XIII of 1900, for the year ending the 30th of September 1905.

REMARKS.—Since the report was drafted, the Bill for the amendment of the Land Alienation Act has passed the Punjab Legislative Council with substantially the amendments foreshadowed in paragraphs 2 to 5. It has not, however, been considered necessary to amend the definition of occupancy rights, and the position of the landlord who wishes to acquire the occupancy rights of his tenant has been still further safeguarded by making sanction in this case unnecessary.

2. The Lieutenant-Governor thinks it unnecessary to enter into any general discussion of the provisions of the new measure. He agrees with the Financial Commissioner that it is undesirable to issue any executive instructions to Deputy Commissioners to the effect that applications for permanent alienation in favour of quondam agriculturists should be treated in a liberal manner, and considers that it will be quite sufficient to safeguard the interests of the class referred to at the end of paragraph 2 of the report in the manner there prescribed.

3. Apart from the notification of a list of agricultural tribes for the Attock district and of the Labanas in the districts of the Central Punjab, both mentioned in last year's review, the only tribes notified during the year under report were the Koreshis in Sialkot and the Turks in Jhang. A notification has since the close of the year been issued for the Lyallpur district. The applications of the Ramgarhias, Brahmans, Shaikhs, Sayyids and others to be included under the Act were rejected after careful consideration on the principle already laid down in paragraph 3 of last year's review.

4. The question of introducing a new form of mortgage under the Act which was mentioned in paragraph 4 of last year's review has been submitted for the orders of Government. The consensus of opinion was that while a form of mortgage on the lines there indicated could be framed to the benefit of the mortgagor, there was nothing to commend it to the mortgagee. The proposal has consequently been dropped as unlikely to have any practical result.

5. The Lieutenant-Governor has read with interest the remarks of the Financial Commissioner in paragraph 16 of the report relating to the procedure to be adopted in cases of notice of foreclosure under Regulation XVII of 1806 when the mortgagor denies the validity of the mortgage. He is not altogether prepared to accept the Financial Commissioner's suggestion that the Deputy Commissioner is entitled to enquire into the question of execution, and if the Financial Commissioner thinks the matter of sufficient practical importance, a separate report should be submitted for the consideration of Government.

6. His Honour agrees with the Financial Commissioner that the diversion of capital from money-lending to commerce must inevitably be a gradual process, but notes with interest the indications in Ferozepore that this process has begun. During the year under report, a portion of the province has, for the first time since the passing of the Act, been exposed to famine conditions; and it is satisfactory to find that the new conditions have stood the test, and that the contraction of credit which resulted from them has not been of such a nature as unduly to embarrass the cultivator; though it has apparently led to an increase in the amount advanced by Government. With this exception, the year's statistics do not present any particularly striking features, nor afford grounds for any other conclusions as to the general working of the Act than those which have been drawn from the past few year

of its working. There have been slight increases in the areas sold and mortgaged, but agricultural tribes have both bought more land than they have sold and have gained by redemption more than they have mortgaged. The price of land remains practically unaltered.

ORDER.—Ordered that the above remarks be printed and circulated with the report; also that they be published in the *Punjab Government Gazette*, be communicated to the Financial Commissioner, Punjab, and forwarded to the Government of India, Department of Revenue and Agriculture, with the usual number of spare copies of the report.

By order of His Honour the Lieutenant-Governor,

E. D. MACLAGAN,

Chief Secretary to Government, Punjab.

Punjab Government Press, Lahore—4-5-07—1295—471—K. C. M.

ANNUAL REPORT

OF THE

WORKING OF THE PUNJAB ALIENATION

OF

LAND ACT XIII OF 1905.

FOR THE YEAR ENDING 30th SEPTEMBER 1906.

PART I.—The Working of the Act.

SECTION I.—PRELIMINARY.

Preliminary.

1. Following the practice of previous years unless the contrary appears from the context the word "zamindar" will be used in this report as the equivalent of a "member of an agricultural tribe," and the word "agriculturist" will be used only in the technical sense given to it by the Act.

The statutory agriculturist.

2. In view of the clause in the Bill for the amendment of the Act which, if passed, will abolish the statutory agriculturist, the Financial Commissioner does not propose to discuss any of the questions, all of a minor character, relating to this class which have been mentioned in some of the district reports. As regards a suggestion made by one Deputy Commissioner that, in the event of the abolition of the agriculturist, it is desirable to issue executive instructions to Deputy Commissioners to the effect that applications for permanent alienation in favour of quondam agriculturists should be treated in a liberal manner, it need only be remarked that a person who now comes under the definition of 'agriculturist' would, if the Bill becomes law, have no possible claim to preferential treatment. If, however, he is a member of an agricultural tribe which has not been notified, he will continue to be dealt with as laid down in paragraph 11 (vi) of Financial Commissioner's Circular letter No. 3441, dated 5th June 1901.

Occupancy and mukarraridari rights.

3. The Bill now in Select Committee provides for the inclusion of "any occupancy right" in the expression "land" as defined in section 3 (2) of the Act. If the clause becomes law it will assimilate the definition of land to that which was adopted in the Punjab Pre-emption Act, 1905, with this exception that the restrictive words there used have been omitted with the object of covering cases of occupancy rights which have been acquired otherwise than under an Act of the Legislature, and of including the "mukarraridari" status referred to in paragraph 3 of the last report and similar tenures. It is, however, open to question whether "mukarraridari" rights would come within the meaning of the term "occupancy rights," and the question of amplifying the definition will be considered by the Select Committee on the Bill.

Alienations to landlords.

4. With reference to paragraph 5 of the last report it may be remarked that, following present practice, a clause has been inserted in the Amendment Bill which provides that sanction shall be given as a matter of course to a permanent alienation of a right of occupancy by a tenant to his landlord.

Fictitious gifts.

5. Cases in which fictitious gifts for religious or charitable purposes have been used to cover attempted evasions of the law have been very uncommon. In the Financial Commissioner's Circular No. 2, dated 10th May

1906 (printed as Appendix No. 55), Deputy Commissioners were instructed that all mutations of such gifts should be submitted to them for orders. The case is met in the new Bill by the inclusion of gifts for a religious or charitable purpose in the definition of *permanent alienation*, a proviso being added that sanction *shall* be accorded where the Deputy Commissioner is satisfied that the gift is in fact for a religious or charitable purpose.

Changes of tribe in Kulu.

6. In paragraph 9 of the last report reference was made to a passage which occurred in the Kangra report for 1904-05. The Deputy Commissioner wrote :—" In Kulu a non-agriculturist outcasted frequently becomes a member of an agricultural tribe. This is particularly noticeable when the man has been outcasted for marrying a woman of a tribe reputed lower than his own." The Deputy Commissioner has since explained that if, for instance, a Brahman marries a Dagi woman, he is outcasted and becomes a Dagi, and therefore a member of an agricultural tribe. On the other hand Dagis and Kolis (zamindars) intermarry freely with women of the Lohár tribe and may then become Lohárs. The Deputy Commissioner quotes several other instances which it is unnecessary to discuss. The Financial Commissioner thinks that in each case of this sort the Deputy Commissioner can only take the castes to which the parties happen to belong at the time when proceedings are before him. As the Commissioner remarks, cases in which hardship would result are not likely to be common, and if any hardship occurs the Deputy Commissioner can always remedy it by granting sanction to alienation. The matter is, therefore, more interesting than important.

Notifications of agricultural tribes.

7. Punjab Government Notification No. 36, dated 31st January 1906, (Appendix No. 53 to this report) notified a list of agricultural tribes for the Attock district. Punjab Government Notification No. 100, dated 30th May 1906 (Appendix No. 54), included the Labána tribe in the lists of agricultural tribes in ten districts, it being expressly explained that the Notification does not, and is not intended to cover members of the Banjára tribe. Koreshis have been notified in Sialkot, and Turks in Jhang, *vide* Punjab Government Notifications Nos. 787 and 788, dated 6th August 1906 (printed as Appendices Nos. 59 and 60). Other applications for inclusion on the part of Ramgarhias, Brahmans, Sheikhs and Sayads (in Ferozepore) Pathans (in Jhang) and Pirzadas (Delhi Division) have been rejected after careful consideration either by Government or by the Financial Commissioner. In the orders of Government on the case of the Brahmans it was remarked that "no tribe ought to be notified, which although it contains more or less *bona fide* agriculturists, is not as a tribe a true agricultural one, and desires to come under the Act not for protection from professional money-lenders, but in order to obtain facilities for acquiring land from other tribes." Proposals to notify a list of tribes for the Lyallpur district, and to amplify the Shahpur list with the object of facilitating the recognition of persons claiming to be members of agricultural tribes are at present with Government, and the Financial Commissioner is considering the question of a similar amplification in the case of the Montgomery district. The difficulty arising in the case of these and other districts in the west of the Punjab is the uncertainty as to which of the main tribes (Rajputs, Jats, &c.), a class of people who are certainly members of an agricultural tribe belong. In isolated cases elsewhere the expedient has been adopted of notifying sub-tribes ; but in the case of Shahpur the list of sub-tribes with reference to which it could not be definitely said that they were branches of a particular main tribe, though they certainly belonged to one or other of several agricultural tribes, is a very long one.

Changes of tribe designation.

8. In paragraph 32 of the last report the Financial Commissioner discussed the case of attempts to change tribe designation from a non-agricultural tribe to an agricultural tribe. After making inquiries from local officers he has since issued the instructions contained in his Circular No. 6, dated 13th December 1906, printed as Appendix No. 61 to this report, which will, he believes, minimise the likelihood of such changes being used to defeat the provisions of the Act. As the result of a special inquiry made regarding

the case of the Sheikh Ansáris in Jullundur city, the Financial Commissioner found that the order that the Sheikhs in question should be treated as Pathans, and consequently as members of an agricultural tribe, was issued by the Commissioner. On examination of the evidence on which the Commissioner's order was based, the Financial Commissioner has held that these Sheikhs are not Patháns, and he has issued orders accordingly. The circular above quoted will ensure that in future cases of this kind will be fully examined before orders are passed.

Extension of the provisions of the Act to Municipalities.

9. The question of the extension of the provisions of the Act to agricultural land in municipal limits has been considered during the year. It is one of considerable difficulty owing to the fact that practice varies greatly in regard to fixing the boundaries of municipalities. In some cases the necessities of municipal administration have led to the adoption of limits which are too wide for the purposes of the Alienation of Land Act, though in others they are more confined, the result being that municipal limits are not really a sound basis for exemption from the operation of the Act. For the present at least it has been held to be inadvisable to alter the terms of the exemption laid down in Punjab Government Notification No. 84, dated 14th May 1902.

Section II.—Permanent Transfers.

Working of instructions.

10. The district reports contain even less on this subject than those of last year. No suggestion has been made for the improvement of the instructions conveyed in paragraph 11 of Financial Commissioner's Circular Letter No. 3441, dated 5th June 1901, which are evidently continuing to work well. Usually the most important matter discussed in the district reports is that referred to in paragraph 11 of the last report, namely, the alienation of land in cases where indebted zamindars owning mortgaged land desire to sell a part of it in order to raise money to redeem the whole or part of the rest, and it would appear from the reports that great care is always bestowed on such cases. Full inquiries for zamindar purchasers are made, the zaildar agency being used more frequently than was formerly the case. But zamindars seldom make an offer which can be accepted and the terms of the mortgagee are usually to the enormous advantage of the vendor. While on the whole satisfied that in dealing with such transactions the objects of the Act and the personal advantage of the vendor are as a rule fully considered, the Financial Commissioner thinks that it is necessary to exercise care in such cases. It is to be noted, however, that if a zamindar is allowed to alienate permanently half of his holding in order to clear the remaining half, it would not appear possible for him to repeat the process after an interval in respect of the part that he retains because of the provisions of the Act with regard to the forms in which only mortgages can now be made.

Applications from Native States, &c.

11. Applications for permanent alienation to persons holding land in the North-West Frontier Province or Native States have usually been properly dealt with. But in Kangra mutation of a transaction between a zamindar of that district and a member of the same tribe in Chamba was sanctioned by the revenue officer without reference to the Deputy Commissioner. The alienation in question was probably unobjectionable, but the Deputy Commissioner has called for the mutation sheet.

Section III.—Temporary Alienations of Land.

Mortgages under section 6 (1) (*c*).

12. The Deputy Commissioner of Hissar reports that section 6 (1) (*c*) has been made use of in Hissar for the first time in the case of 12 mortgages executed under the orders of his predecessor in the form covered by that clause, and that in all of these cases a rent in kind was fixed. He thinks, however, that pressure was put upon the mortgagees in order to induce them to accept mortgages under these terms. The circumstances of these cases are not at all clear from the Deputy Commissioner's remarks, and a separate inquiry will be made. It is stated that in the Attock district one application "was made under section 6, clause (*c*), but was rejected by the Deputy Commissioner." No further facts are stated, and it is not apparent what the Deputy Commissioner means.

13. In paragraph 16 of the last report Sir Lewis Tupper discussed at some length the question whether a new form of mortgage under the Act is required, and Government agreed (*vide* paragraph 4 of the review) that this question should form the subject of a separate reference. The Financial Commissioner has since obtained the opinions of selected officers, and he will now report his conclusions to Government.

Need for a new form of mortgage under the Act.

14. In Financial Commissioner's Circular No. 3, dated 10th May 1906, (printed as Appendix No. 56 to this report) certain instructions were issued on the subject of temporary alienations of land where the order of the revenue officer refusing mutation is disregarded and the alienee remains in possession. It was laid down that such transactions should be entirely ignored so far as the revenue papers are concerned; but, while the collection of statistics was deprecated, Deputy Commissioners were asked to examine the point in their annual reports. The subject has now been noticed by several Deputy Commissioners. The Deputy Commissioner of Gurgaon gives the approximate figures shown in the margin,* while the Deputy Commissioner of Rawalpindi says that in 110 cases (concerning only 101 acres) possession has remained with the alienee. The Deputy Commissioner of Kangra reports that alienees have remained in possession of a small area, while in Amritsar this has happened in a few, and in Gurdaspur in a considerable number of cases. In Sialkot, where a number of such cases came to notice, the Deputy Commissioner remarks that the mortgagor is not always a consenting party, but that he has neither the means nor the courage to recover possession by a civil suit. His proper remedy is of course to make an application for the revision of the mortgage under section 9 (1). On the other hand, the Deputy Commissioner of Ambala remarks that no such cases have come to light, and he thinks that probably none have occurred because the alienees insist on mutation being effected, and if it is not, the transaction is either cancelled or treated as a cash loan. If this is so the result is satisfactory as showing that the mortgagees appreciate the insecurity of their position in that the mortgagor can always apply for the revision of the mortgage under section 9 (1), while if the mortgagee sued on his mortgage the Court would be bound under section 9 (3) to refer the case to the Deputy Commissioner for the same purpose.

Possession of mortgagees after refusal of mutation.

* Reverted to alienees on refusal of mutation:—1905-06, 30 acres; 1904-05, 108 acres; 1903-04, 92 acres.
Remained with alienees even on refusal of mutation :—1905-06, 183 acres; 1904-05, 647 acres; 1903-04, 224 acres.

15. Several cases have been brought to the notice of the Financial Commissioner during the past year in which the Courts failed to recognise their obligations under section 9 (3). For the present instructions on the subject have been issued by the Hon'ble Judges of the Chief Court, while clause 9 of the Bill for the amendment of the Act will, if passed, provide a legal remedy.

Action of the Courts.

16. The Hon'ble Judges of the Chief Court have recently brought to the notice of the Financial Commissioner several cases (occurring in Rohtak, though they are not mentioned in the district report) in each of which the facts are understood to have been as follows. On application by the mortgagee for the issue of a notice of foreclosure under Regulation XVII of 1806, the Court referred the case to the Deputy Commissioner under section 9 (3) of the Act. On appearing before the Deputy Commissioner the mortgagor denied either the execution of the mortgage, or that the mortgage was binding on him. The Deputy Commissioner was accordingly unable to take action under section 9 (1) or (2) and returned the cases to the Civil Court with intimation to that effect. The Hon'ble Judges were not prepared to issue definite executive instructions on a point that might come before them for judicial decision, but as then advised they were of the opinion that the reference to the Deputy Commissioner having proved abortive, the Court must issue the notice of foreclosure under section 8 of Regulation XVII of 1806, and leave the question of the validity of the mortgage to be settled in the course of the subsequent litigation, if any.

Denial of validity of mortgage by the mortgagor.

Other doubts have been suggested with regard to the action which should be taken under section 9 (3), and the view of the matter, which the Financial Commissioner is at present disposed to take, is as follows:—

The functions of a Civil Court in proceedings under the Regulation are purely ministerial, and the only additional function that the Act requires the Civil Court to perform is that of referring to the Deputy Commissioner before taking action under the Regulation. If such proceedings have been instituted, section 9 (3) requires the Civil Court to refer the case to the Deputy Commissioner as a matter of course, and whether or not the mortgagor is a member of an agricultural tribe. The sole object is to give the Deputy Commissioner the opportunity of taking action, and with that action the Civil Court is not concerned in any way.

(*i*). The Deputy Commissioner can only take action under clause (2) if he finds that the mortgagor is a member of an agricultural tribe, and where this condition is not fulfilled he would at once return the proceedings to the Civil Court with an intimation that he would not intervene.

(*ii*) If the Deputy Commissioner finds that the mortgagor is a member of an agricultural tribe, his next action would be to put the mortgagee to his election under clause (2), and if the mortgagee agreed to have the condition struck out, that would be done. The mortgagee could not then, of course, go on with the proceedings under the Regulation. Here it would be unnecessary to refer to the mortgagor at all.

(*iii*). If, however, the mortgagee elected for a fresh mortgage it would then be necessary for the Deputy Commissioner to summon the mortgagor with a view to fixing "the sum of money" which the Deputy Commissioner "considered to be reasonable" as the consideration to be entered in the new deed. Under the existing provisions of the Act the mortgagor was in a position to render the whole proceedings before the Deputy Commissioner abortive by neglecting or declining to execute the fresh deed, and in the Bill now before the Legislative Council it is proposed to get over this difficulty by giving the Deputy Commissioner the power of executing it on his behalf.

The fresh difficulty referred to above has now come to notice, *i.e.*, the mortgagor may before the Deputy Commissioner deny execution of the deed on which the proceedings have been taken. It seems, however, to Mr. Gordon Walker, though he advances the opinion with some hesitation, that the powers of the Deputy Commissioner under the Act, which certainly cover the determination of the "sum considered to be reasonable" would also cover inquiry as to execution. No doubt in some cases where the mortgagor was obdurate, the Deputy Commissioner would find it impossible to take action and he would inform the Civil Court, which would then go on with the proceedings under the Regulation.

The question under discussion concerns only *proceedings under the Regulation*. Where a suit has been instituted in a Civil Court the matter stands on an entirely different footing.

Alienations to zamindars of other districts.

17. The Deputy Commissioner of Delhi referring to Financial Commissioner's Circular Letter No. 5407, dated 5th September 1904 (printed as Appendix No. 42 of the report for 1904), remarks on the anomaly that whereas the Deputy Commissioner can sanction a permanent alienation to a zamindar of another district or Native State, a temporary alienation to such a person must be in one of the forms permitted by the Act. He suggests either that adjacent districts and possibly Native States should be grouped, or that the Deputy Commissioner should be given legal power to sanction such transactions where required. The Commissioner too thinks that the position requires adjustment. In the Financial Commissioner's opinion the matter is one of little or no practical importance, but it can be considered if further legislation becomes necessary.

Leases.

18. Evasions of the Act by means of leases do not appear to be at all common. The Deputy Commissioner of Multan reports that no such cases have come to light, though he thinks that there is a growing tendency to give long

leases. The Deputy Commissioner of Ferozepore, however, says that the practice of putting creditors in possession of land, the consideration being their willingness to forego suits on a simple bond, is growing fast. As was remarked last year (paragraph 21 of the report for 1904-05) on a case reported from Muzaffargarh, the remedy of the owner lies in his own hands. He can always eject the creditor. Some cases of a much more complicated nature have been separately reported from the Lahore district. In one of these which was under consideration by Sir Lewis Tupper at the time when the Bill for the amendment of the Act was being framed, the facts were briefly these:—

Two zamindars executed a lease of land for five years in favour of a money-lender on an annual rent of Rs. 42, the revenue demand being payable by the lessors. On the same date they also executed a bond in favour of the same person under which they agreed to repay him Rs. 700 after five years, with interest in the meantime at 8 annas per cent. per mensem, *i.e.*, Rs. 42 per annum, which would just balance the rent due to them on the lease. The two transactions taken together would appear to be an undoubted evasion of the Act, but the Legal Remembrancer was of opinion that they could not be said to form a mortgage, because the essence of a mortgage is the transfer of specific immoveable property for the purpose of securing the payment of money advanced or an existing or future debt, and in the case above described the payment of the original debt is in no way secured on the land though the whole amount of the debt would still be due at the expiry of the five years. The Financial Commissioner agrees that, if the lease really secured only the amount of the annual interest, that transaction was a genuine lease and legitimate, even though its object was to defeat the Act. But if on the other hand the annual rent of Rs. 42 was fixed merely with reference to the interest due on the bond and was not a fair rent for the land, the value of the produce of which might in five years have actually secured the payment of the whole or a part of the debt, the Financial Commissioner is inclined to think that the two transactions taken together form a mortgage, and that whether this is so is a question of fact. He is accordingly again referring this and two other cases since reported (also from Lahore) for the Legal Remembrancer's opinion; and on its receipt he thinks it will be necessary to issue a circular letter drawing attention to the possibility of evasions of the Act in this form, as it is necessary to guard against leases being assumed to be such merely because they are so described in the deed, there being other transactions behind in consequence of which they are really mortgages in disguise.

Provisions of the Bill relating particularly to mortgages.

19. The new Bill, if passed, will give power to the Deputy Commissioner to place mortgagees in possession where the mortgage is without possession and the mortgagor fails to fulfil the terms of his contract. Similarly it will give the Deputy Commissioner power to eject the mortgagee and place the mortgagor in possession where either (1) it is proved to his satisfaction that the mortgagor has paid the mortgage debt or such proportion of it as the Deputy Commissioner finds to be equitably due, or (2) the mortgagor tenders the amount due. By an unfortunate omission, however, this clause is only operative in regard to mortgages under section (6), whereas it was undoubtedly contemplated that it should be made applicable to all existing mortgages. On a reference made to Government it has been decided that the amendment necessary to rectify this omission cannot be incorporated in the present Bill, so that the great mass of existing mortgages will be left unaffected.

Further, as already noticed, clause 8 of the Bill has been framed with the object of remedying a defect in the Act which was discussed in paragraph 24 of the last report. If a mortgagee, who is put to his election under section 9 (2), accepts the alternative of a mortgage under section 6 (1) (*a*) or (*b*) and the mortgagor refuses or neglects to execute it, the Deputy Commissioner will be empowered to execute the deed on behalf of the mortgagor.

Section IV.—General Provisions.

Work caused by the Act.

20. The vernacular hand-books referred to in paragraph 28 of the last report have been issued by the Financial Commissioner, and there is little doubt that the Act is now generally well understood by officials. Thus the Deputy

Commissioner of Hoshiarpur reports that in only 18 cases out of about 25,000 mutations scrutinized by the Collector and his Extra Assistants, was interference under the Act necessary, and that nearly all the mistakes detected were made by one Extra Naib Tahsildar. In Rohtak the work under section 9 (2) and (3) is said to be decreasing, while the Deputy Commissioner of Hissar also notes that the work itself is lighter now that the people and subordinates are beginning to understand the Act. Several Deputy Commissioners remark that the work caused by the Act is "insignificant" "not great," or "not appreciable," though the Deputy Commissioner of Rohtak says that some extra work has been thrown on his vernacular office by the orders contained in Punjab Government Notification No. 54, dated 20th June 1906, printed as Appendix No. 58 to this report, which require Deputy Commissioners to send information to registering offices regarding the cancellation or amendment of registered mortgage deeds under section 9 (1) and (2). The amount of this work must in any case be inconsiderable and it will have a natural tendency to decrease. No doubt difficult cases sometimes arise and give the Deputy Commissioner some trouble; but as regards the revenue staff generally it is probable that any extra work which the Act involves will be at least balanced by a decrease in the number of mutations and cases for ejectment or rent, while a decrease in civil litigation is generally reported to be one of the most marked results of the Act.

Registration.

21. No cases have been reported in which delay caused by the necessity of obtaining the Deputy Commissioner's sanction has occasioned the lapse of the period of registration. The sanction of the Deputy Commissioner is usually obtained before deeds are executed.

Section V.—General Remarks.

Popularity or otherwise of the Act.

22. The popularity of the Act with the purely agricultural class is now sufficiently well established to call for no remark, while it would be absurd to expect that the other party directly concerned, *i.e.*, the money-lenders, should ever approve of it. It may also, as Mr. Maynard suggests, be specially unpopular with the not unnumerous class of persons who, though not included among the agricultural tribes, have nothing to do with money-lending, for example, the prosperous Sikh craftsman. Indeed it may be said that amongst almost every class of the community there is the desire to acquire land, and that legislation which prevents this desire being satisfied must be unpopular. The result that the popularity of class legislation of this sort should be confined to the class beneficially affected is inevitable.

Effect on trade.

23. The following extracts from district reports are quoted as interesting as regards the effect of the Act on trade. The Deputy Commissioner of Jullundur writes:—

"The general closing to the money-lending classes of their main avenue for investment ought to have a very much larger effect on ordinary trade, than is at present evident. It cannot be held that the opening of a solitary factory for soap-making (as has occurred this year in Jullundur), or a few cotton factories, represent anything like the amount of money that has been withdrawn from investment, since the passing of this Act. The chief trades of the district are grain, piece-goods, iron and hardware; I believe these have to some extent increased; prices of the former, in spite of good harvests, are still ruling high, which may mean that there is more money to invest, and more competitions to invest it, but at the same time, there are large sums of money uninvested, and which remain unaccounted for."

On the other hand the Deputy Commissioner of the neighbouring district of Ferozepore says that:—

"The opening up of the Ludhiana McLeod Ganj railway, which passes through the whole length of this district, has given impetus to trade, and big markets are springing up at convenient intervals on the line of the rail. The towns of Zira, Dharmkot and Isa Khan, famous strongholds of money-lending classes, have been or are being connected with the railway by metalled roads and a similar project for connecting Butar and Badni is under consideration. The trade in grain which formerly was monopolised by strangers has gone into the hands of local men, who have thus outlets for utilizing their capital set free by the passing of the Law of Alienation and consequent contraction of money transactions with zamindars. Not only is the grain trade on the increase there are sure indica-

tions of activity in other directions. Trade in the *Doaba* in imported sugar and in piece-goods, which formerly centred at Ferozepore, is fast spreading to Moga and other places where market buildings have been or are being constructed."

The Financial Commissioner has little to add to what was said in paragraph 30 of the last report in which he generally concurs, though he thinks that in a conservative country like the Punjab the diversion of capital from money-lending to commerce will at least be gradual. The opening of new market towns on new railways and canals will afford an outlet for the investment of a considerable amount of capital in a form that has been found acceptable enough in the past.

Effect on credit.

24. There is no reason at all to suppose that the Act has affected the credit of the zamindar in such a way as to cripple his resources for expenditure on legitimate objects. What it has done is to check unnecessary extravagance with borrowed money, though, no doubt, the general prosperity occasioned by recent agricultural conditions is not without its natural effect in reducing the necessity for borrowing. In view of what has been said in past years on this subject the Financial Commissioner does not wish to labour the point. He will only quote the following brief remarks of the Deputy Commissioner of Jhelum :—

"Of the general effect of the Act I can only repeat what I have previously said that it has saved the situation. If proof be needed that it has not unduly restricted credit, I can point to the fact that during the past two years I have never known a zamindar to undergo imprisonment in default of payment of a fine, nor have I known one to forego contesting a claim of pre-emption however much money was required, and when 500 or 1,000 rupees is wanted for conducting a case in the Divisional or Chief Court, it is invariably forthcoming.',

Takkavi and rents.

25. Whether or not the Act has had any effect in increasing applications for takkavi is a point on which opinions differ a little. It need only be remarked that if it has had this effect there is not the slightest reason for regret. The Act has had no effect on rents.

Evasions.

26. Attempted evasions of the Act are of course not uncommon, but they are usually checked by vigilance on the part of Deputy Commissioners, and, with the exception of the device of disguised mortgages described in paragraph 18 above, no form of evasion has been reported which is at all likely to involve further legislation. The Bill now before the Legislative Council will, if passed, go far to stop "*benami*" transactions through agriculturists, and the confession of judgment in Civil Courts resulting in decrees contravening the Act, while other "*benami*" transactions are too dangerous to those really interested to become common. The present reports show clearly that attempts to change tribe designation are becoming more frequent; but the instructions issued in Financial Commissioner's Circular No. 6, dated 13th December 1906, (Appendix 61 to this report), should be quite a sufficient safeguard. A suggestion made by the Deputy Commissioner of Ludhiana that "*benami*" transactions and attempts to change tribe designation should be made penal offences, does not commend itself to the Financial Commissioner.

27. The District reports are forwarded in manuscript for reference if required.

The following new instructions and notifications have been issued during the year under report. They are numbered from 53, the number of the last appendix to the report for 1904-05 being 52.

Appendix No. 53.—Punjab Government Notification No. 36, dated 31st January 1906, notifies a list of agricultural tribes in the Attock district.

Appendix No. 54.—Punjab Government Notification No. 100, dated 30th March 1906, notifies the Labána tribe as an agricultural tribe in ten districts.

Appendix No. 55.—Directs the procedure to be followed when cases of gifts for religious or charitable purposes come before Deputy Commissioners for orders.

Appendix No. 56.—Issues instructions for the guidance of District officers in dealing with cases where the mortgagees remain in possession after refusal of mutation.

Appendix No. 57.—Informs all Revenue officers that Punjab Government Notification No. 100, dated 30th March 1906, regarding the inclusion of Labanas as an agricultural tribe does not include the Banjara tribe.

Appendix No. 58.—Punjab Government Notification No. 54, dated 20th June 1906, adds two rules to those published in Punjab Government Notification No. 44, dated 8th November 1901, in regard to the amendment or cancellation of documents admitted to registration contrary to the provisions of the Punjab Alienation of Land Act.

Appendix No. 59.—Punjab Government Notification No. 787, dated 8th August 1906, notifies the Koreshi tribe as an agricultural tribe in the Sialkot district.

Appendix No. 60.—Punjab Government Notification No. 788, dated 8th August 1906, notifies the Turk tribe as an agricultural tribe in the Jhang district.

Appendix No. 61.—Issues instructions for the guidance of Revenue officers in dealing with cases of attempts of persons who are not zamindars to get themselves recorded as members of agricultural tribes.

Concluding remarks.

28. There are no points of general interest in the working of the Act which are not covered by the preceding paras. Owing to the unfortunate omission noticed in paragraph 19 a large mass of mortgage debt with which it was proposed to deal has been left untouched, and this may entail further legislation.

Part II.—The Analysis of Statements.

Statement No. I.

Gifts and exchanges.

29. The number of gifts and exchanges shows a small increase from 21,888 to 22,002, and the area so transferred has risen from 1,11,308 acres to 127,788 acres. As noticed in the last report 'exchanges' include the re-adjustments of field boundaries resulting from the *killabandi* operations which are undertaken in one or two districts for the purpose of arranging areas in plots convenient for purposes of irrigation. Such exchanges have, of course, nothing to do with the working of the Act. The largest increases are shown for Montgomery (11,016 acres), Jhang (5,945 acres) and Dera Ghazi Khan (3,138 acres). That in Montgomery, though it is not explained, is probably due to *killabandi* on the Chenab Canal. The increase in Jhang is due to exchanges following the acquisition of land for the Jhelum Canal and the Jech Doab railway, and the remarks made with reference to "*killabandi*" exchanges apply to these also. In the Dera Ghazi Khan report the reason given is that zamindars arrange for exchanges in order to evade the provisions of the Pre-emption Act. This explanation can scarcely be accepted as satisfying, and special inquiry will now be made on the subject.

Mortgages.

30. The number of mortgages with possession including transfers by order of a Court has risen from 80,380 to 87,646, and the total and cultivated area from 237,026 and 194,738 acres to 246,968 and 209,169 acres, respectively. The average area affected by each transaction has remained stationary, but the proportion of the cultivated to the total area has slightly increased. The largest increases occur in Hissar, Delhi, Karnal and Hoshiarpur, where the mortgaged area has risen by 4,826, 3,718, 2,861 and 3,111 acres, respectively. In all three districts of the Delhi Division this result is attributed to the failure of the kharif crop in 1905, and in Hissar and Karnal also to the careful scrutiny of mutation registers in anticipation of and during settlement operations. No explanation is given of the figures in Hoshiarpur, the district which last year recorded the most considerable decrease; but it may be remarked here that, except in Delhi, the loss on mortgages is more than covered by gains in redemptions, while even in Delhi the difference in favour of mortgages is very slight. In Mianwali and Attock the mortgaged area has decreased by 7,133 and 2,065 acres, respectively, the figures not being explained.

In all other districts the variations are of less than 2,000 acres, and do not call for any detailed comment. The district reports contain but few general remarks on the subject. In Gujrat, however, where the area mortgaged in favour of zamindars has risen by 833 acres, while that mortgaged to others has only increased by 312 acres, the Deputy Commissioner thinks that the facts show that "the thrifty zamindar is taking what advantage he can of the preferential law in his favour, while the sahukar is also making the best of the situation." The Deputy Commissioner of Dera Ghazi Khan remarks that mortgages in the forms allowed by the Act are now frequently made, while the Deputy Commissioner of Ludhiana says that they are acceptable to both parties.

Amount of mortgage money.

31. The amount of the mortgage debt involved has risen from Rs. 1,33,09,102 in the previous year to Rs. 1,57,82,398, and the average per cultivated acre from Rs. 68 to Rs. 75. The proportion which the figures of revenue bear to the total amount of mortgage money closely approximates to the proportion brought out by last year's figures, so that the rise in average per acre cannot be accounted for by saying that the land mortgaged now is generally more highly assessed to land revenue, and therefore presumably more valuable. Possibly, therefore, it indicates a genuine rise in the value of land, regarding which mortgages are in some respects a better guide than sales, as they are less likely to be affected by special causes of fluctuation. The increase in the amount of mortgage money is shared by all the districts which return figures except Ludhiana, Rawalpindi and Jhelum, of which only the first shows an increase in the mortgaged area, *viz.*, 604 acres.

Redemptions.

32. The area redeemed in 1904-05 exceeded that redeemed in the previous year by 27,350 acres. The present excess over the previous year is 41,455 acres. All but six districts show an increase in the area redeemed. In three of these, *viz.*, Rohtak, Lahore and Multan the loss is trivial. In Mianwali it is far more than, and in Montgomery and Gujranwala partially counterbalanced by a decline in the area mortgaged. The largest gains are those of Hissar + 8,921, Hoshiarpur + 7,830, and Dera Ghazi Khan + 4,894. The total gain of 41,455 acres may be compared with the loss of 9,942 acres by which the total mortgaged area has increased.

The amount of the mortgage money discharged has risen from Rs. 1,03,57,475 to Rs. 1,29,18,287, or a gain of Rs. 25,60,812, which is shared by all districts except Lahore and Mianwali. This also may be compared with the loss due to the increase of Rs. 24,73,296 in the mortgage debt. The average per acre of the mortgage money redeemed was Rs. 42 against Rs. 39 last year, but if the average sum for which land is mortgaged increases the average sum paid for redemptions necessarily displays the same upward tendency.

Several Deputy Commissioners, *e.g.*, the Deputy Commissioner of Hissar, notice that redemptions are frequently followed by remortgages; but in Hissar redemptions have gained on mortgages. In the Delhi Division generally want of progress where it occurs is ascribed to the failure of the kharif crop of 1905. Elsewhere the increase in the area redeemed is usually put down to the effects of good crops; or, as in the case of Hoshiarpur and Sialkot, to the profits from colony grants. In Ferozepore the area redeemed is higher than in any year during the past twenty, except 1896-97, and the Deputy Commissioner remarks that the rise in the value of land enables the zamindars to obtain the release of mortgaged areas on remortgage of a part only without any repayment. This is an interesting comment on the attempts noticed by the same Deputy Commissioner and also the Deputy Commissioner of Jullundur on the part of mortgagees to avoid redemptions. The Deputy Commissioner of Montgomery says that of about 100 villages irrigated by the Kitchin Bund only two now remain with any unredeemed mortgages. In the Kangra report there is the somewhat remarkable statement that the increase in redemptions is probably due to the charitable relief and takkavi advances which followed the earthquake.

The gain in redemptions during the year under report was not anticipated, as it was thought that the poor crop of kharif 1905 would have checked the advance noticed last year. In the Delhi Division that harvest was generally bad,

and in many other districts the cotton crop failed almost entirely. The figures themselves are an improvement on those of last year, and for the reason above indicated the real results are still better.

Sales.

33. Sales and permanent transfers for value represent a total and cultivated area of 245,518 and 152,223 acres, respectively, as against 226,878 and 136,707 acres in the previous year, and the purchase money has increased from Rs. 1,12,05,754 to Rs. 1,25,56,867. The average price per acre of ownership rights has decreased from Rs. 52·8 to Rs. 51·8, and the price per cultivated acre from Rs. 86·4 to Rs. 84·5. On the other hand, the totals of all transfers for value give an average price of Rs. 51·1 per acre compared with 49·3 last year. Generally there has been an approximate return to the figures of 1904-05, the increase in sales being no doubt connected with the increase of redemptions. The fall in average price paid for ownership rights is probably due to the fact that the land sold was generally less valuable than that transferred last year, as the land revenue on the land now sold is practically the same as that on the smaller area sold last year. Indeed in districts where the price of land sold has fallen, *e.g.*, in Hissar, Gurgaon and Hoshiarpur, the decrease is ascribed to the sale of large areas of poor land. In Shahpur the price has risen in spite of the fact that the land sold is less highly assessed to land revenue, a result which may be due to speculation in land to be commanded by the new Shahpur Branch of the Jhelum Canal. Elsewhere rapid rises in prices are often due to other special reasons, such as the acquisition of land for new perennial canals and for building sites, and these no doubt to a certain extent counterbalance the effect of the sale of inferior land. The only district, however, in which the value of land is said to have actually fallen is Delhi, and there the fall is stated to be the direct result of past poor crops. Generally where Deputy Commissioners notice the subject they give the opinion that the value of land is rising, and the Financial Commissioner believes that this is the common tendency. We must, he thinks, expect slight fluctuations from year to year, but we have already quite enough experience to explode the old theory that the Act would cause a general fall. On the contrary, the zamindar can and will pay a better price for land than the moneylender who could force a sale on his creditor.

Usufructuary mortgages.

34. The area under usufructuary mortgage has increased from 3,671,602 acres to 3,750,194 acres. Increases have occurred in nine districts only, the total being more than accounted for by the Mianwali district alone which shows a rise of no less than 150,450 acres (from 6,953 to 157,403), which is not discussed in the district report. The Deputy Commissioner will be asked to explain it if possible. An increase of 17,554 acres in Hissar is natural enough. The largest decreases are shown by Attock (52,720 acres) and Gurdaspur (28,705 acres). Neither figure has been explained. The other variations are generally unimportant.

Statement No. II.

Applications for permanent alienation.

35. Columns 2 and 3 of Statement No. II show that out of 1,628 applications to make a permanent alienation 992 were sanctioned.

Usually the areas concerned were very small, the majority of the cases dealt with being connected with sales for building purposes, small exchanges, and sales allowed with the object of effecting the redemption of other areas from mortgages. In the Mianwali district two large transactions were sanctioned for the last object. Both were greatly to the advantage of the alienors.

Misapprehensions regarding charitable gifts.

36. It is evident, however, from some of the district reports that a number of applications relating to charitable gifts have been wrongly shown in column 2 of the Statement. The sanction of the Deputy Commissioner under section 3 (2) is not at present required to genuine gifts for charitable or religious purposes, and such cases would only come to the Deputy Commissioner's notice on submission of the mutation register (*vide* Financial Commissioner's Circular No. 2, dated 10th May 1906, which is printed as Appendix No. 55 to this report). In practice, however, what apparently happens is that persons who are desirous of making such gifts often ask for the Deputy Commissioner's previous

approval, in order that the gift may not be objected to subsequently. There is no objection to this form of procedure, which no doubt saves trouble to the parties, and merely anticipates the clause in the bill now before the Legislative Council which would render such sanction necessary; but the cases were not really cases under section 3 (2), and should have been shown in column 10 under the head of "Other proceedings." The Attock report contains the statement that "in one application for gift the period of gift was reduced to 50 years." The gift was either genuine or it was not, and the Deputy Commissioner's order was quite *ultra vires*. The Commissioner, who has made no remark on this statement, should call for the file and, if necessary, submit the case for revision.

Cases under section 6 (1) (*b*).

37. With reference to the remarks made in paragraph 42 of the last report regarding proceedings under section 6 (1) (*b*) (column 4) in Hissar, Rawalpindi and Gujranwala, it has been ascertained that no proceedings under that section actually took place.

Cases under section 7 (3).

38. Hissar, Karnal and Ambala show 4, 3 and 2 cases, respectively, under section 7 (3) (column 6 of the Statement). Only in the Karnal report are any remarks made. Of one of these cases it is said that the mortgagor applied to redeem half of his mortgaged area on payment of the mortgage debt; but that, as the term had not expired, the application was filed. The form of the mortgage is not stated, but apparently it has not been noticed that section 7 (3) enables the mortgagor to redeem during the currency of the mortgage. However, the true reason probably was that section 7 (3) does not enable the mortgagor to redeem only a part of the land. All these cases should be examined by the Commissioner and reported, if necessary, to the Financial Commissioner. The report called for with regard to two applications in Rawalpindi (mentioned in paragraph 42 of the last report) showed that no such cases had really occurred.

Cases under section 9 (2).

39. The largest figures recorded in column 8, section 9 (2), as usual come from Hissar and Rohtak. In no less than 56 cases occurring in Hissar the mortgagors refused to execute fresh mortgages. In the Gurgaon report it is remaked that "in two cases no order under the Act was called for, as, on the date of the execution of the deeds in question, the alienors had not been notified as members of agricultural tribes." What the Deputy Commissioner means is not very evident, as section 9 (2) refers exclusively to mortgages made before the commencement of the Act, *i.e.*, at a time when no agricultural tribe had been notified. No remark is made by the Commissioner. Again in the Karnal report it is said that "one (case under section 9 (2)) was compromised, hence the condition (of conditional sale) was not struck out." On this the Commissioner remarks that "the stipulations of compromise must be lawful in themselves." In no circumstances had the Deputy Commissioner power to agree to a compromise under which the clause of conditional sale was retained. Again the Deputy Commissioner of Multan states that four applications under section 9 (2) were disposed of. In three of these the condition of sale was struck out, and one was rejected. The reason is not stated. Here again no remark is made by the Commissioner. The Commissioners concerned should call for the files of all the cases referred to in this paragraph, reporting them if necessary.

Miscellaneous proceedings and general.

40. The other figures shown in Statement II require no detailed comment. The volume of business is apparently decreasing, and the pending file, which is now very small, has been reduced. Cases under the Act appear to be disposed of promptly; and though there are evidently still some misunderstandings, both on the part of Deputy Commissioners and of applicants, they are not of a nature which can be said to affect the working of the Act. The figures reported last year from Rawalpindi were incorrect.

Changes of designation.

41. The Financial Commissioner has examined the case of the Beragi Sadhus referred to in para. 44 of the last report. They were really Jats and rightly accepted as such. The question of attempted evasions of the Act by change of tribe designation from a non-agricultural tribe to an agricultural tribe has already been discussed in paragraph 8 above.

Statements III—VI.

Statements Nos. III and IV give the details of transactions regarding mortgages and sales, Statement No. V gives the district totals and Statement No. VI shows the net gains and losses by the agricultural tribes.

Mortgages and Sales.

42. The net result for the province is that agricultural tribes have mortgaged 15,482 acres more than they took on mortgage compared with a loss of 17,474 acres last year, while they have gained 490 acres on sales compared with a previous gain of 1,040 acres. The present gain would have been greater but for acquisitions by Government, principally in Gujrat, Sialkot, Gujranwala and Jhang.

Agriculturists have lost 8,793 acres in mortgages and have gained 11,156 acres in sales. Non-agricultural tribes have gained 24,275 acres on mortgages at the expense of agricultural tribes (15,482 acres) and agriculturists (8,793 acres); but they have lost 11,646 acres in sales. Of this area the agricultural tribes have acquired 490 acres and agriculturists 11,156 acres.

Mortgages of Zamindars.

43. In the last two reports Ferozepore was mentioned as the only district in which zamindars took more land than they gave in mortgage. This year Ferozepore again heads the list with a gain of 1,710 acres. For this result the Hindu Jats are responsible, the Rajputs in the same district experiencing a loss of 1,983 acres. In all, the Ferozepore Hindu Jats actually gained 4,751 acres, of which 2,372 acres were from members of other agricultural tribes. Three other districts, *viz.*, Kangra 65, Lahore 301, and Amritsar 80, also show small gains. That in Lahore is due to acquisitions by Jats, Kambohs and Arains.

Throughout the province Jats have gained 1,761 acres. Their largest gain is of course in Ferozepore, where, however, Musalman Jats lost 260 acres. Other districts in which Jats gained are Mianwali (805), Ludhiana (532), Jullundur (436), with smaller areas in Lahore, Ambala and Delhi. Their heaviest losses, which were nowhere great, occurred in Hissar, Sialkot, Shahpur and Multan.

Rajputs have gained 346 acres in Kangra and a trifling area in Dera Ghazi Khan. In every other district they have again lost, their net loss being 13,240 acres compared with a loss of 13,381 acres last year. They have fared worst in Hissar, losing to 3,066 acres. In Ambala, Hoshiarpur and Ferozepore they lost between one and two thousand acres. Arains and Kambohs have gained as usual, this time 1,728 and 279 acres, respectively. Gujars have lost 1,422 acres.

Sales of Zamindars.

44. Jats have followed up their gain on sales of 3,614 acres last year by a fresh gain of 4,866 acres. In Hissar they acquired 7,400 acres, a fact which the Deputy Commissioner is unable to explain. Other gains of over a thousand acres occurred in Ferozepore and Lahore. In Ferozepore, Hindu Jats gained 1,877 acres, Musalman Jats losing 478 acres. Only in Dera Ghazi Khan and Multan did Jats lose over 1,000 acres. Rajputs have lost only 301 acres compared with 2,342 acres last year; but their loss is nowhere heavy, and in Hissar they gained 1,612 acres. Arains and Kambohs have gained 4,565 and 314 acres, respectively, while Gujars show a slight loss.

Grouping.

45. The Deputy Commissioner of Ludhiana again remarks on the acquisitions by Jats. He thinks that, unless they are grouped separately from Rajputs, they are likely to buy up most of the lands belonging to the latter. The Deputy Commissioner of Ferozepore considers that "the Hindu or Sikh Jat is more to be feared than the statutory agriculturist," and that it might be found advisable to form them into a separate group with the object of protecting other tribes. On the other hand, he remarks that "Arains and Mahtams, who are as industrious and thrifty as Hindu Jats, have also gained in proportion to their numerical strength." The figures between Jats and Rajputs in Ludhiana and Hindu Jats and Rajputs in Ferozepore do not, however, show a serious state of affairs. In Ludhiana, Rajputs have lost 93 and 341 acres by sales and mortgages

to Jats, while in Ferozepore they have similarly lost 341 and 1,586 acres to Hindu Jats. It is, as was remarked in paragraph 48 of the last report, still desirable that the progress of the Jats should be watched; but no immediate action can be said to be necessary. The remark made last year that the bulk of transactions is inter-tribal still applies. Nor is there any evidence to show that larger tribes are absorbing smaller ones to an appreciable extent. The industrious and thrifty of course gain, and of the Ahir tribe in Gurgaon it is remarked that they are as successful at money-lending as *sahukars*. The Deputy Commissioners of Ambala and Attock alone remark on the tendency of large zamindars to absorb men of less capital. Generally it may be said that the situation remains in this respect unchanged.

Statements VII and VII (*a*).

Redemptions from mortgage.

46. The total area redeemed from mortgage amounts to 3,08,730 acres, of which 2,25,118 acres were redeemed by members of agricultural tribes, or 72·9 per cent. compared with 74·5 per cent. last year of the whole area redeemed. A comparison of the total mortgages by agricultural tribes as shown in the last column of Statement No. III with their redemptions as given in Statement No. VII is made in Statement No. VII (*a*), and shows that in the province as a whole zamindars have gained by redemption 23,523 acres more than they have mortgaged, as compared with a gain of 5,030 acres in 1904-05. With the exception of Ambala and Kangra, all the districts of the Delhi and Jullundur Divisions show greater or less losses. On the other hand, with the exception of Sialkot and Jhang, all the districts of the other three divisions show gains, the largest being that in Dera Ghazi Khan, 11,048 acres. As usual the largest debts have been discharged by the Jat tribe in the majority of districts, but of the other tribes Meos head the list in Gurgaon, where Ahirs also have done well; Awans come first in Shahpur and Attock; Pathans in Mianwali; Biloches in Dera Ghazi Khan and Rajputs in Rawalpindi and Jhang. Other districts where Rajputs figure prominently in Statement No. VII are Hissar, Karnal, Ambala, Hoshiarpur, Ludhiana, Gurdaspur and Sialkot. Arains have done best in Ferozepore and Gujars in Gujrat. In all districts except Montgomery, Lahore and Jhelum, which show slight decreases, the amount of the debt discharged by zamindars is larger and often very much larger than that recorded last year, the total being Rs. 96,13,503 against Rs. 78,54,853,—a result which is no doubt due to the general prosperity of recent years. It can hardly be regarded as otherwise than most satisfactory.

[No. 53.]

The 31st January 1906.

No. 36.—*Notification.*—In exercise of the powers conferred by section 4 of the Punjab Alienation of Land Act, 1900 (XIII of 1900), and in continuation of Punjab Government Notification No. 63, dated 18th April 1904, the Lieutenant-Governor of the Punjab with the previous sanction of the Governor-General in Council, is pleased to determine that for the purposes of the said Act—

(*a*) all persons either holding land or ordinarily residing in the Attock district and belonging to any one of the tribes hereinafter named shall be deemed to be an "agricultural tribe" within that district, that is to say—

(1) Awan.
(2) Biloch.
(3) Ghakhar.
(4) Gujar.
(5) Jat.
(6) Jodhra.
(7) Khattar.
(8) Koreshi.
(9) Maliar.
(10) Moghal.
(11) Pathan.
(12) Rajput.
(13) Syad.
(14) Bhatti.
(15) Janjua.
(16) Jodh.
(17) Kahut.
(18) Mair and Manhas ; and

(*b*) all such "agricultural tribes" within the district of Attock, shall be deemed to be a group of agricultural tribes.

The 30th March 1906.

[No. 54.]

No. 100.—*Notification.*—In exercise of the powers conferred by section 4 of the Punjab Alienation of Land Act, 1900 (XIII of 1900), the Lieutenant-Governor of the Punjab with the previous sanction of the Governor-General in Council, is pleased to determine that for the purposes of the said Act—

(1) In each district of the Punjab mentioned in the Schedule annexed to this notification, all persons either holding land or ordinarily residing in such district and belonging to the Labana tribe shall be deemed to be an "agricultural tribe" within that district.

(2) The Labana tribe shall be deemed to belong to the group of agricultural tribes already notified for each of the districts mentioned in column 1 of the Schedule to Notification No. 63, dated 18th April 1904.

SCHEDULE.

Ambala.	Amritsar.
Hoshiarpur.	Gurdaspur.
Jullundur.	Sialkot.
Ludhiana.	Gujrat.
Ferozepore.	Gujranwala.

[No. 55.]

Financial Commissioner's Circular No. 2, dated Lahore, 10th May 1906, to all Revenue Officers in the Punjab.

In paragraph 5 of the Financial Commissioner's circular letter No. 3441, dated 5th June 1901, it was remarked that the Alienation of Land Act places no restriction on gifts for religious or charitable purposes (section 2 (4) of the Act), and that the working of this exemption is a matter to be carefully watched, as it must not be allowed to become a cloak for evasions of the law.

2. It appears that it has become not an unusual practice for cases of this class to be submitted to Deputy Commissioners for orders. This practice is sound, and the Financial Commissioner now prescribes that it should be followed in the case of all alienations of this description.

3. When any such case is submitted to the Deputy Commissioner he should, after inquiry, record a decision whether the transaction is really a gift and not a disguised sale, and whether the purpose is really religious or charitable. If he holds that the transaction is not a gift, or not made for the purpose permissible, he should treat it like any other transaction to which the Act applies.

4. As a consequence of section 21 (1) of the Act a Civil Court would have no jurisdiction to interfere with the order of a Deputy Commissioner under the Alienation of Land Act deciding for the purposes of that Act that any particular transaction was or was not a *bonâ fide* gift for one of the prescribed purposes.

[No. 56.]

Financial Commissioner's Circular No. 3, dated Lahore, 10th May 1906, to all Revenue Officers in the Punjab.

In cases where the Revenue Officer refuses to sanction mutation in respect of a temporary alienation of land, but his order is disregarded and the alienee remains in possession, the transaction is not brought on to the revenue record, which therefore is not in accordance with the facts. The question whether any entry or note of such transactions should appear in the revenue papers has been considered, and it has been decided that such transactions should be entirely ignored so far as revenue papers are concerned, because any mention in our records might be taken to have a fictitious value, and might act as an encouragement to leave matters as they stand.

2. For the same reason, it has been decided that no endeavour should be made to obtain exact statistics of the areas transferred by mortgages of the above description, but the subject is one which should receive the close attention of Deputy Commissioners and their assistants, who may be able in the course of their inspections to gain an idea of the extent to which such unrecognised mortgages prevail, and I am to request that the point may in future be examined in the annual reports under he head of temporary alienations of land.

[No. 57.]

Financial Commissioner's Circular Letter No. 3203, dated Lahore, 15th May 1906, to all Revenue Officers in the Punjab.

*(Vide No. 54, *supra*.)

The Labana tribe has been notified as an agricultural tribe in the districts of Ambala, Hoshiarpur, Jullundur, Ludhiana, Ferozepore, Amritsar, Gurdaspur, Sialkot, Gujrat and Gujranwala, *vide* Punjab Government Notification No. *100, dated 30th March 1906.

I am to explain that the above notifica tion of Labanas does not, and is not intended to include members of the Banjara tribe.

[No. 58.]

The 20th June 1906.

No. 54.—*Notification.*—In exercise of the powers conferred on him by section 25 of Act XIII of 1900 (Punjab Alienation of Land Act) the Lieutenant-Governor of the Punjab and its Dependencies is pleased to make the following rules, in continuation of those published in Punjab Government Notification No. 44, dated 8th November 1901, for giving effect to the provisions of section 17 of the said Act.

Rule 5.—When a mortgage deed is cancelled by the Deputy Commissioner under section 9 (2) of the Act and a new deed is drawn up in lieu thereof the Deputy Commissioner shall send to the office in which the cancelled deed was registered a copy of his order of cancellation and the registering officer shall make a note of the cancellation in red ink in the column of remarks opposite the copy of the document cancelled.

Rule 6.—In cases in which a registered mortgage deed is revised or altered by the Deputy Commissioner under section 9 (1) or where under section 9 (2) of the Act a condition intended to operate by way of conditional sale is struck out, the Deputy Commissioner shall, when returning the document to the parties after revision, alteration or striking out, send a copy of his orders to the office where the document was originally registered, and the registering officer concerned shall make a note of the correction, revision or striking out together with a reference to the Deputy Commissioner's order in the column of remarks against the copy of the document concerned.

[No. 59.]

Dated the 8th August 1906.

No. 787.—*Notification.*—In exercise of the powers conferred by section 4 of the Punjab Alienation of Land Act, 1900 (XIII of 1900), and in continuation of Punjab Government Notification No. 63, dated 18th April 1904, the Lieutenant-Governor of the Punjab, with the previous sanction of the Governor-General in Council, is pleased to determine that for the purposes of the said Act—

(*a*) All persons either holding land or ordinarily residing in the Sialkot district and belonging to the Koreshi tribe shall be deemed to be an "agricultural tribe" within that district,

(*b*) The Koreshi tribe shall be deemed to belong to the group of agricultural tribes already notified for the Sialkot district in Notifications Nos. 63, dated 18th April 1904, and 100, dated 30th March 1906.

[No. 60.]

Dated the 8th August 1906.

No.—788.—*Notification.*—In exercise of the powers conferred by section 4 of the Punjab Alienation of Land Act, 1900 (XIII of 1900), and in continuation of Punjab Government Notification No. 63, dated 18th April 1904, the Lieutenant-Governor of the Punjab, with the previous sanction of the Governor-General in Council, is pleased to determine that for the purposes of the said Act—

(*a*) All persons either holding land or ordinarily residing in the Jhang district and belonging to the Turk tribe shall be deemed to be an "agricultural tribe" within that district.

(*b*) The Turk tribe shall be deemed to belong to the group of agricultural tribes already notified in the Jhang district in Punjab Government Notification No. 63, dated 18th April 1904.

[No. 61.]

Financial Commissioner's Circular No. 6, dated Lahore, 13th December 1906, to all Revenue Officers in the Punjab.

THE Financial Commissioner has had under consideration the matter mentioned in paragraph 32 of the report on the working of the Alienation of Land Act for 1904-05, of the attempts of persons who are not zamindárs to get themselves recorded as members of agricultural tribes, and the question whether it is desirable to take any steps to check such attempts.

2. As a result of the inquiries which he has made, the Financial Commissioner finds that even if such attempts are not at present common, they are not unlikely to become so, and the following instructions are issued for the immediate guidance of Revenue Officers in dealing with cases that may come before them though it may be remarked that the question is in some aspects a far-reaching one which it is not yet possible to dispose of finally.

3. The most simple case that can occur is where a person applies to have his tribal designation as shown in the village papers altered, apart from any proceedings under the Alienation of Land Act, from that of a non-agricultural to an agricultural tribe. If a mutation of this kind is wrongly sanctioned, it may afterwards be used to support what would otherwise be an illegal transaction under the Alienation of Land Act. In such cases, therefore, the Revenue Officer to whom the register of mutations is submitted should either (*a*) refuse sanction and leave the applicant to appeal, or (*b*) if he thought that there had been a mistake in fact, and that the claim should be admitted, report the case to the Collector for orders.

4. (*i*) The second class of cases to be noticed are of a more complicated nature and arise out of proceedings directly connected with the working of the Alienation of Land Act.

(*ii*) Rules I and II of the addendum to chapter V of the rules under the Punjab Land Revenue Act issued under Punjab Government Notification No. 23-S., dated 22nd May 1901, provide for the procedure of patwaris and Revenue Officers in the case of permanent and temporary alienations of land made otherwise than in accordance with the provisions of the Alienations of Land Act. But the question whether an alienation is or is not in accordance with the provisions of the Act may depend on whether the alienee its or is not a member of an agricultural tribe.

(*iii*) If in such a case the claim of the alienee to be a member of an agricultural tribe does not depend on any entry in the record-of-rights (*e.g.*, when the alienee is recorded neither as a landlord nor as a tenant), it might happen that in the absence of such documentary evidence, the alienee would be accepted, on the basis of verbal and inaccurate statements, as a member of an agricultural tribe. Then, if the alienation is otherwise in accordance with the provisions of the Act, the procedure laid down in rule II above referred to would not be followed.

(*iv*) In order to obviate this risk, the Financial Commissioner is pleased to order that in all cases in which the alienee is unable to support his claim to be a member of an agricultural tribe from an entry in a record-of-rights, the Revenue Officer, to whom the register of mutations is submitted for orders under Land Revenue rule 48, shall,—

(*a*) in the case of a permanent alienation, follow the procedure laid down in rule II (*i*); and

(*b*) in the case of a temporary alienation, refer it for the orders of the Deputy Commissioner if he thinks the claim is substantiated. Otherwise he should refuse to sanction mutation as in rule II (*ii*).

5. (*i*) A more difficult class of cases is where the alienee, though shown in a record-of-rights, is described by a class name which is not one of the well recognized sub-divisions of the notified tribe to which he claims to belong; *e.g.*, where a Harni claims that the Harnis are Rájpúts.

(*ii*) Here there is a general question for decision, *viz.*, whether the contention is correct that the class concerned does in fact belong to one of the notified tribes; and the decision would be of importance because all future applications by members of the class would in the district concerned be dealt with in accordance with it.

(*iii*) The Financial Commissioner, accordingly, directs that, whenever a case of this kind arises, the Revenue Officer shall report it to the Deputy Commissioner, who will himself make an inquiry, and unless he rejects the application, report the result to the Commissioner for orders. If the Commissioner considers the case clear, he should dispose of it himself, but doubtful cases should be reported to the Financial Commissioner. It is most desirable that in dealing with cases of this class there should be uniformity of treatment throughout the province.

STATEMENTS.

STATEMENT No. I.

(*Vide* paragraphs 29 to 34 of the text).

TOTALS OF SALES, MORTGAGES AND REDEMPTIONS AND OTHER TRANSFERS FOR THE YEAR ENDING JUNE 15TH, 1906.

Proceedings of His Honour the Lieutenant-Governor of the Punjab, in the Revenue and Agriculture (Agriculture) Department, No. 81, dated 19th May 1908.

READ—

The annual report on the working of the Punjab Alienation of Land Act, XIII of 1900, for the year ending the 30th of September 1907.

REMARKS.—The amendment of the Punjab Alienation of Land Act by Punjab Act I of 1907 was noticed in paragraph 1 of the review of the report for the year ending September 1906. The amended Act came into force on May 9th, but it is too early to gauge as yet the effect of the abolition of the "statutory agriculturist." The only new tribes notified in the past year were the Awans in the Amritsar district, the Khaggas, Sainis and Gujars in Lyallpur, and the Arains in Muzaffargarh. A number of other tribes were included in the notification regarding the Lyallpur district, but these had already been declared to be agricultural tribes under section 4 of the Act in the districts out of which Lyallpur was formed. As regards the proposal of the Deputy Commissioner, Jhelum, to notify as an agricultural tribe all army pensioners who do not belong to agricultural tribes, Sir T. Gordon Walker is in entire agreement with the opinion of the Financial Commissioner expressed in paragraph 6 of the report, and he thinks that it would be quite impossible to accept the view of the Commissioner as to what it is open to Government to do under the provisions of the Act. The suggestion is not really a new one, having been already considered on several occasions, though not exactly in the same form. The Lieutenant-Governor has no doubt that it would be a misuse of the Act to employ its provisions for the purpose of rewarding or encouraging any set of persons, however deserving, while there are the other strong objections noticed by the Financial Commissioner.

2. As regards permanent and temporary alienations, His Honour notes that the Financial Commissioner is watching the tendency to evade the provisions of the law by granting long leases which are in effect equivalent to mortgages. He is prepared to concur in the view (paragraph 11 of report), that the restriction imposed by section 58 (*i*) of the Punjab Tenancy Act, 1887, cannot be held to be overridden by section 11 of the Alienation of Land Act, and that the latter does not give an occupancy tenant greater power of alienation, as against his landlord, than the former Act permits; but the question is one for the revenue courts to decide.

3. A comparison of the figures of transfers of land in the past year with those of the year 1905-06 loses perhaps some of its value from the fact that the earlier period was one of scarcity in a part of the province, while fortunately the past year has been a favourable one. But after making all allowance for the difference in conditions it is quite clear that as regards sales at least there has been steady progress in the direction desired. The amount of land permanently transferred is less than in any year since the passing of the Act: while the average price per acre calculated on total area, which was only Rs. 37 in the year after the Act passed, has now risen to Rs. 56. As regards mortgages, the redemptions have shown a continued and most encouraging increase. During each of the last three years the area redeemed has exceeded the area mortgaged; and during the present year the combined area of the land redeemed by agricultural tribes and mortgaged to them is 290,000 acres greater than the land which they have lost by mortgage. With regard to the figures in paragraph 31 of the report showing the total cultivated area of the province under mortgage it may be noted that the full effect of the yearly redemptions in reducing the total cultivated mortgaged area will not be apparent

for some years, as the latter figure is taken from the village " statement of ownership, mortgages and assignments " which is revised only every fourth year. While, however, the figures of redemptions are satisfactory, it must be noted that the area mortgaged during the year exceeds that mortgaged during the preceding year, and is, in fact, higher than in any year since the passing of the Act. This is no doubt due in part to the action of landowners in redeeming lands under mortgage in order to re-mortgage them to greater advantage. And in any case, it must be remembered that a very large proportion of the mortgages executed since the passing of the Act are self extinguishing, and the figures relating to mortgages have not therefore the same importance as they had before 1901. The real effect of the Act in regard to mortgages will be seen in a few years time when, if the redemptions continue at the present rate, a very substantial reduction may be expected in the total mortgaged area of the province.

4. In the 27th paragraph of the report allusion is made to the question which has frequently been discussed, whether special protection should be given to the weaker tribes by grouping them separately from the stronger. The statistics in table VI seem to show that the Rajputs and Dogars have been losing some ground to the advantage of their more thrifty neighbours, of whom the most entrprising are the Jats. At the same time the position is by no means clear. In transactions among agricultural tribes only, the Jats have made a net gain of 6,255 acres by mortgage, but have lost 1,313 acres by sale. Up to the present the figures on either side are small; and the Lieutenant-Governor agrees with the Financial Commissioner that the time is not yet ripe for action with a view to protect the weaker agricultural tribes from the stronger.

5. The Financial Commissioner has taken the occasion to review (paragraphs 29—32 of report) the working of the Act since it came into force, and the facts and figures given by him are of great interest. As regards sales of land, he draws the conclusions, which are fully supported, that during the six years the result of the Act has been to put a stop to transfers from members of the agricultural to the non-agricultural class, to reduce the annual number of sales of land and the area sold, while the price per acre (which on the first passing of the Act fell heavily) has risen steadily from year to year, and is now considerably higher than at any period during the past eleven years. As regards mortgages, the situation has already been commented on in paragraph 3 of this review. It can safely be said that the agricultural tribes are as a whole not only holding their own, but are slowly recovering land both by purchase and redemption from mortgage; and that the value of land is increasing steadily both for purposes of sale and of mortgage. To this extent the Act has achieved its object, and of its popularity with the agricultural classes, whose contentment and solvency are considerations of the first importance, there cannot be the slightest doubt. The provisions of the Act will again be put to a severe test in the present year of scarcity, and it is desirable that in the report of the current year particular attention should be directed to the districts in which scarcity is most marked.

ORDERED that the above remarks be printed and circulated with the report; also that they be published in the *Punjab Gazette*, be communicated to the Financial Commissioner, Punjab, and forwarded to the Government of India, Department of Revenue and Agriculture, with the usual number of spare copies of the report.

By order of His Honour the Lieutenant-Governor,

W. M. HAILEY,

Secretary to Government, Punjab.

Punjab Government Press, Lahore—20-5-08—1926—476—K. C. M.

ANNUAL REPORT

OF THE

PUNJAB ALIENATION OF LAND ACT XIII OF 1900

As amended by Punjab Act I of 1907.

FOR THE YEAR ENDING 30th SEPTEMBER 1907.

PART I—The Working of the Act.

SECTION I.—PRELIMINARY.

Preliminary.

1. The Bill for the amendment of the Punjab Alienation of Land Act, 1900, which was before the Punjab Legislative Council when the report for last year was submitted, was passed during the year as Punjab Act I of 1907, and, having received the assent of the Governor-General in Council, became law on May 9th; the date on which it was first published in the Punjab Gazette.

Changes effected by Punjab Act I of 1907.

2. In view of the comments made in last year's report and also in the Government Review, which was published after the passing of the amending Act, any discussion of the changes made is unnecessary. Under paragraph 3 (2), proviso 2 (*b*), sanction is not necessary in the case of a gift made in good faith for a religious or charitable purpose. This exemption existed under the previous Act and it is still necessary that, as pointed out in Financial Commissioner's Circular No. 2, dated 10th May 1906 (Appendix 55 of last year's report), all cases of this class should be submitted to the Deputy Commissioner for orders that he may satisfy himself that the alleged gift is really entitled to this exemption, and is not made as an evasion of the law. In some districts attempts of the kind were detected owing to this scrutiny.

In consequence of the abolition of the statutory agriculturist, the necessary alterations have been made in the detailed Memorandum given in Part IV of Revised Revenue Circular No. 61 and in the statements submitted with this report.

Changes of tribal designation.

3. The Deputy Commissioners of four districts report cases of evasive attempt to change tribal designation from a non-agricultural to an agricultural tribe in order to defeat the provisions of the Act, and in these cases the attempts were unsuccessful. If the instructions conveyed in Financial Commissioner's Circular No. 6, dated 13th December 1906 (Appendix 61 of last year's report), are carefully followed it is probable that few such cases will remain undetected. The Deputy Commissioner of Hoshiarpur reports that he has refused the agricultural status to persons described in that district as Rajput Harni or Jat Harni, the case being one provided for in paragraph 5 of that Circular. The Deputy Commissioner of Sialkot remarks that applications are made by the rich artizans and other non-agriculturists to get their tribal designation altered into that of a notified tribe, not so much for the sake of the protection afforded by the Act, as to obtain facilities to acquire land. The Commissioner of Rawalpindi on a similar report from Attock writes—"The wish to change one's caste name existed in part of the Rawalpindi Division before the Act was passed. The reasons were then social and the desire to satisfy the recruiting officer."

Evasive description of mortgages.

4. There is some evidence of attempts being made to execute what are really mortgages under the guise of long leases. During the year the Inspector-General of Registration issued, after consulting the Financial Commissioner, for the guidance of Registrars and Sub-Registrars, his Circular No. 7, dated 15th

July 1907, which deals with the case from the point of view of the Registration Department; but, on receipt of the opinion of the Legal Remembrancer upon the Lahore cases referred to in paragraph 18 of last year's report, the officiating Financial Commissioner decided to take no action for the time being as this particular evasion of the provisions of the Act did not appear to be widespread. The Financial Commissioner will, if necessary, again consider whether action is required to check it.

Notification of agricultural tribes.

5. During the year a list of agricultural tribes was notified for Lyallpur district in Punjab Government Notification No. 79, dated 12th April 1907: (Appendix 62 to this report). Awans have been notified in Amritsar and Arains in Muzaffargarh in Punjab Government Notifications Nos. 93, dated 5th June and 1056, dated 22nd November 1907 (Appendices 64 and 67), respectively. Applications for similar notifications on behalf of Mazbi Sikhs generally and of Kanungo Gadhioks in Jhelum were rejected. The cases of the Gurkhas and of the Farukis in Karnal are still under inquiry. The proposal to amplify the Shahpur list of tribes by notifying all sub-tribes, which was designed to obviate the difficulty experienced in classifying the sub-tribes under the gazetted main tribes, was rejected by the Government of India on the ground that the difficulty did not appear to be insuperable, whereas the proposed notification of sub-tribes opened the door to large numbers of menials who frequently assume the designation of certain of the sub-tribes.

Proposal to include pensioned soldiers and officers.

6. The Deputy Commissioner of Jhelum, *à propos* of the abolition of the statutory agriculturist, proposes the inclusion of all Army pensioners, who do not belong to agricultural tribes, as an agricultural tribe, to be grouped with other agricultural tribes of the district. Upon this the Commissioner of the Division comments:—

"I think it is well worth considering whether something might not be done in the direction suggested by Major Fox-Strangways. I do not think an amendment of the Act is necessary. The wording of Section 4 gives a practically unlimited discretion to the Local Government. It is not necessary to notify a particular class as an agricultural tribe. It is sufficient to notify that they shall *be deemed to be* an agricultural tribe *for the purposes of the Act*. I think that all pensioned soldiers and officers of the Native Army might well be so notified. The measure would be intensely popular and would do away with most of the 'hard cases' which arise where the minor clans have been excluded.

Section 24 of the Act gives no assistance as it is not *exemption* from the operation of the Act that is desired but the imposition of the Act's restraints on those who are already exempt."

The Financial Commissioner does not support this suggestion. He doubts whether it would be permissible for the Local Government to declare that any persons who certainly do not belong to an agricultural tribe shall be deemed to be an agricultural tribe: and he ventures to agree with the decision of the Local Government quoted in last year's report that no tribe ought to be notified which, although it contains more or less *bonâ fide* agriculturists, is not as a tribe, a true agricultural one, and desires to come under the Act, not for protection from professional money-lenders, but in order to obtain facilities for acquiring land from other tribes.

Section II.—Permanent Transfers.

Working of rules and instructions.

7. Practically all Deputy Commissioners report that the existing rules and instructions have worked well and been found sufficient. Applications for sanction to sell to non-agriculturists are, comparatively speaking, few in number, and are only sanctioned after due enquiry, when it is found that the transfer will be a benefit to the vendor, for instance, in enabling him to redeem the rest of his land from mortgage, or when the land is required for building purposes.

Cases from Native States and other Provinces.

8. Very few permanent alienations to residents of Native States or of other Provinces are reported.

Section III.—Temporary Alienations.

Mortgages under Section 6 (*i*) *a* and 6 (*i*) *c*.

9. No mortgage in the form prescribed in Section 6 (*i*) *c* has come to light during the year, the reason no doubt being that double the land revenue plus cesses would everywhere be considered a very low rent. The most general form of mortgage is that under Section 6 (*i*) *a*, the mortgagor however remaining in possession and paying the mortgagee the customary rent in cash or kind. Such a mortgage does not involve any immediate change from the practice obtaining before the passing of the Act and it will not be until the term of 20 years expires and the mortgaged land is returnable to the mortgagor that the effect of the Act on such mortgages will really be felt.

Need for a new form of mortgage under the Act.

10. A separate reference was made to Government on the question whether a new form of mortgage should be "permitted" under Section 6 (*i*) *d* of the Act providing for (*i*) payment of rent in kind, (*ii*) fixity of tenure of the mortgagor, (*iii*) extinction of the mortgage debt in a term of years. After consulting selected officers and the Legal Remembrancer, the Financial Commissioner expressed his opinion that, though there was little objection to the proposed form of mortgage, there was a very strong probability that it would never be used. He therefore recommended that the proposal be dropped, and to this Government agreed. Almost all officers report that no need is felt for any new form of mortgage, and that the provisions on the subject work well, except for the tendency, already referred to, to grant long leases which are little different from mortgages.

Discrepancy between provisions of the Act and of the Punjab Tenancy Act.

11. It is pointed out by the Deputy Commissioner of Hissar that occupancy rights can be given on lease for 20 years under Section 11 of the Act while such rights can only be temporarily alienated for 7 years under Section 58 (*i*), Punjab Tenancy Act, 1887. It seems doubtful, however, whether the special provision of the Tenancy Act on this point would not be held to be still in force.

Section IV.—General Provisions.

Registration and work caused by the Act.

12. The Deputy Commissioner of Rohtak, in which district alone has action been taken under Section 9 (4), reports that sub-registrars have referred to him, for orders as Registrar, the mortgages executed by him under the provisions of that section as the mortgagor was not present at the time of registration. The Commissioner suggests that a proviso similar to that under Section 21A 5, exempting the Deputy Commissioner from attendance in person or by proxy, should be framed under Section 9 (4) as regards the registration of documents which he has ordered to be executed under this section. The Inspector-General of Registration will be consulted on the point.

The general report is that the provisions of the Act are now well understood and that the extra work imposed by it on Revenue officials is insignificant and is decreasing. Several officers observe that it has led to a more careful scrutiny of mutation orders. Others note that the total amount of work connected with mutations and rent-suits has decreased.

Instructions and notifications.

13. The district reports are forwarded in manuscript for reference if required.

The following notifications and instructions were issued during the year under report. They are numbered from 62, the number of the last appendix to the Report for 1905-06 being 61.

Appendix No. 62.—Punjab Government Notification No. 79, dated 12th April 1907, notifies a list of agricultural tribes for the Lyallpur district.

Appendix No. 63.—Lays down the procedure to be followed in registration in future upon the abolition of the "statutory agriculturist."

Appendix No. 64.—Punjab Government Notification No. 93, dated 5th June 1907, notifies the inclusion of the Awans in the Amritsar district in the list of agricultural tribes in that district.

Appendix No. 65.—States the cases in which Deputy Commissioners may sanction permanent alienations.

Appendix No. 66.—Issues instructions for working section 9, sub-section (3) of the Alienation Act.

Appendix No. 67.—Punjab Government Notification No. 187 A (Revenue), dated 22nd November 1907, notifies the inclusion of Arains in Muzaffargarh district in the list of agricultural tribes in that district.

Part II.—The Analysis of Statements.

STATEMENT No. I.

Gifts and exchanges.

14. The number of gifts and exchanges has fallen from 22,002 to 20,031 (the latter being the lowest figure returned in any recent year) and the area transferred from 127,788 to 127,289 acres. The decrease is however more apparent than real, because the previous figures had been swollen by the inclusion of certain re-adjustments of boundaries involving exchanges, noticed in last year's report, which have for the present practically ceased. The decrease in Montgomery and in Jhang is due to this cause, whereas in Rawalpindi the Deputy Commissioner explains that, owing to the *patwaris* being engaged in preparing the Settlement Records, practically no mutation orders, upon which Statement I is based, have been passed. As is to be expected, practically all districts in which settlement operations are in progress and in which the records are being specially brought up to date show increases. Some Deputy Commissioners note that exchanges are often made to consolidate holdings and facilitate cultivation.

Mortgages.

15. The number of mortgages with possession has risen from 87,646 to 96,505 and the total and cultivated area from 246,968 and 209,169 acres to 2,65831 and 227,737 acres respectively. The average area affected by each transaction is 2·8 acres, at which figure it has stood for the last three years. The proportion of cultivated to total area, however, has again slightly increased and now stands at 85 per cent. The largest increases occur in Gurgaon, Ambala, Hoshiarpur, Ludhiana, Ferozepore, Gurdaspur and Mianwali. But as a matter of fact all districts except Hissar, Delhi, Gujranwala, Rawalpindi and Attock show increases or at any rate stationary figures. All these districts are or have lately been under settlement and the previous figures were no doubt in consequence of the special revision of the record considerably above normal. The provincial figures for the year under report under number of transactions, total area and cultivated area mortgaged are the highest that have been returned since 1902.

Amount of mortgage-money.

16. The amount of debt secured by mortgage during the year has risen from Rs. 1,57,82,398 to Rs. 1,96,15,235 and the average per cultivated acre from Rs. 75 to Rs. 86. There has been a steady rise in the average figures from the Rs. 62 per acre returned for the year ending September 1902.

Re demptions.

17. The area annually redeemed rises from year to year and has now reached 399,097 acres, 90,367 acres in excess of the figures for the previous year. In the year 1905 the area redeemed for the first time exceeded the area mortgaged and the excess has increased in the following years, amounting in the year under report to 133,266 acres or 50 per cent. With the exceptions of Rohtak, Gurgaon and Delhi, where settlement operations are bringing to record old mortgages, the area redeemed in the year exceeds the area mortgaged in all districts. The area redeemed exceeds the area

mortgaged and area sold combined in the districts of Ambala, Hoshiarpur, Montgomery, Gurdaspur, Sialkot, Gujrat, Shahpur, Lyallpur and Ferozepore, and for the Province as a whole has reached the high proportion of 82 per cent. of this combined area. Only nine districts return a less area redeemed this year than in the previous year, but the decreases are not large except in Delhi (3,707), Rawalpindi (2,296) and Attock (2,901). Large increases are returned by Ferozepore (28,239), Mianwali (10,554), Gurdaspur (8,460), Sialkot (6,744), Gujrat (6,216) and Ambala (5,579 acres).

The amount of mortgage money discharged by these redemptions is given as Rs. 1,75,16,380 which is Rs. 20,98,855 less than the amount secured by mortgage during the year. The average per acre cultivated of the mortgage money redeemed has risen from Rs. 53 to Rs. 55 which is much less than the average per acre of the new mortgage debt. The conclusion is that land can now be mortgaged at a much higher rate than formerly.

Sales.

18. Sales and permanent transfers for value represent a total and cultivated area of 220,342 and 125,059 acres respectively against 245,518 and 152,223 acres in the last year, and the purchase-money has fallen from Rs. 1,25,56,867 to Rs. 1,23,24,700. The average price per acre of ownership rights has risen from Rs. 51·8 to Rs. 58·3 and the price per cultivated acre, from Rs. 84·5 to Rs. 103·5. The total of all transfers for value gives an average price of Rs. 55·9 per acre compared with Rs. 51·1 in the previous year. The rise has been practically continuous from the Rs. 38 per acre reported for the year ending September 1902. Among special cases of sale during the year may be mentioned the sale of the Holta Tea Estate in Kangra and the large acquisitions for the Upper Chenab Canal in Sialkot and Gujranwala, and for the Upper Jhelum Canal in Gujrat. Most districts report a continued rise in the price of land and in many it is far higher than before the passing of the Act.

STATEMENT No. II.

Applications for permanent alienation.

19. One thousand five hundred and forty-five applications for sanction to make a permanent alienation were instituted and 1,137 granted. The proportion of cases in which sanction is accorded has been gradually rising and is now 74 per cent. More than half the cases are reported from the five districts of Jullundur, Ludhiana, Amritsar, Gujrat and Jhelum. They refer chiefly to sales of land for building purposes or to provide means for redeeming other property from mortgage. The Commissioner of Rawalpindi quotes with approval six cases in Attock where sanction was accorded to the bestowal of occupancy rights on tenants with a view to the improvement of the land.

Cases under Sections 6 (1), 6 (2) and 7 (3).

20. Proceedings under Sections 6 (1) *b* and 6 (2) are still very infrequent. Fifteen institutions under Section 7 (3) are reported from the four districts of Hissar, Rohtak, Karnal and Ambala.

Cases under Section 9 (1).

21. Of the 58 cases under Sub-section (1) of Section 9, 31 are reported from Ferozpore. The Deputy Commissioner of Shahpur gives as his reason for refusal to revise an unauthorised mortgage that the mortgagor could not make up his mind as to the relief required: a reason in itself insufficient.

Cases under Section 9 (2).

22. The bulk of the institutions under Section 9 (2) come from Hissar and Rohtak districts. In Hissar in more than three-fourths of the cases application was made for the substitution of a mortgage in form (*a*) and in the remaining cases for the cancellation of the sale condition. In Rohtak new mortgages were executed in 72 cases and the sale clause struck out in 7 only. Elsewhere the sale clause was usually struck out. Many Deputy Commissioners refer to the difficulties which arose before the passing of the amending Act from the refusal of the mortgagor to execute the new mortgage, but only the Deputy Commissioner of Rohtak reports having taken any action under the extended powers given by Section 9 (4) of the Act as amended.

Miscellaneous proceedings.

23. A large number of the proceedings returned under column 10 of Statement II were applications for certificates by statutory agriculturists made before the enactment of Act I of 1907. The majority of the 275 cases reported from Muzaffargarh were mutation cases returned for review by the Collector. The scrutiny of mutation cases relating to gifts for religious and charitable purposes ordered in Financial Commissioner's Circular No. 2, dated 10th May 1906, contributes an appreciable number of institutions under this head; and a few applications for change of tribal designation or for inclusion in the list of agricultural tribes are reported.

Statements No. III to VI.

Mortgages and sales.

24. From StatementNo. Vit will be seen that agricultural tribes have mortgaged 10,325 acres more than they took on mortgage. The excess is much smaller than in the previous year and the reduction now shewn is the fourth in succession which has been returned in this statement. In the districts of Kangra, Ludhiana, Ferozepore, Montgomery, Lahore, Amritsar and Gujranwala, members of agricultural tribes have taken more land on mortgage than they have given.

The net area gained by agricultural tribes by sales is 4,000 acres. The chief losses occur in Sialkot, Gujranwala, Gujrat and all the old settled districts of the Multan Division: whereas Hissar and Ferozepore shew large gains amounting in the case of the former to over 3,000 acres. The Deputy Commissioners of Sialkot and Gujrat attribute the losses in their districts to acquisitions by Government for canal projects and in Gujranwala the cause is probably the same. In the south-west of the Province the losses are probably due to the operations of the statutory agriculturist. The Deputy Commissioner of Multan reports that this class of owner had been particularly active during the year in anticipation of his extinction.

Mortgages by zamíndárs.

25. It is practically only in the Central Punjab that members of agricultural tribes take land to any large extent on mortgage—and of the main tribes, the Jats, Arains and Kambohs are the only ones which shew more land taken than given on mortgage. Throughout the province generally Jats have gained 4,365 acres in mortgage transactions, but in the two Divisions of Lahore and Jullundur with Ambala the gain is 7,567 acres. In the Rawalpindi and Multan Divisions, where the Jats are principally Mussalman, losses are recorded in the majority of districts. In the Ferozepore district alone Jats have taken during the year 4,604 more acres than they have lost.

The case of the Arains is somewhat similar, as out of a total gain of 2,247 acres the central districts are responsible for no less than 2,032.

To Rajputs generally a mortgage does not seem to appeal, and in practically every district members of Rajput clans are shewn as having mortgaged to others more than they took on mortgage. The Kangra Rajputs are somewhat exceptional and have gained a small area. To the Gujars the same remarks apply; their total losses on mortgages amount to 2,177 acres, the districts of Gujrat and Attock contributing about half to this result.

In all districts (except Jhang) in which they are notified the Biloches have gained in mortgage transactions and especially in Muzaffargarh and Dera Ghazi Khan. In Gujranwala the Syads have done well but they have lost heavily in Muzaffargarh and more especially in Dera Ghazi Khan: as have the Pathans of Mianwali.

Sales by zamíndárs.

26. Jats shew a net increase in sale transactions of 2,564 acres only: the general figures are very similar to those reported last year. Large gains are shewn again in Hissar (6,861) and Ferozepore (2,073) and large losses in Sialkot and Gujranwala (due no doubt in great measure to acquisitions for Government) and also, as last year, in Dera Ghazi Khan and Multan. The Rajput tribes again shew a steady loss this year of 2,286, which would be larger but for the gain of 1,434 shewn in Hissar. The loss is fairly distributed over all districts; being greatest in Hoshiarpur (843) and Ferozepore (722) though small gains (apart from Hissar) are shewn in Rohtak, Kangra, Rawalpindi,

Jhang, Multan and Dera Ghazi Khan. The gain reported for the Arains, 987 acres, is fairly general in all districts, Mianwali (664) and Delhi (330) alone shewing any large loss. The gains by Jats and Rajputs in Hissar have been, it will be observed, from non-agricultural tribes.

Of the tribes of local importance only, it may be pointed out that the Awans have done well in Shahpur and Attock and Biloches in Mianwali and Dera Ghazi Khan. Pathans have gained very largely at the expense of the Syads in Dera Ghazi Khan, but have lost ground in Mianwali; as have the Dogars in Ferozepore.

Grouping.

27. The Deputy Commissioners of Ludhiana and Ferozepore again refer to the advisability of grouping Jats separately in order to prevent them from ousting weaker tribes, especially Rajputs and Dogars. The question has been noticed in the last two reports. The Deputy Commissioner of Ludhiana recommends separate grouping, but the Deputy Commissioner of Ferozepore, in pointing out that the chief losers are Dogars, Rajputs and Pathans, remarks that members of these tribes will never be able to turn their land to the best advantage, and that there is little economic and not much political or social advantage in preserving these tribes as land-holders. At the same time he thinks that Muhammadan Jats might be grouped separately from Sikh and Hindu Jats. On the figures for Ludhiana it does not appear that any separate grouping is required in that district. In Ferozepore, Rajputs, Dogars and Pathans have lost to Jats 941, 321 and 93 acres by mortgage and 622, 581 and 200 acres by sale. The Mussalman Jats in Ferozepore have only lost 288 acres by mortgage and 144 by sale and as far as this clan is concerned no separate grouping is required. The Financial Commissioner does not think that the time has yet come for grouping certain agricultural tribes separately in order to save them from having their lands acquired by other tribes, but the matter requires watching.

STATEMENTS No. VII AND VII (*a*).

Redemption from mortgage.

28. Of 399,097 acres, the total area redeemed from mortgage during the year, 301,073 acres were redeemed by members of agricultural tribes. The proportion is 75·4 per cent. which is the highest yet reported. From Statement VII (*a*) it will be seen that in the Province as a whole zamindars have gained by redemption 84,119 acres more than they mortgaged. In 1905-06 the gain was 23,523 and in 1904-05, 5,030 acres: previous to the latter year the balance had been the other way. Rohtak, Gurgaon, Delhi, Karnal, Hoshiarpur and Jullundur are the only districts which do not share in the increase, but of them too the decreases are considerable in Rohtak and Gurgaon only, both of which districts are under settlement. Ferozepore, Multan, Mianwali and Dera Ghazi Khan all shew large gains. Exceptionally large areas have been redeemed by Jats in Hissar and Ferozepore and by Pathans in Mianwali. In explanation of the redemptions returned for their districts, the Deputy Commissioner of Sialkot explains that a large number related to the land acquired for the Upper Chenab Canal, and the Deputy Commissioner of Lyallpur that many were due to loans of money given by the excellent agricultural bank started by Kabir Khan, Kharral, in the Jaranwala sub-tahsil and in the Gugera tahsil of Montgomery. In all districts, except Rohtak, Delhi, Lahore, Gujranwala, Rawalpindi and Attock, which shew slight decreases, the amount of mortgage debt discharged by agricultural tribes is larger than, and in some cases nearly double, that recorded last year, the total being Rs. 1,30,72,187 against Rs. 96,13,503.

Part III.—General Remarks.

General.

29. The Alienation of Land Act came into force from the 8th June 1901, and has now been in operation for more than six years during which a considerable part of the province has suffered from severe drought in 1905-06 and again in the current year (1907-08). We have therefore had sufficient experience to make it possible to judge with some confidence of the effect which the

Act has had and is likely to have on the agricultural community. The following statistics have been extracted from the various reports; those for the years previous to 1901-02 having been obtained by deducting from the totals of the province as formerly constituted the figures for the districts transferred to the North-West Frontier Province in November 1901, so that throughout the statistics are those for the Punjab as now constituted. They are compiled from the lists of mutations sanctioned during the year after enquiry by a Revenue Officer.

30. The totals for the province for sales of land are as follows :—

Sales.

Sales of land in the Punjab.

Year.	Number of transfers.	Area transferred. Total.	Area transferred. Of which cultivated.	Revenue in rupees.	Price in rupees.	Price per acre. Total.	Price per acre. Cultivated.	Price per rupee of land revenue.	Sales by agricultural tribes.	Sales to agricultural tribes.	Sales by statutory agriculturists.	Sales to statutory agriculturists.	Sales by others.	Sales to others.
		Acres.	Acres.			Rs.	Rs.	Rs.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.

Average of 5 years ending 1906...	43,191	252,627	150,191	1,30,528	1,12,88,973	45	75	86	149,989*	148,948	20,591	22,926	60,938	59,624
1906-07	40,681	220,342	125,059	1,22,009	1,23,24,700	56	98	101	152,445	156,445	...	...	67,819	63,819

* This and the following average are for four years only.

During the five years before the passing of the Act the number of sales effected had been rapidly increasing, until in 1900-01 (a year of drought), they amounted to nearly 57,000 ; in the following year they dropped to 46,000, and in the year after to 39,000 ; they then rose again to 46,000 in 1905-06 (a year of drought) but this number was still less than in any of the five years before the Act. The average number of sales for the five years before the Act was 51,000 : for the five years after the Act it has been only 43,000, and for last year it was only 41,000, the smallest number for any of the 11 years with the exception of 1902-03.

The total area transferred by sale during the year had also been increasing rapidly, till in 1900-01 it reached 318,000 acres. It dropped in the next year to 283,000 acres, and continued to fall for the next three years. The average area transferred during the five years before the Act was 288,000 acres; for the five years after the Act it was only 253,000 acres, and last year it was only 220,000 acres, the smallest area for any of the 11 years.

If the figures for cultivated area transferred be taken, the result is much the same. For the five years before the Act the average area transferred was 173,000 acres; for the five years after the Act it was 150,000 acres: and last year it was 125,000 acres, the lowest for the 11 years.

The average price paid per acre of total area averaged Rs. 46 for the five years before the Act: it fell in the following two years to Rs. 37 and Rs. 39, but rose again, and the average for the five years after the Act was Rs. 45: last year it rose further to Rs. 56, the highest figure for the 11 years. If the price paid be spread over the cultivated area sold, the average for the five years before the Act is Rs. 78, for the next five years Rs. 75 and for last year the figure is Rs. 98, the highest yet recorded.

A better indication of the market value of land is to be got by calculating how the price paid stands in relation to the land revenue assessed on the land sold, seeing that, broadly speaking, the assessment varies in proportion to the quality of the soil and its rent-paying capacity. For the five years before the Act the price paid averaged 75 times the land revenue charged on the land, for the following five years it averaged 86 times and last year it was 101 times that sum. (To judge from the figures for the last two years average land in the Punjab can be sold for 100 times the annual land revenue assessed upon it).

General statistics are not available for the areas sold by and sold to members of agricultural tribes before the passing of the Act, but the enquiries then made showed that land was passing rapidly out of the hands of the agricultural classes into those of the non-agricultural classes. The statistics for the four years ending 1905-06 show that, on the average, agricultural tribes sold 150,000 acres and bought 149,000 acres: last year they sold 152,000 acres and bought 156,000 acres, a gain of 4,000 acres. During those four years "statutory agriculturists," *i. e.*, members of non-agricultural tribes, who had already obtained a footing in a village, were allowed to purchase other land in the village without sanction, and availed themselves of this privilege to increase their holdings by an average of 2,300 acres a year, while other non-agriculturists lost ground by on the average 1,300 acres a year. Last year by the amending Act the "statutory agriculturist" was placed on the same footing as the non-agriculturist to which class he properly belonged, and during the year all classes of non-agriculturists sold to members of agricultural tribes 4,000 acres more than they bought from them.

As regards sales of land, the conclusions are irresistible that the passing of the Act caused an immediate and very marked diminution in the number of sales and in the area sold; that, while, before the Act, land was rapidly passing out of the hands of the agricultural tribes into those of non-agriculturists at an increasing pace, the Act has enabled those tribes to hold their own and they are now beginning to recover land that had passed from them: and that, while the selling price of land fell for the two years succeeding the passing of the Act, it has risen again, and is now higher than it ever was before.

31. The totals of the province for mortgages of land are as follows :—

Mortgages.

Mortgages of land in the Punjab.

Year.	Total cultivated area under usufructuary mortgage.	Percentage of cultivated area under usufructuary mortgage.	Cultivated area redeemed.	Cultivated area mortgaged.	Mortgage-money per rupee of revenue of area mortgaged.	Total area redeemed by agricultural tribes.	Total area mortgaged by agricultural tribes.	Total area mortgaged to agricultural tribes.	Total area mortgaged to others including statutory agriculturists.

1897-98	...	...	307,365	245,240	52	...	...	...	...
1898-99	...	...	255,804	382,813	54	...	...	...	...
1899-1900	...	...	197,919	335,905	54	...	...	...	...
1900-01	...	...	185,050	294,610	54	...	...	...	...
* Average of 5 years ...	...	...	235,395	327,065	...	...	..	...	..
1901-02	3,625,097	13·5	184,462	207,501	53	...	...	...	...
1902-03	3,560,742	13·3	160,912	199,505	56	124,679	169,858	132,569	73,345
1903-04	3,868,587	14·1	182,895	206,724	59	162,829	193,640	153,192	80,759
1904-05	3,671,602	13·3	214,633	194,738	61	199,179	194,149	176,675	60,187
1905-06	3,750,194	13·5	242,889	209,169	65	225,118	201,595	186,113	60,680
Average of 5 years ...	3,695,244	...	197,118	203,527	...	*177,951	189,810	162,142	68,743
1906-07	3,749,905	13·3	319,044	227,737	70	301,073	216,954	206,629	59,04

* This and the following averages are for four years only.

On the average of the five years before the Act the cultivated area annually redeemed from mortgage was 235,000 acres : for the five years after the Act it was only 197,000 acres, but it has been rapidly rising and last year the area redeemed was 319,000 acres, the largest figure for the 11 years. The average cultivated area mortgaged during the year was for the five years before the Act 327,000 acres, and for the five years after the Act 204,000 acres : last year it was 228,000 acres. On the average of the five years before the Act the area mortgaged exceeded the area redeemed by 92,000 acres annually : for the five years after the Act the excess averaged only 6,000 acres. The tide turned in 1904-05 and in every year since the area redeemed has exceeded the area mortgaged, the excess last year being 91,000 acres. The total cultivated area returned as under usufructuary mortgage has fallen from 38,69,000 acres or 14·1 per cent. of the total cultivated area of the province in 1903-04 to 3,750,000 acres or 13·3 per cent. of that area last year. The average mortgage-money per cultivated acre which never exceeded Rs 54 before the Act, has gone up steadily since the year succeeding its passing, and is now Rs. 70.

Last year members of agricultural tribes redeemed 84,000 acres more than they mortgaged : on the average of the previous four years they had mortgaged 12,000 acres more than they redeemed. On the average of those years the area taken on mortgage by agricultural tribes was 162,000 acres to 69,000 taken by non-agriculturists : last year the proportion was 207,000 acres to 59,000.

As regards mortgages therefore the area annually mortgaged is now much less than the area redeemed, and the total area under mortgage is gradually decreasing : the proportion held on mortgage by non-agriculturists is also decreasing ; so that the agricultural tribes are recovering their hold on the land in the matter of mortgages as well as in that of sales. At the same time the amount per acre that can be raised on a mortgage is steadily increasing and is higher than ever before.

Conclusion.

32. So much for statistics. To turn to reports, practically every Deputy Commissioner in the province remarks that the Act continues to be popular with the landowning tribes, and not one reports the contrary. Mr. Douie writes :—

"As Settlement Commissioner for four years my duties took me into many parts of the province, and I have never met a genuine agriculturist who did not approve of the Act."

Mr. Wilson's own experience has been similar. Soon after the Act passed, he had frequent opportunity of learning the warm approval it had gained from the Muhammadan peasantry of the West Punjab. He has recently toured through the Sikh Jat districts of the Central Punjab, and the Delh Division, which suffered from severe scarcity in 1905-06 and is again affected by wide-spread drought. Everywhere the people are loud in their expressions of gratitude to Government for passing this Act, which they say has saved their land to themselves and to their children. No member of an agricultural tribe has a word to say against it. They declare that it has not lessened the value of their land, that it has not contracted their credit to any serious extent, that it has reduced the rate of interest to solvent landowners, because now the loan is made on a business-footing and without the ulterior object of obtaining possession of the land : that it has greatly encouraged thrift by making it less easy for a reckless landowner to raise money on his land : and that it has led to a very marked decrease in the ruinous litigation, which was the bane of the Punjab peasant.

Deputy Commissioners throughout the province express similar views, and add that they have experienced no difficulty in realising the land revenue and other demands of Government, that the Act has caused no appreciable increase of work to officials, and that it is now well understood by the people and is working smoothly. Attempts at evasion have been comparatively very few, and those that have been successful quite insignificant in number. There can now be no doubt that the Act has been eminently successful in its main object of putting a stop to the rapid transfer by sale of land from the agricultural to the non-agricultural classes. It has had other results, not altogether expected, but all of them most beneficial to the peasantry. It has greatly encouraged thrift and reduced litigation, and has, with the aid of rise of prices, accumulation of capital and growing prosperity, made it possible for the agricultural classes to redeem much of their land from mortgage. Above all, it has earned the universal approval and gratitude of the hereditary landowners of the Punjab, some three millions in number, and has shown them that Government sympathises with their dearest wish, which is to hand on their ancestral land to their children's children.

It is of course disliked by the non-agricultural classes. It was not aimed at them in any hostile spirit: but, in order to preserve the land to its hereditary owners, it was necessary to curtail the opportunities formerly enjoyed by members of other classes of getting a hold on the land. They have in the main acquiesced in the change, and they cannot deny that it has benefited their agricultural fellows. They have little difficulty in finding profitable investment for their capital in other directions, especially in the distribution of produce and the establishment of markets and factories ; and the income-tax returns afford no reason for supposing that their net profits have been seriously reduced. The one objection to the Act is that it prevents the commercial and professional classes from gratifying their ambition of becoming landowners and has thereby earned their disapproval and, in some cases, resentment. Opinions may differ as to whether this objection outweighs its many and marked advantages. But there can be no doubt as to what is the unanimous opinion on this point of the agricultural population of the Province :—and with them the Financial Commissioner unhesitatingly agrees.

APPENDICES.

TABLE OF CONTENTS.

62. Punjab Government Notification No. 79, dated 12th April 1907.

63. Inspector-General of Registration's Circular No. 5, dated 11th May 1907.

64. Punjab Government Notification No. 93, dated 5th June 1907.

65. Financial Commissioner's Circular No. 8, dated 2nd August 1907.

66. Registrar, Chief Court, Punjab's Circular Memo. No. 4129-G., dated 24th October 1907.

67. Punjab Government Notification No. 187-A., dated 22nd November 1907.

[No. 62.]

The 12th April 1907.

No. 79.—*Notification.*—In exercise of the powers conferred by Section 4 of Punjab Alienation of Land Act, 1900 (XIII of 1900), His Honour the Lieutenant-Governor, with the previous sanction of the Governor-General in Council, is pleased to determine that for the purposes of the said Act—

(*a*) all persons who both either hold land or ordinarily reside in the Lyallpur district and also belong to any one of the tribes hereinafter named shall be deemed to be an "agricultural tribe" within that district, that is to say,

1. Arain;
2. Bhatti;
3. Biloch;
4. Gujar;
5. Jat;
6. Kamboh;
7. Khagga;
8. Kharral;
9. Kokara;
10. Koreshi;
11. Pathan;
12. Rajput;
13. Saini;
14. Sayad;

(*b*) all such "agricultural tribes" within the district of Lyallpur shall be deemed to be a group of agricultural tribes.

[No. 63.]

Circular No. 5, dated 11th May 1907, from Inspector-General of Registration, Punjab, to all Registering Officers in the Punjab.

As the statutory agriculturist has now been abolished, I have the honour to point out that any deed, which has hitherto been legal only on the ground that it was in favour of a man who came within the definition of "agriculturist", in Act XIII of 1900, should not in future be accepted for registration, but should be returned to the presenter in accordance with Circular No. 11 of 12th December 1901.

2. The whole of Circular No. 2 of 19th May 1904, and so much of Circular No. 9 of 15th November 1901 as deals with the agriculturist, may be regarded as cancelled.

[No. 64.]

The 5th June 1907.

No. 93 *Notification.*—In exercise of the powers conferred by Section 4 of the Punjab Alienation of Land Act, 1900 (XIII of 1900), as amended by Section 5 of Punjab Alienation of Land Amendment Act, 1907 (Punjab Act I of 1907), and in continuation of Punjab Government Notification No. 63, dated 18th April 1904, the Lieutenant-Governor of the Punjab is pleased to determine that for the purposes of the said Act—

(*a*) all persons either holding land or ordinarily residing in the Amritsar district and belonging to the Awan tribe, shall be deemed to be an "agricultural tribe" within that district;

(*b*) the Awan tribe shall be deemed to belong to the group of agricultural tribes already notified in the Amritsar district in Punjab Government Notification No. 63, dated the 18th April 1904.

[No. 65.]

Financial Commissioner's Circular Letter No. 8, dated Lahore, 2nd August 1907.
To—All Revenue Officers in the Punjab.

In inviting attention to the provisions of Section 2 (2) and (3) of the Punjab Alienation of Land Amendment Act, 1907, which have expressly defined 'any right of occupancy' as 'land' and 'grants of occupancy rights' as 'a permanent alienation', I am directed to say that there is no reason why Deputy Commissioners should not sanction such alienations where the object is to promote agricultural development by giving favourable terms to new settlers and the like.

2. Accordingly in cases where these conditions are fulfilled and no evasion of the Act is contemplated, such alienations may be freely sanctioned.

[No. 66.]

Registrar, Chief Court, Punjab's Circular Memo. No. —4129-*G.*,

dated 24th October 1907.

To—All Civil Courts in the Punjab.

For paragraph 3 of this Court's Circular Memo. No. 3-1118-G., dated 13th March 1902, regarding the Punjab Alienation of Land Act, substitute the following:—

3. Another difficulty in the working of section 9, sub-Section 3, relates to the stage at which a reference should be made by the Civil Courts to the Deputy Commissioner. The question is whether the Civil Court should not postpone reference until it has recorded a finding as to the validity of the mortgage, or on any dispute concerning limitation. The section itself is silent on the subject, but the Act must be construed reasonably, and the Hon'ble Judges are therefore pleased to issue the following directions :—

(*a*) In "proceedings", *i.e.*, in proceedings under Section 8 of Regulation XVII of 1806, the action of the District Judge is purely ministerial, and the only enquiry he should make is to ascertain, before he refers the proceedings to the Deputy Commissioner, whether the mortgagor is a member of an agricultural tribe, if the point is in dispute. If the Deputy Commissioner, on a reference being made, returns the proceedings without striking out the clause as to conditional sale, the District Judge should proceed to serve the notice on the mortgagor, as required by Regulation XVII of 1806.

(*b*) If a civil suit is instituted, on a mortgage to which Section 9 of the Act applies, the Civil Court shall not make a reference to the Deputy Commissioner under sub-section 3 of section 9 until it has disposed of any objections brought by the mortgagor against the validity of the mortgage, or of any plea raised by him on the point of limitation.

[**No. 67.**]

The 22nd November 1907.

No. 187 *A.—Notification.*—In exercise of the powers conferred by Section 4 of the Punjab Alienation of Land Act, 1900 (XIII of 1900), as amended by section 5 of Punjab Alienation of Land Amendment Act, 1907 (Punjab Act I of 1907), and in continuation of Punjab Government Notification No. 63, dated 18th April 1904, the Lieutenant-Governor of the Punjab is pleased to determine that, for purposes of the said Act—

(*a*) all persons either holding land or ordinarily residing in the Muzaffargarh district and belonging to the Arain tribe shall be deemed to be an "agricultural tribe" within that district;

(*b*) the Arain tribe shall be deemed to belong to the group of agricultural tribes already notified in the Muzaffargarh district in Punjab Government Notification No. 63, dated the 18th April 1904.

Proceedings of His Honour the Lieutenant-Governor of the Punjab in the Revenue and Agriculture (Agriculture) Department, No. 100, dated 23rd April 1909.

READ—

The annual report on the working of the Punjab Alienation of Land Act, XIII of 1900, for the year ending the 30th September 1908.

REMARKS.—This report has been received a fortnight late.

The Land Alienation Act has now stood the test of a year of severe scarcity; and there is nothing to show that it has caused any undue contraction of credit or has operated to prevent the agriculturist from successfully tiding over the period of temporary distress. Its effects are however obscured by the very liberal suspensions of land revenue and distributions of Government loans that have been made, as well as by the prevalence of high prices for grain and of good wages. During the year 40¾ lakhs of rupees were suspended out of the revenue and 22¼ lakhs were advanced as takavi, that is, 63 lakhs of rupees, which in less lenient times the people would have raised from the money-lender at high interest or by alienation of their lands, were granted to them by Government free of interest or nearly so. This result must be satisfactory to the peasantry, but the risk of demoralization must be watched.

2. There are no returns of the amount of floating debt incurred in the past year, but the figures of sales and mortgages of land afford a clear indication of the improved capacity of the zamindar to weather a season of scarcity. The total area of land sold in the past year was 9 per cent. below the average of the quinquennium ending 1906 and 20 per cent. below that of the previous five years; the greater part of the land sold was bought by members of agricultural tribes, and the average price of cultivated land per acre was Rs. 97 or only Re. 1 less than the record price of the preceding year. The price equalled 108 times the land revenue assessed.

3. Turning to the figures of mortgages; it appears that though the cultivated area mortgaged has increased, it is considerably less than the area redeemed, and on the balance an area of 75,600 acres of cultivated land was freed from the burden of mortgage in the past year. Moreover, of the total area mortgaged, 73 per cent. was mortgaged to members of agricultural tribes. It is a feature of the history of the Act that since the year after its passing the area redeemed has steadily increased, and now for the fourth year in succession it has exceeded the area mortgaged. The conclusion arrived at in the second clause of paragraph 14 of the report is not apparently warranted, as the area redeemed (293,256 acres) presumably includes land redeemed from agriculturist tribes.

4. On the other hand, the total amount of mortgage-debt has increased by 35½ lakhs of rupees in the year 1907-08. Moreover, while a net area of 339,524 acres has, during the past four years, been released from mortgage, the burden of debt on the land has risen by over a crore of rupees. This at least shows how enormously the value of land has increased, as a much smaller area is now required to secure a much larger debt.

5. With regard to the position of members of agricultural tribes, whom the Act is specially designed to protect, the analysis of results contained in the last paragraph of the report proves that they have more than held their own in the past year both in the matter of sales and of mortgages, and it is abundantly clear that the Act is producing the effect which it was designed to have in preventing the land from passing from their hands. Moreover, the peasant is undoubtedly restricting his borrowing on agricultural land, for, whereas the amounts raised by sale and mortgage—after deducting the sums used for redemptions—were in the three years before the passing of the Act 265, 253 and 245 lakhs of rupees, during the last three years they have been only 142, 144 and 163 lakhs. Thus the pace at which the land is being burdened has been decisively checked, and though it is well known that the peasants' homesteads

instead of their land are in many cases being used as security, the country people would seem to be learning slowly, but unmistakeably, under the influence of the spread of education, the institution of co-operative credit and other social movements, the lesson of thrift.

6. The burden of work caused by the Land Alienation Act does not appear to be heavy. Many of the questions raised in the report, though interesting, are such as must be referred separately for orders. Sir Louis Dane is inclined to think that the time has come when a separate report on the working of this Act is no longer necessary. He would therefore ask the Financial Commissioner to consider the question of its abolition or at least of its curtailment. A note of the main results of the year's working in the Land Revenue Administration Report might be sufficient.

7. It is understood that the difference between the total of column 8 of statement No. I and the statistics of mortgages contained in other statements is due to the inclusion in the former statement of 184 acres of land mortgaged in the Simla district where Act X of 1904 is not in force, and of 10,640 acres of land mortgaged to Government by a ward of Court in the Montgomery and Ferezepore districts.

ORDER.—Ordered that the above remarks be printed and circulated with the report; also that they be published in the *Punjab Gazette*, be communicated to the Financial Commissioner, Punjab, and forwarded to the Government of India, Department of Revenue and Agriculture, with the usual number of spare copies of the report.

By order of His Honour the Lieutenant-Governor,

H. P. TOLLINTON,

Offg. Secreary to Government, Punjab.

Punjab Government Press, Lahore—24-4-09—117—565—K. C. M.

ANNUAL REPORT

ON THE

PUNJAB ALIENATION OF LAND ACT, XIII OF 1900,

As amended by Punjab Act I of 1907.

FOR THE YEAR ENDING 30th SEPTEMBER 1908.

PART I.—The Working of the Act.

Character of the year.

The year to which this report relates was the first year in which really acute agricultural distress has been general in the Province since the passing of the Land Alienation Act: and the policy embodied in the Act was put to a severe test. In commenting on a comparison of the figures for alienations in the scarcity year 1899-1900 in Ambala before the Act came into force and for the year under report the Commissioner draws the inference that, to pay the Government demand in a time of scarcity, the peasant used to sell his land or a portion of it in preference to applying for a suspension of land-revenue, whereas now the land-revenue is suspended and the peasant has Government as his creditor instead of the money-lender. He characterises this result as highly satisfactory.

The amount of land-revenue suspended during the year reached a very high figure; but this is in a large measure due to the more liberal policy pursued under the instructions of the Government of India in order to avoid putting pressure on the revenue-payers in periods of scarcity. It has the effect pointed out and there is no doubt that Government is a better creditor for the peasant than the village banker as it charges no interest on its arrears and is ready to remit them after a series of bad years.

Some Deputy Commissioners ascribe the extraordinary demand for *takkavi* entirely to the effect of the Act in a year of bad harvests: others, more cautiously, state that it is only one of several causes. The Commissioner of Lahore writes:—"Is not this phenomenon (unprecedented applications for *takkavi*) due to a combination of circumstances, high prices and shortage of grain supplies, the latter caused very much by unusually large exports in August 1907 immediately after a poor wheat harvest?" It is no doubt also partly due to the greater liberality of Government in providing funds for such loans and to the simplification of the procedure and especially to the disbursement of petty loans in the village by peripatetic officers, which has made it much easier for the peasant to obtain a small loan at a low rate of interest from Government in time of need.

Interpretation.

2. In the judgment published as Punjab Record, No. 4 (Revenue) for July 1908 the Financial Commissioner has held that Section 19 of the Act extends to the proceedings of revenue officers under Chapter II, so that an order by a Deputy Commissioner under Section 3 (3) granting or refusing the sanction required by Section 3 (2) is not final.

The interpretation placed on paragraph 11 (*iv*) and (*viii*) of Financial Commissioner's Circular letter No. 3441, dated 5th June 1901, appears to lack uniformity, as some Deputy Commissioners hold that they cannot under (*viii*) sanction the alienation to a money-lender of land required for building purposes, sanction to which is allowed by (*iv*). The Commissioner, Rawalpindi, writes:—"I am inclined to think that, as regards transfers to money-lenders, Deputy Commissioners might be now given the full power allowed them by the Act. They could state, when submitting quarterly business statements, the number of cases in which sanction had been given and the area involved."

The Financial Commissioner thinks that possibly the prohibition prescribed in paragraph 11 (*viii*) may now be relaxed and will take steps to ascertain the general opinion on the subject.

One effect of the passing of the amending Act, which is noticed by several Deputy Commissioners, is that the permanent alienation of land which was acquired under the provisions of clause 3 (*b*) of the original Act by a statutory agriculturist no longer requires sanction when the alienee is not a member of an agricultural tribe. The area so affected must, however, be small.

The Deputy Commissioner of Rawalpindi reports that in a case dealt with in the course of the year some doubt arose as to whether the definition of land given in Section 2, sub-section 2, did or did not cover the rights of a mortgagee with possession. On a reference to the Commissioner it was held that it did. The reference was in connection with a proposal by a Civil Court to sell mortgagee's rights belonging to a member of an agricultural tribe in a case where satisfaction of the decree could not, for certain reasons, be had by farm. He says: "It may be doubted whether it was ever contemplated that Section 16 (1) would operate as a bar to such a sale. It would not, however, be safe to alter the definition in Section 2 (3) so as to exclude the rights of a mortgagee. Were this done, a member of an agricultural tribe could mortgage land in perpetuity to a relative who could then sell to anyone he wished." The Deputy Commissioners of Ferozepore and Ludhiana both note that the interpretation followed in Rawalpindi is followed in their districts also, and there is no doubt that it is correct, and that it would be unsafe to alter the Act in this respect.

Notification of tribes.

3. During the year the Kanets of Ambala, the Dogars of Gujranwala, the Khaggas, Bodlas and Koreshis of Montgomery, the Arains of Jhang, the Koreshis of Gujranwala and the Baloches of Lahore were notified as agricultural tribes in those districts—*vide* Appendices Nos. 69 and 71—75 to this report. The claim of the Farukis of Karnal was rejected by the Financial Commissioner after careful consideration. The question of notifying the Sheikh Ansaris of Jullundur as an agricultural tribe was again raised by the Commissioner of Jullundur, but as they are not true agriculturists the Financial Commissioner was unable to recommend their notification. The Deputy Commissioner of Ferozepore has re-opened the case of the Ferozepore Sayyids, the inclusion of whom in the district group was negatived in Punjab Government letter No. 555-S., dated 19th June 1906, and further inquiries are being made. The case of the Gaur Brahmins of the Delhi division is still under investigation. Recommendation has been made to Government that this tribe should be told definitely that they will not be gazetted in the same group as the other notified agricultural tribes of the district, and that they should be asked if they wish to be gazetted as a separate group.

Alteration of tribal designation.

4. The instructions issued with Financial Commissioner's Circular No. 6, dated 13th December 1906, seem to be working satisfactorily. Frequent cases arise in which application is made by tribes not included in the group notified for the district to have the tribal designation altered to one so included. Many of these cases are quite legitimate, but they have to be investigated with care. Menials apparently frequently so apply: the Deputy Commissioner, Rawalpindi, writes :—"The Punjabi and Kashmiri lohar or weaver is a man of pluck and enterprise, who travels freely and takes service under Government often in guise of a Gakhar, Awan, etc. Apart from this the general rise in wages has given wealth to a class which will no longer submit tamely to the hectoring of the ancient proprietors of the village. I see no harm in sanctioning alienations by worn-out stocks to these more vigorous shoots and believe that a declaration of policy might usefully be issued by the Financial Commissioner in regard to the free sanction of alienations in favour of Musalman *Kamins* and Kashmiris", upon which the Commissioner comments: "The landowning community in Rawalpindi district is a very mixed one, and there is no reason why transfers to the superior artisan

tribes, lohar and tarkhan, should not be sanctioned freely." The same subject is mentioned by the Deputy Commissioners, Jhelum and Multan also. The Financial Commissioner has recently proposed to Government an addition to Financial Commissioner's Circular letter No. 3441, dated 5th June 1901, the object of which is to make it easy for thrifty members of the artisan class to become owners of small plots of land.

It has been decided on a reference concerning the Taga tribe in the Delhi district that change of religion does not in itself alter the status under the Act of a landowner, and that if a member of a Hindu notified tribe becomes a *Nau Muslim* Sheikh he does not cease to be a member of his original notified tribe.

Two cases in which a false tribe was given by the alienor at the time of registration were prosecuted in Rawalpindi under Section 82 of the Registration Act with good effect.

Evasions.

5. No particular novelty in respect of evasions of the act has been noticed. What are called *benámi* transactions are reported from most districts. The money-lender induces a member of an agricultural tribe, of whose solvency and good faith he is well assured, to take land on mortgage from the would-be borrower. In return for this the nominal mortgagee executes a bond in favour of the money-lender equal to the amount of the mortgage money, and he hands over the land to the money-lender as tenant, the rent being equal to the interest on the bond. The money-lender then very often puts in the mortgagor as a sub-tenant levying a *batai* rent. The money-lender is thus doubly secured. If the owner refuses or neglects to pay the rent, he can be ejected summarily by the money-lender, and, if the nominal mortgagee breaks faith, the money-lender has the bond to fall back upon. The fact remains, however, that the money-lender cannot enforce his claim on the land itself except as a temporary tenant.

Difficulties.

6. Last year the Deputy Commissioner of Rohtak referred to the difficulty, which was felt by Sub-Registrars, in the case of mortgages executed by him under the provisions of Section 9 (4), owing to the absence of the mortgagor at the time of presentation. He was eventually referred to Sections 34 and 88 of the Indian Registration Act. In Rawalpindi a different kind of difficulty is reported by the Deputy Commissioner, who asks: "What is to be the form of the new mortgage? Is it to be so worded as to purport to be made by the Deputy Commissioner or is the mortgagor's name to be used with a recital in the preamble that the Deputy Commissioner is acting for him? In Rawalpindi the Superintendent of the Vernacular Office in consultation with various deed-writers has evolved a form which we have used, but the wording as it results is sometimes rather quaint and European names, which do not transliterate very sweetly into the vernacular, sometimes stand committed to odd engagements." In the Financial Commissioner's opinion it is sufficient that the deed should be written in the mortgagor's name as usual and signed by the Deputy Commissioner as "empowered under Section 9 (4) of the Act." Before general instructions however are issued the Legal Remembrancer will be consulted.

Cases of mortgagees remaining in possession of mortgaged land, notwithstanding the rejection of the mutations, owing to the mortgages being opposed to the provisions of the Act, are naturally increasing in number: the Commissioner of Rawalpindi notes that Section 9 (1) gives the Deputy Commissioner power to revise the terms of such mortgages; but the Commissioner of Lahore writes: "Under paragraph 20 of Financial Commissioner's Circular letter 3441, dated 5th June 1901, the Deputy Commissioner is directed not to take up such cases without a special application from the parties interested, the reason given being the desire to avoid burdening the Deputy Commissioner with an excessive amount of work. The provisions of the Act are now fairly well known, and it does not appear that the number of mortgages executed in contravention of the Act is likely to be excessive. I would suggest that

mortgages contrary to the Act which come to notice at mutation should be reported to the Deputy Commissioner for his orders just as permanent alienations which come to notice at mutation are reported to him." In this case too the Financial Commissioner proposes to ascertain the opinion of officers generally before submitting his recommendations to Government.

Conditional sales.

7. The provisions of Section 9 of the Act, which deal with mortgages containing a condition intended to operate by way of conditional sale, were discussed exhaustively in paragraph 10 of the report for the year ending September 1906. Difficulty is still experienced in Rohtak, where cases of such mortgages are numerous. On the reference to the Deputy Commissioner mortgagors frequently allege repayment of the mortgage-money or deny the execution of the mortgage-deed with the result that the case goes back to the Civil Court and is filed and as stated by the Deputy Commissioner, Rohtak: "It is settled law that upon the expiry of the year of grace allowed by Regulation XVII of 1856 the mortgagee becomes *ipso facto* owner of the property by purchase; even though he may still have to sue for possession". The Commissioner writes: "Orders seem to be necessary as to the authority which should make the inquiry in these cases, *viz.*, where execution is denied altogether by the mortgagor, or receipt of consideration in whole or in part. It would be preferable, in my opinion, that these points should be decided by the Civil Court before sending the case to the Deputy Commissioner at all, as, if it found that execution was not proved or no consideration had been paid, it would simply dismiss the suit altogether, at any rate in sending the case to the Deputy Commissioner it would state authoritatively how much money was due on the deed and the Deputy Commissioner would then be in a position to decide the term for which a mortgage should be drawn up in a form permitted by the Act. But on the other hand if the Civil Court fails to make the inquiry, is not the Deputy Commissioner himself empowered to? I should say he was, under the authority of Notification No. S-25, dated 22nd May 1901, quoted at page 89, Gurcharn Singh's Land Alienation Act, second edition. Moreover Section 9 (*n*) seems to me to pre-suppose that such an inquiry has been made, as the mortgage has to be executed for the period and for the sum of money considered by the Deputy Commissioner to be reasonable. If execution is not proved, he should, I think, return the case to the Civil Court, with the evidence recorded by him and his finding, and leave further action to the Civil Court. The Civil Court, before issuing notice of foreclosure in such a case, would, I presume, pass some order as to whether the deed had been executed or not, and would not issue notice if it found execution not proved." In paragraph 5 of the review for the year ending September 30th, 1906, Government asked for a separate report, should the Financial Commissioner think the matter of sufficient practical importance, but the subject was then dropped. It appears, however, that further steps should now be taken to alter this unsatisfactory state of affairs and further inquiries will now be made. The Financial Commissioner thinks that the time has now come to enact a Transfer of Property Act for the Punjab and to abolish these ancient regulations which are so unsuited to the circumstances of the Province.

Results.

8. Some Deputy Commissioners note that capital which used to be employed in loans on the security of land is now finding other outlets—factories, light railways and banks are mentioned. The Deputy Commissioner of Ferozepore in speaking of village *banias*, who seldom have sufficient capital to invest in large industries, says:—"The only difference which has been made by the introduction of the Act is that now that the *bania* cannot acquire land he has no desire to make advances recklessly with a view to render the zamindar insolvent to get hold of his land. The *bania* now lends with care and takes proper measures for recovery. This has made the zamindar of necessity more frugal and economic in his habits. Again the *bania* now makes advances generally for such purposes only as add to the prosperity of the borrower to enable him to repay the debt with interest, and therefore the zamindar cannot now find sufficient funds for luxury or extravagance. The money-lenders are no doubt against the law but not because their business has been injured in any way, but because they have been prevented from acquiring landed property."

The Deputy Commissioner of Rawalpindi states that the supervision exercised by the higher revenue officials in the working of the Act has led to a much more careful scrutiny of mutation work since its introduction, and that this has led to a higher standard of work all round.

Suggestions.

9. The Deputy Commissioner of Gujranwala points out that, where large areas are acquired by Government for public purposes, the areas returned as acquired by "others," among whom is included Government, are apt to be misleading. The Commissioner recommends that, if shown at all, such areas should be shown in a separate column. The amendment of the statements attached to the Alienation Report is under consideration and this point will not be overlooked, but these areas cannot have much effect on the total statistics of the Province.

The Deputy Commissioner of Ambala points out the anomaly that, though a Deputy Commissioner may sanction a sale of land by a zamindar to a non-zamindar, he may not sanction a mortgage which is contrary to the provisions of the Act: and quotes the following case:—"An agriculturist had before the passing of the Act mortgaged with possession 200 *bighas* of land to various agriculturists and non-agriculturists. This year a non-agriculturist agreed to redeem the whole 200 *bighas* in consideration of a re-mortgage to himself of 50 *bighas* only. Such a mortgage being illegal cannot be sanctioned, and in all probability the 50 *bighas* will be sold out and out, while obviously it would be more to the advantage of the agriculturist that they should only be mortgaged." Such cases must be rare. The same subject is referred to by the Deputy Commissioner, Multan, who points out that, though a Sayyid of Muzaffargarh can obtain sanction to the purchase of land in Multan, he cannot in any circumstances take land on mortgage in the latter district from a member of one of the notified tribes, unless the mortgage is in one of the permitted forms.

The Deputy Commissioner of Delhi again suggests that the Act might be made applicable generally to land within municipal limits and the Commissioner sees no objection to this proposal. As was stated in the report for the year ending September 1906 this question was considered in that year, and it was decided that it was inadvisable to alter the terms of the present exemption. There are, however, many places in the Province where it may be found advisable to apply the Act to part of the area within municipal limits, which is truly agricultural in character.

Part II.—Analysis of the Statements.

Forms of statements.

10. The forms of the statements appended to the report are not altogether satisfactory and the question of amending them and of reducing their bulk is under the consideration of the Financial Commissioner. In the present report only minor alterations have been made. In Statement I gifts are now shown separately from exchanges, in order to show the growing tendency to effect exchanges of land with a view to the consolidation of holdings and the improvement of land. This tendency is one which in the opinion of the Financial Commissioner should be encouraged in every way, as one of the chief obstacles to land improvement is the scattered character of many holdings. Statements III, IV, VI and VII have been somewhat reduced in size by the elimination of separate figures for the smaller gazetted tribes in each district.

Sales. Statement No. I.

11. The total area sold has risen since last year from 220,342 to 231,990 acres and the cultivated area from 125,059 to 131,865 acres, the increase being in each case 5 per cent. The average area sold before the Act was passed was 288,214 acres, of which 173,142 were cultivated. The price realised

shows a slight set-back from Rs. 56 to Rs. 55 per acre of total area sold and from Rs. 98 to 97 per acre cultivated. Before the Act was passed, the corresponding prices were Rs. 46 and Rs. 78 per acre. The price per rupee of land revenue brought out by the recorded purchase money has risen from Rs. 101 to Rs. 108. Before the Act the average price was only 75 times the annual assessment. The prices obtained for land are in some cases extraordinarily high. The highest is naturally reported from Simla, where the conditions are special; but 1,664 acres were sold in Amritsar at an average price of Rs. 303 per acre. The Deputy Commissioner remarks that there has been an enormous rise in the price of land in and around Amritsar of late years; other Deputy Commissioners also refer to the high prices obtained for suburban land as increasing the average price per acre obtained. Among other causes fear of plague has induced many of the better class towns folk to settle away from the bazars, and many plots of land are being acquired outside the towns for country houses; the price paid for such areas is naturally very high. The sale statement given in paragraph 30 of last year's report has been brought up-to-date and is given as Appendix A to this report.

Mortgages. Statement No. I.

12. The mortgage statement given in paragraph 31 of last year's report is reproduced as Appendix B to this report and the figures for 1907-08 have been added. The total and cultivated area mortgaged has again risen from 265,831 and 227,737 acres respectively to 292,617 and 249,573 acres. Before the Act the cultivated area annually mortgaged averaged 327,065 acres. The average area affected by each mortgage transaction is, for the fourth year in succession, 2·8 acres: and the proportion of cultivated to total area is, as last year, 85 per cent. The mortgage money amounts to an average for the province of Rs. 72 per acre as compared with the sale consideration average of Rs. 55 per acre. The Deputy Commissioner of Muzaffargarh writes:—"One striking tendency of the Alienation of Land Act appears to be that land is becoming more and more mortgaged up to and even beyond its sale value. This I believe is due to the fact that additional money is advanced on land which was already under mortgage at the time the Act was introduced. As such additions are not regarded as new mortgages sanction is not required for them, although the transaction is usually recorded as a nominal redemption of the old mortgage and as a new mortgage for the enhanced amount." For the province as a whole, however, the lowness of the consideration money per total acre in sales as compared with mortgage money is sufficiently explained by the fact that only 56 per cent. of the total area sold is cultivated as against 85 per cent. of the total area mortgaged. It is significant that the average per acre of the mortgage money discharged in cases of redemptions is Rs. 43 only, although the percentage of cultivated to total area redeemed is as high as 79 per cent., the reason of this low rate no doubt being that, when the land was originally mortgaged years ago, its value in rupees was much lower than at present.

Conditions in Ferozepore.

13. The following remarks of the Deputy Commissioner of Ferozepore are interesting:—"In this district the Sikh Jats are taking the place of the village *bania* and hence the transactions of sale and mortgage of landed property are not likely to receive appreciable check by the introduction of the Act. The figures show that in the few years immediately following the passing of the Act the areas alienated by sale and mortgage were below the average of the five years preceding the date of passing the Act, *viz.*, 16,518 and 34,043 acres, respectively. During the year under report 12,498 acres were sold and 41,425 acres were mortgaged against 13,935 and 32,142 acres respectively in the previous year. The area redeemed, *viz.*, 58,074 acres, shows an improvement over the preceding year's figure 50,075 acres. The alienation of occupancy rights gives the same results. In *rohi* tracts generally, where the zamindars have moneys to spare, the same land very often undergoes two or three mortgage transactions during the course of the same year. Owing to the habit of excessive drinking in some cases and to gambling in others the people mortgage their lands first to one then to another for increased consideration, and again to a third person for a further increase during the course of the same year;

and this fact alone accounts for the high figures under the head mortgage and redemptions of mortgage. On account of high prices of produce and good harvests during years of scanty rainfall on *rohi* lands, the value of land in that part of the district has increased abnormally. The alienation of land on *rohi* tracts generally takes the form of mortgages while very few people consent to sell their lands. In other parts of the district, where sales are more common, the value of land is not so high. Hence it is that, while the mortgage value of land for the district is so high as Rs. 97 per acre, the selling value is only Rs. 86 per acre. There is considerable improvement in both rates over the preceding year which gave Rs. 86 and Rs. 73 per acre, respectively, as compared with Rs. 53 and Rs. 50 per acre, the rates prevailing immediately before the Act came into force."

Redemptions. Statement No. I.

14. The area redeemed has again risen: the figures for the year under report being 406,864 acres, *i.e.*, 7,767 acres in excess of the figures of the previous year. The cultivated area redeemed was 325,173 acres against the annual average of 235,395 acres before the Act. The Deputy Commissioner of Jullundur gives a curious reason for the decrease in his district: "Owing to the fact that immigration into Australia has been prohibited, large sums of money which used to be sent by the immigrants from this district for the redemption of ancestral lands are no longer remitted". He says, however, that "emigrants now go further afield and in a few years the figures for redemption will again go up". The Deputy Commissioner, Muzaffargarh, ascribes the decrease in redemptions in his district to the abolition of the statutory agriculturists who in the previous year had exerted every effort to purchase and redeem all the land they could, before their right to do so terminated.

The excess of area redeemed over area mortgaged has been maintained during the year and amounted to 114,247 acres. The only districts which show no excess in redeemed area are Rohtak, Gurgaon, Delhi, Karnal and Simla. The total area redeemed is 77 per cent. of the combined area mortgaged and sold. The actual difference is 117,743 acres, but the area redeemed by notified tribes during the year was 293,256 and the excess of sales *to* over sales *by* notified tribes was 12,070 acres, so that, deducting the excess of mortgages *by* over mortgages *to* notified tribes, which amounted to 18,887 acres, the net gain to agriculturist tribes was 286,439 acres. It is very gratifying to find such a result in a very bad year.

Statement No. VII.

The total area under usufructuary mortgage in the Province is now put at 3,584,299 acres. This area is less than that returned in the previous year by 165,606 acres. The returns for this area vary to some extent with the variations of cultivation in good and bad seasons and in any case, as they depend on figures obtained for each village from the annual record which is not revised until the expiry of four years, they respond but slowly to the transactions of mortgage and redemption which are sanctioned for incorporation in the record each year. But it is obvious that the large excesses of redemptions over mortgages which have been returned during the last few years are at last being reflected in these figures also. The area now returned as under mortgage is the lowest since 1902-03, and is 280,000 acres less than in 1903-04.

Statement No. V.

Financial results. Statement No. I.

15. The total amount of consideration money entered in the sales which were recorded last year was Rs. 1,27,74,088, and the amount of debt secured by mortgage Rs. 2,11,66,087. On the other hand the amount of mortgage money discharged by the redemptions of the year was Rs. 1,76,15,370.

Gifts. Statement No. I.

16. The area transferred by gift amounts to 75,742 acres for the whole Province. Large areas have been gifted in Multan (13,062 acres), in Hissar (9,064 acres) and in Dera Ghazi Khan (6,582 acres). It is clear that the Multan figures are wholly abnormal. Taking gifts and exchanges together the figures for the year under report exhibit an increase of 3,380 in the number of transactions and of 5,346 acres in the area involved over the figures for the previous year.

Exchanges. Statement No I.

17. The area exchanged amounts to 56,893 acres: the figures include areas held by Government tenants in the canal colonies, who are still occasionally allowed to exchange their squares. The Deputy Commissioner of

Jhang explains that the very considerable area of privately owned property which was exchanged in his district during the year was due to private arrangements among proprietors to carry out the *killabandi* system. The Financial Commissioner is glad to see that the expectations of the Settlement Officer, that such exchanges would gradually follow on his rectangular field measurements, are being fulfilled. The separation of the figures for gifts and exchanges in Statement No. I has had the effect of directing attention to the desirability of facilitating the consolidation of holdings by exchanges: in Delhi apparently the Settlement Officer had already taken the matter up and instituted proceedings with a view to carrying out such exchanges.

Applications for permanent alienation. Statement No. II.

18. A considerable increase from 1,545 to 2,003 in proceedings under Section 3 (2) of the Act granting or refusing sanction to a permanent alienation is shewn in this year's return. Sanction was accorded in 1,435 cases or 72 per cent. of the total number of applications. The great bulk of the alienations to which these applications refer are sales of land for building purposes. The number of applications varies very considerably from district to district: and the six districts of Jullundur, Ludhiana, Amritsar, Gujrat, Jhelum and Rawalpindi provide the majority of the cases.

Proceedings relating to mortgages. Statement No. II.

19. Proceedings under Section 6 (1) (*b*), 6 (2), 7 (3), 9 (1) or 9 (2) which relate to mortgages are in most districts extremely rare, indeed in eight of the 28 districts to which the Act applies no single case is reported for last year. For the Province the total number of such proceedings is 438, of which 342 arose, in Hissar and Rohtak alone, under Section 9 (2), to put a mortgagee to his election whether he will agree to a condition intended to operate as a conditional sale being struck out, or accept, in lieu of the mortgage, a mortgage in one of the prescribed forms. In Hissar it appears that action was taken in 35 cases of conditional sale only, and that in all these cases new mortgages under Section 6 (1) (*a*) were executed, of which 7 were executed by the Deputy Commissioner under Section 9 (4). In Rohtak, out of 59 cases in which action was taken, the conditional sale clause was struck out in 10: and a new mortgage under Section 6 (1) (*a*) executed in 54 cases, in 5 of which the Deputy Commissioner had to execute the deed. In no case was a mortgage under Section 6 (1) (*b*) selected.

Miscellaneous proceedings. Statement No. II.

20. The number of miscellaneous applications instituted has fallen from 825 to 372, and a third of these are reported from Muzaffargarh where, contrary to the practice elsewhere, mutations which have been checked in compliance with Financial Commissioner's Circular letter No. 3, dated 10th August 1903, are shewn as miscellaneous applications. On the whole the totals of cases for disposal under the Land Alienation Act and of disposals are practically the same as in the previous year. It is obvious from the figures given in Statement No. II that the amount of work thrown upon district officers by the Land Alienation Act is far less burdensome than was anticipated and that in most districts the additional labour involved by the passing of the Act is trifling.

Abstract of mortgages and sales. Statement No. V.

21. The notified agricultural tribes of the Province have mortgaged 18,887 acres in excess of the area mortgaged to them The excess is considerably higher than the 10,325 acres returned in the previous year. In Kangra, Jullundur, Ludhiana, Ferozepore, Lahore and Amritsar however the balance is, as usual, the other way.

The sale statement shews that in permanent alienations notified agricultural tribes have gained 12,070 acres. With the exception of the six districts of Amritsar, Sialkot, Gujranwala, Gujrat, Mianwali and Dera Ghazi Khan all districts shew gains to the notified tribes. In the case of Sialkot, Gujranwala and Gujrat however acquisitions of land by Government have turned the scale against them. Last year the whole of the old settled districts of the Multan division shewed losses, whereas only Mianwali and Dera Ghazi Khan do so in the

present statements : in both these districts the areas reported are unusually large and it is probable that the acquisitions by the statutory agriculturist, which were reported to have been the cause of the losses shewn in these districts last year, were in Mianwali and Dera Ghazi Khan to a large extent not brought on to the record until the year under report. The gain by agricultural tribes in Hissar amounts to about 5,000 acres following on a gain in the previous year of over 8,000 acres ; a somewhat remarkable result.

Sales by zamindars. Statement No. VI.

22. Jats as a tribe continue to add to their property by purchase. As usual large acquisitions are shown in Hissar (3,825 acres) and, for Jats other than Musalman, in Ferozepore (1,751 acres). Losses in Sialkot and Gujranwala are due to acquisitions made by Government for public purposes. The only district in which Jats have lost way to any serious extent is in Dera Ghazi Khan where, according to the figures for the last six years, the tribe is losing ground rapidly ; the loss in the year under report being 1,269 acres and the total loss in the last six years 9,039 acres. Rajput tribes have done unusually well during the year—a serious loss (1,100 acres) being shewn in Ferozepore district only, while on the other hand large gains are shown in Hissar (1,257 acres), Montgomery (1,652 acres) and Jhang (790 acres). Sayyids, who have the reputation of being of a somewhat acquisitive nature, have lost ground during the year—they own land chiefly in the south-west of the Punjab and are returned as having lost in each of the south-west districts except Dera Ghazi Khan ; the loss in Multan is 552 acres and in Jhang 456. The distribution of the Baloches is similar to that of the Sayyids. They have however gained ground in each of these districts ; Montgomery showing a gain of 448 acres and Muzaffargarh 557 acres. Of tribes of local importance the Ahirs have gained to some extent in Gurgaon and Rohtak : and the Awans in Shahpur and Jhelum ; but the Gujars in Gujrat have lost considerably (602 acres), probably owing to acquisitions by Government.

Mortgages by zamindars. Statement No. VI.

23. The only districts in which the agricultural tribes notified for the districts have taken more land on mortgage than they have mortgaged, are Kangra, Jullundur, Ludhiana, Ferozepore, Lahore and Amritsar. The total loss, apart from redemptions, in mortgage transactions by members of notified tribes in the Province is 18,887 acres ; but in Multan and Jhang alone it amounts to 11,269 acres. The tribe which takes land on mortgage most freely is that of the Hindu and Sikh Jats of the central Punjab. Jats gained possession by mortgage of an additional 3,036 acres in Hissar and 8,082 acres in Ferozepore : in Gujranwala on the other hand they lost 1,021 acres. The Jats of the south-west do not take land on mortgage to any great extent, and losses are shewn in these districts amounting to as much as 2,299 acres in Multan. With the exception of Kangra, Gujranwala and Montgomery, in which the balance is slightly in their favour, Rajputs have lost ground in mortgage transactions. The losses are particularly heavy in Hissar (2,207 acres), Ambala (1,026 acres), Hoshiarpur (1,622 acres) and Ferozepore (2,673 acres). It appears that in all these districts the greater part of the land mortgaged has been mortgaged to members of other notified tribes. Other striking figures relating to mortgages in Statement VI are the losses of the Pathans in Hissar (1,323 acres) ; of the Kharals in Montgomery (1,349 acres) ; of the Sayyids in Jhang (2,172 acres) ; of the Baloches (2,543 acres) and Pathans (1,538 acres) in Multan.

Redemptions by agricultural tribes. Statement No. VII (*a*).

24. Of 406,864 acres, the total area redeemed from mortgage during the year, 293,256 acres were redeemed by members of agricultural tribes. The proportion 72·1 per cent. is less than that of last year, which is the highest yet recorded, but is satisfactory. Members of agricultural tribes have gained by redemption 61,191 acres more than they lost by mortgage. This is the fourth successive year that the area redeemed by agricultural tribes has exceeded the area mortgaged by them. In Rohtak, Gurgaon, Delhi, Karnal and Gurdaspur however a greater area has been mortgaged than redeemed by members of

agricultural tribes. The largest areas redeemed have been by the Jats in Hissar, Ferozepore and Sialkot and by the Meos in Gurgaon. The amount of mortgage debt discharged by members of agricultural tribes during the year under report reached the very high figure of Rs. 1,32,98,646, an increase of Rs. 2,26,459 over the figures for the previous year.

Statement No. VII.

25. The district reports are forwarded in manuscript for reference if required.

The following notifications and instructions were issued during the year under report. They are numbered from 68, the number of the last appendix to the Report for 1906-07 being 67.

Instructions and notifications.

Appendix No. 68.—Inspector-General of Registration's Circular No. 7, dated 15th July 1907, lays down instructions to all Registering Officers as to the manner in which deeds of lease or deeds of mortgage for a limited period should be treated.

This was inadvertently omitted from the last report.

Appendix No. 69.—Punjab Government Notification No. 60, dated the 22nd April 1908, notifies the inclusion of the Kanets in the Ambala district in the list of agricultural tribes in that district.

Appendix No. 70.—Punjab Government Notification No. 85 Revenue, dated 25th May 1908, corrects a misprint in the list of agricultural tribes of the Lahore district from "*Dogra*" to "*Dogar*."

Appendix No. 71.—Punjab Government Notification No. 87 Revenue, dated 25th May 1908, notifies the inclusion of the Dogar tribe in the Gujranwala district in the list of agricultural tribes of that district.

Appendix No. 72.—Punjab Government Notification No. 91 Revenue, dated 8th June 1908, notifies the inclusion of the Arain tribe in the Jhang district in the list of agricultural tribes of that district.

Appendix No. 73.—Punjab Government Notification No. 107 Revenue, dated 6th July 1908, notifies the inclusion of the Khagga, Bodla and Koreshi tribes in the Montgomery district in the list of agricultural tribes of that district.

Appendix No. 74.—Punjab Government Notification No. 109 Revenue, dated 6th July 1908, notifies the inclusion of the Koreshi tribe in the Gujranwala district in the list of agricultural tribes of that district.

Appendix No. 75.—Punjab Government Notification No. 135 Revenue, dated 18th August 1908, notifies the inclusion of the Baloch tribe in the Lahore district in the list of agricultural tribes of that district.

Part III.—General Remarks.

26. Some idea of the magnitude of the interests affected by the Alienation of Land Act may be got from the following statistics. The total area of the Punjab is 62 million acres, of which 40 million acres are held in private ownership, subject to the payment of land revenue to the State. Of this area some 27 million acres are under cultivation, and the land revenue averages almost exactly one rupee (one shilling and fourpence) per cultivated acre, the gross land revenue assessment of the Province being nearly three crores of rupees or two millions sterling. The number of proprietary holdings is 3½ millions, but many owners hold shares in more than one holding, and the number of persons owning rights in the land is about two millions. Some of the estates are very large, and the typical peasant proprietor of the Punjab may be taken to be a man owning about 10 acres of cultivated land and paying ten rupees (thirteen shillings) annually as land revenue to the State. Such a man could, at present prices, sell his rights in his ten acres for nearly one thousand rupees (say £60), so that the land revenue he pays the State is only about one per cent. on the selling value of his rights in the land : but it must always be remembered that several hundred thousands of peasants own each a smaller area than this. Land at present sells at an average of nearly Rs. 100 (say £6) per cultivated acre or 100 times the

annual land revenue assessed upon it, so that it may be estimated that the present selling value of the proprietary rights in the land of the Punjab, subject to the payment of land revenue, is at least 250 crores of rupees, or considerably over 150 million pounds sterling.

27. The main object of the Act was to make it less easy for the agricultural tribes who own the great mass of this land to sell it to the non-agricultural classes to whom it was passing at a very rapid rate, to the great and lasting injury of the peasant families, who were thus being gradually reduced from the independent position of peasant proprietors to that of tenants holding under landlords or of landless labourers. Members of such tribes now require to obtain the sanction of the Deputy Commissioner before they can make a permanent alienation of their land to a non-agriculturist, but they can still freely sell land to fellow-members of agricultural tribes, and more than 40,000 sales of land still take place annually in the Province. That owners who wish to sell can still readily find a purchaser, is shown by the fact that the average price of land, which was Rs. 78 per cultivated acre on the average of the five years before the passing of the Act, and Rs. 75 on the average of the five years after its passing, was Rs. 98 per cultivated acre in 1906-07, and Rs. 97 last year, notwithstanding the severe drought and scarcity from which the Province suffered. Stated in terms of the land revenue assessment, the selling price of land averaged 75 times that amount for the five years before the Act, 86 times for the following five years, 101 times in 1906-07, and last year equalled 108 times the annual land revenue. Similarly the average mortgaging value of land, which before the Act was 54 times the land revenue, is now 78 times that amount. Whatever effect therefore the Act may have had in reducing the transferable value of land was merely temporary, and land can now be sold or mortgaged for a much higher amount per acre or per rupee of land revenue than it could before the Act was passed.

28. The general effect of the Act in discouraging sales and mortgages of land can be seen from the following figures for cultivated area transferred. For the five years before the Act the average cultivated area sold was 173,142 acres: for the next five years it was 150,191: in 1906-07 it was only 125,059, and last year only 131,865 acres. For the five years before the Act the average cultivated area mortgaged was 327,065 acres: for the next five years it was 203,527: in 1906-07 it was 227,737 and in 1907-08 249,573 acres. The passing of the Act, coupled with the rise in the value of land, has had a remarkable effect in encouraging mortgagors to redeem their land from mortgage. For the five years before the Act the average cultivated area redeemed was 235,395 acres: for the next five years it was 197,118 acres: in 1906-07 it was 319,044 acres and last year 325,173 acres. Thus the area under mortgage is now rapidly diminishing, and as the total cultivated area of the Province is steadily increasing, the percentage shows a still greater improvement. The cultivated area under mortgage is now returned as 3,584,299 acres against 3,868,587 in 1903-04, and the percentage of total cultivated area mortgaged as only 11·5 as against 14·1 in that year. There are few countries in the world in which the land is less burdened with mortgage. Last year (1907-08) was the worst from which the Province has suffered, as regards drought and scarcity, since 1899-1900, and the following comparison between the two bad years is striking:—

	1899-1900.	1907-08.
	Acres.	Acres.
Cultivated area sold	171,497	131,865
Cultivated area mortgaged	335,905	249,573
Cultivated area redeemed from mortgage	197,919	325,173

These statistics show that the Act has weathered a bad year with very satisfactory results. There has been no complaint that it prevented the peasant

owners from obtaining the loans they required to take them over the bad seasons, or contracted their credit, except to the extent of discouraging extravagant borrowing: a result for which the would-be borrowers themselves, and still more, their heirs and relations, are sincerely grateful.

If we take the figures for agricultural tribes only for the last two years, we get the following result:—

Year.	Sales (cultivated area).		
	Sold by agricultural tribes.	Sold to agricultural tribes.	Net gain of agricultural tribes.
	Acres.	Acres.	Acres.
1906-07	152,445	156,445	4,000
1907-08	156,492	168,562	12,070

Year.	Mortgages (cultivated area).		
	Redeemed by agricultural tribes.	Mortgaged by agricultural tribes.	Net gain of agricultural tribes.
	Acres.	Acres.	Acres.
1906-07	301,073	216,954	84,119
1907-08	293,256	232,065	61,191

Thus both in the matter of sales and mortgages the agricultural tribes are now recovering lost ground, and have continued to do so even in a year of serious drought. The progress made is even more satisfactory than these figures show, for, of the whole cultivated area of 249,573 acres mortgaged last year, 213,178 acres are returned as having been mortgaged to members of agricultural tribes, who no doubt in many instances took the place of previous non-agriculturist mortgagees.

These statistics prove that the Act has been even more successful than its promoters hoped, in not only stopping the process of expropriation of the hereditary landowners of the Province from their ancestral land, but in enabling the agricultural classes as a whole to recover much of the land they had lost. Small wonder therefore that it is extremely popular among the whole body of hereditary proprietors, some two million in number, from end to end of the Province, and that, far from resenting the restriction it imposed on their previous freedom of alienation, they look upon it as the charter of their rights and as evidence that the Government sympathises with them in their dearest interests.

APPENDICES.

75. Punjab Government Notification No. 135, dated 18th August 1908.

Inspector-General of Registration's Circular No. 7, dated 15th July 1907, to all Registering Officers in the Punjab.

[No. 68.]

It has come to my notice that in several districts, especially in the west of the Province, there is considerable laxity in the classification of many deeds presented for registration which might be treated either as deeds of lease or as deeds of mortgage for a limited period. More often than not the Sub-Registrar adopts the classification preferred by the deed-writer, and treats the deed as a lease if the writer has in it used the words *patta, theka mustajri-nama,* and so on, even though the terms of the deed show clearly enough that it is really a deed of mortgage, not of lease.

2. The most suitable definitions of "lease" and "mortgage" for our present purpose are those contained in section 2 of the Stamp Act. It is true that these definitions are not mutually exclusive, and deeds which transfer the possession of land in exchange for the payment of a premium, with or without a further annual payment, might be classified either as leases or as mortgages. As a practical rule, however, it may be held that if the land is transferred in order to secure the repayment of a lump sum of money advanced to or due from the owner of the land the deed is usually a mortgage deed, whereas in the case of a lease the land is transferred on account of a future recurring annual payment.

3. In future registering officers should decide, as best they can, as to the nature of each so-called lease presented to them for registration. If they hold that the deed is a deed of mortgage they will treat it as such for the assessment of stamp duty and registration fees, and if it is understamped will impound it. The real nature of the deed as decided by the registration officer should, of course, be shown in column 2 of the register.

4. In some cases the decision that a deed drafted as a lease is really a mortgage deed will involve the decision of the further question whether, viewed as a mortgage, it contravenes the provisions of Act XIII of 1900 or not. The procedure in deciding the question will be that laid down in Inspector-General's Circulars Nos. 9 and 11 of 1901.

[No. 69.]

The 22nd April 1908.

No. 60—*Notification.*—In exercise of the powers conferred by section 4 of the Punjab Alienation of Land Act, 1900 (XIII of 1900), as amended by section 5 of Punjab Alienation of Land Amendment Act, 1907 (Punjab Act, I of 1907), and in continuation of Punjab Government Notification No. 63, dated the 18th April 1904, the Lieutenant-Governor of the Punjab is pleased to determine that, for the purpose of the said Act,—

(*a*) all persons either holding land or ordinarily residing in the Ambala district and belonging to the Kanet tribe shall be deemed to be an "agricultural tribe" within that district;

(*b*) the Kanet tribe shall be deemed to belong to the group of agricultural tribes already notified in the Ambala district in Punjab Government Notification No. 63, dated the 18th April 1904.

[No. 70.]

The 25th May 1908.

No. 85.—*Notification.*—In Punjab Government Notification No. 63, dated the 18th April 1904, publishing a revised list of "agricultural tribes" under the Punjab Alienation of Land Act, 1900 (XIII of 1900), the following misprint should be corrected :—

Under *Lahore* for "*Dogra*" read "*Dogar*".

[No. 71.]

The 25th May 1908.

No. 87.—*Notification.*—In exercise of the powers conferred by section 4 of the Punjab Alienation of Land Act, 1900 (XIII of 1900), as amended by section 5 of Punjab Alienation of Land Amendment Act, 1907 (Punjab Act, I of 1907), and in continuation of Punjab Government Notification No. 63, dated the 18th April 1904, the Lieutenant-Governor of the Punjab is pleased to determine that, for purposes of the said Act,—

(1) all persons either holding land or ordinarily residing in the Gujranwala district and belonging to the Dogar tribe shall be deemed to be an "agricultural tribe" within that district;

(2) the Dogar tribe shall be deemed to belong to the group of agricultural tribes already notified in the Gujranwala district in Punjab Government Notification No. 63, dated the 18th April 1904.

[No. 72.]

The 8th June 1908.

No. 91.—*Notification.*—In exercise of the powers conferred by section 4 of t Punjab Alienation of Land Act, 1900 (XIII of 1900), as amended by section 5 of Punjab Alienation of Land Amendment Act, 1907 (Punjab Act, I of 1907), and in continuation

of Punjab Government Notification No. 63, dated the 18th April 1904, the Lieutenant Governor of the Punjab is pleased to determine that, for purposes of the said Act,—

(*a*) all persons either holding land or ordinarily residing in the Jhang district and belonging to the Arain tribe shall be deemed to be an "agricultural tribe" within that district;

(*b*) the Arain tribe shall be deemed to belong to the group of agricultural tribes already notified in the Jhang district in Punjab Government Notification No. 63, dated the 18th April 1904.

[No. 73.]

The 6th July 1908.

No. 107.—*Notification.*—In exercise of the powers conferred by section 4 of the Punjab Alienation of Land Act, 1900 (XIII of 1900), as amended by section 5 of Punjab Alienation of Land Amendment Act, 1907 (Punjab Act, I of 1907), and in continuation of Punjab Government Notification No. 63, dated 18th April 1904, the Lieutenant-Governor of the Punjab is pleased to determine that, for the purposes of the said Act,—

(*a*) all persons either holding land or ordinarily residing in the Montgomery district and belonging to any one of the tribes hereinafter named shall be deemed to be an "agricultural tribe" within that district, that is to say,—

Khagga;

Bodla;

Koreshi;

(*b*) the above tribes shall be deemed to belong to the group of agricultural tribes of the Montgomery district already notified in Punjab Government Notification No. 63, dated 18th April 1904.

[No. 74]

The 6th July 1908.

No. 109.—*Notification.*—In exercise of the powers conferred by section 4 of the Punjab Alienation of Land Act, 1900 (XIII of 1900) as amended by section 5 of Punjab Alienation of Land Amendment Act, 1907 (Punjab Act, I of 1907), and in continuation of Punjab Government Notification No. 63, dated 18th April 1904, the Lieutenant-Governor of the Punjab is pleased to determine that, for the purposes of the said Act,—

(*a*) all persons either holding land or ordinarily residing in the Gujranwala district and belonging to the Koreshi tribe shall be deemed to be an "agricultural tribe" within that district;

(*b*) the Koreshi tribe shall be deemed to belong to the group of agricultural tribes of the Gujranwala district already notified in Punjab Government Notification No. 63, dated the 18th April 1904.

[No. 75.]

The 18th August 1908.

No. 135.—*Notification.*—In exercise of the powers conferred by section 4 of the Punjab Alienation of Land Act, 1900 (XIII of 1900), as amended by section 5 of Punjab Alienation of Land Amendment Act, 1907 (Punjab Act, I of 1907), and in continuation of Punjab Government Notification No. 63, dated 18th April 1904, the Lieutenant-Governor of the Punjab is pleased to determine that, for the purposes of the said Act,—

(*a*) all persons either holding land or ordinarily residing in the Lahore district and belonging to the Biloch tribe shall be deemed to be an "agricultural tribe" within that district;

(*b*) the Biloch tribe shall be deemed to belong to the group of agricultural tribes in the Lahore district already notified in Punjab Government Notification No. 63, dated the 18th April 1904.
